Although the supplies of English wheat on offer in our various markets have not increased, the demand for both red and white qualities has fallen off, and prices have given way fully 1s per quarter. Foreign wheat has receded in value 1s to, in some instances, 2s per quarter, and at which only a limited business has been transacted. Fine barley realised quite recent rates; but low and damp parcels have commanded very little attention. We have no change to notice in the value of malt; but the sale for it has been much restricted. There has been a good consumptive inquiry for oats, at extreme currencies, and the value of beans and peas has had an upward tendency. Flour has been drooping in price, the town millers having reduced their quotation 2s per 280 lbs.

There has been only a limited demand for wheat in most of the continental markets, and all kinds are offering on easier terms. Spring corn, on the contrary, has commanded more attention, at very full prices. The supplies of most articles on offer are somewhat extensive for the time of year. In the United States, both wheat and flour—which are still freely offered—have sold slowly, at lower rates.

The Scotch markets have been heavy for wheat, and low qualities are certainly cheaper. Barley and oats have changed hands freely, at very full prices.

In Ireland, very little change has taken place in the value of any kind of produce, and the trade, generally, has been in a very inactive state.

At Mark lane, to-day, there was a very limited supply of English wheat. Really fine samples brought Monday's quotations, but all other qualities were only saleable on easier terms. In the value of foreign wheat no quotable change took place; the demand, however, ruled heavy, and prices were decidedly drooping. Malting barley moved off steadily, at full currencies; otherwise the trade was in a very sluggish state. Malt changed hands to a limited extent, on former terms. Oats, beans, and peas were firm, and quite as dear as on Monday. The flour trade was dull, at the late decline in prices.

Floating Cargoes.—Since the 24th ult. to last night, 26 grain-laden vessels have arrived at ports of call for orders, consisting of 14 wheat, 1 rye, 6 maize, and 5 barley, viz.:—Wheat, 3 cargoes from Alexandria, 2 New York, 2 Trieste, 1 Santander, 1 Ibraila, 1 Eupatoria, 2 Venice, 2 Odessa; maize, 3 New York, 1 New Orleans, 1 Marseilles, 1 Venice; rye, 1 Odessa and Eupatoria; barley, 2 Constantinople, 1 Alexandria, 2 Odessa. The demand for cargoes afloat continues slow. The following prices have been paid since this day week:—Wheat, arrived, per 492 lbs, Venetian, 57s 6d, about 57s, and 56s 9d; Kanizza, 53s; Berdianski (not quite perfect), 54s 6d; Eupatoria, 52s 6d; Hungarian, 57s 6d; a cargo, part Berdianski and part Theodosia, 53s; per 480 lbs, Galatz, 46s; Ibraila (not quite perfect), 44s. Maize, arrived, mixed Western, nearly perfect, at 36s 6d per 480 lbs (for Cork direct); a cargo (not quite perfect), part Ibraila, 36s per 480 lbs, and part Odessa, 38s per 492 lbs. Barley, arrived, per 400 lbs, Odessa, 27s and 26s 6d; Ibraila, 26s 3d; Smyrna (for Antwerp), slightly over 27s.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 1st day of May, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,514,950	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,326,498
		Silver Bullion	713,452
	26,514.950		26,514,950

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10 272,938
Rest	3,190,173	Other Securities	17,886,117
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5 578,523	Notes	6,207,645
		Gold and Silver Coin	798,698
Other Deposits	11,180.811		
Seven Day and other Bills	662,891		
	35,165,398		35,165,938

Dated the 2nd May, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,970,196	Securities	28,081,055
Public Deposits	5,578,523	Coin and Bullion	12,838,648
Private Deposits	11,180,811		
	37,729,530		40,919,703

The balance of Assets above Liabilities being 3,190,173*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£247,307
An INCREASE of Public Deposits of	820,916
A DECREASE of Other Deposits of	1,425,264
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	70,002
A DECREASE of Bullion of	278,801
An INCREASE of Rest of	6,738
A DECREASE of Reserve of	546,621

The above return shows an increased pressure upon the resources of the Bank. There is a considerable falling off in the bullion, chiefly due to the withdrawals of silver by the Council of India, under their late arrangement, for shipment to the East. The decrease in the other deposits is partly accounted for by the increase in the Government balance. The remainder probably arises from the augmented demand for money, causing the banks and other moneyed establishments to diminish their balances.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,810,498	£ 21,415 311	£ 23 040,445	£ 22,905,288	£ 20,970,196
Public deposits	4,762,496	4,612,037	5,468.008	6,871.698	5,578,523

Bank rate of discount	3 p. c.	3 p. c.	4½ p. c.	5 p. c.	5 p. c.
Price of Consols	97½	97⅝	90½	95¼	92
Average price of wheat	38s 8d	44s 5d	42s 6d	51s 2d	55s 8d
Exchange on Paris (shrt)	24 95 25	25 2½ 7½	25 2½ 10	25 12½ 17½	25 17½ 25
— Amsterdam ditto	11 15¼ 15¾	11 14¼ 15	11 12 13	11 14½ 14⅝	11 16 17
— Hamburg (3months)	13 7¼ 7⅜	13 6½ 7	13 4 4½	13 5¼ 5½	13 7½ 8

In the corresponding week of 1851, the principal feature was the opening of the Great Exhibition on the first of May. As a contrast to this memorable event, a great Protectionist demonstration had taken place on the occasion of the second anniversary of the "National Association for the Protection of Industry and Capital throughout the British Empire." The reactionary system was making further progress abroad, especially in Austria, where the plan of Baron Bruck for an Austro-German customs union was being opposed to the utmost. Prince Metternich was about to return to Vienna.

In 1858, the condition of the money market was very easy. The discount business of the Bank dwindled to a trifling amount, the rate in the open market having fallen to 2¼ per cent. Consols were verging upon 98, notwithstanding the uncertainty as to the course in Parliament on the India Bill.

In 1859, the report of a Franco-Russian alliance against England having been contradicted, the public were beginning to view with comparative calmness the outbreak of the Italian war. Nevertheless, great sensitiveness remained, and the rapidity with which the banks and other money-lenders were calling in their resources and throwing out stock deposited with them exercised a most severe effect on the Stock Exchange. Sixty members of that establishment had been declared defaulters. Turkish stocks, which in the previous week fell 20 to 22 per cent., had experienced a fresh decline of 5 per cent. The English funds, however, after falling 5¼ per cent., had rallied to the extent of 1¼. The new Indian debenture loan stood at 3 per cent. discount. The Bank rate of discount had been raised from 3½ to 4½ per cent., making a rise of 2 per cent. within a fortnight. France had announced a 3 per cent. loan for a sum equal to 20,000,000*l* at the low price of 60½. At Vienna, the great house of Arnstein and Eskeles had stopped payment. There was a panic in every market for Austrian securities on the Continent.

In 1860, King Victor Emanuel was making a triumphant progress through his new Central Italian dominions. Encouraging advices had been received from Japan, where a very large trade was expected to be gradually formed. From America, the news had arrived of the stoppage of the Bank of Tennessee, an establishment with a capital of 740,000*l*. The Reform Bill continued to be discussed in the House of Commons at great length. The Committee of London Bankers had carried a resolution to close at three o'clock on Saturday.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,877,404*l*; in 1858, a deficiency of 762,267*l*; in 1859, a deficiency of 3,173,343*l*; and in 1860, a deficiency of 8,467,433*l*. In 1861, the deficiency is 6,705,306*l*.

DISCOUNT AND MONEY MARKET.—In the discount market this week there has been more pressure, especially towards the close. At the commencement the unfavourable news from America caused a contraction in the general facilities for discount, and the effect of this measure has been heightened by the exceptional demand yesterday and to-day to meet the engagements maturing on the 4th, which are unusually large this month. The rate in the open market has consequently advanced to 5 per cent., and as there is ittle disposition to do much business even on these terms for other than regular customers, the applications at the Bank have been considerable. On the Stock Exchange, owing to some large loans on stock having been called in, money has been in demand, and the general terms have risen to 4 per cent., or even more.

The following are the rates of discount on the various Continental exchanges, *showing no alteration from last week*:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	3½
Frankfort	3	2¼
Amsterdam	3	3
Turin	6	5½
Brussels	4	4
Hamburg	..	2½
St Petersburg	6	...

A new Italian loan for a sum equal to 20,000,000*l* has been announced. It is not stated whether the money is to be raised in Italy or abroad.

ENGLISH FUNDS.—Consols have been influenced only to a trifling extent by the further adverse accounts from the United States, the effect which they might otherwise have produced being counteracted by some large purchases. The almost continuous rise on the Paris Bourse, which is taken as a sign that no outbreak of war is anticipated on the Continent this spring, has also increased the favourable tendency. To-day, however, prices were rather flatter. The general business has been limited, and on Wednesday the Stock Exchange was closed according to custom, the transfer offices at the Bank being shut for the half-yearly balance. Consols closed yesterday evening at 91⅞, and this morning they were alternately buyers and sellers at that price, the final quotation being 91½ to ⅞, or about the same as last Friday. The next account is fixed for the 6th of June, and the last transactions for that day were at 92⅛ to ¼.

The increase in the value of money has caused further depression in the market for Exchequer bills and India

bonds, prices having respectively declined to 6s to 3s discount, and 20s to 10s discount.

There has been a better demand for India Five per Cents., and the present quotation—101¾ to 102—shows a slight advance.

FOREIGN STOCKS.—The principal movement in foreign securities has been an advance in Turkish Six per Cents. of 1858, on the publication of a letter announcing that the Government have agreed to remit regularly to the Financial Commission the portion of revenue assigned to meet the obligations under this loan. In the morning, the price touched 58, being a rise of more than 4 per cent.; but a reaction took place this afternoon to 56½ to 57 on some realisations and further reported embarrassments in the Greek trade. The price, however, remains comparatively firm, the public having been recently buying. The old loan closed at 71¼ to ⅜, after having been as high as 72½. Mexican has declined on the painful intelligence from New York. There have been some inquiries for Spanish bonds. Sardinian is tolerably steady, notwithstanding the official declaration of the new loan of 20,000,000*l*.

The closing price of French Three per Cents. on the Paris Bourse this evening was 69f 15c, showing another rise in the week of three-eighths per cent.

The following is the correspondence with the Ottoman Government alluded to above. Under this arrangement the revenue assigned for the dividend and sinking fund of the Turkish Six per Cent. loan of 1858 will be remitted monthly to the Commission in Turkey, who will send it immediately on to London. The Turkish Government appear on this occasion to have acted with that liberality and good faith which have generally characterised their transactions with their foreign creditors:—

Sir,—May I request the insertion of the following important communication, which I have this day received from his Excellency Musurus Bey, the Turkish ambassador, relative to the memorial signed by the holders of the loan of 1858, which was presented to his Excellency on the 15th March (the object of which was to obtain the transmission to this country, month by month, of the proceeds of the Customs and other duties at Constantinople, specially pledged as guarantee for the payment of interest and sinking fund of the said loan):—

The Turkish Ambassador presents his compliments to Mr Meadows, and in acknowledging the receipt of his letter of yesterday's date, has the pleasure to transmit to him the enclosed copy of a telegraphic despatch which he has just received from his Highness the Minister for Foreign Affairs at Constantinople, concerning the monthly remittance of the funds for the service of the Ottoman loan of 1858, and promising the details by the post.

In the meanwhile the Turkish Ambassador requests Mr Meadows to be kind enough to communicate the contents of this telegraphic despatch to the gentlemen who accompanied him to the embassy to present the memorial, as well as to those who signed it.

Bryanston square, May 1, 1861.

"TELEGRAPHIC DESPATCH.

"From the Minister of Foreign Affairs to the Turkish Ambassador in London.

"Constantinople, April 30, 1861.

"The monthly and direct remittance of the funds to the Syndicat appropriated to the service of the loan of 1858 has been decided upon.

"All the necessary arrangements have been made.

"I authorise you to convey the foregoing to the knowledge of whom it may concern.

"Details by post."—I am, &c., H. J. MEADOWS.

20 Throgmorton street, London, E.C., May 1.

The annexed memorandum has been published with regard to the debt of New Granada:—

The Committee of Spanish-American Bondholders have received advices from his Excellency Senor Martin, at Paris, that the Government of New Granada has appointed Senor Manuel Maria Mosquera to act as fiscal agent in everything relating to the arrangements necessary for carrying out the agreement of the 25th ult., and that this gentleman may be expected to arrive in London, from Paris, in the course of the present week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The market for British railway stocks was firm in the earlier part of the week, the fortnightly settlement showing a preponderance of purchases by the public. The speculative feeling, however, has been adverse, and a general decline took place on the later news from America, together with an unfavourable change in the traffic returns. Great Western and West Midland improved considerably on the announcement of the intended amalgamation, but the full rise has not been maintained. Compared with last week, however, a good advance is shown. North-Eastern descriptions are also firmer.

In the colonial market, the demand for Indian guaranteed stocks continues steady, and prices are gradually improving.

Continental railway shares have also presented a strong tendency this week, owing to the rise on the Paris Bourse. Lombardo-Venetian have advanced to ¼ to ⅛ dis.

One of the most important features in the Stock Exchange, this week, has been a heavy fall in American stocks and shares, which has continued without the slightest rally to the close this afternoon. Illinois Central and New York and Erie shares have been chiefly depressed, and respectively left off this afternoon at 40 to 39½ dis., and 18 to 19. Of the State stocks, Virginian securities have especially receded.

There has been no movement of importance in the miscellaneous market. The shares of the new Natal Land Company are quoted ¾ to ⅞ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

FOREIGN EXCHANGES.—The rates, this week, have shown increased firmness, and are generally higher than last Friday.

BULLION.—The following is the circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—As the demand for export still continues, further amounts of gold have been taken from the Bank, amounting to about 150,000*l*. Since the date of our last circular, some considerable sums have arrived from Constantinople, and these have also been taken for abroad. Small amounts continue to be sent to America, the Africa having taken 2,300*l*, and the Arago 16,000*l*, to New York. The Seine has brought 19,500*l* from the West Indies; the Dane 2,000*l* from the Cape; and the Calliance has arrived from Melbourne with 126,000*l*. As the

wind has now changed, further arrivals from Australia may be hourly looked for, and all demands for the Continent will be therefore satisfied, without causing any withdrawals from the Bank.

Silver.—The Seine has brought a large amount of silver specie, the total of bar silver and dollars being 467,000*l*. The demand for silver during the past week has been but small, and prices have therefore declined. The outgoing mail of the 4th inst. will, we think, take very little above 150,000*l*, of which about 100,000*l* will be shipped by the Council for India. The Atrato has taken 5,035*l* to the West Indies; and the Tagus has brought 1,730*l* from the Peninsula.

Mexican Dollars.—The large amount of dollars brought by the Seine will not be deliverable until about the 4th inst.; the price has, however, declined, as the demand has been but small. We do not think any rate will be named for the above large amount for some few days, buyers preferring to wait the arrival of the next telegrams from China.

Exchange for Bank's 60 days' sight drafts on Bombay and Calcutta continues about the same, viz., for Calcutta 1s 11⅛d to 2s 0⅛d, Bombay 1s 11¾d to 2s 0¼d, bills with documents 1s 11¼d. Madras drafts by banks 1s 11⅜d to 2s.

India Government Loan Notes are unchanged. We quote 5⅓ per Cents. 100 to 100½, and 5 per Cents. 93¾ to 94¼. Little or nothing doing.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std; Spanish doubloons, 76s 9d to 77s per oz. Silver—Bar silver, ditto containing 5 grs gold, and fine cake silver, nominal (pending the delivery of the West India packet); Mexican dollars, 5s 0½d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price.

The Empress of the Seas has arrived from Melbourne, with 20,000*l* in Australian gold.

The exact amount of specie that will be taken by to-morrow's steamer for the East is 169,293*l*, of which 1,200*l* is for Alexandria, 4,200*l* for Ceylon; 5,698*l* in gold and 132,290*l* in silver for India; and 1,200*l* in gold and 24,705*l* in silver for China and the Straits. The Government send 103,990*l* in silver to Calcutta on this occasion.

The demand for gold for the Continent being for the present supplied by the late arrival from Australia, a sum of about 5,000*l* in refined was taken to the Bank to-day.

Failures and Mercantile Embarrassments.—The strenuous efforts which have been made to enable the several Greek firms to maintain their position have been in a great measure successful, the only suspension announced being that of Messrs P. Hava and Co., whose engagements to a great extent, it is understood, will be withdrawn by the intervention of third parties, and whose assets are amply sufficient to meet their direct liabilities and leave a considerable surplus. There is but one feeling existing as to the solvency of all the Greek firms, provided the securities held from the Turkish Government are rendered available; and the honourable manner in which these firms have exerted themselves to support their position has been fully responded to by the liberal indulgence accorded to them by the banking and monetary houses, both in France and this country. In order to protect all parties interested in Turkish securities, the Bank of France have determined on sending two or three delegates to Constantinople to examine and report upon them, and have invited the English firms to adopt a like course, and to co-operate with them. By this concurrent action on behalf of the French and English interests, while no preferential advantage can arise, great strength will be produced in the event of its being necessary to adopt measures for enforcing payment of the claims from the Turkish Government. Notwithstanding that the very numerous complications which present themselves in a matter of such magnitude are of no ordinary character, it is anticipated that the desired result will be attained.

Some suspensions are announced by the present mail to have taken place at Valparaiso, the most important being that of the native house of M. Salus for about 275,000*l*.

At an adjourned meeting of creditors of Messrs J. G. Behrends and Co., East India merchants, on Thursday, the Committee appointed to examine the books stated that, after a thorough investigation, the position of affairs was correctly described by Messrs Quilter, the accountants, in the balance-sheet prepared by them for the last meeting, which showed liabilities expected to rank upon the estate 25,668*l*, with assets estimated to realise 11,709*l*. The bulk of the latter consist of consignments to Calcutta and a debt due from the agents there, and it had been hoped that some arrangement might have been made with their representative on this side by which a composition could be offered. This arrangement having fallen through, the only mode of dealing with an estate like the present is through the Court of Bankruptcy. A resolution was accordingly adopted in favour of that course, the creditors generally however expressing their conviction that a liquidation through that tribunal is certain to be productive of considerable loss.

A meeting of creditors of Messrs C. A. and T. Ferguson, mast and block manufacturers, who stopped early in April, took place on Tuesday, when a balance-sheet was presented by Mr Turquand, of the firm of Coleman, Turquand, Youngs, and Co., accountants, showing unsecured creditors 21,684*l*, and assets expected to realise 9,718*l*. There are also some secured creditors, but they are fully covered, and also some liabilities on bills discounted, none of which will come upon the estate. Five years ago the firm had a capital of 4,500*l*, and since then a profit has been gained of 31,000*l*. The present deficiency is made up by trade expenses and interest, 15,700*l*; partners' drawings, Mr C. Ferguson 23,000*l*, and Mr T. Ferguson 3,500*l*; bad debts, &c. The apparently large sum taken by Mr C. Ferguson is attributable to a loss of 20,460*l* by the ship Herefordshire. After some discussion, it was resolved to wind up under a deed of inspectorship.

A meeting of the creditors of the Preston Old Bank (Messrs Pedder and Co.) was held at Manchester on Saturday, when it was stated that the debts amounted to 638,827*l*, and that the assets were estimated to realise 17s in the pound. It appears that for a long period the bookkeeping has been very defective, and that the private expenditure of the partners has been extremely large, chiefly in additions and improvements to their estates. A liquidation in the Court of Bankruptcy was, however, considered out of the question, and it was finally resolved to wind up under a deed of private inspection.

Public Companies.—The Assam Tea Company held their annual meeting to-day, when the report was adopted, and a dividend declared of 12 per cent. per annum free of income tax. The crop of the past season amounted to 880,154 lbs, being 69,474 lbs in excess of that of the preceding year. The crop of the current season is estimated to be 972,912 lbs. Nearly the whole of the 1859 crop has been realised, and the total profit is found to be 64,693*l*. The average per lb is rather less than in 1858, owing partly to the prevalence of low prices, and partly to the tea being of inferior quality by a want of care in the gathering and manufacture. It is expected that the crop of last year will be found to have been gathered with more attention. Sixty-five poorahs of land have been brought into cultivation this season, making a total of 3,544 poorahs now under culture. A very satisfactory progress has been made in the plantations during the past year, and extensive clearances are now being made. New machinery has been invented which will effect material improvements in the preparation of tea.

At a meeting of the East Indian Railway Company on Tuesday, authority was given to issue 6,000,000*l* in 5 per cent. debentures, convertible into stock at the option of the holder. The sum positively required, however, is only 3,000,000*l*, of which two-thirds will be raised this year and the remainder the next. The other 3,000,000*l* is contemplated for the Jubbulpore and Allahabad line, the construction of which is deferred for the present.

It is stated that an agreement has been effected between the Great Western and West Midland Railway Companies for an amalgamation. By this arrangement it is understood that the Great Western will receive 82½ per cent. of the net earnings of the united railways, and the West Midland 17½ per cent. A similar operation has been found to work well with the North-Eastern lines.

The first dividend of 5s in the pound is announced in the case of the Faringdon and Wantage Bank, which stopped as lately as the 10th of April.

Miscellaneous.—In consequence of the outbreak of hostilities between the Northern and Southern States, the underwriters at Lloyd's require increased premiums upon American vessels loading in American ports. For Northern ships the war risk is only trifling; but for ships about to sail from New Orleans and other Southern harbours five to ten guineas per cent. is demanded. A considerable impetus has been given to the employment of British ships, and the

freight market is better than for many months past. It has been suggested that American shipowners, in order to save themselves from loss, might transfer their vessels to the British flag; but it appears that there are considerable practical difficulties in adopting this course. Independently of the chance of the transaction being held invalid in a court of law, much inconvenience would be felt by American masters and mates, who would have to pass examinations under our Marine Board to enable them to keep their commands. Many other questions may also arise, which, in case of average or loss, might provoke much litigation with the underwriters.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2½ per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 3-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 107¼ to 107⅜ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for loss of interest and charges of transport, the present rate gives no profit on the transmission of gold to the United States.

Imports of the week ..... 169,459 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat on offer at Mark lane, to-day, was limited; nevertheless all kinds were a dull inquiry, and inferior samples were lower to purchase. Foreign wheat was dull, at barely late rates. Fine barley commanded full prices. Inferior qualities were a dull inquiry. Oats, beans, and peas were firm; but flour moved off heavily, at Monday's decline in value. The imports this week are 17,820 quarters of wheat; 1,390 barley; 11,770 oats; 8,230 barrels, and 2,050 sacks of flour.

At Liverpool, this morning, wheat was in fair request at Tuesday's currency. Other produce was a dull inquiry.

The sales of the present week in the Liverpool cotton market have amounted to 90,000 bales, and include 51,000 bales to spinners, 23,000 bales on speculation, and 16,000 bales for export: prices are ⅛d to ¼d per lb dearer than last Friday. The

week opened with a fair demand, which has been continued throughout, a fresh stimulus being given to the market yesterday by later American accounts advising the commencement of earnest warlike preparations in the States. The sales, yesterday, amounted to 25,000 bales, with an advance of ⅛d per lb upon the early part of the week. To-day the market closes very firm: sales 12,000 bales, at full rates.

The public sales of tea held this week have gone off slowly at about previous rates. Privately, the demand is steady.

There has been rather less activity in the sale for most descriptions of raw sugar, and, in some instances, prices have had a drooping tendency. Refined goods have mostly commanded full quotations.

We extract the following from Messrs Trueman and Rouses circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Three Months ending 31st March, 1860 and 1861.

The latest accounts from Trinidad of the weather and crop prospects are very unfavourable. The *Gazette* speaks of rain falling every day in torrents, sugar-making completely stopped, sugar washed out of casks, and the canefields looking as green with sprouts and grass as if it were the end of a wet July. The yield of sugar from the canejuice is in most places very poor. This is about the time when the best return ought to be given, but instead of which it takes from 1,500 to 1,800 gallons of liquor to furnish the sugar that, with a good yield, would be got from 1,200 to 1,400 gallons. The produce shipped was 6,708 hhds 1,377 tierces 378 barrels of sugar, 1,231 puncheons 22 tierces of molasses, 585 puncheons of rum, 2,077,800 lbs of cocoa, 2,520 lbs of coffee, 131 bales 37 serons of cotton, and 1,300 tons of asphalt. At Demerara the exports for the fortnight had been 1,216 hhds 49 tierces 469 barrels and 1,059 bags of sugar, 671 puncheons 86 hhds 97 barrels of rum, 141 puncheons molasses, 10,867 cubic feet of hardwood timber, and 2,700 cocoa-nuts. Business at Grenada continued extremely dull. Large supplies of every description of merchandise were in store, and prices ruled low for most articles.

Writing from the Havana on the 6th ult., Messrs Schmidt and Stern observe:—

Prices, in consequence of the unfavourable advices from Europe and the continued stringency of the money market, have further declined fully ½ real. The market opened very dull, but subsequently became more active, and considerable transactions have taken place on the basis of 6¼ reals for current quality No. 12. Our quotations are:—No. 7 to 10, 15s 11d to 18s 3d; 11 to 12, 18s 10d to 20s 1d; 13 to 14, 20s 8d to 21s 11d; 15 to 17, 22s 6d to 25s 6d; 18 to 20, 26s 1d to 27s 10d; whites, inferior to prime, 27s 10d to 32s 8d, at 10 per cent. premium f.o.b. Low damp qualities, which are very abundant, are to be had cheaper, whilst strong dry sugars are difficult to be bought at the above quotations. Dry crystallised quality has been paid for France as high as 6¾ reals for No. 12. White sugars are in good demand at 10 to 11 reals for Russia. Stocks between here and Matanzas amount to about 300,000 boxes, against 230,000 boxes last year at the same period.

All good and fine coffees have sold at full currencies; but low parcels have slightly given way in value. In the value of cocoa, no change of importance has taken place.

Owing to recent imports of cinnamon being light, and to some intermediate auctions having been held, the quantity offered at the quarterly public sales on Monday was limited to 1,166 bales, 26 half-bales, and 46 boxes Ceylon; and 61 bales 18 cases Tellicherry, which consequently met an improved competition; the latter description sold at firmer prices, and the greater part of the Ceylon at an advance of 2d per lb on the January sales. 190 bales first sort Ceylon, middling to good, 1s 7d to 2s 4d; fine, 2s 6d to 3s 1d; sea-damaged, 1s 8d to 2s: 589 bales second sort, ordinary to fine, 1s 2d to 1s 9d; superior, 1s 11d to 2s; sea-damaged, 1s 2d 1s 4d: 335 bales third sort, ordinary to good, 11d to 1s 4d; sea-damaged, 10d to 1s 1d; 52 bales and 26 half-bales fourth sort, 7d to 9d: 26 boxes broken, 1, 2, 3, 4, 7d to 8d. Tellicherry—54 bales first sort, 11d to 1s; 5 bales second, 9d; 2 bales third, 8d; 18 cases chips, 7d per lb.

There has been only a limited sale for rice and saltpetre, a about previous rates. Rum, brandy, and grain spirits have realised very full prices.

The following observations are from Messrs Grant and Hodgson's monthly report of the tobacco trade:—"Until nearly the close of last month, transactions in most descriptions were of a very limited character, and although an improved demand has existed for the last few days, the sales for the month have not exceeded 560 hhds, viz., 110 hhds Virginia leaf, 147 hhds and tierces of strips, 100 hhds Kentucky leaf, 88 hhds strips, and 106 hhds Maryland. There has been an entire absence of any speculative movements in the market, and the trade have not been influenced to extend their purchases by the recent unfavourable intelligence from America. Some further parcels are said to have been withdrawn from sale, and holders are much less inclined to sell even at extreme prices. Our quotations must in a great measure be considered nominal. An improved inquiry has been experienced for export qualities, but at prices importers will not entertain." Imports—109 hhds. Deliveries—847 hhds, against 1,121 hhds in the corresponding month of last year. Stock—18,988 hhds, against 17,326 hhds in 1860; 11,942 hhds in 1859; 8,571 hhds in 1858; 10,204 hhds in 1857.

Scotch pig iron has sold at 48s 6d. The stock in the yards at Glasgow is 164,400 tons, against which warrants are in circulation for 161,500 tons.

The following is the monthly report for Banca tin in Holland:—

	1861. slabs	1860. slabs	1859. slabs
The stock on warrants amounted on the 31st March to	41454	39685	29426
Deliveries in April	9188	6530	8350
Stock on warrants April 30	32266	33155	21076
Stock in the hands of the Trading Society for their annual sale	136367	127850	120750

Linseed oil is steady, at 28*l* 10s per ton on the spot. Most other oils are firm; and American turpentine has advanced to 34s per cwt.

Tallow is less active. P.Y.C., on the spot, is selling at 58s 6d; May to June, 58s 6d; October to December, 55s 3d per cwt. Town tallow, 54s 3d per cwt net cash.

COTTON.

NEW YORK, April 16.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

	Sales.	Closing.	Middling.	Freight	F.o.b
New Orleans...Apr.	13 11000	⅛c lower	12¼c	⅛d equal to	7.06d
Mobile	13 4000	nominal	12c	7-16d —	6.75d
Charleston	12 3000	—	12⅛c	5-16d —	6.89d
Savannah	12 2000	—	12¼c	5-16d —	6.76d
New York	16 8000	⅛c lower	Upl. 12⅛c	3-16d —	6.70d
Total	28000 bales			Average	6.85d

There is now a decrease in receipts of 839,000 bales from last year, when the crop reached 4,675,000, and of 80,000 bales from 1858-9 (crop 3,851,000).

New York Market.—In this market business has been quiet throughout the week, the dull news from Liverpool having checked the demand. Holders have shown firmness, however, and prices are without material change. Transit cottons have been neglected, but there has been no pressure to sell, most parties preferring to send forward to Liverpool rather than submit to losses here. The week's sales amount to about 8,000 bales, principally in cottons on the spot. Midland Upland is quoted 12⅜ to 12¾c, and the market closes firm but quiet.

The following is a statement of the movements of cotton for the past week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts.	Receipts. Since 1st Sept.	Exports for the Week. To Great Britain.	Exports for the Week. To France.	Exports for the Week. To other For. Pts.
	bales	bales	bales	bales	bales
1860-61	41000	3290000	42000	15000	8000
1859-60	54000	4129000	87000	11000	15000
1858-59	50000	3370000	98000	2000	12000
1857-58	66000	2584000	96000	19000	11000
1856-57	29000	2707000	46000	2000	14000
1855-56	69000	3067000	69000	12000	10000

	Exports since First September.— To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	1843000	506000	304000	2653000	375000
1859-60	2069000	509000	373000	2951000	798000
1858-59	1372000	348000	441000	2161000	707000
1857-58	1183000	297000	235000	1715000	690000
1856-57	1109000	332000	325000	1766000	441000
1855-56	1348000	387000	387000	2122000	587000

Thus the receipts show a decrease of 839,000 bales from those of last year, and a decrease of 80,000 from 1858-9, and the exports exhibit the following results—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 226000	Dec. 3000	Dec. 69000	Dec. 298000	Dec. 487000
Compared with 1858-9	Inc. 471000	Inc. 158000	Dec. 137000	Inc. 492000	Dec. 359000

Southern Markets by Telegraph.—Business at the South has been on a small scale this week, being checked by the late dull advices from Europe and the scarcity of desirable cottons now offering. At New Orleans the transactions for the week only amounted to 11,000 bales, while in the absence of buyers prices have declined considerably, middling at the close being quoted 12½c. The week's business at Mobile has been limited to 4,000 bales at o rmer rates, middling being quoted 12½c. The Atlantic markets bave also been very quiet and prices irregular. Freights at the Gulf ports have advanced. Sterling exchange has declined.

Receipts.—The receipts this week amount to 41,000 bales at all ports, against 54,000 same week last year, and 50,000 the year before. The total receipts now foot up 3,290,000 bales, showing a deficiency of 839,000 as compared with last year to date, and 80,000 as compared with 1858-59. By telegraph the receipts at New Orleans and Mobile for the following week show a steady falling off, being 18,000 bales against 24,000 in each of the two preceding years.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenhaw, of Manchester.*

New York, April 20.—Our market is very firm, and prices have advanced fully ⅛c per lb, in some instances rather more. Middling Upland commands 13¼c per lb.

LIVERPOOL MARKET.—May 3.

The cotton market has been animated during the past week. The purchases of the trade have not greatly exceeded their usual rate of consumption, but those of speculators and exporters have been on a liberal scale. The exciting intelligence from America has enabled holders again to advance prices, and our quotations are to-day fully ⅛d per lb above those of last week. Egyptian are in fair demand, at firm rates. Brazil are without change. East India have advanced ⅛d per lb. The sales to-day are 12,000 bales. Prices continue tending upwards. The reported export amounts to 16,460 bales, consisting of 5,080 American, and 11,380 East India. Vessels arrived and not reported—1 from North America and 1 from Bombay.

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the commencement of civil war in the United States, the whole of the markets held in the manufacturing districts, this week, have been extremely inactive. In prices, however, no change of importance has taken place. The iron trade shows symptoms of improvement, and there is a full average business doing in coals, at full quotations.

Manchester, May 2.—Notwithstanding the animation in cotton, increasing heaviness has been experienced here in the disposal of goods. For the last ten days little business has been done, but a comparatively large amount had been done before. Now buyers are still more inclined for caution, fearing a renewal of pressure in discounts, and being mostly in receipt of unfavourable advices from abroad. Yarns have been irregular; some descriptions have been slightly better and others slightly worse to sell than last week. In cloths, India shirtings, which were moved off freely ten days ago, have been the only prominent exception to a process of gradual accumulation of stocks which depresses sellers. With the absence of demand, prices are nominal, but lots are constantly being offered below recognised rates. Calcutta and Bombay telegrams to 12th April are extremely unfavourable for our products.

Comparative Statement of the Cotton Trade.

Bradford.—There has been less disposition to buy wool during the past few days. Prices are, nevertheless, tolerably firm, and no actual reduction can be quoted. The yarn market must be quoted decidedly flat. A good deal for export has no doubt been sold within the past few weeks, but no one, in face of the fresh aspect of American affairs, seems to be at all disposed to buy. Prices remain unaltered. The American news continue to influence the market for pieces very unfavourably, business to that quarter being now almost entirely snspended. The home trade merchants report an improvement, with better sales.

Leicester.—There is a tolerable amount of business doing in some descriptions of goods, but the trade generally is rather quiet, and an average business is not being done. At Loughborough and the other country hosiery districts there is little, if any, improvement to notice, and many town and country hands remain unemployed. Wools are not in demand, and continue at about old prices. Yarns are selling at full rates, and spinners are pretty well employed.

Nottingham.—The lace trade in most branches of the cotton department is very quiet; indeed, the dulness appears to be increasing. There continues to be a fair business doing in superior silk goods used for trimmings, and future prospects for this description of lace are tolerably good, as much more lace will be worn as the warm weather sets in. There is not much change in the hosiery trade. Most branches are quiet.

Belfast.—The news to hand from America in the early part of the week had the effect of bringing transactions in white goods to a sudden check, and orders, as well as consignments, were left aside. Later reports have tended to give the market a still more depressed feeling. Even in the home trade there is less business business done. Prices have not given way, nor are stocks so heavy as to lead to the supposition that any great push will be made so force sales under adverse circumstances. Light drills are less easy of sale. There is no improvement in lawns, and, for handkerchiefs, the market rules especially quiet. Linens for the brown finish can only be moved in small parcels.

Wolverhampton.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End Mine forge pig iron, 3*l* 7*s* 6d to 3*l* 10*s*; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Barrow hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Workington hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites from 3*l* 2*s* 6d to 3*l* 7*s* 6d, according to brand or quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The market is dull, last week's prices being barely maintained in the public sales of Mauritius and Penang. Madras declined 6d per cwt yesterday. Owing to the diminished supply of West India, no change can be noticed upon that description, and the Barbadoes submitted on Tuesday went off well, particularly the lots in good condition: brown, 35s to 37s 6d; low to fine yellow, 38s to 44s, including which, only 810 casks sold during the three days. A parcel of grocery Porto Rico also sold with spirit. There were but 1,900 tons landed last week and 5,050 tons delivered, consequently the stock has fallen to 45,550 tons, against 56,300 tons in 1860.

Mauritius.—15,305 bags in the public sales went as follows, more than three-fourths being sold: soft grey to good light yellow, 36s 6d to 42s 6d; low to good brown, 31s to 35s 6d; grainy sorts, 39s 6d to 44s; crystallised, 41s to 44s; (16s duty), 46s to 47s per cwt. Several parcels have changed hands privately.

Bengal.—340 bags white Benares partly sold at 43s 6d to 45s for low yellowish to middling.

Penang.—750 bags sold at moderate rates: brown, 33s to 35s 6d; low to good middling soft greyish yellow, 36s to 39s per cwt.

Madras.—1,975 bags partly sold: native brown and yellow, 30s 6d to 33s 6d; date sorts, 29s 6d to 31s 6d per cwt. About 2,000 bags native were exported privately in the early part of the week at 32s.

Foreign.—Two floating cargoes of Havana, No. 12 to 12½, sold for the United Kingdom at 27s 6d and 27s 9d; also two of Cuba muscovado at 24s 9d to 25s. By auction, 326 casks grocery Porto Rico found ready buyers: low and brown to good middling yellow, 39s 6d to 44s; good to fine, 44s 6d to 48s 6d per cwt.

Refined is inactive, and quotations of dry goods exhibit rather a downward tendency, on account of the expected addition to the supplies.

MELADO.—179 casks were chiefly taken in and since sold at 28s to 36s 6d per cwt.

RUM.—West India is quiet. A parcel of Bengal proof sold at 1s 8½d. Demerara has been disposed of on lower terms, viz., 1s 10d to 2s per gallon. The stock on the 27th ult. amounted to 22,655 puns 4,150 hhds, against 26,400 puns 6,400 hhds last year at the same period.

COCOA.—Partial inquiries prevail for Grenada and other kinds of West India from exporters at previous rates. Yesterday, 131 bags Trinidad, of the new crop, found buyers: good red, 78s to 87s; grey to fair red, 60s to 68s per cwt.

TEA.—There has been only a moderate amount of business transacted by private contract during the week, the trade awaiting the result of the debate on the duties. The tea sales, yesterday, went off flatly, and some kinds were rather cheaper. Of 4,712 packages in the catalogues, 2,283 packages sold.

COFFEE.—The sales, consisting chiefly of plantation Ceylon, have gone off steadily at full prices, 742 casks 82 barrels finding buyers: fine ordinary to middling, 68s to 73s 6d; good middling to good, 74s to 78s 6d. A few lots fine ordinary to low fine Jamaica realised 65s to 106s; and some small parcels of Mocha, good clean garbled, 117s; long berry, 118s. A floating cargo of good firsts Rio has sold at 53s, and one of St Domingo at 60s 6d per cwt, both for near ports.

RICE.—Four floating cargoes of soft grain have been sold: Rangoon at 10s to 10s 3d, Necrancie Arracan at 10s 6d, for the United Kingdom, or 3d more if taken for the Continent. Moderate transactions have occurred on the spot, including Necrancie Arracan at 10s 3d; Bassein, 10s 6d; low to fine white Bengal, 9s 9d to 14s; cargo kinds, 9s 6d to 9s 9d. 3,990 bags Bengal by auction were bought in above the value, but since about three-fourths sold at 11s per cwt for middling white.

IMPORTS and DELIVERIES of RICE to April 27, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	18330	9330	7930	39150

Stock	30500	52825	78300	85800

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO.—2,197 boxes partly sold at rather lower rates: dull medium, 15s 6d to 16s; very good to fine small grain, 17s to 18s 6d; the remainder, consisting of the latter, withdrawn at 19s per cwt.

SPICES.—Cassia lignea has declined 1s to 2s, and 952 boxes partly sold at 86s to 90s for common to good quality. 39 cases brown nutmegs were chiefly sold at 1s to 1s 8d for small to fair mixed, and 38 cases mace at 11d to 1s, being full prices. Pimento sells slowly at 2¾d to 2⅞d, 170 bags bringing those rates. 1,876 bags fair common Batavia pepper obtained 3⅛d to 3⅜d; a few lots good, 3⅜d to 3½d. 762 bags good Alleppy were taken in at 4½d per lb. 48 barrels ordinary Jamaica ginger went at 47s to 50s per cwt.

The quarterly cinnamon sales on Monday comprised 1,365 bales Ceylon, and 61 bales 18 cases Tellicherry. There was a good demand for the Ceylon at full prices to 2d advance, middling to good descriptions being most readily taken: 1st sort, 1s 7d to 3s 1d; 2nd, 1s 2d to 2s; 3rd, 10d to 1s 3d; 4th, 7d to 9d per lb.

SALTPETRE.—The few orders executed in Bengal have given firmness to the market. By auction, 1,619 bags Bengal partly sold: refraction 4½ to 2¾, 37s 6d to 38s; 7¾ realised 36s per cwt. 200 bags Bombay brought 31s to 31s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to April 27, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	4630	5200	6750	3900
Delivered	3800	4600	6300	5350
Stock	4650	4460	3400	5160

Deliveries last week 215 tons.

COCHINEAL.—Liberal supplies continue to be offered, and quotations have in some instances given way 1d to 2d. As the market is still inactive, 506 bags at public sale only partly met with purchasers: Honduras silver, 2s 5d to 3s; Mexican silver, 2s 6d to 2s 7d; black, 2s 7d to 2s 9d; Teneriffe silvers, 2s 8d to 2s 9d; black, 2s 9d to 3s 2d per lb.

OTHER DYESTUFFS.—Turmeric is again higher, 950 bags Bengal selling at 15s 6d to 16s. Gambier has not shown any change. 1,720 bales by auction found buyers at 16s to 16s 6d for good, and 15s 6d per cwt for heated. Safflower quiet: 83 bales Bengal were taken at high prices.

SAPAN WOOD.—A parcel of Siam sold at 8*l* 2s 6d to 8*l* 12s 6d. Jamaica log was bought in at 4*l* 12s 6d per ton.

METALS.—There has been less business done this week, but the market remains firm. No change can be quoted in iron. Scotch pig has sold at 48s to 48s 6d per ton. The few contracts made in spelter have been at 18*l* 7s 6d on the spot. Stock on the 1st inst., 4,150 tons, against 2,850 tons last year. The late advance in East India tin has partially checked the inquiry. Good Straits last sold at 124s to 125s per cwt. Other metals are the same as last quoted.

HEMP.—Manilla has not attracted so much attention; but Russian is steady. The jute sales, yesterday, went off at lower rates by 10s to 15s, and some parcels, offered without reserve, sold about 20s cheaper. Of 4,000 bales comprised in the catalogues, the chief part found buyers at 13*l* 10s to 19*l* 5s per ton.

OILS.—A large business has been done in linseed at rather higher rates, closing at 28s 6d to 28s 9d. Rape is again rather dearer: foreign refined, 42s to 42s 6d; brown, 39s 6d to 40s per cwt, and the market has still an upward tendency. Olive is neglected. Fish oils have been dull, and prices the same as before. Fine palm has become scarce, and there are buyers at 45s 6d for fine, holders asking 46s. Cocoa-nut, is active: by auction, Ceylon sold at 46s to 46s 6d; Cochin, 47s 3d to 48s per cwt.

LINSEED.—A good demand prevails for Calcutta at 49s 3d to 50s; Bombay, 53s. Black Sea afloat is quoted 51s to 52s per quarter.

SPIRITS TURPENTINE.—A large business has been done in American, and the price now shows an advance, viz., 34s per cwt.

TALLOW.—The advance reported last week has not been maintained, and the market is now inactive. Y.C., 58s to 58s 3d; for delivery in the last three months, 55s per cwt.

PARTICULARS OF TALLOW.—Monday, April 29.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market remains dull. 4,369 bags Mauritius and 1,356 bags native Madras were partly sold at about previous quotations. 3,926 bags Bengal were bought in at 31s to 34c for soft brown and low yellow. 147 casks crystallised Demerara brought 40s 6d to 45s. Total sales of West India for the week 1,150 casks.

COFFEE.—446 bags Ceylon sold at 61s 6d to 62s for native.

COCOA.—918 bags Trinidad went at 58s to 85s per cwt for grey to good red.

RICE.—6,183 bags were bought in: Rangoon 10s to 10s 6d; Madras 10s; Necrancie Arracan, 10s; middling white Bengal, 11s 6d. The latter since sold at 10s 9d, and 500 bags of the Madras at 9s 1½d per cwt.

SAGO.—1,801 boxes Borneo were chiefly bought in; a portion selling at 16s to 18s 6d per cwt for small medium to fine.

SPICES.—751 bags African ginger were part sold at 33s to 33s 6d. 75 cases cassia lignea from Bombay at 85s to 88s per cwt.

SALTPETRE.—A parcel of low Bombay sold at 34s 6d per cwt by private contract.

COCHINEAL.—111 bags sold at about previous rates.

SAFFLOWER.—154 bales Bengal partly met with purchasers at 3*l* 10s to 5*l* 5s per cwt.

INDIA RUBBER.—A small parcel of Penang sold at 1s 2d to 1s 2½d.

SHELLAC declined 10s: good reddish orange, 8*l* 12s 6d to 8*l* 17s 6d; good, 9*l* 5s to 9*l* 7s 6d; middling, 7*l* 5s to 7*l* 15s per cwt.

TALLOW.—Town unaltered. Y.C., 58s to 58s 3d; last three months, 55s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very languid; rather lower prices have been accepted for dry goods. Treacle remains scarce and very firm. The Dutch market for crushed sugar is barely supplied; prices without any alteration.

GREEN FRUIT.—Market somewhat depressed, owing to fruit arriving out of condition from long voyages. Some cargoes oranges, from St Michael's, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. Valencia improved in price. No alteration in the price of lemons. Sicily bitter difficult of sale, unless at an extremely low price. Black Spanish nuts 2s to 3s per barrel higher; stock in few hands. Para dull, price being too high for consumption. Barcelona firm at 34s.

DRY FRUIT.—The market continues very dull, but all descriptions of fruit are well held, and though many parcels are being offered about, no sign of accepting lower prices is manifested.

ENGLISH WOOL.—A dull feeling pervades the English wool market, and prices are rather in favour of the buyer.

COLONIAL WOOL.—The market is without change. The public sales, to commence on 9th inst., will continue until 8th June. Quantities arrived to date are:—Sydney, 12,611 bales; Port Philip, 20,692; Van Diemen's Land, 4,554; Adelaide, 11,735; New Zealand, 1,052; Swan River, 1,000; Cape, 7,568—total, 59,212 bales.

FLAX.—But little doing. Prices unaltered.

HEMP.—A very quiet week, and rather lower prices accepted.

COTTON.—Sales of cotton from Friday, 26th April, to Thursday, 2nd May, inclusive:—4,000 bales Surat at 5⅜d to 6⅛d for fair to fully good fair sawginned, at 5¾d for fair Broach, at 5½d to 5¾d for middling fair to fully fair Dhollera, at 5d to 5⅜d for middling to fair Oomrawatty, at 5⅜d to 5½d for fair Mangarole, at 5½d for fully good fair Compta; 1,400 bales Tinnevelly at 5½d to 6d for middling fair to good. A fair demand prevailed, and full prices were obtained up to the 30th ult., when the advices from the United States brought decidedly more warlike accounts, which have been confirmed by the news received yesterday of further hostilities, also a further falling off in the receipts at the ports, the general belief now being that the crop will not much exceed 3,600,000 bales. These accounts have created an active and general demand, and the sales during the last three days have been large. Prices of Dhollera, Compta, and good sawginned have advanced fully ¼d per lb; other descriptions are also rather dearer, and the market closes with an upward tendency. P.S.—Market very firm. Sales to-day, 600 middling fair Tinnevelly at 5⅝d per lb.

SILK.—The market extremely quiet; prices unaltered.

TOBACCO.—The market during the last three or four days has presented a very firm appearance, and sales effected to some extent at fully a ¼d advance on previous quotation. Further parcels have been withdrawn from sale, and holders appear disinclined to sell beyond very limited quantities.

LEATHER AND HIDES.—A good average supply of leather was at Leadenhall on Tuesday, and the demand, although still limited, was rather better than last week; a fair amount of business has also been done in the week. Prices are unaltered.

METALS.—The improvement of the two previous weeks has flagged again in the present week, chiefly on account of unfavourable news from the United States. Copper maintains firmness, although a shade less in demand. Iron continues heavy, but prices are unchanged. Tin has been actively done in, and the market shows buoyancy. Lead is steady, and in fair demand. Spelter is firm at last week's quotations, although the stock has increased somewhat, being on the 1st inst. 4,125 tons. Tin plates maintain their improved position both in prices and demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	57	3
Fat by ditto	2	11½
Yellow Russian	60	0
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market dull; very little doing at prices a shade lower. Fine Friesland butter is easier this week, and very slow of sale.

METROPOLITAN CATTLE MARKET.

MONDAY, April 29.—The total imports of foreign stock into London, last week, amounted to 2,491 head. In the corresponding period in 1860, we received 3,497; in 1859, 2,876; in 1858, 1,362; in 1857, 1,456; in 1856, 742; and in 1855, 1,266 head.

Our market to-day was fairly supplied with foreign stock, in, for the most part, good condition. Sales, generally, were concluded at about last week's prices. The receipts of beasts fresh up this morning from our own grazing districts, as well as from Scotland, were seasonably good, both as to number and quality. Prime Scots and crosses commanded steady sale, at fully last Monday's currency; otherwise the beef trade was less active, on former terms. The best Scots realised 5s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire, the arrivals of beasts amounted to 2,000 Scots and Shorthorns; from other parts of England, 500 various breeds; from Scotland, 500 Scots and crosses. We were but moderately supplied with all breeds of sheep; nevertheless, the muton trade was in a sluggish state, at barely last Monday's quotations. The best old Downs, in the wool, realised 5s 10d; out of the wool, 5s per 8lbs. Good and prime lambs sold steadily, at full prices; inferior breeds, however, were dull. About 240 came to hand from the Isle of Wight. There was only a limited sale for calves, at last Monday's currency, being a decline compared with Thursday, of 2d per 8 lbs. The top price was 5s 6d per 8 lbs. The pork trade was somewhat heavy, and prices had a drooping tendency.

SUPPLIES.

	April 30, 1860.	April 29, 1861.
Beasts	4530	3580
Sheep and lamos	24250	18480
Calves	115	107
Pigs	360	350

THURSDAY, May 2.—The supply of beasts on offer in our market to-day was moderately good. Prime breeds commanded a steady sale, at full prices; but inferior stock ruled heavy, at late rates. There were 40 oxen on sale from Spain. With sheep we were fairly supplied. Generally speaking, the mutton trade was in a sluggish state, at Monday's currency. Prime lambs were scarce, and in request, at full quotations; otherwise the lamb trade was very inactive. 200 lambs reached us from the Isle of Wight. The veal trade was slow, at Monday's prices. In pigs and milch cows very little was done.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	5	10
Second quality ditto	4	0	4	4	Large coarse calves	4	6	5	0
Prime large oxen	4	6	4	8	Prime small ditto	5	2	5	6
Prime Scots, &c.	4	10	5	0	Large hogs	4	0	4	6
Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	4	10
Second quality ditto	4	0	4	4	Suckling calves...each	18	0	22	0
Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	22	0	30	0

Lambs, 6s 0d to 7s 4d.

Total supply—Beasts, 1,060; sheep and lambs, 6,560; calves, 95; pigs, 250.
Foreign supply—Beasts, 220; sheep, 800; calves, 56; pigs 250.

NEWGATE AND LEADENHALL.

MONDAY, April 29.—The supplies of meat on sale here have been less extensive, and all descriptions have moved off somewhat readily, on rather higher terms.

FRIDAY, May 3.—Limited supplies of meat continue on sale here, and the trade generally rules firm, at fully previous rates, to, in some instances, an advance of 2d per 8 lbs.

Per 8lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	0	3	4	Middling mutton	4	2	4	8
Middling ditto	3	6	3	8	Prime ditto	4	10	5	0

Prime small ditto	4	2	4	4	Small pork	5	0	5	4
Large Pork	4	0	4	8	Lamb	5	8	7	0
Inferior mutton	3	10	4	0					

HOP MARKET.

BOROUGH, Monday, April 29.—We have no alteration to report in our market, which continues active at full quotations. The accounts from the different plantations all speak of great weakness in the bine, and in the low grounds a large portion must be re-planted. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 140s, 189s.

FRIDAY, May 3.—All good and fine samples of hops find a ready market, and fully previous rates are realised. Inferior parcels, however, attract but little attention; nevertheless, prices rule firm.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, April 29.—During the past week the arrivals coastwise have still been greater than the demand, with very heavy trade, and no alteration in price to note. The following are this day's quotations:—Yorkshire Flukes, 120s to 150s; Lincolnshire Regents, 90s to 105s; Dunbar red soil ditto, 120s to 160s; North Berwick, 115s to 130s; Perth, Forfar, and Fife ditto, 90s to 105s; ditto, ditto, ditto Rocks, 80s to 85s; ditto, ditto, ditto Reds, 70s to 80s; French Whites, 60s to 80s; Belgian ditto, 60s to 75s; Dutch ditto, 60s to 75s per ton.

BOROUGH AND SPITALFIELDS, Friday, May 3.—These markets have been supplied with home-grown potatoes to a fair average extent, and the demand, although by no means active, has ruled steady, at previous currencies. York Flukes, 95s to 130s; Scotch Regents, 100s to 125s; and Dunbar ditto, 160s to 180s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 15s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 10s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 16s to 2*l* 2s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 16s to 2*l* 0s per load. Supply good.

COAL MARKET.

FRIDAY, May 3.—Wall's-End:—Hetton 18s 6d—Lambton 18s—Haswell 18s 6d—Stewarts 18s 6d—South Hetton 18s 6d—Tees 18s 3d—Hartlepool 17s 9d—Braddyls Hetton 17s 6d—Shincliffe 16s—Thorpe 15s—Harton 15s 9d—Belmont 15s 6d—Hedley 15s 3d—Pease's West 15s—Tanfield Moor Butes 13s—Craghead 15s 6d—Bebside Hartley 16s 6d—Hasting's Hartley 16s 6d—Lambert's Hartley 16s 3d. 69 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 3.—The demand by private contract has been limited this week, buyers having deferred their purchases until the public sales, which opened here on the 2nd and will continue until the 10th inst. The attendance is very good, and last January sale-rates are fully maintained.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 3.—Moderate attendance at to-day's market. Wheat rather better; sales at full prices. Flour nominal. Indian corn firm; 35s mixed. Beans without change. Oats and oatmeal at late rates.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 3.—The market is dull for manufactured iron, the transactions during the week being of a limited character, with prices remaining almost unchanged. Scotch pig iron has been tolerably steady throughout the past week. Unmanufactured copper has been in greater request, but the demand for manufactured is only very limited. Lead continues dull, and spelter, as also tin, have slightly receded in price.

The Gazette.

TUESDAY, April 30.

BANKRUPTCY ANNULLED.

W. B. Stewart, Manchester, yarn agent.

BANKRUPTS.

T. W. Randall, Wexham, near Slough, corn dealer.
G. Peffani, Minories, sail maker.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending the 20th of April amounted to 518,558*l*, and for the corresponding week of last year to 504,751*l*; showing an increase of 13,807*l*. The gross receipts of the eight railways have their *termini* in the metropolis amounted to 228,923*l*, and for the corresponding week of 1860 to 227,544*l*, showing an increase of 1,379*l*.

PARIS AND MEDITERRANEAN.—The report of the directors of this company states that the expenditure on capital account during 1860 on the old lines amounts to 18,004,550f (720,182*l*), of which the sum of 6,628,327f (265,133*l*) was expended for additional rolling stock. The total expenditure on the old lines of the company to the 31st of December last, was 659,669,142f (26,386,765*l*), leaving a balance of 2,298,760f (91,950*l*.) The expenditure of capital on the eight new lines of the company for the year 1860 amounted to 60,954,167f, making the total expenditure on new lines up to the 31st of December, 1860, 433,062,965f (17,322,518*l*), leavimg a balance of 7,655,936f. (306,237*l*) The total capital expended by the company on the old and new concessions amounted to 43,709,273*l*, and the balance on hand to 398,187*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 29.—The railway market to-day was comparatively steady, the progress of the settlement showing a further absorption of stock by the public during the past fortnight. Owing, however, to the civil war in America and its probable effect upon the traffic of the lines in the manufacturing districts, there was in some cases a disposition to press sales, and several stocks consequently showed a slight decline. Mines were inactive at an occasional decline. London and County Bank shares were quoted higher. In miscellaneous descriptions, Mediterranean Extension Telegraph shares advanced, while Madras Irrigation were slightly lower.

TUESDAY, April 30.—The principal feature in railway stocks was an advance in Great Western and West Midland, but the market generally remained firm from the support given by the late purchases by the public. Compared with yesterday, Lancashire and Yorkshire were ½ per cent. higher, and London and North-Western, Midland, North British, York and North Midland, Great Northern, and Eastern Counties, ⅛ to ¼. The general business was limited. Indian guaranteed stocks were in moderate demand at advancing prices, while Canadian descriptions were dull. Grand Trunk closed at 20 to ½, and Great Western of Canada 11¼ to ⅜. In the foreign market, Dutch Rhenish were again higher, and Lombardo-Venetian steadily maintained the late recovery. American securities showed further heaviness, and a fresh decline took place in Illinois Central and New York and Erie shares. Mines were quiet, but steady. No change of importance occurred in joint stock banks. In miscellaneous descriptions, Scottish Australian Investment stock improved.

THURSDAY, May 2.—The railway market was heavy on the American news, and further from a decline in some of the traffic returns, chiefly in the manufacturing districts. Lancashire and Yorkshire receded ¾ per cent., London and North Western, Midland, and Great Western ⅜ to ⅝, and other stocks ⅛ to ¼. The tendency at the close was decidedly unfavourable. In the colonial market there was a continued demand for Indian guaranteed securities, and prices showed a further improvement. Cape shares and Grand Trunk of Canada stock were also higher, the latter closing at 20¼ to 21. Foreign descriptions were firm, especially French and Great Luxembourg. Lombardo-Venetian likewise improved to ½ to ⅝ discount. Dutch Rhenish relapsed. Mines were quiet, and in a few cases showed a slight rise.

FRIDAY, May 3.—The railway share market was dull, and rather flat in character. There was a further fall of ½ per cent. in Great Western stock, and ¼ per cent. in Lancashire and Yorkshire. Other descriptions exhibited little change. Lombardo-Venetian Railway shares advanced to ¼ to ⅜ discount. Indian railway stocks were in demand. Mining shares were dealt in to a full average extent, at, in some instances, rather higher prices.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.5 per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

UNDER HER MAJESTY'S ESPECIAL PATRONAGE.

ROYAL GERMAN SPA—BRIGHTON. STRUVE and CO. beg to inform the Medical Profession and the Public in general that the PUMP ROOM is OPEN from the First Monday in MAY until the end of OCTOBER, offering every facility for taking a course of the most RENOWNED CONTINENTAL MINERAL WATERS, with the same happy results as at the Natural Springs.

The Waters, carefully bottled, are sold throughout the year at the Pump Room, and by all respectable Chemists, where also a short account of the CURATIVE EFFECTS of these Waters may be had gratis.

None are genuine which have not the name of "STRUVE" on the Label, and on the Red Stamp over the Cork.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

Free for four stamps,

ELECTRICITY AND ITS WONDERS in conjunction with the newly-discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Dr WATSON, U.S., F.R.A.S., No. 27 Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD." An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

RIMMEL'S PATENT PERFUME VAPORISER, an Elegant, Cheap, and Portable Apparatus, recommended by Dr LETHEBY and Dr HASSALL for diffusing the fragrance of flowers in apartments, ball-rooms, &c, and purifying the air in dwelling-houses and sick-rooms. Price from 6s. Sold by all Perfumery Dealers, and by the Inventor and Patentee, EUGENE RIMMEL, Perfumer, 96 Strand and 24 Cornhill, London; and 17 Boulevard des Italiens, Paris.

KEATING'S COUGH LOZENGES.—Judged by the Immense Demand, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

HOLLOWAY'S PILLS are renowned as a safe and salutary remedy for indigestion, liver complaints, and all manner of eruptions and skin disease. Pains in the stomach after eating, eructations of wind, pains in the back, aching of the right shoulder, weakness, langour, and tawny hue of the skin, all disappear under the purifying powers of these admirable Pills. They contain no ingredient which could by possibility hurt the feeblest frame. They effect a momentous change throughout the system, by thoroughly expelling all impurities, and imposing on every organ its natural functions. Many testimonials of their efficacy can be produced, the latests of which has been forwarded by Edward Smith, of Newport, Monmouth, who was cured, after wasting under dyspepsia for fifteen years.

ASTHMA.—Another Important Testimonial in favour of DR LOCOCK'S PULMONIC WAFERS. From W. J. Cooper, Surgeon, Maidstone:—"Having heard the Wafers very highly spoken of by persons who have taken them with decided benefit, I have recommended them in several cases of confirmed Asthma, and their good effects have been truly astonishing. I now recommend them in all obstinate cases.—W. J. COOPER, Surgeon." Dr Locock's Wafers give instant relief, and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a most pleasant taste. 1s 1½d, 2s 9d, and 11s per box. Sold by all chemists.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

AIR CIRCULATING AND ANTI-GREASE HATS—Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. First quality, 21s; second ditto, 17s, cash. To be had wholesale at the manufactory, Union street, Southwark, S.E.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

FURNITURE CARRIAGE FREE.—Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free. This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co., Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, pronounced by the most eminent Medical Men throughout the world to be incomparably superior to all other kinds.

CONSUMPTION.

The investigations of the most experienced pathologists have conclusively proved that Dr de Jongh's Oil is unequalled as a remedy for Consumption, and that no other Oil can possibly produce the same salutary results. ALLEN G. CHATTAWAY, Esq., the eminent Surgeon to the Leominster Infirmary, writes:—"Having for some years extensively used Dr de Jongh's Light-Brown Cod Liver Oil, both in public and private practice, in the treatment of consumption, I have no hesitation in stating that its effects are very far superior to those of any other Cod Liver Oil."

GENERAL DEBILITY.

In cases of General Debility, the restorative powers of Dr de Jongh's Light-Brown Cod Liver Oil have been remarkably manifested, and it has been resorted to with the most beneficial effects, after the whole range of ordinary tonics had been in vain exhausted. BENJAMIN CLARKE, Esq., M.R.C.S., F.L.S., in testifying to its extraordinary efficacy in his own case, observes:—"Having myself taken both the Pale Oil and Dr de Jongh's Light-Brown Oil for Debility, I am able, from my own experience, to remark upon their effects and comparative usefulness as remedial agents. After the Pale Oil, and all other remedies that I could think of had failed, I tried, merely as a last resort, Dr de Jongh's Light-Brown Oil; I received immediate relief, and its use was the means of my restoration to health."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

NEW THEATRE ROYAL ADELPHI.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL,

perfectly pure, nearly tasteless, and free from adulteration of any kind, having been analysed, reported on, and recommended by Professors Taylor and Thomson, of Guy's and St Thomas's Hospitals, who, in the words of the late Dr Pereira, say, that "The finest oil is that most devoid of colour, odour, and flavour," characters this will be found to possess in a high degree. Half-pints 1s 6d, Pints 2s 6d, Quarts 4s 6d, and Five-pint Bottles 10s 6d, Imperial Measure.

79 St Paul's Churchyard, London.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.

—Twenty Thousand Copies of a Medical Book for gratuitous circulation. THE FRENCH AND GERMAN PROTESTANT COLLEGE,

Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.
Capital £200,000.

PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Charles Donaldson, Esq.
Lewis Moffatt, Esq., *Director* Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith Collingwood.
E. W. Thomson, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and 10 years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the paymout of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents, Brunton and Son, Auction Mart chambers, Bartholomew lane, London.

CHEAP FRENCH WINES.

TO THE EDITOR.

SIR,—AS SOME STATEMENTS have been made to the prejudice of French Wines, which are likely in consequence to mislead the public, I beg the favour of your allowing me to give the following information, as extracted from the Official Returns of the Board of Trade, showing the quantities imported and retained for home consumption for the last three years ending Dec. 31, 1860:—

	Imported.	Taken for home consumption.
	gallons	gallons
1858	623,041	571,993
1859	1,010,888	695,913
1860	2,445,159	1,125,599

Comparing the first three months of the present year with the corresponding period of last year, the quantities upon which duty was paid stand thus:—

	gallons		gallons
1860	242,993	1861	669,097

Showing an increase for three months only of no less than 426,104 gallons.

The Chancellor of the Exchequer having done me the honour of quoting me in the House of Commons as selling good sound French Wine at 14s per dozen (bottles included), I venture to append extracts of letters which I have received:—

"11 Downing street, Whitehall, S.W.,
"March 19, 1861.

"SIR,—The Chancellor of the Exchequer desires me to thank you for your letters, and to call your attention to the letter in the 'Times' (signed 'Sitiens') respecting your Wine.—I am, &c., "C. L. RYAN."

"H. R. Williams, Esq.

"11 Downing street, Whitehall,
"23rd March, 1861.

"SIR,—I am desired by the Chancellor of the Exchequer to say that he has no objection whatever to your stating that he alluded to YOUR Wine.—I am, &c.,
"H. R. Williams, Esq. "C. L. RYAN."

I beg only to observe, in conclusion, that with a good sound wine at the price quoted, there must be a growing demand for the light wholesome wines of France; and should we be favoured with a good vintage this year, there is every reason to believe that, from the greatly extended cultivation of the vine in France, a reduction upon the present price may be looked for during the coming year.—I am, Sir, your obedient Servant,
H. R. WILLIAMS.

112 Bishopsgate street within, London, E. C.

MUSLIN AND LACE CURTAINS.—

SEWELL and CO. have now on show a superb collection of Leno, Embroidered Lace, and the much admired Rose-tinted Muslin Curtains, from 4 to 5 yards long. Also a Manufacturer's Stock, at considerably reduced prices.—Compton House, Soho.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

S. P. Low, Esq. (Grindlay and Co.)

With power to add to their number.

The attention of the Public is earnestly requested to the following facts:—

"The Committee have the pleasure to announce that they have already remitted £75,000 to India for distribution through the local authorities of the districts most urgently requiring relief, yet the distress is so great that long and continuous remittances are required, in proof of which the following extracts from Indian papers are given:—

"One-half of the enormous area was completely covered by wasted files of human beings. In every direction, and in every posture of apathy, disease, despair, and prostration, were lying about the hollow-eyed wretched victims of the dreadful visitation, almost too far gone even to care to creep among the long rows of rags, squalor, and half-nakedness."

"Sir Robert Montgomery paced slowly down the lines amid almost unbroken and painful silence, pausing now and then before some gaunt and wan figure to ask whence he came, to be answered only by mute gesture, or exhausted effort at articulation. Out of more than six thousand not one could be pointed out as fit for a quarter of an hour's ordinary work. It was painful enough to reflect, after viewing the remnants of human beings whom charity had reached, upon the thousands who must have been, and must be, perishing in the highways and byways daily."

"But at the Koodseah Bagh the people are almost past hope. Here death steps in and relieves daily from eight to nine of their sufferings. The coming spectacle of human woe here exhibited surpassed all that can be written about it, and adequately justified the earnest appeals for aid, as well as the munificent responses to those appeals. With their skeleton shapes, just covered by skin hanging in thick wrinkles, the famished are brought in, some to struggle into life, most to die from the mere effort at eating. The hideous and repulsive aspect of these cases is utterly lost in the unbounded sympathy felt, as well as the regret that more cannot be done to arrest the scythe of the destroyer."

"Many hundred imploring beings owe their lives to the humane and disinterested exertions of one who had to flee from the infuriated mob at the first mutiny, and for weeks suffered every privation and misery with his family in the jungle."

A statement of the facts will be forwarded upon application to the Honorary Secretaries.

Subscriptions may be remitted direct to the Mansion House, or through any banker in the United Kingdom, to the credit of the Indian Famine Relief Fund with the Bank of England.

The Committee gratefully acknowledge the receipt of several church and chapel collections, and trust that all clergymen and nonconformist ministers will aid the movement by preaching sermons in behalf of the fund; and thus demonstrate to our Indian fellow-subjects that difference in creed does not prevent the flow of Christian charity.

The next mail will leave for Calcutta on the 10th May inst., when all sums received to that date will be remitted.

The General Committee meets at the Mansion House the first Friday in the month, and the Sub-Committee every Marseilles mail day.

The efforts of the Committee have received the Royal sanction. The Nobility, Merchants, and Public generally have responded nobly to the appeal which has been made; but so gigantic is the crisis, that continued and united efforts must be made, or thousands of our fellow-creatures must miserably perish under the most deplorable and heart-rending circumstances.

LIST OF SUBSCRIPTIONS.

EAST INDIAN RAILWAY COMPANY.—

The Directors are prepared to receive Tenders for FIFTY-THREE LOCOMOTIVE ENGINES, as per specification and drawings now open for inspection at these offices. Tenders, marked "Tender for Locomotives," must be delivered in sealed envelopes, addressed to the undersigned, on or before 12 o'clock at noon, on Tuesday the 14th of May instant. The Directors are not bound to accept the lowest or any tender.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, London, May 1, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £50.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December, 1860, transferable by endorsement without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.—By order of the Board,
D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, April 9, 1861.

MADRAS RAILWAY COMPANY.—

Notice is hereby given, that the Ninth Annual General Meeting of the Madras Railway Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 10th day of May next, at One o'clock precisely, in conformity with the terms of the Company's deed of settlement.

And Notice is hereby further given, that at such meeting a resolution will be proposed for the conversion into Stock of all the shares in the Fourth Extension Capital in respect whereof the whole money subscribed shall have been paid up. The transfer books of the Company will be closed from the 3rd to the 10th proximo, both days inclusive. Deeds of transfer are not received at the offices of the Company while the books are closed.—By order of the Board,

JAMES WALKER, Managing Director.

33 New Broad street, London, E.C., April 22, 1861.

MADRAS RAILWAY COMPANY.—

The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l.*

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY MOULES, Secretary.

UNION BANK OF AUSTRALIA.

London Office, 38 Old Broad street.

The Directors of this Bank grant LETTERS of CREDIT and DRAFTS on its Branches as under, viz.:—

NEW SOUTH WALES.

They likewise negotiate approved Bills on the Colonies, and send out Bills for collection, the terms for which may be obtained on application at the offices of the Bank.

N.B. Letters of Credit and Drafts may also be procured of Messrs Glyn and Co., 67 Lombard street.—By order of the Board, H. W. D SAUNDERS, Secretary.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.

Paid-up capital, £500,000. Reserve fund, £50,000.

COURT OF DIRECTORS, 1860-61.

William Howard, Esq., Chairman.
Donald Larnach, Esq.
William Sollory Grey, Esq.
George Garden Nicol, Esq.
George Palmer Robinson, Esq.
George May, Esq.
Alexander Anderson, Esq., Chief Manager.
David Trail Robertson, Esq., Inspector and General Manager.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit, and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertake the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours, 10 to 3; Saturdays, 10 to 2.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital, £750,000. Reserve Fund, £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

And also on the Commercial Bank of Van Diemen's Land at Hobart Town and Launceston.

The Directors also negotiate approved Bills of Exchange, and send them for collection, drawn on any of the Australian colonies and New Zealand.

The Royal Bank of Scotland, Stuckey's Banking Company, the Manchester and Liverpool District Bank, the North and South Wales Bank, and the National Bank in Ireland are authorised to grant credits on this Bank at the several establishments in Australia, and will negotiate bills drawn on the Australian colonies.—By order of the London Board,

JOHN CURRIE, Secretary.

SOUTH AUSTRALIAN BANKING COMPANY.

—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, and Robe. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

BANK OF VICTORIA,

AUSTRALIA.

Paid-up Capital, £500,000.

London office, 3 Threadneedle street.

The London Board of Directors grant Letters of Credit and Drafts on the Head Office of the Bank at Melbourne, and its Branches at Avoca, Ballaarat, Beechworth, Belfast, Castlemaine, Geelong, Hamilton, Maryborough, Portland, Port Albert, Gipps Land, Raglan, Sale Gipps Land, Sandhurst, Warnambool.

They also purchase approved Bills of Exchange, send Bills for collection, and transact every kind of Banking and Exchange business between this country and the Australian Colonies.

JOHN MATHESON, Managing Director.

THE NATIONAL BANK,

Old Broad street, E C., London, 29th April, 1861.

Notice is hereby given, that the Twenty-Sixth Annual General Meeting of the Proprietors of the National Bank will be held on Tuesday, the 28th day of May next, at the office of the Society, Old Broad street, London, when, pursuant to the Deed of Settlement, four of the present Directors are to go out of office by rotation, which will create four vacancies to be filled up.

And, further, notice is hereby given, that Edmund Smithwick, Esq., and Joseph Neale McKenna, Esq., having been appointed Directors, by the Court of Directors, since the last Annual General Meeting, their continuance in office under such appointments beyond the 28th of May next must depend on such appointments being confirmed at the meeting on that day; and if such appointments, or either of them, shall not be confirmed at the same meeting, the want of such confirmation will occasion two other vacancies, or one other vacancy, as the case may be, to be filled up at the same meeting, in addition to the four vacancies above mentioned.

And, further, notice is hereby given, that every proprietor (not being a Director) intending to become a candidate, or to propose some other proprietor as a candidate, for the office of Director, must, at least fourteen days before the day on which the Annual General Meeting is to be held, signify by some writing under his or her own hand, to be left at the office of the Society in Old Broad street, London, either his intention to become a candidate, or the name and place of abode of the candidate intended to be proposed by him or her; but the four Directors going out of office by rotation are immediately re-eligible, and are to be considered as candidates without giving notice of their intention.—By order of the Court of Directors,

H. B. HYDE, Secretary.

N.B.—The chair will be taken at One o'clock precisely.

THE AGRA AND UNITED SERVICE BANK, LIMITED.

Established in India 1833.

Messrs S. Angas and Co., Newcastle-on-Tyne.
Messrs Jas. Watson and Smith, St Vincent place, Glasgow.

In bringing the London and Provincial Discount Company (Limited) under the notice of the public, the Directors wish particularly to call attention to the distinctive principles on which they are determined to conduct business—viz., to avoid heavy preliminary and working expenses, to limit the amount of discount of even the best bills, and to offer facilities to trade and professional bills, for which there is at present no opening, and, lastly, to establish branches in the large provincial towns, which as yet have not one Joint Stock Discount Company, and where the rate of discount rules higher than in London.

Acting upon these principles there can be no doubt of success.

Prospectuses, with full particulars, may be obtained from the brokers; or at the offices, 46 and 47 Cornhill, E.C.

FORM OF APPLICATION FOR SHARES.

To the Directors of the London and Provincial Discount Company (Limited), 46 and 47 Cornhill, E.C.

Gentlemen,—Having paid the required deposit, I request you to allot me shares in the above-mentioned Company; these, or any less number that you may allot to me, I agree to accept, to pay all calls when due, and sign the Articles of Association when required.—I am, Gentlemen, your obedient servant,

MURRAY'S HANDBOOK ADVERTISER. [Published Annually in May.]

Printed for the convenience of those who are desirous of communicating information to Travellers, and inserted in every copy of Murray's Continental Handbooks issued during the Season.

The great advantage of this medium of Advertising over all others can scarcely be questioned, as it enables Steamboat, Railway, and other Public Companies, Landlords of Inns, Teachers, Tradesmen, and others, to bring under the immediate notice of the great mass of English and American Travellers, the various merits of their Railways, Steamers, Hotels, Taverns, Professions, Articles of Merchandise, Works of Art, and such other information as they may desire to make known; while, instead of being limited to the casual publicity of a Daily, Weekly, or Monthly Periodical, it has the additional merit of being displayed for the entire year in a permanent work of interest and perpetual reference to the very class of persons for whom it is specially intended.

As only a limited space is allowed, preference is given to those Advertisements which are more immediately addressed to Tourists.

THE HANDBOOK ADVERTISER

is inserted in the following—

Handbook—North and South Germany.
Handbook—Switzerland.
Handbook—France.
Handbook—Spain and Portugal.
Handbook—Egypt.
Handbook—Madras and Bombay.
Handbook—North and South Italy.
Handbook—Central Italy and Rome.
Handbook—Russia and Sweden.
Handbook—Greece.
Handbook—Syria and Palestine.

*** Advertisements, with a remittance, must be sent to the Publisher by 10th May.

Notting Hill.—First-class Investment.—A well-secured Ground Rent, equal in value to freehold, with valuable reversion in 54 years.

MESSRS DEBENHAM AND TEWSON will Sell, at the Mart, on TUESDAY, May 21, at 12, in one lot, a valuable Ground Rent of £70 per annum, amply secured upon five commanding shops, Nos. 118, 120, 122, 125, and 126 High street, Notting hill, extensive livery yard, school, schoolmistress's house, and seven dwellinghouses, Nos. 1 to 7, Bulmer terrace, in the rear, with reversion to the rack rents, amounting to upwards of £600 per annum, in 54 years. The property is equal in value to freehold, being copyhold of the manor of Kensington Abbot, subject to a nominal fine and quit rent.—Particulars of Messrs Holmer and Robinson, solicitors, 1 Dowgate hill chambers; and of the auctioneers, 80 Cheapside.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

Her Majesty's Royal Forests.—Oak Bark.—For Sale, about 2,300 Tons of Timber and Flittern Bark, situate in Delamere Forest, Cheshire; Hazleborough Wood, and Salcey Forest, Northamptonshire; Dean and High Meadow Forests, Gloucestershire: Alice Holt Forest, Bere, Parkhurst, and the New Forests, in Hampshire; Windsor Park and Forest, Berkshire; and at Andover, Hants.

MESSRS DRIVER HAVE BEEN honoured with instructions from the Hon. J. K. Howard, the Commissioner in charge of Her Majesty's Woods and Royal Forests, to SELL by AUCTION, at the Mart, London, on Friday, the 17th of May, at Twelve for One precisely, the BARK in the above Forests, and which will be sold as standing at the Pole, with the exception of a portion thereof, which is some of the produce of last year, and is stacked. The bark is now being stripped, and will be divided into Lots, and will contain in the whole about 210 tons in Delamere Forest, 40 tons in Hazleborough Forest, 83 tons in Salcey Forest, 718 tons in Dean Forest, 216 tons in High Meadow, 25 tons in Alice Holt Forest, 95 tons in Bere Forest, 30 tons in Parkhurst Forest, 785 tons in the New Forest, 75 tons in Windsor Park and Forest, and 23 tons 7 cwts at Andover, Hants. Samples will be on view at the offices of the Auctioneers, and at the Auction Mart, London. The bark in Delamere, Salcey, and Hazleborough Forests may be inspected and catalogues obtained on application to Mr Thomas Linnell, deputy surveyor, Eddesbury Lodge, Delamere Forest; that in Dean and High Meadow Forests on application to Sir James Campbell, Whitemead Park, Coleford; that in Alice Holt, Bere, and Parkhurst Forests on application to Mr N. Higinbotham, Holt Lodge, Farnham; that in the New Forest on application to Mr L. H. Cumberbatch, Queen's House, Lyndhurst; that at Windsor on application to Mr Wm. Menzies, Parkside, Englefield green, Staines; and that at Andover on application to Messrs Mortimore, who have charge of the same.—Catalogues may also be had at the office of Woods and Royal Forests, 2 Whitehall place; at the Auction Mart, London; of Messrs Clutton, 9 Whitehall place; and of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, S.W.

Local Board of Health Office, Fareham, May 6, 1861.

INVESTMENT.—The Fareham Local Board of Health invite tenders from persons who are willing to advance them a sum of from £4,000 to £5,000 (as may be required) on Mortgage of the General District Rates of the Parish of Fareham, Hants. Such sums to be paid by Annual Instalments during the next 30 years. Interest to be paid half-yearly.

Sealed tenders, stating the rate of interest, and endorsed "Tender for Loan," to be addressed to the Chairman of the Local Board of Health, Fareham, not later than Thursday, the 17th day of May instant.—By order of the Board, JAMES TAYLER, Clerk.

ALLOTMENT OF FREEHOLD BUILDING SITES.—The Conservative Land Society, 33 Norfolk street, Strand, W.C.—The Second Allotment for the present financial year is fixed for Thursday, the 16th of May, at the Offices, at noon precisely, on which occasion will be offered valuable Freehold Building Sites, on the following Estates:—No. 1 Roehampton Park (Second Portion); No. 2. Putney Heath Estate; No. 3. Kentish Town Estate. Plans of the Estates will be sent by post, on receipt of seven stamps for each separate plan. Printed particulars of the land will be forwarded, with the Society's prospectus, free of charge.
CHARLES LEWIS GRUNEISEN, Secretary.

FREDK G. SMITH, Secretary to the London Board.
No. 37 Cornhill, London.

UNIVERSAL LIFE ASSURANCE SOCIETY, No. 1 King William-street, E.C.
Established under Special Act of Parliament in 1834.

The Twenty-Seventh Annual General Meeting of this Society was held on the 8th instant.

The progressive improvement of the Society's business enabled the Directors to declare the sum of £204,537 2s 7d as the profits for the last Five Years, one-fifth of which is divisible among the Policy and Shareholders, in the proportion of three-fourths to the former, and one-fourth to the latter. The Directors have, however, restricted the actual division to the sum of £39,828 18s 8d, which still affords the large reduction of 45 per cent. from the premiums of all Policies entitled to participate in the profits, being 5 per cent. in excess of the reduction of last year. The effect of this reduction upon the Interests of Policy-holders will be understood by stating that the premium in 1861 upon a Policy for £1,000 effected in 1856 on the life of a person aged 40, would be reduced this year from £31 10s to £17 6s 6d, and others in proportion.

	£	s	d
New policies were issued during the past year for	147,750	0	0
Yielding annual premiums of	6,183	3	11
Policies have been issued since 1834 for	6,464,652	14	11
The claims paid since 1834 amount to the sum of	1,166,596	3	8
The amount assured under existing policies is	2,183,974	14	8
The amount of existing assets exceeds	770,000	0	0

By order of the Board,
M. E. IMPEY, Secretary.

EARLY PARTICIPATION IN PROFITS.

CLERICAL, MEDICAL, AND GENERAL LIFE ASSURANCE SOCIETY, 18 St James's square, London.

Policies in existence on June 30th, 1861, will participate in the Seventh Bonus to be declared in January, 1862; so that persons who complete Assurances before June 30th, 1861, will share in that Division, although one Premium only will have been paid.

Tables of Rates and Forms of Proposal can be obtained of any of the Society's Agents, or of

GEORGE CUTCLIFFE, Actuary and Secretary.

ARGUS LIFE ASSURANCE COMPANY, 39 Throgmorton street, Bank.
CHAIRMAN—William Leaf, Esq.
DEPUTY CHAIRMAN—John Humphery, Esq., Alderman.

Accumulated Fund, £500,000. Income, £85,000 per annum: Subscribed capital, £300,000.

Premium to Assure £100.			Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
	£ s. d	£ s d	£ s d	£ s d

Advances on policies when their value exceeds £50.

Half or one-third credit allowed on whole life policies.

Residence in time of peace in any part of Europe. No extra charge for the Militia, Volunteer Rifle, or Artillery Corps, on home service.

Claims paid one month after proof of death has been admitted.

Medical attendants remunerated for their reports.

The medical officers attend every day at a quarter before 2 o'clock. E. BATES, Resident Director.

CANADA LANDED CREDIT COMPANY.
Incorporated by Act of the Parliament of Canada.
Capital £200,000.
PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L Denison, Esq.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Charles Donaldson, Esq.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith Collingwood.
E. W. Thomsen, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and 10 years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents, Brunton and Son, Auction Mart chambers, Bartholomew lane, London.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

EMPLOYMENT OF MONEY, with partial employment of time.—£500 required, for which security will be given over leasehold property. This is an eligible opening for a Gentleman who can post books, and has a few hours to spare any part of the day. Unexceptionable references given and required.—Apply, by letter, to Mr Hutchinson, Accountant, 7 Tokenhouse yard, Lothbury, London, E.C.

A GENTLEMAN OF MEANS wishes another party to join him in the carrying out of a new and profitable method (now in work) of manufacturing a metal in large consumption. £3,000 to £5,000 will in all probability be required.—Apply, by letter, to A. B., care of Jones and Kean, 8 Bury street, St James's, S.W.

INDIA OR CHINA.—A Scotchman, aged 26, at present Clerk and Bookkeeper to an extensive Export House in the City, wishes to meet with a similar situation in either of the above Countries.—Address X.L.C.R., Geo. Poole, Esq., 8 Fore street, E.C.

INDIA AND CHINA.—A Gentleman, having a thorough knowledge of grey goods, and of the shipping business in general, is desirous of a situation in either of the above places.—Address, Mr L., Box 77, Post office, Manchester.

BOMBAY AND PERNAMBUCO.—Wanted, Agencies for the above places by a Gentleman in Manchester who has a good connection amongst spinners and manufacturers.—Apply A. B., care of Henry Greenwood, Advertising Agent, Liverpool.

TO SHIPPERS AND MERCHANTS.—The Advertiser, possessing great commercial experience, is open to an engagement as Manager, or in a confidential position. He could also undertake the Insurance business at Lloyd's. Unexceptionable references can be given.—Address M. X. N., care of Mr G. Street, Advertising offices, 30 Cornhill, E.C.

CLERK.—THE ADVERTISER, who has lately returned from South America, is desirous of a re-engagement, either at home or abroad. Has a thorough knowledge of book-keeping and accounts, and is well acquainted with Spanish.—Address E. G., Messrs Mackie and North's, 29 Threadneedle street, E.C.

CLERK.—WANTED BY THE Advertiser (26 years of age), who has some private means, a situation as Clerk in a merchant's office; has been some years in a good house of business in the City. Very respectable references can be given.—Address, S.D., care of Messrs Davies and Co., Advertising Agents, Finch lane, Cornhill.

THE "TIMES," £1 1s per QUARTER free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. Magazines, Periodicals, and all London Newspapers supplied to order by W. ABBOTT, Newspaper and Advertisement Agent, 7 Little Tower street, London, E.C.

Fellows, Ivory Tickets, and persons registered under the Debentures Agreement, Free.

Doors open each Day, at 1 o'clock.

Tickets for the above will be ready for Sale on MONDAY, the 13th, but can only be had on Orders signed by a Fellow.

All the Shows will be held under Roofed Buildings.

After the opening, on June 5, Bands will play, on Wednesdays and Saturdays, in June and July.

As the Works in the Garden are still in progress, the Council have decided that the right of entry to these Promenades must, for the present Season, be limited to Fellows, who (except on Wednesday, July 10, a Fête Day,) may personally introduce two Friends, the holders of Ivory Tickets, who may introduce two Friends, and to those persons whose names are registered under the Debenture Agreement; and on Saturdays, after 1 o'clock, by Tickets, price 2s 6d, obtainable on the Order of a Fellow.

*** Ballots for Election of Fellows will take place on the 14th, 24th, and 31st of May. AND. MURRAY.

RIMMEL'S PATENT PERFUME VAPORISER, an Elegant, Cheap, and Portable Apparatus, recommended by Dr LETHEBY and Dr HASSALL for diffusing the fragrance of flowers in apartments, ball-rooms, &c, and purifying the air in dwelling-houses and sick-rooms. Price from 6s. Sold by all Perfumery Dealers, and by the Inventor and Patentee, EUGENE RIMMEL, Perfumer, 96 Strand and 24 Cornhill, London; and 17 Boulevard des Italiens, Paris.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William-street, London bridge."

THE STATE OF THE MONEY MARKET.

THE Directors of the Bank of England abstained from raising their rate of discount on Thursday, and the account which we this day publish shows that there was no strict call upon them, notwithstanding the great increase in their discounts, amounting to 1,255,000*l.*

	£
Their reserve of notes was	6,316,015
— — bullion was	12,873,619

while the liabilities of the Banking Department were:—

	£
Public deposits	6,083,595
Private deposits	12,070,911
Seven day bills	636,172
Total	18,790,678

—a state of accounts which certainly did not *require* an alteration in the rate of discount, and would, in the opinion of most persons, scarcely have justified any.

Nevertheless, there are several reasons which tend to prove that a rise in the rate of interest cannot be far distant. First, the Bank rate has been somewhat under the ordinary rate, as is proved by the great pressure on the Bank discounts for the last day or two, and as will be admitted by every one practically conversant with Lombard street. Secondly, there is a slight drain of silver to India for mercantile purposes,—not a very great matter certainly in itself, but nevertheless of some moment when joined to other considerations, and when we remember how potent drains of silver to the East have proved sometimes heretofore. Thirdly, there is the state of America,—the effects of which are unquestionably hard to predict, because the causes are new and the juncture is anomalous. On the whole, however, it would appear that the political state of America is likely to draw bullion from this country, and thereby to augment the rate of interest. All wars absorb *hard cash:* not only do actual military operations require it in proportion to the scale on which they are carried on, but the confusion which is incident to war tends to develop the practice of hoarding with great celerity and to a very important extent. Small sums are hoarded by nearly every one, and the aggregate is immense. Credit moreover is, as we know, the great economiser of coin, and credit is an artificial—a highly artificial product of peace. The moment war is commenced, credit declines: the economising expedients with which we are so familiar cease to be possible, and traffic requires far more money than it did before. There will, therefore, during a period of confusion be a great demand in America for the precious metals if only they can be procured.

Whether they can be so procured we will hardly venture to predict, but we will observe that the direct balance of trade between America and England is always very much against us. England is always in debt. We have—

	Exports other than Bullion from America to England. £	Exports other than Bullion from England to America. £
In 1859	34,265,237	22,116,372
In 1860	44,724,624	21,018,500

showing a balance to be paid by England. It is paid by the transmission of American drafts upon us from China and India—nations from which the Americans import much more than an equivalent for their exports. The consequence is plain: if the consumptive power of America falls off, if they buy less seed in India and less tea in China, the usual mode of rectifying the adverse English balance will become inapplicable. It is quite certain that the consuming power of America will be reduced, and though we may send more warlike stores across the Atlantic than ever before, though our shipowners may earn some extra profits in consequence of being exempt from risks to which their rivals are exposed, it is not likely that either of these subordinate considerations will very materially counterbalance the effect of the diminution in ordinary and regular consumption. In a word, we shall go on consuming their cotton, and they will consume far less of our manufactures, and far less, too, of those other articles grown in other countries which are indirectly paid for by credits upon England. The *ultimate* consequence is inevitably an adverse balance of trade.

At what moment these causes will operate it is impossible for anything save commercial omniscience to determine. The exact state of the accounts between country and country is far beyond the reach of ordinary statistics. We can tell what goods actually pass from shore to shore, but what credit is given by each country to the other, and how that credit varies from time to time, are far beyond *accurate* computation.

On the whole, therefore, the duty of the Bank is clear. They should not raise the rate until a drain of bullion sets in, or the state of the outer market compels them to raise it; but the Directors should bear in mind the peculiar position of the country, and especially of its American relations, and be more keenly alive than they otherwise would be to the commencement of a drain and to the other occurrences of the market.

THE LEGAL RELATION OF ENGLAND AND OF INDIVIDUAL ENGLISHMEN TO THE CIVIL STRUGGLE IN THE UNITED STATES.

NOTHING is more desirable than that we ourselves should have, and that the rest of the world should have, accurate notions of our precise position with respect to the civil conflict which is in progress between the now disunited States of America; and, at the same time, not many things are more difficult. The case is so new that it is difficult to realise its true features and to apprehend distinctly its proper relations either to recognised principles or to our own interests. Curiously, too, we in England have generally been the belligerent and America the neutral nation; and, now that the position is reversed, in some not unimportant

points our former tenets are the more agreeable to them, and their former tenets are more agreeable to us. In these circumstances our duty is a duty of caution. We should be wary in acting, and almost as wary in speaking: we should be very slow to do any act which would embroil us in a discord from which neither of the combatants can hope for anything but disaster; and we should be slow, too, in committing ourselves to any international *formulæ* which might in the rapid course of events, from the unforeseen effect of some omitted consideration, commit us to the very course of conduct we wished to avoid, and immerse us in the dangers we had hoped to shun.

Some important conclusions, however, can be laid down very easily and very clearly. In the first place, we should on no account as yet recognise the Southern States as a new nation. Such an act would be wholly uncalled for, either by precedent, by reason, or by natural feeling. We cannot, with our ethical maxims, be over-ready to favour a federation of which slavery is not the accident but the principle: reason tells us that we should be slow to offend a Government with which we are in amity by recognising any seceders from it: the established precedents of international law tell us that we have our choice, and that there is no call upon us to recognise the Southern States of America unless we like it.

On the other hand, we are bound by all sound principle and by precedent to recognise the Southern States as belligerents. Common sense tells us that when two great sections of a nation are contending, whether the cause of strife be mastery on the one hand or independence on the other, or any other cause whatever, it would not only be absurd but wicked to treat either of the combatants as a herd of rioters or casual breakers of the peace. The two parties themselves are obliged to treat each other more or less according to the international law of belligerent relations, and lookers-on must do so also. We adopted this course in the case of Greece and Turkey; and though in no other respect are the Northern States of the Union at all like the Empire of Turkey, they are like it in being the State from which the secession is in progress. Both are, to use a phrase familiar to all Scotchmen, the *residuary* States; and the entire difference of collateral circumstances must not withdraw our attention from the single material consideration. It is scarcely necessary to point out what would be our position if we did not recognise the South as having the usual rights of belligerents. We should then be constant and close spectators of a maritime conflict in which we gave one party all the rights of civilisation, and the other party none of the rights; in which we recognised one party as regular combatants, and treated the other as tumultuous rebels; in which we, though constantly professing neutrality, should be in fact taking by distinct policy a definite side. It will be very difficult for England as it is to stand clear of all collision in the complicated naval war which seems to be close at hand. Though the force of privateers and other ships that the South can raise will be petty in comparison with European ideas, it is nevertheless considerable, and may come into collision with us at very many points, and therefore it is our clear interest as well as our great duty to steer clear of the conflict by maintaining an *absolute* neutrality.

This absolute neutrality would in one respect be very favourable to the North. It would compel us to deal with a blockade of the Southern ports as if it were an ordinary blockade between hostile nations. It has been questioned whether a nation could blockade its own ports, and it would be a serious question whether a Government would be justified in using such an extreme expedient to quell a mere local disturbance, or a riot in a town, or some series of acts by a municipality which it did not recognise. But when the ordinary rules of real war are by admission to regulate the conflict, the right of blockade must be accepted as one of the inseparable peculiarities of the adopted code.

It is possible that the American navy may at present be too dispersed to make such a blockade effective for the present, and it is also possible that now that the cotton crop of this year has been shipped, the Southern States will not much care for it for the present; but still it is one of the not improbable incidents of a not very distant future, and therefore it is important to observe that the admission of the South to the *status* of a belligerent will then be as advantageous to the North, as for the moment it is advantageous to the South itself.

These considerations are the most important of any at the present juncture as to the conduct of England as a State. It remains to consider the conduct of individual Englishmen, and on this point the English law is tolerably clear. The Foreign Enlistment Act, which is held to be only declaratory of the common law, is express on the one most essential point. It has been thought that letters of marque could be issued to Englishmen, and that British ships could be fitted out as privateers in London or in Canada, but such acts are as plainly illegal as any words can make them. The Act says:—"That if any person, within any part of the United "Kingdom, or in any part of His Majesty's dominions "beyond the seas, shall, without the leave and licence of "His Majesty for that purpose first had and obtained as "aforesaid, equip, furnish, fit out, or arm, or attempt "or endeavour to *equip, furnish, fit out, or arm*, or pro- "cure to be equipped, furnished, fitted out, or armed, or "shall knowingly aid, assist, or be concerned in the equipping, "furnishing, fitting out, or arming of any ship or vessel, with "intent or in order that such ship or vessel shall be em- "ployed in the service of any foreign Prince, State, or "Potentate, or of any foreign colony, province, or part of "any province or people, or of any person or persons exer- "cising or assuming to exercise any powers of government "in or over any foreign state, colony, province, or part of "any province or people, as a transport or store ship, or "with intent *to cruise or commit hostilities against any Prince, "State, or Potentate*, or against the subjects or citizens of any "Prince, State, or Potentate, or against the persons exer- "cising or assuming to exercise the powers of government in "any colony, province, or part of any province or country, "or against the inhabitants of any foreign colony, province, "or part of any province or country, with whom His Ma- "jesty shall not then be at war;" shall be guilty of a misdemeanour, and be punishable personally by fine and imprisonment, while the ship so equipped is to be forfeited with its stores and ammunition.

It is happily, therefore, clear that we should not be tempted to embroil ourselves with either party in this disastrous conflict by permitting individuals to fit out privateers to aid and assist the other. It would have been very dangerous to England if our law had by any inadvertence allowed any unauthorised acts of individual intervention. We might then have been drawn into the conflict at any moment by some thoughtless act of some reckless individual, or the overbearing passion of either of two most passionate combatants.

This would have been aggravated if the North should persevere in their unwise declaration to treat the Southern privateers as simple pirates, and to visit them with the appropriate penalties. If, indeed, the United States had been wise enough to abolish privateering when requested to do so by the Congress of Paris, they would have had a clear right to act in the manner proposed. But now they have claimed the right of fitting out privateers or themselves, and are bound to afford to their *brethren* of the South the same advantage of those rules of warfare which they claim for themselves. They are bound in duty to carry on a civil war by the rules which *they* admit to be binding for all other war.

On the whole, therefore, it may be said that the duty of England and of Englishmen is for the moment plain and simple, though painful as in such terrible events any duty must be. It is to stand steadily apart from a course of events in which our participation would help no one who should be helped, and aid no cause which ought to be aided. As nations and as individuals, it is our evident interest and an incumbent obligation on us to take no part, by word or deed, with either party,—unaffected either by the Free Trade enthusiasm on the one hand, or the Anti-Slavery enthusiasm on the other.

HUNGARY AND ENGLISH THEORIES OF AUSTRIA.

THE death of Count Ladislaus Teleky under circumstances which leave little doubt of his assassination, will do much to destroy the last hope of any reconciliation between Austria and Hungary. It is not imaginable, indeed, that his death was plotted by any of the higher *employés* of the Austrian Government; and it need not have been brought about by

any of the lowest agents of its police. But it will certainly be ascribed to the machinations of the Austrian party in Hungary, and unless it prove to have been an act of suicide, not without reason. Nor can the effect which the violent end of the Liberal leader has produced upon the Diet be measured even by the degree in which credence is placed in such suspicions. The mere catastrophe has excited to the highest pitch what we may call the *nerves* of partisan feeling on both sides,—and will sweep away all disposition to compromise, if any yet remains in the Hungarian Diet.

The position in which both Austria and Hungary stand becomes every week one of more and more blank hostility, and soon we fear must come the moment when all the concessions made to Hungary in October will be recalled, and when martial law must again be proclaimed there. The country is already full of Bohemian and German soldiers, quartered upon a starving peasantry, entirely without arms of any description, and wholly unable to resist a *régime* of force whenever it shall be reintroduced. On the other hand, Austria will naturally enough be most reluctant to recur to the hateful system of the last twelve years. The German Provinces, indeed, do not appear by any means reluctant to support the Imperial Government in such a policy. But the German Provinces form but a limited portion of the Empire even as now represented in the Reichsrath, and it seems pretty certain that Galicia and probably the Slavonic Provinces will do all in their power to cripple the Government in any attempt to return to the military system in Hungary. Indeed, there is a yet more formidable consideration still. The Hungarian army in Italy, so far from being a protection, is an anxiety to the Austrian Government,—little less of an anxiety than it would be on the other side of the Alps and within reach of Hungary or Transylvania. The first act of returning military despotism in Hungary would not improbably be the signal for a very serious outbreak in the Hungarian and perhaps Croatian portion of the army in Italy; and at such a crisis as the present in Venetia, the Austrian Cabinet would profoundly dread any step likely to lead to such an outbreak. There are, therefore, grave reasons why Austria should delay as long as possible any attempt to reduce the unruly Hungarian Diet to silence if not to obedience, at least till she can feel her way to firm and cordial support from the non-Hungarian populations represented in the Imperial Parliament. Hungary is absolutely helpless before Austria, but Austria is for the present not much less helpless before Hungary, since even a futile rebellion there might have an electric effect on her Italian army, and would certainly divide still more the not very united Parliament by whose co-operation she hopes to recruit once again the resources of her bankrupt Exchequer.

Under these circumstances, we confess that it seems to us a little puerile in some of our English statesmen to go on supporting the cause of Austria north of the Alps expressly on the ground that a strong Power is needed to separate an aggressive Russia from a scheming France. Let us test the hypothesis by the present condition of affairs. Fortunately for Europe, Russia is just now too much occupied in contriving to emancipate her serfs without any internal convulsion, to be aggressive; and France, if she is scheming for a new move, does not seem to be meditating a dash in the direction of the Danube. But then, of course, the theory of a strong Austrian Empire is not wanted for such a situation as the present. It is wanted for a time when either Russia is aggressive, or France is disposed to disturb the affairs of the South of Europe. And if this were the case now, how would Austria affect the European position in the mind of either Russia or France? Only we may safely say as affording one of the most excellent occasions for invasion or intrigue with which a meddling Power was ever furnished. Russia might complain that the weakness of Austria and the disaffection of Hungary was encouraging all the subordinate nationalities to revolt, and seriously endangering Russian Poland. She might offer to take the responsibility of keeping one or two of these troublesome peoples quiet, by occupying their territory till a greater strength was at the disposal of the Emperor of Austria, and intimate that if the request were declined, her own Provinces were so seriously compromised that she might be obliged to move without the Austrian consent. Such conduct would be exactly analogous to that which produced the Crimean war, only perhaps with greater show of real grievance. On the other hand, if France wished for an opportunity of intrigue, what better could offer than to declare the Hungarian question one so complicated with European interests as to demand the consideration of a European Congress, and to quarrel again with Austria on the strength of her declining to submit the Hungarian question to such a jurisdiction? We maintain, not only that Austria is not, and cannot become, what English statesmen choose to suppose her, but that, on the contrary, the inharmonious federation of nationalities of which the Empire is composed directly invites and cherishes the spirit in France and Russia which it is supposed to be the Austrian function to curb. Lord John Russell wants to see a real and effective wedge interposed between Southern Russia and France. Well, what wedge can be less effective than one composed, not only of fragments, but of fragments that do not fit closely into each other, but which everywhere show gaps, into which a curious hand might be conveniently thrust?

The truth is, that the Austrian Empire is a diplomatic tradition to which our rulers cannot rise superior. It is one of the most grievous wastes of English moral influence at a moment when we need all the influence we have, to be lending our aid to prop up an Empire which is not to be saved, and which we lose credit as well as strength in trying to save. There are elements in Austria,—the German and Bohemian for example,—which might be consolidated into a very powerful free State. But to hope that Hungary and Transylvania will ever lend their popular strength to that State after the long course of treachery and cruelty which they have experienced at its hands, is one of those wild hopes which only statesmen with a pet theory seem sanguine enough to entertain. These traditional prejudices die hard in Lord John Russell. It was long before he would give up the tradition of a divided Italy. We trust, however, it may not be very long before he gives up the vision of a revival of perfect harmony and strength in the present dislocated Austrian Empire.

THE LEGALITY OF THE COUNTRY CLEARING.

A CASE has this week been decided in the Court of Common Pleas, which is exceedingly important to bankers, and has some interest for the general public.

It is well known that there has been for many years a clearing-house in London, at which the bankers settle their respective demands upon one another every day. But the advantages of this were confined to London bankers; and until the means of communication and intercourse between town and country had been greatly developed, it was not thought to be possible that any others should enjoy a similar facility. Some months since, however, an expedient was adopted by which country bankers might effectually do so.

A clearing house was at first proposed, which the country bankers were to work themselves; but the London bankers, whether from the dread of seeing a large "country agency" established close beside them, or from some more public-spirited motive, undertook to manage the needful process for their respective country correspondents. The process is this: The country banker sends to his London agent the cheques upon all other country bankers which he receives during the day in the course of his business; the London agent forwards these cheques to the London agents of all these country bankers, and receives in return from them the corresponding cheques upon *his* country correspondent received by other London bankers. Each London banker at once transmits these cheques to the country banker upon whom they are drawn, and if notice is not given to the contrary, they are duly debited in the country banker's account.

This clearing is as effectual for business purposes as the London bankers' clearing, and is just as regular. All the cheques drawn upon the banks of the whole country are thus sent to Lombard street; by a few simple entries the balance is struck, and the whole account between the different banks of the country settled with very little trouble, and, as compared with the practice of former times, very little correspondence.

It will be evident, however, that this ingenious expedient necessarily entails a certain amount of delay. It cannot be

otherwise. If all cheques are to be sent round by London instead of being sent direct from one country bank to another, a certain delay—under the present postal regulations commonly the delay of a day—is necessarily incurred. In consequence, a legal difficulty was raised. A banker is bound at common law to use "due diligence" in transmitting to their ultimate destination all cheques paid into his bank: if he lose a day in sending them to London is that "due "diligence"?

The Court of Common Pleas has now decided that it is so, and on the following ground. There is an old-established rule which the Court now approves of and confirms, that a banker need not send off a cheque upon the day on which he receives it, but that he may hold it till the next day. Perhaps for general purposes, in the present day of developed banking and incessant communication, this licence is under most circumstances scarcely required. Every wise banker sends off the cheques he receives on the day on which he receives them: the sooner he can get them to their ultimate destination the better for all parties. Still the licence is useful in case of occasional accidents, and in the peculiar circumstances of distant places; and now it has a still further value as affording the needful legal basis to the "country clearing" in London. If a banker may lose a post and a day by keeping a cheque for no good purpose in his own drawer, *a fortiori* he may lose the same amount of time by sending a cheque to London for the purpose of being cleared. This is the simple view which the Courts of Law have now taken of the subject; and it may be assumed in future that it is consistent with due diligence in a banker to send country cheques to London, *provided he does so on the same day*, and does not, therefore, incur any greater delay than under the old customs and usages of business he was justified in incurring.

The practice of clearing in London has been now adopted by almost all the country bankers. All of any importance *receive* cheques from the clearing, and nearly all send to the clearing,—the London banker being, as we have explained, in each case the intermediate agent and the responsible manager of the transaction. In a little time the practice will probably become universal, as its convenience has been proved and its legality is now established.

It has been doubted by some country bankers, upon plausible though perhaps erroneous grounds, whether this practice of clearing in London is really an advantage to them or not. It has been said that it diminishes the draft circulation of the banker, which is a valuable part of his business, because it induces and enables the customer to send his cheque to London, instead of going to the bank and getting the banker's draft. And there can be no doubt that it has this effect. In the long run, if cheques can be conveniently transmitted, they will be transmitted, and an ordinary person will not usually take the trouble of getting a banker's draft, though he might diminish his liabilities by so doing.

But, on the other hand, stamped cheques *will* be sent, and before the country clearing were sent, very long distances. The country clearing did not invent the practice of transmission; it only gave a convenient and business-like arrangement to a practice already existing. It was the change in the law which allowed cheques to circulate beyond the radius of fifteen miles which first impaired the draft circulation of the country banker, and prevented its increasing, as it would have doubtless done otherwise, with the constant development of the trade of the country.

And, moreover, the facility of clearing in London makes country cheques of use on London. A practice most injurious to the country banker was beginning to grow up of persons in the country keeping accounts in London, and paying their London bills and their miscellaneous bills by cheques on London. This is now quite needless; a country bank cheque is for all practical purposes as good as a London cheque. It will pay London bills or bills elsewhere just as well. The country clearing, therefore, though in its first aspect not directly profitable to the country banker, will probably in the end prove to be so; and it is indubitably a very great convenience to the general public, because all persons living in the country are enabled to discharge their liabilities with the same convenience and celerity as those who live in London; and by no other expedient could they be enabled to do this.

THE OLD ITALIAN TARIFFS AND THE SARDINIAN TARIFF.

THE future commercial relations of England with Italy are likely to be of an importance second only to that of our relations with Germany and France. Even last year we exported of British and Irish produce to the value of 4,500,000*l* to Italy, and only to the value of 5,200,000*l* to France. And though France takes much more of our colonial produce than Italy, and sends us far more of her own manufactures and products than Italy has ever yet done,—yet the latter fact is in some measure due to the heavy export duties which all the minor States of Italy now united with Sardinia foolishly imposed, and which are nearly swept away by the assimilation of their tariffs with that of Sardinia. The Tuscan tariff, the most liberal in all Italy in its general scale of import duties, had an exceedingly burdensome list of export duties. "There are very few "articles indeed," says Mr Consul Macbean, in his report from Leghorn last autumn, "on which the Tuscan tariff "did not impose an export duty varying from 15s per "cwt on straw for plaiting, 13s 8d on raw silk, and "3s per cwt on rough alabaster, down to ½d per cwt "of terra umbra. The Sardinian tariff allows the free "export of everything, except oil (which pays about "2d instead of 8d per cwt), charcoal, firewood, rough or "sawn timber, stocks for muskets, arms, and rags." It is not, indeed, probable that Italy will soon be able to send us her own produce to anything like the amount of France; but if she does not pay us directly, she will indirectly through some other nation, and it is clear enough that English manufactures will find an extensive market there. It is, then, a matter of the most obvious interest to us to consider the commercial effects of the incorporation of the different States of Italy with Sardinia, and the modifications in her own Customs system which we ought to press upon Sardinia; and this an interesting return just presented to Parliament gives us some means of doing. It becomes evident from it, and from the knowledge which we possess of the Neapolitan tariff, that there are a few branches of trade in which the substitution of the Sardinian Customs will have a distinctly injurious effect, unless the Sardinian Commission which is to revise the tariff for United Italy should, as we have good reason to hope, adopt into the Sardinian tariff the more liberal scale of import duties of which Tuscany especially has long had reason to boast. On the other hand, the mere assimilation of the Customs,—the removal of the many vexatious Custom House barriers between the different little Italian States,—will be no small commercial gain; the almost total disappearance of export duties is not less beneficial; and, finally, there are some departments of our export trade to which the Sardinian tariff is far more favourable than that of any of the newly-added States,—the Two Sicilies, Tuscany, the Legations, or the smaller Duchies.

The change which, if it be permanent, will be most injurious to our trade with Italy, is the assimilation of the duties on cotton yarns, woollens and worsteds, to those of the Sardinian tariff.

The following table will show how much more burdensome is the Sardinian Custom duty in this respect than the old Tuscan:—

	Additional duty. s	d
Unbleached cotton twist under No. 45, per cwt.	7	10
— — — above No. 45	17	1
Grey calicoes, per piece of 24 yards	0	10
Cassinets, per piece of 37 yards	4	0
Printed cotton handkerchiefs, per dozen	0	5½
Printed calicoes, per piece of 35 yards	1	1
Moleskins, per piece of 70½ yards	7	2
Orleans with silk stripes, per piece of 29½ yards	3	0
Orleans without silk, per piece of 29½ yards	1	3
Pilot cloth, per piece of 27½ yards	7	7
Friezed or ratteened cloth, per piece of 37 yards	16	7
Lastings, per piece of 29½ yards	3	4
Cotton velvets, per piece of 47 yards	3	6

In the case of the Bradford and Huddersfield stuffs, which were much used by the lower classes of Tuscany, the Sardinian duty is, we are told, little short of 50 per cent. on the value, and will of course greatly diminish the export of these articles, unless the Sardinian duty is much lowered, as we trust it will be. Again, in cotton yarns, the trade to Tuscany had been a very remarkable and increasing one; while to Sardinia, in consequence of the high duty, it had

been comparatively very small, as the following figures show:—

DECLARED VALUE of COTTON YARNS EXPORTED from GREAT BRITAIN.

	1854.	1855.	1856.	1857.	1858.	1859.
	£	£	£	£	£	£
To Sardinia..	29,745 ...	61,397 ...	51,862 ...	55,202 ...	75,923 ...	69,860
To Tuscany..	95,152 ...	101,160 ...	135,465 ...	146,009 ...	175,257 ...	161,501

This is a remarkable comparison, when we consider that Sardinia before her extension was a country of considerably more than twice the population of Tuscany; and we can scarcely be wrong in assigning the heavy protective duty in Sardinia as at least one element in the cause of her comparatively small import. Lord John Russell has already, we are happy to see, communicated through Sir James Hudson his strong desire to see a reduction of the heavy Sardinian duty on yarns and textile fabrics, and we have every reason to hope that the request will be complied with.

On the other hand, there is a by no means unimportant list of articles of British production on which the Sardinian tariff weighs far less heavily than any of the tariffs which it superseded,—especially fish, coals, and the metals. At a time when the American tariff is threatening to put a stop to our exports of iron to the Northern States, it is at least satisfactory, if not a matter of the greatest immediate moment, to find that Italy will admit it on far more favourable terms than heretofore. Thus common iron (bar, bolt, hoop, &c.) now pays a duty of 2s 5d per cwt instead of 5s, the old Tuscan duty; iron wire pays 3s 4d instead of 6s 6d, pig lead of 7d instead of 1s, tin and zinc 6d in the place of 2s 6d. Coal also is free of duty according to the Sardinian tariff; while it paid a low duty under the old tariffs of Tuscany and the Duchies, and a tremendous one in the Papal States.

On the whole, we believe we shall have, even as matters at present stand, a balance of advantage in the unification of the Italian Customs systems and their assimilation to that of Sardinia; but we confidently hope that this advantage will be greatly increased by the promised revision, when we shall, we trust, see incorporated with the system of the Kingdom of Italy the best points in the tariff of each of the absorbed sections,—in short, an amalgamation of the most liberal parts of the Sardinian and Tuscan tariffs, without the many trifling but harassing import duties which both impose, and without any of the foolish Tuscan export duties.

THE JUDGMENT ON THE KOSSUTH NOTES.

IT was a matter of course that the judgment delivered on Saturday last by Vice-Chancellor Sir John Stuart in the case of the Emperor of Austria *versus* Messrs Day and M. Kossuth should be appealed against. We believe that the general opinion of the bar is entirely unfavourable to the judgment, and that no man of any eminence, except the plaintiff's counsel, hopes to see it confirmed.

Sir John Stuart argues that the Court of Chancery has a jurisdiction in the matter, on the ground that the right of the sovereign power to regulate the currency of any realm is not a municipal right, but a great public right, recognised and protected by the law of nations; that England recognises the right by enacting statutes against the counterfeiting or forging of foreign money; and that, in the absence of any other protection for it, the Court of Chancery is bound to step in and shield it. The argument is a very strange one on many accounts. The English statutes against counterfeiting and forging foreign money are rather an argument *against* our recognition of the supposed international law than in its favour, seeing that the statutes would scarcely be enacted if the common law of nations already afforded protection. Besides, their purpose is rather to protect the victims of false coin or forged notes in *this* country, than to protect the foreigner, who is usually held competent to protect himself.

Again, the interference of the Court of Chancery is limited to the defence of property-rights where there is no other remedy, and it might possibly be argued that for the manufacture of counterfeit notes or coin in England the only efficient remedy would be in England. But the issue of notes which bear expressly on the face of them the political assumption under which alone they could be available stands on quite different ground. The Emperor's property-rights (if they are recognised by England at all) in the currency of Hungary are not endangered by these notes in any way, though they clearly contemplate a time when these property-rights may have ceased to exist *de facto*. They assume a political convulsion as the only agency which would turn them to account; and, therefore, if they supplant the Emperor's property rights at all, it is only *through* his political rights. If any Austrian, dreaming of a conquest of England, were to prepare orders in his own name on Her Majesty's Exchequer for money,—no one would imagine that such orders, openly signed by a person without authority or right, would be an invasion of Her Majesty's property-rights, which a German Court of Chancery could restrain; because they could by no means injure or affect that property, even though after a certain political catastrophe they might conceivably take the place of Treasury warrants. Yet this is exactly a similar case. Instruments which have no tendency to excite a revolution, (or even if they had, would certainly not be liable to the jurisdiction of a *Chancery* Court on that account),—which, if they ever have any efficiency at all, can acquire it only through political events,—strike, in Sir John Stuart's opinion, not at the political stability, but at the civil property of the Emperor of Austria.

The precedent quoted by Sir John Stuart is a singularly unfortunate one. He tells us that in the case of Farina *v.* Silverlock, an injunction was granted against the issue of certain Eau de Cologne labels professing to state that the contents of the bottles bearing them was Eau de Cologne manufactured by Farina, although it was not proved that they had been, or were intended to be, put to any use injurious to Farina, simply on the ground that it was probable they might be so put. That judgment, however, was overruled on appeal, and overruled expressly because the defendant showed that under certain contingencies they were capable of a perfectly lawful use. The same may be said of these Kossuth notes. They are only an inchoate instrument, capable of uses, if they should ever have any, which may be either lawful or unlawful in Austria according to the course of future events.

It is indeed quite clear that if Kossuth has been guilty of any breach of law at all, it is a criminal offence, a political conspiracy,—if that *be* an offence under our law,—to upset the power of the Emperor of Austria in Hungary. This is a case for a Common Law Court and a jury. It is a case doubtless which could not be successfully pressed by the Emperor of Austria before any English jury,—both because the notes are very insufficient evidence of any conspiracy to upset the power of the Austrian Government, and because it is by no means certain that such a conspiracy, if proved, is a criminal offence by English law at all. But if there has been a breach of law at all, it was of the law of conspiracy. It is incredible that the Court of Chancery can have any jurisdiction in the matter, and it was something of an artifice in the Emperor of Austria's representatives to take their case into the only English Court in which, from personal rather than legal considerations, there was any hope of their getting a favourable judgment. We confidently expect that the decision will be reversed by the Court above.

Agriculture.

THE DUTIES OF LANDLORDS AND TENANTS.

PLEAS FOR MODERN FEUDALISM.

THE extent to which feudalism infects the relations of landowners and tenant-farmers in England, as it dominates in our landed property law, is the most serious, we might almost say the sole, obstacle to modern agricultural progress. Perhaps this has seldom been more forcibly illustrated than by a lecture recently delivered at a monthly meeting of the Blandford (Dorsetshire) Farmer's Club, by the Rev. Lord Sidney Godolphin Osborne, on "The Respective Duties of Landlord, Tenant, and Labourer." The Reverend and Noble Lecturer is well known as an earnest philanthropical writer, and is in many respects a man of liberal views. Many of the practical conclusions, too, at which he arrives in his lecture are sound and sensible, and considerably in advance of the general opinion of his class on such subjects. Yet we find him enunciating principles—or prejudices—in reference to the relations which should subsist between the owners of land and the occupying tenants, utterly inconsistent with modern husbandry, regarded as a business carried on by men of capital. It seems that he was invited to lecture on this thesis, and though offered the choice of other subjects adopted that suggested. And he intended to adapt his lecture to his audience, for he said "In the consideration of my subject I feel bound to keep in view whom it is I am addressing—individuals engaged, as the rule, in business as tenants of farms, for the most part ob-

taining their incomes from the profit they derive by the cultivation of the land they occupy, who have formed themselves into a club to discuss subjects incidental to their own position as cultivators of the soil—as tenants in connection with the landlords from whom they rent their farms—and as employers in connection with the labourers they hire to do their work." We do not gather from the report we have seen what acceptance this lecture met with from the farmers present; but they could scarcely have considered it anything short of an apology for feudal landlordism. The lecturer himself, however, had specially adapted his remarks to his own notions of the requirements of a meeting of Dorsetshire farmers.

The terms of the thesis were somewhat ambiguous. The "respective duties" of landlords and tenants mean properly the respective obligations which by custom and agreement they owe to each other. These ought to be plainly and simply defined in a lease or written agreement, just as the "respective duties" of the owner and occupier of a house in Fleet street are specified, and outside the lease or agreement there are no "duties" between the landlord and tenant of a farm than such as subsist between all the members of a community. That is the natural, the practical, and the commercial view of the subject. That is not by any means the limit assigned by Lord Sidney Godolphin Osborne to the word "duty" in the connection between landowners and tenant-farmers. Assuming "to speak to two of these parties" as he found them there and in many other large counties, "as resident landlords possessed of large estates—tenants, in the occupation of large holdings," he thus defines "duty" as applied to the landlord. "I am not to regard him simply as a landowner, but as a landlord—not as one possessed in fee of a certain portion of soil, but one so possessed, who *deputes* (mark the word) to others that cultivation which is to cause it to return its fair value in rental to himself." Now here in the outset of the definition of "duty" as applied to the landlord, we find a term used which is altogether inapplicable to the relation of landlord and tenant. The landlord does not "depute" the cultivation of the land to his tenant; he lets it to him for a money consideration. He "deputes" the management of his estate to his steward, of his home farm to his bailiff, of his game and deer park to his gamekeeper, of his racers and hunters to his stud-groom; to each and all of these dependents he concedes powers and imposes duties which he may recall or vary at any moment. In a word, he "deputes" to them functions which he can more conveniently exercise by deputies, *i.e.*, servants. But with the tenants of his farms he makes bargains. For money rents they contract for the use of the farms for a definite period with the purpose of cultivating them for their own benefit. They pay the price and are entitled to the commodity. There is no deputation in the matter. It is a commercial bargain—of which it may be truly said the landlord commonly gets the best end. The context, however, shows the sense in which the lecturer used the word was something very different from the legal and proper definition of "duty." He says: "As a landowner on a large scale he at once obtains that which we all love—an influence over others, capable of being exercised for great good." May we not also say or for great evil? Of that more anon. Again: "As the owner of large landed property, the State most wisely treats him with special deference, is always ready to accord him certain privileges, place him in high authority, oftentimes to give him and his heirs high rank." Now to follow this lead, to show why and how the landed interest is predominant in the State, would take us somewhat beyond our province in our agricultural columns, but it may be suggested that not a small portion of the British community treats, the "special deference" the State pays to the landed aristocracy as a most grievous abuse. Be that as it may, it is obvious that, though it may be the "duty" of a "landlord" to himself, to his family, to his caste, or to his ambition, to use his territorial possessions for the acquirement of political influence as a means of gaining place, pension, or peerage, such objects cannot come within the scope of his "duty" as a landowner. On the contrary, such objects may and not seldom do conflict alike with his duty and interest as a landed proprietor.

Here we have a passage in support of pure feudalism:—"Just as a man has others dependent upon him does his own worldly importance and responsibility increase; but the nature of the tie between him and those who have to look up to him, being subject to his good or ill will, *has a great deal to do with the real weight of his position.*" Again, it is admitted that the first consideration of a landowner is "how he can best obtain in income a fair owner's share in the value of the land he lets to tenants," *i.e.*, the best rent. He is to obtain this, "and yet preserve to himself that position as head of the estate which constitutes, not only one great element in the value of landed property, but involves also the power of making his estate, through those who live on it, a healthy portion of the commonwealth.....It follows, then, that one duty of a landlord is to secure, in the obtaining his rental, as far as may be possible, that he obtains it under conditions which may give him a tenantry who will fulfil their duty to him, and to those they employ, as he is also bound to do his duty to both. The landlord of the present day has to take anything but a superficial view of estate management." What is this but asserting a right of constant, perpetual control on the part of the landlord over his tenants? And for what? Why for the increase of his "worldly importance," by rendering his tenants hourly subject to his "good or ill will." Of course this is only a paraphrastic euphuism for the proposition, that a landlord ought to get the best rent which is consistent with controlling the votes of his tenants for the advancement of his own political influence.

This is brought out more strongly when the lecturer treats of the "influences of the landlord and methods of letting farms." He says the landlord's "position upon the estate will depend upon the *direct influence he can himself bring to bear upon every part of it.* Just as its whole economy is more or less dependent upon the influence he may have over all concerned with it, as occupiers, labourers, and others, will more or less be the value of his real position *as its central head.* Possessory right involves a large amount of free power of action. It is this which gives what is called territorial position its great value. Just as the right of action on the part of the owner of the land is restricted on any part of the estate, in so far as he cuts off from himself power to control its general economy, *so much the less will be his social importance* in regard to his property, and therefore his direct power to effect good"! This is asserting the right and "duty" of using proprietary interests to establish a petty local despotism. Let a landlord mean ever so well, he cannot be trusted—if he be a wise man he will not trust himself,—to retain such absolute and irresponsible power over the occupying tenants of his farms, as will render him the sole judge in case of any diversity or difference between himself and his tenants. Experience, in nearly every rural district of England, has proved that such power as the Rev. Lecturer claims for the landlord has never been, and cannot be, exercised for good, though it often has been, and may always be, exercised for evil. The instances which could be cited to the contrary are merely cases in which the landlord, though retaining the despotic power, has never exercised it at all. If there were not many such instances, English husbandry, such it is, could not exist. The principles enunciated by Lord S. G. Osborne rather belong to the age when a predatory chief seized the lands of a country and parcelled them out amongst his followers, retaining the original occupiers in a state of serfdom, than to an English estate in the present day. In short, he asserts the feudal principle as a modern and practicable one, though many of his suggestions as to modern husbandry are quite inconsistent with that principle. Of course the lecturer objected to leases, as making the tenant independent, who, performing his own part of the contract, "would repel all interference" on the part of the landlord. Now this really is just what is indispensable to the further progress of agriculture. But from seeking such shocking independence the Dorsetshire farmers were to be frightened by such argument as this: "Such a tenant will only have obtained his farm by outbidding other competitors for it. We all know the weakness of human nature when exposed to the allurements of a sale by auction; how men will buy for the sake of buying, with little reference to the question of the value of what is bought. ... .A landlord by the tender system may obtain a very high rental; there will be competitors wanting farms.....but the very eager and perhaps the best men will for the time have their understandings blinded." The successful offerer may get the farm for a twenty-one years' lease, and find he has agreed to give too much rent. "The occupier of such a farm," says the lecturer, "may be a good farmer, and what is called a good fellow; I do not believe that he will be *in my sense of the word* a good tenant." Oh dear no, he will be far too independent, he will "repel interference" by the landlord, and it is not impossible that he may vote against that political party in the State from which his landlord is expecting a Peerage! Facts, however, directly contradict the lecturer's view. He says, "it is the duty of a landlord to abstain from this system of letting," *i.e.*, letting on lease by tender. But are there no tenders, is there no competition for farms let on yearly hirings? The truth is, that many men will take a farm by the year on terms, or subject to obstacles and burdens they would not accede to if the farm could only be taken on a lease. Then inferior men offer and inferior men are accepted as tenants by the year, than would offer or be thought of as leaseholders. A deliberate tender for a farm on lease renders careful calculation and prevision necessary, and no farmer in offering for a farm is ever influenced by anysuch silly feeling as the lecturer supposes to influence the bidders at an auction. The system of letting farms in Scotland and in the North of England was referred to, "and no evil follows from it. It may be so. I am arguing against the principle. I cannot say how, where it has become general and not unpopular, it may or may not have been qualified by particular provisions in the leases, or by the weight of long-existing understood interpretation, giving to it a very different complexion from that it may appear to possess." This is mere evasion, a shutting the eye, s to easily demonstrated facts. It possibly too may have served as a propitiation to actual yearly tenants, who might not feel quite easy at the introduction of leases with the chance of some one offering higher rents than they have been accustomed to pay.

So far are intelligent farmers from being led rashly into tenders for leases without calculation, that it has been found that they are always ready to give more rent for a long than for a short lease. This is quite natural, and the reasons for it are obvious enough to practical men; but on persons who regard farmers as merely the retainers or dependents of the owners of the land, any reference to facts which contradict their own prejudices would probably be

thrown away. To the general reader it may be of interest to mention that Mr John Grey of Dilston, the intelligent agent of the Greenwich Hospital estates in Northumberland, found that the longer the term proposed the higher the rent offered. Having two farms to let, he "offered them on leases of 15 or 21 years, as the parties might propose. The result was, that of ten proposals for one farm which was eventually let at 2,000*l*, only three offered for both terms, and mark the difference of the offers. One for fifteen years was 1,630*l*, but for twenty-one years 1,760*l*—viz., 130*l* more for the longer term during the whole lease." In another instance the difference of rent offered for a twenty-one over a fifteen years' lease was even greater, *i.e.*, 226*l*. "The other seven competitors offered only for a term of twenty-one years. Then for another farm offered on the same conditions, and let for 1,305*l*, of six parties, not one proposed for the shorter term." It would be a good thing for farmers if leases, either with or without lettings by tender, should become the rule in every agricultural district in England. We cannot believe that the Dorsetshire farmers could have sanctioned or approved such slavish and erroneous views of the relations of landlords and tenants as those proposed in the lecture we have referred to.

Literature.

COMMERCIAL LITERATURE.

The Banker's Magazine. May, 1861. Groombridge and Sons.
Hunt's Merchants' Magazine. April, 1861. New York: W. B. Dana.
Revue du Monde Colonial. 25th April, 1861. Paris: Bureaux de la Revue.

In the "Banker's Magazine" this month there is a continuation of an interesting article on American and Canadian Banking. The new Post Office Savings Banks scheme is also examined at length, and a general review is given of the proceedings of the principal Railway Companies of the United Kingdom during the past half-year.

"Hunt's Merchants' Magazine" wisely leaves general philosophy alone in this number, and discusses a question of more immediate interest to the mercantile community,—viz., Quarantine. The Morrill Tariff Act is also published, and a comparative table of the duties leviable under the several tariffs of 1842, 1846, 1857, and 1861.

The "Revue du Monde Colonial" is a publication devoted chiefly to the agricultural and industrial interests, and the present issue contains, among other things, remarks on the proposed Algerian railway system, the agriculture of Algeria, and an account of the production of cocoa and chocolate. A good deal of miscellaneous information, especially concerning the French colonies, is also provided.

Cotton in Turkey:—1. On Cotton Growing in Turkey and Syria. By William Sandford. 2. Railways, Cotton, and Provincial Exhibitions in Asia Minor. By Hyde Clarke. Constantinople: Schimpff. London: Saunders, Otley, and Co.

The above are two articles which have lately appeared in the "Levant Quarterly Review." Mr Sandford describes in detail the extraordinary facilities which Syria possesses for the cultivation of cotton, both from the fertility of the soil and the abundance of labour. In old times indeed it formed a regular branch of industry, until supplanted by the enterprise of the West. Mr Sandford supports his views by extracts from official despatches and other writings, which agree in stating that the only things required to raise almost any amount of the staple are foreign capital and energy. The Government have lately shown their willingness to assist the introduction of cotton growing by several important concessions with regard to the levying of tithes.

Mr Hyde Clarke describes the progress of the Smyrna and Aïdin Railway, gives a full account of the district through which the line passes and its productions, and examines at length the prospects of the undertaking and the traffic it is likely to receive. The latter, he estimates, will be considerable, not merely from the carriage of goods, but also from passengers, the inhabitants of that part of Turkey being stated to be essentially fond of change of scene, although they at present compulsorily lead stationary lives from the want of travelling facilities. The introduction of the railway has also led to a marked improvement in the native labourer, both Turkish and Greek, the provincial workmen being now considered two-thirds as good as the English navvies. Mr Clarke anticipates that in future, when the success of the Smyrna line is assured, local capital will be largely devoted to the construction of railways.

Canaux et Chemins de Fer. Par Eugene Delattre. Paris: Guillamin et Cie.

In this little work M. Delattre examines the position of the canals of France now that the country is covered by a network of railways, and advocates their being relieved from certain restrictions, which he contends *gives* the railway undue advantages in its present competition with the canal. M. Delattre also proposes that the Government should interfere by means of legislation, and especially by preventing reckless opposition, ruinous alike to both sides.

GENERAL LITERATURE.

Considerations on Representative Government. By John Stuart Mill. London: Parker and Bourn. 1861.

[first notice.]

All Mr Mill's books are able, thoughtful, and vigorous in a high degree. All of them are worthy of study, and most of them certain to influence to a very great extent the belief of the generation in which he lives, and perhaps to some extent of several generations subsequent to it. Certainly this book is not an exception. It is strongly conceived and vigorously reasoned. Its principles are comprehensive and sound, and held with that somewhat dictatorial grasp which gives Mr Mill's style a dogmatic and even professorial character. Still its later portions are unsatisfactory, and remind us of the vague concluding books to his "Logic," and in some degree to his "Political Economy," where the generalisations become too wide and thin to have much significance, and remind one of a leading article without a definite occasion or drift. The three or four last chapters, especially that on Nationality, are mere "leaders" on subjects so wide that a man of Mr Mill's genius should have written either a separate treatise on them or nothing at all.

For the early portion of the book, however, we feel sincerely grateful to Mr Mill. It is an exceedingly able protest, by the only living thinker of much authority among English Liberals, against that helpless and reluctant drifting of the Liberal party into pure democracy which is so melancholy a sign of their political imbecility. Mr Mill has not a vestige of sympathy with pure Toryism,—exceedingly little, if any, with mere inert Conservatism;—no one represents better the faith in the possibility, nay the duty, of constant political expansion,—of drawing a larger and larger portion of the population into the circle of political duties which connect them with the Government, give them a control over it, and interest them in what it does,—than Mr Mill. To the Radical party, therefore, he will speak with some chance of being heard. No one suspects him of reactionary fears. He outstrips many of the most radical in his advocacy of feminine rights. No one fancies that Mr Mill is identified with the interest of any party. He speaks from conviction, with all the traditions of the Benthamite school still fresh upon him,—for he was brought up in the very heart of it,—and we trust, therefore, that he may be listened to by those who most need his counsel.

The most valuable portion of Mr Mill's book is that which treats of the aim and meaning of true representation;—and the most questionable part is that which deals with the latest practical expedient for obtaining such a true representation for a country like England, his advocacy, namely, of Mr Hare's scheme.

Mr Mill lays down as the two main criteria of good government,—first, the degree in which it tends to improve the political qualities of the people governed,—and next, the degree in which the machinery is adapted to take advantage of all the political capacity in a people which exists, and apply it to the purposes of firm, intelligent, and just administration. The first end can only be secured for an advanced people by giving them a direct share and influence over the political institutions of the country; in short, by an adequate representative system. The second end,—that of obtaining for intelligent and capable and just administration,—is often secured nearly as adequately, and with less obvious impediments, Mr Mill points out, in bureaucratic systems, but only at the cost of completely sacrificing the first and still more important end. To secure the first end, Mr Mill shows that in a country where habits of order, independence, and obedience are so far advanced as in Great Britain, some share in the representation should be given to every respectable inhabitant of mature age. But Mr Mill contrasts very powerfully and ably, as we have so often done in these columns, the principle of representing *All*, with the democratic principle, as it is chiefly known in Great Britain, of representing all *local majorities*, and leaving all the minorities, however closely allied in conviction and however widely distributed, entirely unrepresented. We have so often insisted on the line of thought developed in the following passage, that it can scarcely be new to our readers; but we are glad to enforce it once more in the luminous language of Mr J. S. Mill:—

> The pure idea of democracy, according to its definition, is the government of the whole people, by the whole people, equally represented. Democracy as commonly conceived and hitherto practised, is the government of the whole people by a mere majority of the people, exclusively represented. The former is synonymous with the equality of all citizens; the latter, strangely confounded with it, is a government of privilege, in favour of the numerical majority, who alone possess practically any voice in the State. This is the inevitable consequence of the manner in which the votes are now taken, to the complete disfranchisement of minorities. The confusion of ideas here is great, but it is so easily cleared up, that one would suppose the slightest indication would be sufficient to place the matter in its true light before any mind of average intelligence. It would be so, but for the power of habit; owing to

which the simplest idea, if unfamiliar, has as great difficulty in making its way to the mind as a far more complicated one. That the minority must yield to the majority, the smaller number to the greater, is a familiar idea; and accordingly men think there is no necessity for using their minds any further, and it does not occur to them that there is any medium between allowing the smaller number to be equally powerful with the greater, and blotting out the smaller number altogether. In a representative body actually deliberating, the minority must of course be overruled and in an equal democracy (since the opinions of the constituents, when they insist on them, determine those of the representative body) the majority of the people, through their representatives, will outvote and prevail over the minority and their representatives. But does it follow that the minority should have no representatives at all? Because the majority ought to prevail over the minority, must the majority have all the votes, the minority none? Is it necessary that the minority should not even be heard? Nothing but habit and old association can reconcile any reasonable being to the needless injustice. In a really equal democracy, every or any section would be represented, not disproportionately, but proportionately. A majority of the electors would always have a majority of the representatives; but a minority of the electors would always have a minority of the representatives. Man for man, they would be as fully represented as the majority. Unless they are, there is not equal government, but a government of inequality and privilege: one part of the people rule over the rest: there is a part whose fair and equal share of influence in the representation is withheld from them; contrary to all just government, but above all contrary to the principle of democracy, which professes equality as its very root and foundation.....

Democracy, thus constituted, does not even attain its ostensible object, that of giving the powers of government in all cases to the numerical majority. It does something very different: it gives them to a majority of the majority; who may be, and often are, but a minority of the whole. All principles are most effectually tested by extreme cases. Suppose then, that, in a country governed by equal and universal suffrage, there is a contested election in every constituency, and every election is carried by a small majority. The Parliament thus brought together represents little more than a bare majority of the people. This Parliament proceeds to legislate, and adopts important measures by a bare majority of itself. What guarantee is there that these measures accord with the wishes of a majority of the people? Nearly half the electors, having been outvoted at the hustings, have no influence at all in the decision; and the whole of these may be, a majority of them probably are, hostile to the measures, having voted against those by whom they have been carried. Of the remaining electors, nearly half have chosen representatives who, by supposition, have voted against the measures. It is possible, therefore, and even probable, that the opinion which has prevailed was agreeable only to a minority of the nation, though a majority of that portion of it, whom the institutions of the country have erected into a ruling class.

The answer generally made to this argument is that the unfairness of result is neutralised by the varieties of conviction in different constituencies. Thus, a Conservative or even a Constitutionalist in Marylebone is lost, merged, utterly unrepresented,—but he virtually recovers a representation in consequence of the more moderate and constitutional views of the county members and the members for a hundred small boroughs. But Mr Mill answers with perfect justice, that the accidental rectification thus given to a serious injustice by the present system, would cease to operate if the present constituency were much enlarged or made identical with the whole population. The great uniformity and immense numbers of the manual labourers would then rule the representation everywhere,—and where any question was at issue between this class and the classes higher in the social scale, none other would get a hearing. Mr Mill points out that this is as great a political injury to the class thus exclusively favoured, as to those excluded, since, to use his own words, the political position which develops "the best and highest qualities, is the position of those who are strong enough to make reason prevail, but not strong enough to prevail against reason." Hence he lays it down that a representative system is expressly calculated to fail which does not in some way ensure a fair representation in the constitution to *all* classes in proportion to their real numerical importance and strength in the country.

But though this condition, if satisfied, would do much to secure a satisfactory political education to the people who should work it,—it would not be sufficient to secure the most effective machinery for taking advantage of the political capacities of the nation,—in short, it would not secure an affective *administration*. Let us suppose the representative body an exact counterpart of the nation, though on a diminished scale,—giving an image of all its blind wants, and passions, and partial intelligence, and limited education and self-control. All such imperfect elements should be represented no doubt, in order to ensure real self-government. But besides self-government, we want good government,—in other words, the most *skilful* use of the national resources which is compatible with self-government at all. Nor are the two conditions really incompatible. The least educated classes ought to have considerable power in order to prepare them for an intelligent use of it; but it will be far better for them *not* to have power in exact proportion to their numbers, because their capacity for conducting the government is not in proportion to their numbers. If, then, the political system is modified by giving a greater *relative* weight to the votes of the educated classes, the people's political training will be even more perfect, and the security for a well-chosen administration will be far more perfect. The working classes will be more likely to be in that best of all positions, "strong enough to make reason prevail, but not strong enough to prevail against reason,"—and, moreover, there will be more security for a discriminating and intelligent choice of the actual administration, and of highly-cultivated men out of whom to form an administration. The danger of an equal level of representation is, that through it the machinery does not exist for getting the very first men in the nation into Parliament and office. Unless a preponderance is given to the votes of the educated, the best intellect of the nation will not be at its service, and the capacity of the administrative government will be injured by the means chosen for making it popular. Accordingly Mr Mill advocates a system of plural voting, based on conditions which would leave the highest plural vote open to the poorest member of the community in case he could obtain such practical distinctions as would be a guarantee of his standing in the highest grade of intelligence. Mr Mill would give more votes to the master manufacturer than to the foreman, to the foreman than to the ordinary workman,—more to the banker than the banker's clerk,—and more to the higher University degrees or the holders of certificates under the middle-class examinations, than to those without these distinctions; his only limitation being that "the plurality of votes must on no account be carried so far that those who are privileged by it, or the class, if any, to which they mainly belong, shall outweigh, by means of it, all the rest of the community." The difficulty in this, as in the other practical suggestions of Mr Mill's which we have yet to examine, is practical rather than theoretical. To prevent fraud, and all kinds of suspicion of fraud, it is most essential to have some tangible and easy criterion of electoral right. If we multiply and complicate these criteria, and base them on such easily invented credentials as University degrees and certificates, a temptation to political falsehood will be introduced which cannot but work fatal results. Mr Mill bestows too little attention on these practical aspects of his subject. That which he despises as "matter of detail" is, in fact, of the very essenee of a successful political expedient. We propose to return to this subject in order to review Mr Mill's advocacy of Mr Hare's scheme.

THE NORTH BRITISH REVIEW. No. LXVIII. T. and T. Clark, Edinburgh.

A GOOD article in the present number of the "North British" on "Dr John Brown's Horæ Subsecivæ" has the following just remark:—"While we find writings every day in reviews, and magazines, and newspapers, which show great cleverness, learning, scholarship, every kind of ability, it is rarely indeed that we find any which shows character." In this respect the best article in this number,—that which shows the most "character," of which the thought is at the same time the most original and most matured, and the style most natural and refined,—is one on the "Poems and Plays of Robert Browning." It is a small instalment of the long-deferred tribute which is due from English critics to a great, unpopular poet. Though the writer heartily admires the poet, he is not blind to his occasional harshness and obscurities.

Mr Browning's matter generally requires a minute and patient study, such as only comes of a loving disposition, whilst his manner is often the very opposite of that required to foster a kindly feeling. It frequently repels or irritates at first sight, instead of laying allurements on the reader for further acquaintanceship.

We once knew a lady who had the most tantalising method of communicating intelligence. Whenever she stuck fast, and either did not know what she had to say, or how to say it, she always bridged over the break with a "You understand!" Of course, you did not understand the least in the world; but the manner was so assuring as to make you pause to consider whether you did understand or not, by which time she had got over her little difficulty, though you had failed to surmount yours. Mr Browning seems to have this knack of handing his little difficulties over to the reader, and of passing them by as jauntily as though the most perfect understanding existed betwixt them. This manner is shown most provokingly just when the reader is in the greatest state of bewilderment. Again, he will propound all sorts of odd questions to the reader, and carry on a Socratic discussion; that is, if the reader can answer the questions. One piece concludes with two unanswerable questions. He asks—

"Who fished the murex up?
What porridge had John Keats?"

For ourselves we merely reply, "Hav'nt the least idea." But we can imagine there may be readers who are not inclined to answer thus meekly. They will not know what to say to such a poser, and will feel rather like Byron's "Jack Buntin" in a similar predicament.

The critic is not happy in his choice of an instance. The two lines he quotes, taken by themselves, are no doubt inexplicable enough, but to any one who reads the little poem of which they are the conclusion their meaning and their pertinence are as clear as daylight. The critic and not the poet is at fault here.

In the theological department we have a long, elaborate, turbid protest against the "Essays and Reviews"—dogmatic without being forcible, though it strives to be so by the copious use of italics and capital letters. An article on the late "M. de Tocqueville," and one on the American troubles, are the most timely and readable of the rest in this number. The most unreadable is one on "Railway Accidents"; it is a curious mixture of would-be fine writing and statistics.

THE MAGAZINES.

THE CORNHILL MAGAZINE for May. Smith and Elder.

MACMILLAN'S MAGAZINE for May. Macmillan.

THE TEMPLE BAR MAGAZINE for May. Temple Bar Office.

THE DUBLIN UNIVERSITY MAGAZINE for May. Hurst and Blackett.

THE ST JAMES'S MAGAZINE for May. Kent and Co.

THE ENGLISH WOMAN'S JOURNAL for May. Printed at the Office of the English Woman's Journal.

THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. S. O. Beeton, Strand.

THE "Cornhill Magazine" for this month is very good, though the void left by the cessation of Mr Trollope's tale is by no means adequately filled up by Mrs Stowe. "Agnes of Sorrento" is scarcely a subject fitted to display that lady's great but homely and motherly genius. She should keep to American soil, and subjects she has studied long in their household relations. Mr Thackeray's tale has more skill and genius than in any previous number, though it appears to have reached a rather premature *dénouement*. The papers on "Blue Water," "Horse-keeping and Horse-dealing," and "Dignity," are good and not frivolous,—which is the characteristic failing of magazines.

"Macmillan's Magazine" has several articles of ability and great interest, and the continuation of "Tom Brown at Oxford" is one of the best of the instalments, though all have been good. The gem of the present number is the translation of the Italian poet Giusti's beautiful poem "Sant' Ambrogio."

"The Temple Bar" grows rather more trashy, we fear, nor do we admire much the one really able thing it contains, Mr Sala's own tale. That this is full of vigour and knowledge of life in its way, though coarse and low in grain, we willingly admit. But a more disagreeable literary effort we have seldom seen. The heroine is a poor and flimsy edition of Thackeray's Becky. The *ablest* parts of the tale are the outlines of vulgar and depraved life which it contains. The number is mainly filled up with other flimsy tales that have no such power,—such as "John's Wife" and "In the Temple Gardens."

This number of the "Dublin University" is unusually animated and good. The subjects are varied, and for the most part well chosen and well treated. Of the opening article, on "Indications of Antagonism in 'Essays and Reviews,'" we, being wearied of the ceaseless argument, shall say nothing, except that by pointing out discrepancies between the opinions of the seven contributors the writer merely confirms their assertion that they wrote without "concert or comparison"; and that he has taken one more step in that worst direction for the welfare of the Church he professes to defend, the casting out and stoning as her enemies men whose character and intellect would adorn any Church, if they venture in the least to enlarge her charity or widen the meaning of her creeds. "The Morality of Garbled Blue Books" is a spirited protest against the tampering with diplomatic despatches, by which false impressions are given to the public mind, such as that displayed by the publication of the recent Blue Book on the war in Affghanistan compared with its predecessor in 1839. A kindred topic, having reference to the asserted misrepresentations concerning our Chinese affairs, is touched on in the article on China. In this the cause of the Tae-Pings is upheld, and a very fair case is made out in their favour. The principle of non-intervention is claimed in their behalf, and all collision with them in the collection of the revenue dues earnestly deprecated. A short account of "Mina," the Spanish guerrilla leader, is worth reading. The article on "Paris Industries, and the Commercial Treaty," tends to increase our respect for the manufacturing industry of France.

The poetry, and the criticisms on poetry, of this magazine are perhaps its weakest points; to this rule the verses of the present number, and its article on William Caldwell Roscoe, and on minor minstrelsy, are no exceptions.

The "St James's Magazine," the youngest member of a large and, of late, rapidly increasing family, is now fairly afloat, and prepared to enter the lists of competition with its older brethren. We will not now stay to inquire if an addition to our already numerous magazines were necessary or desirable. In literature so purely commercial as this, the supply will always equal the demand. Success is the measure of its right to be. We might indeed, on higher grounds, deplore the extension of a class of reading productive of desultory habits, a superficial half-knowledge, and a distaste for more severe studies; but we prefer to dwell rather on the brighter side of what is irremediable, and own with satisfaction that, as a whole, it contains little that is actually objectionable, and much that is innocent and mildly instructive. Those who have a taste for this kind of thing will find a pleasing variety in the pages of the "St James's." Dr Doran contributes a gossiping article on "Woman in the Middle Ages," full of quaint anecdotes gathered from old sources. A gentle stimulus of pleasant self-gratulation is given to the British public, by showing how much it is doing in the charitable line, and how much such charity is to be admired and praised, in the opening article on "What the Rich are Doing for the Poor." How comfortable it is to read a sentence like this. It makes us feel quite proud of belonging, even as a humble member, to such a goodly assemblage of worthies.

To Royalty, and especially in our own day to our illustrious and most gracious Queen and the Prince Consort; to the nobility; the landed proprietary; the clergy; the gentry, and the professional man; the capitalist; the wealthy banker; the merchant and manufacturer, are we mainly indebted for that progress by which mankind have advanced to their present high state of civilisation.

No better *title* could surely have been chosen for this courtly magazine than that of the "St James's."

By far the best article is one on the "Mystery of Water," by Professor Ansted. Slight, and popular in its form, it yet has the stamp that genuine and thorough knowledge alone can give. An account of coal formations, under the head of "British Diamonds," is another instructive article, of fair merit. "A Night in the Catacombs" is somewhat exciting, and reads as if it were the record of a fact. Besides these we can find little to praise. The verses are, with the exception of some pretty lines by Miss Procter, intolerably weak. Mrs S. C. Hall's tale "Can Wrong be Right?" is chiefly remarkable for the strength of its capital letters and italics, and Thomas Hood's "Little Ones" for its imitation of Thackeray's style and its puerile sentimentality.

On the whole, this new periodical does not seem to us strong enough for a protracted struggle for existence; but the battle is not always to the strong; and its decidedly correct tone, moral, religious, and domestic, may secure for it a popularity it cannot claim on the score of literary merit.

There is little to call for remark in the May number of the "English Woman's Journal." Matter at once interesting and novel is not always to be found at a month's notice, and we must in general be contented if useful topics are discussed in a sensible manner.

The more special causes of Insanity among Women, and the falseness of the received opinion that it is more prevalent among them than among men, is the subject of the principal paper. The exertions of Madame Luce for the education of the Moorish girls of Algeria, and the Fourth Report of the Committee of the Ladies' Sanitary Association, represent its practical side; while a pleasant pedigree of King Pine-Apple, some fair poetry, poor reviews, and a rather too strong-minded tale, form its literary articles.

The "Englishwoman's Domestic Magazine" is a useful and pleasant little periodical, containing some creditable letter-press, and many patterns of all kinds, which will no doubt be acceptable to its circle of subscribers, we presume chiefly feminine. The merits of a Marie Stuart nightcap we are scarcely qualified to pronounce upon; we can only recommend our lady readers to consult the work itself, which appears to possess an infinite stock of resources for unemployed fingers. The present number is a double one, and the usual form would therefore probably amount to about one-half of the contents of this, which appears to contain rather an inordinate collection of needlework for one month. The newest *modes* in bonnets, &c., are not forgotten.

AGNES TREMORNE. By L. BLAGDEN. Smith, Elder, and Co., 65 Cornhill.

THERE is a large class of novels hovering on the boundary line, nowhere more faintly marked than in novel literature, between good and bad, which, as they do not give room for much censure, just praise, or fair ridicule, leave little to be said about them. Such novels steer clear of all irregularities of genius; they are quite free from any gleams of promise that might subject them to a critical dissection. Their uniform level of mediocre merit secures them from individual examination. To them Pope's well-known line in the "Essay upon Woman" may be correctly and not so ungallantly applied. They have "no characters at all." Their morality is pure, if often fantastic, and occasionly morbid,—their aim instructive,—their style easy, and creditable to the taste and education of the writers. They show, perhaps more than anything else, the wide diffusion of literary tastes, and, up to a certain point, of literary skill; and of, what is more important by far, good morals and refined feelings. As a whole they are deserving of notice, since they form a by no means unimportant element in our national literature; but individually they yield little result beyond a few more gaily-dressed volumes to our drawing-room tables, and a few more misty outlines of plot and character to our minds.

Of this order of novels "Agnes Tremorne" is a very creditable specimen. Its plot is novel, if somewhat extravagant; its *dramatis-personæ* are carefully drawn, if no more real than we are accustomed to meet with; its descriptions of Italian scenery, and of art in Rome, are written with genuine appreciation, if without much power. It is moderately interesting, and enjoys all the qualifications, in short, of a good second-rate novel.

THE STRUGGLE FOR EXISTENCE: a Lecture addressed to the Working Classes, delivered at the School Room of the Hope Street Church, Liverpool, 23rd November, 1860. By HENRY BOOTH, Esq. London: E. Whitfield, 178 Strand. Liverpool: H. Young, 12 South Castle street. 1861.

A REPRODUCTION of the argument of Malthus, addressed to the

THE SEASON: a Satire. By ALFRED AUSTIN. With Frontispiece of "The Modern Muse," by Thomas George Cooper. London: Robert Hardwicke, 192 Piccadilly. 1861.

THE description which the author of these verses gives of himself at p. 72 is not that of one who is entitled to "cast the first stone" at others; yet that passage is but a mild specimen of the worse than coarseness, the ingrained depravity of taste which pervades this "satire." Strange to say, it seems intended for a drawing room book.

PROMETHEUS' DAUGHTER. A Poem. By Colonel JAMES ABBOTT, H.M. Bengal Artillery, Author of "Narrative of a Journey from Heraut to Khiva." London: Smith, Elder, and Co., 65 Cornhill. 1861.

THE notes appended to this poem show a cultivated and observant mind, and are curious and interesting. The poem itself, in twelve cantos, is one of those heavy modern epics whose composition probably affords much pleasure to their authors, but which most other persons, ourselves included, find unreadable.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The text of the treaty of commerce between France and Belgium has been published. It imposes a duty of 10c to 15c the 100 kilogrammes (2 cwts) on Belgian coal imported into France according to the frontier by which it is brought in, and establishes the same duties on coke; it imposes duties, as in the English treaty, for iron, lead, zinc, copper, &c., but makes certain modifications with regard to steel and articles in cast iron; it puts a duty of 1f or 1f 50c the 100 kilogrammes on marble, and one of 4f on slates for roofs, or 10f the 100 kilogs for slate in slabs; abolishes all duties on bricks, tiles, coarse earthenware, articles for chemical manufactures, &c., and imposes one of 4f the 100 kilogs or 20 per cent. *ad valorem* on other sorts of earthenware; it fixes a duty of 1f 30c the 100 kilogs on bottles, one of 3f 50c on window glass; on flax yarn the duty is to be from 15f to 60f the 100 kilogs, which is a reduction of from 4f 36c to 38f 56c; on flax fabrics, from 28f to 400f, a reduction of from 5c to 67f 25c; on woollen yarn, heretofore prohibited, the duty is to be from 1½ to 3 per cent. *ad valorem*, and a little higher for combed woollen yarn; on woollen fabrics it is to be 15 per cent., subject to reduction to 10 in 1864; on cotton yarn the duty is to vary from 15c to 3f the kilogramme; and cotton fabrics, heretofore prohibited, are to be about 15 per cent. *ad valorem;* on silk fabrics the duties are the same as with England. These are the principal articles which interest the English in so far as Belgium can compete with the French market. As to French productions imported into Belgium, the most important, wines, are in addition to the import duty, which is little more than nominal, to pay 27f 50c the hectolitre from the 1st July next; 25f from the 1st January, 1862, and 22f 50c from the 1st July, 1862; and alcohols, 45f the hectolitre from the 1st October, 1861, to the 1st October, 1864, and 42f 50c afterwards; raw sugar is to pay 1f 20c the 100 kilogs in addition to excise, and refined 60f; and on paper the duty is to be 10f the 100 kilogs up to 1864, and 8f afterwards. Belgian sugar and paper sent into France are to pay about the same duty. Finally, France is to allow rags to be exported at 12f the 100 kilogs, and Belgium is to permit the free export of iron ores. A treaty of navigation has also been concluded between France and Belgium. In substance it enacts that the vessels of the two countries shall only pay in their respective ports, the tonnage, pilotage, quarantine, and other dues imposed on national vessels.

The Government on Monday reduced by ½ per cent. the interest to be allowed on Treasury bills. That of bills of from three to five months is consequently 3½, of from six to eleven months 4, and for a year 4½.

In my last I briefly noticed a peculiar project of the Credit Mobilier relative to the buying up of "floating securities" of the different great companies. This scheme has naturally excited much attention in the financial world, and is thus spoken of in the *Semaine Financière*, a good authority on such matters:—

"The principal feature in the report presented to the shareholders of the Credit Mobilier in the recent meeting is the announcement, at once striking and mysterious, of a possible issue of bonds of the Credit Mobilier which would serve to consolidate an equal amount of floating securities in the great French companies, or of the securities of the Government itself. We say that this announcement is a striking one, for it holds up before one's eyes a large sum, about 100,000,000f, which, if it were to receive the destination assigned to it by the report, would be applied to purchases of securities on a large scale; but we find it mysterious, because we do not clearly understand the theory of the combination.

"It is not sufficient, in fact, to state that the shares of the best French railways are capitalised on the footing of 7 and even 8 per cent., when bonds of the same companies are capitalised on the footing of 5. It is not sufficient to conclude from this comparison that the share represents generally 7 and the bond 5 per cent.; and, starting from that point, to imagine that by playing on a name, the company can obtain at 5 per cent. on a security called a bond, money which will produce 7 placed out in shares. However unintelligent the public may be supposed to be, however childish in its fits of enthusiasm or antipathy, it must not be considered so much a novice as to base on a simple *jeu de mots* the estimate which it makes of such or such a category of securities. Bonds secured by shares would not appear in its eyes better than the shares themselves; they would even be worth rather less, for an indirect guarantee is evidently inferior to direct possession. People will always prefer to receive directly 7 per cent. on a security they possess, to 5 per cent. mortgaged on that security placed in the hands of a third party. We assume, then, that if the Credit Mobilier has recourse to an issue of bonds, that issue would be based on an arrangement more intelligible and more solid than that which has been set forth. Up to the present moment, the Credit Mobilier does not appear to have justified the ambition and the pomp of the promises with which it accompanies the announcement of this operation. What! with 100,000,000f employed in purchases of the shares of a dozen vast enterprises, the anarchy of the offers of speculation would be put an end to, and French *rente* would be established on a basis worthy of it! That is not serious. No doubt, if the public were sufficiently simple and sufficiently complaisant to lend at 5 per cent. 100,000,000f by which the Credit Mobilier would gain 7, the Credit Mobilier would do a good stroke of business. But nothing would be changed in the financial situation of the country."

The Bank of France will, in all probability, before long proceed, as last year, to offer for sale a new batch of railway bonds of different companies. The total amount will be from 200,000,000f to 250,000,000f, or thereabouts.

The long-pending question of the establishment of lines of *French* steamers to ply between France and North America is at last on the eve of obtaining a solution. A bill has been presented in the name of the Government to the Legislative Body, authorising the Compagnie Generale Maritime and the Credit Mobilier to take up the concession for establishing lines between Havre and New York, and between Saint Nazaire (Nantes) and the French West Indies and Cayenne, which was made in 1858 to a company called the Union Maritime, but was never acted upon. The concession is made for twenty years, and a subvention of 9,300,000f (372,000*l*) is to be paid by the Government annually, the first two years in advance, but subject to reduction of 600,000f after the first two years in the event of a branch line on Mexico not being established. Sixteen steamers of 9,085 horse-power are to be provided by the Compagnie Maritime, and five of them are to be of 850 horse-power, six of 660.

The Minister of Agriculture and Commerce has addressed to the Chambers of Commerce of Havre and other places a circular informing them that frauds are committed at Cardiff in the embarking of coal from France, and describing the manner in which they were perpetrated. The Minister recommends that the names of Cardiff firms which practise these frauds shall be communicated to the Chambers of Commerce, and published in the newspapers.

The Bourse is closed to-day, this being the fête of the Ascension. The following are the quotations of last Thursday and yesterday:—

Annexed is an account of the markets:—

FLOUR.—Business at *Paris* has not been very active during the past week, but yesterday the quotation was 73f to 75f the sack of 159 kilogrammes for good sorts, and 70f to 72f for others. Four marks were 72f to 72f 25c for the present month, and 72f 50c for June.

WHEAT.—At *Paris*, yesterday, the attendance of dealers was not

large: ordinary sorts were at 38f 50c the sack of 120 kilogs, but there were no purchasers at that price: good sorts were offered at 39f 50c to 40f; choice, 40f 50c to 41f 25c. In the provincial markets, 52 present a rise of from 11c to 1f the hectolitre, 38 a fall of from 5c to 1f, 26 are reported firm, 52 without variation, 8 calm.

COTTON.—The sales at *Havre*, in the week ending Tuesday, amounted to the large number of 36,623 bales, and the imports were only 18,452. The closing prices were 4f higher for the very low, and 3f to 4f higher for the low and other sorts. Low New Orleans was consequently 103f the 50 kilogs, and very ordinary ditto 108f. The stock on the 1st of this month was 293,000 bales. On Monday and Tuesday of the present week business was exceedingly active, and low New Orleans advanced to 104—for some lots even higher. Yesterday, business was calmer, but prices were firm at 101f to 105f.

SUGAR.—The market at *Havre*, in the week ending Friday, was rather calm: 1,035 casks French West India at 49f to 49f 50c duty paid; a lot of Porto Rico for delivery, 48f 50c; 24,44 bales Reunion disposable or in the port, 52f; 7,243 ditto, disposable, part at 52f 62½c, part at prices kept secret; 2,400 sacks Mauritius, 52f; 660 casks Havana, old, 36f 25c. In addition, some sales of damaged were made. The arrivals were about 7,000 casks or bales. This week, Reunion has been at 55f 50c duty paid; Havana, 35f to 35f 25c in bond; French West India, 49f. At *Bordeaux*, last week, 1,920 bales Reunion went at 53f; 1,200 ditto at 54f 50c and 56f; 800 bales ditto gros grain 57f; 320 casks French West India 49f 53c; a lot of Porto Rico, 49f 50c; 40 casks Havana 53f; 1,200 bales Mauritius, 53f 50c; a lot of Batavia, 56f. This week, nothing has been done. At *Nantes*, last week, upwards of 6,000 casks Reunion were sold at 52f 50c, and a small lot of Java was taken at 60f 25c. This week, only a small lot of French West India has been sold. At *Marseilles*, last week, about 2,300 bales Reunion were sold, part at 53f, part at prices kept secret, and for low quality, 42f to 46f.

COFFEE.—At *Havre*, in the week ending Friday, purchasers were reserved. 230 sacks Hayti Jacmel went at 79f 50c the 50 kilogs in bond; 103 Rio, 73f; 232 Porto Cabello *grages*, 89f to 93f; and a small lot of Guadeloupe *habitant*, 136f 25c duty paid. In addition, some lots of damaged Hayti and Porto Cabello were sold by auction. The arrivals exceeded 17,500 sacks. The stock in bond on the 1st was 6,554 tons. This week, Hayti Cape has been at 81f 50c; ditto Gonaives, 82f 50c; Rio, 68f to 72f 50c; Ceylon plantation, 110f to 127f 50c duty paid. At *Bordeaux*, last week, business was more active; 4,200 sacks fair went at 111f to 115f the 50 kilogs duty paid; 2,900 sacks Guayra *grage*, 92f 50c; 42 sacks *non-grage*, 87f 50c; a lot of Caracoby, 106f in bond; a lot of Santiago, 92f to 98f; 129 sacks Mysore, 110f to 111f; 60 sacks Rio, not washed, 70f. This week, no sales. At *Nantes*, this week, 1,388 sacks Java have been taken at, it is said, 112f.

INDIGO.—Sales at *Havre*, in the week ending Friday, were active: 560 cases Bengal new at 50c to 1f above the estimates, and 44 at prices kept secret. The arrivals were only 19 cases from England. The stock on the 1st was about 1,100 cases. This week, at a public sale, new Bengal has been taken at 9f 60c to 10f 80c the half-kilog; ditto, old, 5f 20c to 11f 40c; Manilla, 4f to 6f; Mexico, 4f 20c to 6f 20c; Java, 6f 70c to 9f 80c. At *Bordeaux*, last week, the demand was regular: 198 casks Kurpah, 127 Bengal, 25 Madras; prices not stated. This week, nothing done.

HIDES.—At *Havre*, in the week ending Friday, 15,270 Monte Video and Payrandu went at 74f the 50 kilogs; 4,000 ditto expected at same rates as at London; 400 Buenos Ayres dry, 105f to 125f; 821 ditto salted, 50f; 1,001 Rio Grande salted, 72f for ox, 69f for cow; and 1,202 horse, salted La Plata, at 90f to 91f the 100 kilogs. The arrivals exceeded 12,000. This week, Monte Video salted has been at 74f.

WOOL.—At *Havre*, in the week ending Friday, the sales were 16 bales Buenos Ayres, unwashed, at prices kept secret; 15 German, unwashed, 2f 80c the kilog; and 7 bales Algeria, 1f 35c. The arrivals exceeded 1,000 bales. A sale by auction went off very coldly, only 615 bales out of 3,377 offered having been disposed of. In the sale, Buenos Ayres, unwashed, went at 129f 50c to 292f 50c the 100 kilogs; Monte Video, 190f to 260f; Australia, unwashed, 350f to 500f; ditto washed, 360f to 435f; Bombay, 95f; Russian, washed *a chaud*, 770f to 772f 50c; Portugal, unwashed, 135f; Spain, unwashed and washed, 125f to 220f. In the same, 19 bales sheepskins out of 72 offered were sold: Buenos Ayres, unwashed, went at 177f 50c; Monte Video, unwashed, 115f to 185f. This week, Buenos Ayres, unwashed, has been at 125f to 150f, also at 1f 60c the kilog; ditto washed, 340f to 500f; Rio Grande, washed, 210f to 305f; Spain, washed, 180f to 185f.

TALLOW.—At *Havre*, in the week ending Friday, 15 casks New York disposable went at 66f the 50 kilogs; and the arrivals were 7 pipes, 64 half-pipes, and 100 casks Buenos Ayres. This week, Buenos Ayres has been at 67f 75c. At *Paris*, yesterday, the 100 kilogs were 133f 25c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 104f the hectolitre; 3-6 Montpellier of 89 deg., 133f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc of 86 deg. was 125f.

ANTWERP, May 8.

The quantity of coffee imported into this city in the first four months of the present year was 104,151 bales; in the corresponding period of 1860, it was 86,677; and in that of 1859, 74,218. The stock on the 1st of the present month was 40,000 bales; on the same date last year it was 29,000. Of hides, in the course of the four months the import was 306,623, and the sales 169,823.

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Bombay to the 12th ult. state:—In the first week after the expiration of the holidays we experienced a brisk demand for grey staples, and a fair amount of business resulted at comparatively steady prices. Cotton has advanced slightly, though European houses generally abstain from entering into transactions of magnitude, the bulk of the shipments being on native account. Shares and Government securities have improved during this fortnight, while money is again easier in the Bazaar, though the banks' rates still stand at 11 per cent. for loans on Government paper, and 13 per cent. on other securities.

Abstract of the Customs returns of the trade of the Cape of Good Hope:—

Latest advices from Buenos Ayres state that business affairs were improving, and trade had been brisk. Prices of produce had advanced, and were very firmly maintained. Operations at the barracas had been on a considerable scale during the month, the slaughter amounting to 86,000 head, and the low rate of exchange had enabled shippers to pay advanced rates. Arrivals of dry hides were small, chiefly from the rivers. The number in stock was 46,000, against 50,000 at the close of February. Advices from Rio are to the 9th ult. After a long duration of inclement weather, which had materially impeded the transmission of produce from the uplands, a change for the better had at last made its appearance, with every prospect of a continuance.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending April 6, 1861, compared with the previous month:—

	March 9, 1861.	April 6, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	19504836	19279899	...	224937
Private Banks	3205513	3256601	51088	...
Joint Stock Banks	2867926	2987604	119678	...
Total in England	25578269	25521098	...	54171
Scotland	3936969	3852354	...	84615
Ireland	6682077	6553872	...	128205
United Kingdom	36197315	35930324	...	266991

And, as compared with the month ending the 7th of April, 1860, the above return shows a decrease of 1,920,059*l* in the circulation of notes in England, and a decrease of 2,491,633*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,136,478*l*, the English joint stock banks are below their fixed issue 314,753*l*,—total below fixed issue in England 1,451,231*l*; the Scotch banks are above their fixed issue 1,103,083*l*, the Irish banks are above their fixed issue 199,378*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 3rd of April was 12,721,538*l*, being an increase of 788,265*l* as compared with the previous month, and a decrease of 2,486,350*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 6th April:—Gold and silver held by the Scotch banks, 2,619,966*l*; gold and silver held by the Irish banks, 2,356,274*l*; total, 4,976,240*l*; being a decrease of 183,031*l* as compared with the previous return, and a decrease of 226,164*l* when compared with the corresponding period last year.

MARKETS IN THE MANUFACTURING DISTRICTS.

Throughout the manufacturing districts, trade, generally, has been in a most inactive state; nevertheless, no change of importance has taken place in the quotations. Stocks, however, do not increase to any extent. The iron trade may be considered somewhat healthy, although the business doing in it is by no means extensive. Coals have mostly sold at full prices.

BRADFORD.—Every department of our wool trade is in a stat approaching stagnation. The American news is eagerly read an discussed, and the suspense occasioned thereby continues. The demand for wool is exceedingly small, and spinners will not buy a pound more than they require. Spinners are in no better position than for some time past. Short time and idle frames must still be adopted to save them from loss. The export houses have been able to supply their wants at very low prices. The market for pieces is also remarkably dull.

MANCHESTER, May 9.—We repeat our quotations from last week, but the tendency has been against sellers, and extremely little business has been done. The absence of satisfactory demand from all quarters has been universally felt, and much want of confidence has been expressed in the position and prospects of the trade. Several failures have occurred amongst the smaller manufacturers who do not spin their yarn. Many firms would at once adopt short time, were it not that their hands would leave them for those who continued on full time. Shirtings from 6 lbs to 8¼ lbs have been offered by sellers who were disengaged at 1½d per piece less than last week, but without tempting buyers. Both cop and bundle yarns have receded from the late nominal rates, which had been forced by the rise in cotton.

LEEDS.—There was but a small attendance of buyers in the cloth halls on Tuesday, and there was little disposition to purchase. Prices were a little easier for several of the lighter fabrics, manufacturers being willing to make some come concession to meet the offers of purchasers; but, after all, the amount of business done in the public markets was small. Wools remain steady in price.

ROCHDALE.—For the season there is a moderate amount of business doing in the home trade, and machinery is kept in fair employ and the operatives are in something like full work. Stocks are pronounced to be in a reasonable compass, and prices keep steady. Wools continue without change. The demand is tolerably steady, and staplers keep up the quotations.

LEICESTER.—In general hosiery there has not been much doing at the warehouses, and business in most departments is decidedly quiet. At Loughborough and the country districts the hosiery trade has not been so dull for a long period. Yarns are selling at high rates. Wools are firm, at good prices for fine sorts.

NOTTINGHAM.—There has been very little doing in the lace trade this week. The American market is almost closed. The Germans are also doing very little, and the home trade is considerably more dull than it usually is at this period of the year. Superior classes of silk goods continue in demand. The hosiery trade is extremely dull. Shipping orders are limited, and the home demand is very quiet. Yarns keep up in price.

BELFAST.—The first feeling of alarm at the insurrection of the Southern States of America having softened down, a more favourable spirit actuates the market for white linens. Exports are rather large to most of the foreign customers, America excepted. Very little has been done with France. To the ports of South America a very fair amount of linens has been forwarded during the last quarter. Cuba promises to become an extensive market for the sale of flaxen products. In the home trade there is little of the novel to report. Lower lines of goods are more looked for, and sell at the full quotations of the past month.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End Mine forge pig iron, 3*l* 7s 6d to 3*l* 10s; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets held since our last have been moderately supplied with home-grown wheat, chiefly in poor condition. Good and fine samples have mostly found buyers at full prices; but low and damp qualities have continued neglected at irregular quotations. At the outports, as well as in this market, most descriptions of foreign wheat have changed hands to a moderate extent on former terms. The supplies of barley having been very moderate, the barley trade has been in a healthy state at very full prices, even for grinding and distilling sorts. The malt trade has shown more firmness than for some time past; and the value of all kinds has been well maintained. Oats have realised extreme rates, with a good consumptive demand. Beans and peas have moved off briskly, and prices have had an upward tendency. The flour trade has been inactive; yet, owing to the unfavourable advices from the United States, American barrels are most held for more money.

The continental markets have been steady for all good and fine wheats, at full quotations. Inferior qualities, however, have met a dull inquiry. Barley and all other kinds of produce have realised quite previous rates, with a good export inquiry. The latest advices from New York state that breadstuffs were on the advance.

The Scotch markets continue to be fairly supplied with wheat in good condition. Most kinds have moved off steadily, at full quotations. Barley and oats have commanded more attention, at extreme currencies. Other kinds of produce have sold on former terms.

In Ireland, fine wheat, barley, and oats have changed hands freely, at very full prices. Otherwise, the trade has been in a most inactive state.

The supply of wheat at Mark lane, to-day, was much restricted, and the trade generally ruled steady, at Monday's currency. Foreign wheat met rather more inquiry, at full prices. Barley, oats, beans, and peas were firm, and the quotations were well supported. American flour moved off freely, and, in some instances, rather higher rates were realised. Other kinds maintained previous currencies.

Mr E. Rainford furnishes us with the following observations with regard to the floating trade:—Since the 30th ult., there have been 73 arrivals off coast for orders, comprising 37 cargoes of wheat, 23 maize, 6 barley, and 7 miscellaneous. Of the wheat, 11 cargoes are from Odessa, 4 Venice, 6 Alexandria, the rest from various ports. Of the maize, 6 are from America, 1 Vienna, 1 Bayonne, 3 Salonica, 2 Odessa, 1 Lagos, 1 Mazagan, 2 Trieste, 1 Galatz, 1 Ordu, 2 Venice, 1 Sulina, 1 Alexandria. Of the barley, 2 from Constantinople, 1 Odessa, 1 Ibraila, 1 Galatz, 1 Ismail. Rye, 1 Eupatoria, 1 Odessa; flour, 1 Santander, 1 Trieste; wheat and flour, 1 Santander; wheat and barley, 1 Malta; oats, 1 Odessa. A few of these had previously found buyers. There has been more doing in cargoes afloat since this day week, and to-day there is a tendency upward, both in wheat and maize. The following prices have been paid:—Wheat, arrived, per 492 lbs, Berdianski, 54s 6d; new Odessa Ghirka, 53s; Odessa Ghirka, 51s 6d; Venetian, 57s 6d; per 480 lbs, Polish Odessa, 55s, 54s 6d, 50s 6d, 53s 6d; Milwaukee, 56s 9d; Saide, 40s and 41s; per imperial quarter, 39s (2 cargoes) and 38s; Behara, not perfect, 37s 6d. Rye, arrived, per 480 lbs, 32s 7½d, for the Continent. Maize, arrived, per 492 lbs, Galatz, 38s 6d; Odessa, 38s; per 480 lbs, Ibraila, 36s; Salonica, 36s 6d and 36s 3d; white American, equal to 37s 6d; mixed American (large cargo and few lay days) 34s; another, 35s. Barley, arrived, per 400 lbs, Egyptian, 26s 7½d; Danubian, 26s 9d and 26s 6d. Oats, Odessa, per imperial quarter, about 22s.

The London averages announced this week are:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 8th day of May, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,490,700	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,302,248
		Silver Bullion	713,452
	26,490.700		26,490,700

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,272,938
Rest	3,244,842	Other Securities	19,141,648
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,083,595	Notes	6,316,015
		Gold and Silver Coin	857,919
Other Deposits	12,070,911		
Seven Day and other Bills	636,172		
	36,588,520		36,588,520

Dated the 9th May, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,810,857	Securities	29,336,586
Public Deposits	6,083,595	Coin and Bullion	12,873,619
Private Deposits	12,070,911		
	38,965,363		42,210,205

The balance of Assets above Liabilities being 3,244,842*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£159,339
An INCREASE of Public Deposits of	505,072
An INCREASE of Other Deposits of	890,100
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	1,255,531
An INCREASE of Bullion of	34,971
An INCREASE of Rest of	54,669
An INCREASE of Reserve of	167,591

The above return is more satisfactory than might have been anticipated. Notwithstanding the pressure for money, sufficiently indicated by the increase in the other securities, there is an augmentation both in the reserve and the bullion. A large part of the amounts taken out of the Bank under discount have returned under the head of "other deposits," showing that the late demand was less to supply actual wants than with the view of meeting a rise in the rate on Thursday.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,581,013	£ 21,257,107	£ 22 655,903	£ 22,606,113	£ 20,810,857
Public deposits	5,154,596	2,749,169	4,867.380	7,264.448	6,083,595
Other deposits	8,963,801	15.243,836	17,136,932	12,608,269	12,070,911
Government securities	13,606,362	9,526,563	11,281,376	9,728,943	10,272,938
Other securities	11,508,890	15,211.033	19,625,154	20.739,025	19,141,648
Reserve of notes & coin	7,818,467	11,893,442	9,694,623	7,967,391	7,173,934
Coin and bullion	13,271,617	17,797,707	17,041,813	15,373,326	12,873,619
Bank rate of discount	3 p. c.	3 p. c.	4½ p. c.	4½ p. c.	5 p. c.
Price of Consols	97¼	97¼	91¼	95½	92
Average price of wheat	38s 10d	44s 2d	44s 10d	52s 6d	55s 4d
Exchange on Paris (shrt)	24 97½ 25 2½	25 5	25 2½ 10	25 12½ 17½	25 22½ 30
— Amsterdam ditto	11 15½ 15¾	11 15	11 11 13	11 16⅜ 16½	11 17½ 18
— Hamburg (3months)	13 7½ 7¾	13 6½	13 4 4¼	13 5½ 5⅔	13 8 8¼

In the corresponding week of 1851, the Great Exhibition continued the chief subject of interest. Even at this early date it had proved a distinguished success. Abroad, the insurrection of Marshal Saldanha in Portugal had triumphed, and the Marshal had been appointed President of the Council of Ministers. In the other parts of the Continent the reactionary system was being carried out in full vigour. The London money market was easy, but there was some expectation that more pressure would shortly be felt.

In 1858, Lord Ellenborough's resignation had just been announced. The issue of a new Turkish loan was looked for.

In 1859, the money market was under the influence of a reaction from the excessive alarm which had been occasioned by the report of a Russo-French alliance against England. The pressure for money had subsided almost as suddenly as it had arisen. There was a decided recovery from the extraordinary panic in the stock markets, except as regards Austrian securities, for which no buyers could be found. Although the proclamation of Napoleon III. to his army revived the traditions of the days when half Europe was devastated by the French troops, it had been intimated that the subscriptions to the French war loan of 20,000,000*l* had reached 60,000,000*l*.

In 1860, the Count de Montemolin had signed a renunciation of the Spanish Crown, a step which he hastened to revoke on attaining his liberty. Garibaldi had just sailed for Sicily. The money market showed increased ease, and the Bank had just reduced their rate from 5 to 4½ per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,544,999*l*; in 1858, an excess of 32,803*l*; in 1859, a deficiency of 2,488,222*l*; and in 1860, a deficieney of 8,130,756*l*. In 1861, the deficiency is 7,070,737*l*.

DISCOUNT AND MONEY MARKET.—The demand for money during the early part of the week was extremely active, and the discount establishments requiring 5½ per cent. the bulk of the business was thrown upon the Bank. The applications at that establishment were therefore very large, the demand being increased by the expectation that a rise would take place yesterday in the minimum rate to 5½ per cent. To-day there has been less pressure, and the choicest paper could be negotiated in the open market at 5 per cent., 5¼ being still asked for other bills. On the Stock Exchange, loans on Government securities have been in request at 4½ per cent.

The following are the rates of discount on the various Continental exchanges, showing no alteration from last week:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	3½
Frankfort	3	2½
Amsterdam	3	3
Turin	6	5½
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

The agents for the Government of New Zealand have advertised for tenders for a loan of 150,000*l* in 6 per cent. debentures, redeemable in 30 years. The adjudication is to be made on the 20th instant at the Union Bank of Australia. Payment will be required in the following instalments:—10 per cent. on allotment, 20 per cent. respectively on the 20th July and 20th August, 25 per cent. on the 20th September, and the remainder on the 21st October. The bonds will bear interest from the 1st July.

ENGLISH FUNDS.—Notwithstanding the adverse news from the States, and an increased delivery of stock at the monthly settlement this week, Consols have been comparatively steady until to-day, when the general tendency was decidedly unfavourable. The public ntinue to sell Reduced and New Three per Cents., which are, therefore, now quoted relatively lower than the former security. Consols closed this evening at 91⅝ to ¾ for money, and 91⅞ to 92 for the 6th of June, showing a decline compared with last Friday of ⅜ to ½ per cent. The general business of the week has been below the average.

Exchequer bills and India bonds have again been flat, owing to the stringency in the money market; and the former have receded to 10s to 5s discount. India bonds closed at 20s to 15s discount.

A reaction has taken place in the new Indian Five per Cent. loan, the final price this afternoon being 101¼ to ½, or a half per cent. lower than last Friday.

FOREIGN STOCKS.—The principal fluctuations have been in Turkish Six per Cents. of 1858, which, owing to the unsatisfactory position of Turkish finance and the continued disturbances in various parts of the Ottoman Empire, have experienced a reaction from the rise of last week. The loan of 1854 is also slightly flatter. Mexican has again fallen on the further news from America. There have also been some sales of stock held on speculation, which have contributed to depress the market. The announcement that Senor de la Riestra has resumed the post of Minister of Finance to

the Argentine Confederation has caused a rise in Buenos Ayres bonds. Russian and Brazilian stocks remain dull, especially the former. There have been some inquiries for Spanish Active and Deferred bonds, but the Certificates have not maintained their previous value.

On Monday, the usual drawing for redemption of Turkish Four per Cent. guaranteed bonds took place, the amount taken being 54,000*l*. The bonds drawn will be paid off on the 1st of August.

French Three per Cents. left off this afternoon at 69f 35c, showing an improvement over last Friday of a quarter per cent., but a reaction of an eighth from the highest price attained during the week.

The French Government have reduced the interest on Treasury bonds a half per cent., the present rates being 3½ per cent. for bonds from 3 to 5 months to run, 4 per cent. 6 to 11 months, and 4½ for a year.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market was heavy in the commencement of the week, speculative sales being pressed on the unfavourable news from America, the civil war in the United States being expected to have a most prejudicial effect on trade and traffic. After sustaining a general and severe fall, the low prices brought in purchasers, and a rally took place yesterday, which was assisted by the announcement that the Bank had made no change in their rate of discount. To-day, the tendency has been again adverse, London and North-Western having especially experienced a renewed decline. The movements in this market are almost entirely speculative, and the public generally show no want of confidence, being rather purchasers of stock on balance. Hence, several of the leading descriptions are scarce in the market for immediate transfer. The principal operations in this department continue on provincial account.

In the colonial market there has been less demand for Indian guaranteed stocks, but generally the late advance has been well supported. Canadian descriptions have receded.

Foreign shares improved in the commencement of the week, especially French and Lombardo-Venetian, but have since relapsed. A recovery has taken place in American securities on the corresponding movement in New York reported by the last steamer.

Brazilian railway shares have fallen, the advices from Rio stating that the Ministry have suspended for the present the operation of the law permitting the interchange of guaranteed railway shares for national stock. At the same time they have decided to pay the call now due upon the Pernambuco shares already transferred to the Government.

In the miscellaneous market, Great Ship shares have advanced on the expectation that the Great Eastern will be chartered by the Government of President Lincoln. The final price was 6s 9d to 7s per 1*l* share.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The rates continue to improve, and are now quoted slightly higher than last Friday.

BULLION.—The following is the circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—The Empress of the Seas has arrived from Melbourne with 20,000*l*, and the Southampton with 86,000*l*; the former amount has been taken for exportation, the latter remains to be dealt with; of the total now at sea, about 297,000*l* may be considered as fully due. Shipments have continued to America, the Europa having taken 25,199*l*, and the Edinburgh 84,024*l*; and the Persia, sailing on the 11th inst., is likely to take a considerable sum. The imports have, however, exceeded the demand for export, and about 120,000*l* has been sent into the Bank. The Tyne has brought 104,000*l* from the Brazils. The Athens takes 20,000 sovereigns to the Cape, the Tagus 3,022*l* to the Peninsula, and the Oneida 960*l* to the Brazils.

Silver.—The large amount of silver brought by the Seine was not delivered until the 7th inst. We cannot yet quote any price, as the market is very quiet, and the buyers are scarcely doing anything. The shipments by the outgoing Bombay mail of the 12th inst. will be but small. The Oneida has taken 15,000*l* to the Brazils.

Mexican Dollars.—The dollars per Seine are not yet sold. The mail from China being so close at hand, we do not expect that any large amounts will be purchased until the delivery of the letters. The price is, therefore, quite nominal.

Exchange for drafts on India by Banks at 60 days' sight remains as at the date of our last, viz.: 1s 11¾d to 2s 0¼d for Bombay, and 1s 11⅝d to 2s 0¼d for Calcutta; Madras, 1s 11⅝d to 2s. Bill with documents, Bombay and Calcutta, 1s 11¼d.

India Government Loan Notes are without much change, perhaps rather weaker. We quote 5½ per Cents. 100 to 100¼, and 5 per Cents. 93¾ to 94¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 10½d per oz std; Spanish doubloons, 76s 9d per oz; South American doubloons, 73s 9d per oz; United States gold coin, scarce. Silver—Bar silver, nominal, flat; bar silver, containing 5 grs gold, nominal; fine cake silver, nominal; Mexican dollars, 5s 0⅛d per oz last price; Spanish dollars (Carolus), 6s 6d per oz last price.

The bullion operations at the Bank to-day comprised a withdrawal of 100,000 sovereigns for exportation to the United States, and a further purchase of 10,000*l* in Australian gold.

It is reported that policies of insurance have been opened for the transmission of 1,000,000*l* of Californian gold direct from Panama to London, in order to obviate the chance of capture on its way to New York. Moderate sums are likewise stated to be in course of remittance to this country, to be lodged on deposit at the current rate of interest.

PUBLIC COMPANIES.—The annual meeting of the National Provincial Bank of England was held on Thursday, when the report announcing a bonus of 10 per cent., in addition to dividends already declared of 8 per cent., out of the profits in the year 1860 was carried unanimously. Notwithstanding the fluctuations in the value of money during that period from political and financial causes and the consequent check to trade, the business of the Company was stated to have been large and profitable. The net sum realised was 141,800*l* after providing for a gratuity of 10 per cent. to the officers, and of this amount 17,000*l* remains to be added to the reserve, which now stands at 120,015*l*. In accordance with

a wish generally expressed at the last meeting, the Directors have awarded a grant of 2,500*l* to the general manager, Mr Daniel Robertson, as a special acknowledgment of his long and valuable services. Mr George Hanbury was elected a Director in place of Major Moore, deceased.

At a meeting of the shareholders of the Western Bank of Scotland, it was resolved to accept the compromise of 200,000*l* offered by some of the Directors.

The report of the Intercolonial Steam Company, issued preparatory to their meeting next Friday, states that the net profits in the past six months were 6,679*l*, and that the available balance is 3,810*l*, out of which a dividend is proposed at the rate of 7½ per cent. per annum, free of income tax. The Company's fleet now consists of five steamers and four sailing ships.

At the 27th annual meeting of the Universal Life Assurance Society, a reduction of 45 per cent in the premiums (being 5 per cent. more than last year) was declared. The outgoing Directors, the Hon. James Byng, Mr Serjeant Jones, and Sir Macdonald Stephenson, were re-elected, and the proceedings terminated with a cordial vote of thanks to the Chairman and Directors for their persevering and successful exertions.

The increasing trade with China and Japan has led to the formation of a new company called the China and Japan (Coast and River) Steam Navigation Company. The backward state of Chinese navigation gives ample room for its success, as also the application of steamers in order to give increased facilities for conveying goods in larger quantities and at a quicker rate.

Failures and Mercantile Embarrassments.—A large amount of bills on Greek houses fell due yesterday, and an apprehension existed that some firms would be compelled to suspend payment. This expectation was unfortunately correct in two instances. The first is Messrs Lascarida and Co., with liabilities for about 50,000*l*, and assets estimated to cover this amount. Some time back the engagements of the firm were much larger, but they have been gradually contracted within their present limit. The other house is that of Theodore Ralli, Sons, and Co., with liabilities for about 70,000*l*, and an estate showing a large surplus. Both these establishments have long struggled to maintain themselves by an unhesitating realisation of their means, and the circumstance of their being at last obliged to succumb is viewed with general regret.

Owing to the unceasing exertions and sacrifices of the principal houses in the Greek interest, the liabilities of the firms imperilled by the late failures at Marseilles and the sudden restrictions of the Bank of France have been reduced to less than 600,000*l*.

Messrs Nicholson and Stone, warehousemen, of Cannon street west, have suspended with moderate liabilities.

The Manchester papers announce the failure of several power-loom manufacturers in the neighbourhood of that city, the principal being Mr G. Moorhouse, of Burnley, with liabilities for 20,000*l*. It is said that his mill worked 1,100 looms.

A meeting of creditors of Mr J. Crichton, flax-merchant, of Dundee, who stopped payment early in March, was held on Monday, when a balance-sheet was presented, showing liabilities expected to come upon the estate 25,515*l*, and assets estimated to produce 8,520*l* net. The estate thus shows about 6s 6d in the pound, but the ultimate outturn greatly depends upon the satisfactory realisation of quantities of jute, hemp, &c., held by secured creditors, from which a surplus is calculated to come in of 4,062*l*. In 1859, Mr Crichton had an estimated capital of 20,000*l*; but since then, from over-speculation and other causes, large losses have been experienced. The trade expenses, including interest, have also been considerable, while the private drawings were moderate. A desultory discussion took place, at the close of which an adjournment was determined upon for a week, to enable Mr Crichton to make an offer. It is not expected, however, that he will be able to come to any arrangement; and, from the complexities of the case, the estate will probably have to be wound up under a public sequestration.

A petition under the private arrangement clauses has been presented in the case of Messrs Churchill, Macmillan, and Co., wood brokers, who have recently suspended with about 35,000*l* liabilities.

At a meeting of creditors of Mr H. Walmsley, cotton-spinner, of Firs Mills, Failsworth, the balance-sheet showed liabilities 150,941*l*, and assets 46,558*l*, leaving a deficiency of 104,383*l*. After a considerable discussion, a committee was appointed to investigate the accounts and report to an adjourned meeting.

The creditors of Mr Joseph Sutcliffe, commission agent have held a meeting, and also appointed a committee of investigation. The statement of affairs showed debts 32,114*l*, and assets 13,513*l*. It was admitted that the larger portion of the bill claims represented accommodation paper, part of which had been discounted at 20 per cent.

At an adjourned meeting of creditors of Mr Joseph Bull, of the Ravensdale Ironworks, North Staffordshire, it was resolved to wind up under the private arrangement clauses.

Miscellaneous.—The French Government are about to establish a mail service with China, including branches to Reunion, the French, Spanish, and Dutch East Indies. The subsidy is very large, about 20s per mile, or four times the sum given to the English contractors for the India and China service. It is also stated that the present fortnightly English mails between Great Britain and China are to be discontinued, and only a monthly communication retained.

Advices from Cognac and Bordeaux mention that the vines have been seriously injured by frost, and that the yield both of brandy and wine will be greatly impaired.

A series of public sales of colonial wool commenced today, the quantity arrived being 7,568 bales from the Cape, and 52,274 bales from the Australian colonies. There was a good attendance of buyers, both home and foreign, the latter chiefly purchasing the better descriptions. The quantity of wool on sale is by no means excessive, several ships being kept out by the east wind.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.5½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is very variously quoted; for first-class bills it may be stated at 106 to 107 per cent., which, as compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

INDIA EXCHANGES.—May 10.

Imports of the week ..... 255,724 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a fair demand both for English and foreign wheat, at Mark lane, to-day, and Monday's prices were well supported. Malting barley was fully as dear; but inferior kinds were a dull inquiry. Oats, beans, and peas commanded extreme rates, and American flour was held for more money. The imports from abroad are 14,130 quarters of wheat, 1,730 barley, 11,340 oats, and 400 sacks of flour.

At Liverpool, to-day, wheat has advanced 1d per cental, and all other articles have commanded quite Tuesday's currency.

The Liverpool cotton market, under the influence of the American advices received during the present week, has been very animated, and large transactions have taken place, the total sales of the week amounting to 94,000 bales, and including 58,000 bales to spinners, 21,000 bales to speculators, and 15,000 bales for export. Prices are ⅛d per lb dearer than on Friday last. To-day's sales are 10,000 bales, with a firm market, at full prices.

The annexed figures show the exports of cotton from India, from the 1st January to the 12th April:—

	1861. bales.	1860. bales.
London	17,274½	14,695
Liverpool	256,848½	128,037
Clyde	2,424	1,404
Hull	655	302
Total Great Britain	277,202	144,438
Continent	8,776	959
China	12,266	25,110
Total	298,234	170,507

"There has been a good demand for cotton since our last," write Messrs Briggs and Co., of Alexandria, to the 26th ult. "Fine descriptions are much inquired for but cannot be obtained, as what little remains being in strong hands, the holders will not sell at the prices offered. The following are the transactions of the week past:—207 bales low ordinary, at 6.11d to 6.61d; 3,234 bales ordinary to middling, 6.82d to 7.53d; 928 bales good middling to fair, 7.56d to 8d; 49 bales good fair, 8.13d per lb f.o.b.: total, 4,418 bales. Freights ⅛d per lb in full; sailing vessels ⅜d in full. Exchange is firmer, owing to the small quantity of safe paper offering. We quote London, 95½ piastres per £ sterling; France, 5f 29c to 5f 30c per dollar of tariff piastres 20."

Good and fine samples of sugar have mostly realised full currencies; but the value of all other qualities has had a drooping tendency.

In the value of coffee, no change has taken place, and the demand for most kinds may be considered steady. Cocoa is held at full prices.

There has been a moderate, but by no means active, demand for all kinds of tea, and prices have been fairly supported. The show of samples is only moderate.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to April 30, 1860 and 1861, with STOCK on hand on May 1, 1860 and 1861.

The leather trade for the past month is thus described by Messrs Powell and Co.:—"Although we are able to report some increase in the sales of leather during the past month, we cannot give a more satisfactory account of the position of the market generally: prices of most articles are rather lower, while there is no concession at present on the leading article of raw material for sole leather, South American hides; and as the prospects of trade do not lead us to anticipate an increased consumption of leather, we cannot see any immediate remedy for the existing discrepancy between the prices of leather and hides. The only hope is that the caution which has for some time past marked the operations of tanners will be maintained, and that thus lower prices of hides will eventually be the result. There is no doubt that although the stocks of leather held by factors are considerable, they are generally small in the hands of the dealers and consumers, and we therefore look for a steady, if not an extensive, future demand. Raw goods, with the exception of South American hides, have generally shown a downward tendency. The imports have been moderate. The public sales have been very dull, the demand having fallen off for exportation, while for the home trade it has been restricted to the immediate wants of tanners."

COMPARATIVE STATEMENT of HEMP and FLAX on hand in London, on the 1st of May, 1860 and 1861, Dealers' Stocks included.

Rum has continued to move off freely, at very full prices. Brandy, however, is a dull inquiry; but there is a fair business doing in grain spirit.

Scotch pig iron has sold slowly, at 47s 6d cash mixed numbers. Other metals are very inactive.

The following are the exports of pig iron, foreign and coastwise, from Scotland, in April last, compared with the same month of three years; also, the average price, and the number of furnaces in blast in that month, in those years respectively:—

	April, 1861.	April, 1860.	April, 1859
Shipments tons	72,791	58,930	73,110
Average price per ton	48s	54s	51s 3d
Average No. of furnaces in blast	123	126	127

We have no change to notice in the value of saltpetre; but the demand for it has somewhat improved.

The colonial wool sales have commenced steadily. Both for home use and export, the biddings have ruled steady, at the decline established at the last auctions.

Linseed oil is steady, at 29s 6d per cwt on the spot.

Spirits of turpentine have sold as high as 56s. The quotations are now 52s to 54s per cwt.

The tallow market is dull. To-day, P.Y.C., on the spot, has sold at 58s 3d; May to June, 58s; October to December, 55s sellers.

"The money market continues very quiet," observes the New York *Shipping List* of the 24th ult., "but we think the tendency is undeniably to higher rates of interest, not by reason of any increasing demand for business purposes, but because of the increasing risks of the now very uncertain future, and the doubtful character of certain kinds of stock securities. The range for first-class business paper is from 6 to 7 per cent., with good endorsements, while for the most single names there is but little currency on any terms. The fact is, parties that have 'first-class' are generally those who are the least urgent of borrowers, and hence neither the banks nor the private discount houses are overburdened with business. On call, the brokers continue to be supplied with all they require at a slight advance. We quote:—

	Per cent. per annum.	
Loans on call, stock securities	5	to 5½
Do. other good securities	6	6½
Prime endorsed bills, 60 to 90 days	5½	6
Do. 4 to 6 months	6½	7
First-class single signatures	6½	7
Other good bills	8	9
Names less known	12	24

There continues to be considerable activity in certain descriptions of trade that have to meet the demands of the War Department. Naval stores, provisions, rice, groceries, and other articles that enter largely into the commissariat, are all active, and likely to be for a while to come, and the activity sometimes runs into speculation. All other branches of trade, however, apart from these exceptions, are, as they have been, very dull. We annex the usual Custom House tables, showing the foreign commerce of the port for the week and from 1st January to date, compared with the previous season:—

EXPORTS.		
For the week	1,536,424	2,082,470
Previously reported	24,593,543	33,317,277
Since January 1	26.129,967	35,399,747"

	1860. dols		1861. dols
For the week—			
Dry goods	655,050	.....	629,374
General merchandise	3,214,809	.....	2,038,617
Total for the week	3,869,859	.....	2,667,991
Previously reported	71,023,703	.....	53,498,358
Since January 1	74,893,567	.....	56,166,349

The same journal of the 27th ult. remarks:—"In money there has been no essential change since our last review. Transactions with the West are almost as much embarrassed as those with the South, and to-day it is difficult to have funds transmitted from the principal centres of trade in Illinois, Wisconsin, Iowa, and the Southern Border States that are still in the Union, without an enormous discount. The stock market during the week has been subject to violent fluctuations, as the natural consequence of the disturbed state of the country. Within the past day or two, however, it has assumed a steadier appearance."

The market has been considerably excited, and the advancing tendency has continued uninterrupted. Holders offer their stocks sparingly, except at very high prices, which tends to restrict operations. The sales foot up 7,500 bales, the market closing firm, at prices from ¼c to ½c higher.

The arrivals have been from Texas, 236 bales; New Orleans, 67; Mobile, 11; Florida, 45; Georgia, 3,635; South Carolina, 1,441; North Carolina, 139; Virginia, 237; Baltimore, 271—total, 6,102. Total import since 1st inst., 27,123 bales; total import since 1st September, 418,187 bales.

NEW YORK, April 27.—The market continues to increase in buoyancy, and with an active demand during the three days, in part speculative, prices have further advanced fully half a cent. per lb. The sales foot up 13,000 bales, including 5,000 in transit. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.

The cotton market has been characterised by much unsettlement and some excitement during the past week. The business has been large, trade buyers operating freely. At the same time present prices are a temptation to many holders, and the supply has been fully equal to the demand. We have, however, slightly raised our quotations for American. A large business has been done in Egyptian, but without materially improving their value. They are, however, unsaleable. Brazils are firmly held. East India have attracted more attention, being relatively cheaper than American, and the better kinds are decidedly dearer. The sales to-day are 10,000 bales; prices are quite firm. The reported export amounts to 15,440 bales, consisting of 5,830 American, 850 Brazil, and 8,760 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 24.—The demand for State and Western flour has been moderate, and prices may be called a shade lower on most descriptions. The sales for the three days comprise 37,000 bbls, of which 17,000 changed owners yesterday, the market closing heavy and in favour of the purchaser. Canada flour is steady, with a moderate demand at about previous prices. Owing to the war excitement the market for Southern flour continues excited, and, with a good demand, prices have further advanced 25 to 75 cents per bbl.

EXPORT from 1st to 23rd April.

	1861. barrels		1860. barrels
Wheat Flour	155,713	.....	58,372

For wheat, there has prevailed a moderate inquiry, and transactions both for local milling and for shipment have been comparatively light, while prices have favoured the purchaser to the extent of about 1 to 2 cents per bushel, Transactions for the three days foot up 175,000 bushels, of which about 76,000 were placed yesterday. The demand for corn has been moderate, and prices slightly favoured the purchaser at the close; the sales foot up 175,000 bushels, including 50,000 yesterday.

EXPORT from 1st to 23rd April.

	1861 bushels		1860 bushels
Wheat	765,850	.....	77,330
Corn	706,319	.....	58,316

NEW YORK, April 27.—Flour was in better demand, and more active, and closed at an advance of 5c to 10c per barrel for common and medium grades of State and Western brands. Southern flour was brisk, and decidedly higher. Wheat was in good request, and prices steady. Corn was firm, and in steady demand. Freights were rather firmer, while engagements were quite limited.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Quotations have shown a downward tendency, but low and soft qualities are the most difficult to sell. Some parcels of Cuba of indirect import went upon very moderate terms; and with an increased

supply, West India has barely sustained its former value. 250 casks Barbadoes, by auction, went as follows: dabs and brown, 35s to 37s; low to fine yellow, 37s 6d to 44s. 120 casks 350 barrels other descriptions: grainy Demerara, 43s 6d to 44s 6d; Berbice, 36s 6d to 45s per cwt. The deliveries last week were 4,700 tons, making an increase of 2,900 tons for home consumption since the beginning of the year, and about 1,900 tons for exportation. 5,050 tons were landed, which rather increase the stock, but it is still 8,850 tons less than at the same period last season.

Mauritius.—The sales on Tuesday and Wednesday comprised 9,900 bags, of which a fair proportion sold at and afterwards: grainy and crystallised, 39s to 44s; low to good soft grey, 36s to 41s.; low to good brown, 30s to 35s 6d per cwt.

Bengal.—625 bags Gurpatta date of the lower qualities were taken in at 37s to 38s 6d per cwt, a few lots of washed finding buyers at moderate prices. A few lots good grainy sold at 43s 6d to 44s 6d per cwt.

Singapore.—609 bags brown to middling soft grey were taken in at 36s to 38s per cwt.

Foreign.—Four floating cargoes have sold for the U. K., viz., one of Porto Rico at 26s; one Cuba at 24s; one Java, No. 11 to 11¼, at 26s.; and one Havana, No. 12½, at 27s 6d. 479 boxes Havana, by auction, were taken in. A few lots clayed Cuba realised 34s to 41s 6d for brown and yellow. 612 casks of indirect import were partially disposed of: brown, 34s to 36s 6d; low to very good yellow, 37s to 42s per cwt.

Refined.—The comparatively limited quantity of goods ready for delivery has prevented any material change in prices this week, but the demand is not very active.

MELADO.—693 casks partly sold at 24s 6d to 27s per cwt.

RUM is quiet at last week's quotations, and only moderate transactions have taken place. Demerara, 1s 10d to 1s 10½d; fine, in hhds, 2s 2d proof; common Jamaica, 3s 3d per gallon. There has not been any change in East India to notice.

COCOA.—The various parcels of Trinidad offered have partly met with buyers at previous rates: grey to superior red, 57s to 78s 6d; very fine marks, 96s to 96s 6d. 200 bags fair Dominica, at 54s to 55s per cwt, went rather cheap. A Government contract for 150 tons is declared for the 16th inst.

COFFEE.—This market maintains a firm appearance here and on the Continent. 700 casks 700 barrels and bags plantation Ceylon in the public sales were all sold at full valuations: fine ordinary to good colourv, 67s to 81s. 1,410 bags 10 casks native went at 61s to 63s 6d for ordinary to good. A small parcel of Jamaica, 71s 6d to 80s for middling to good middling. 150 half-bales Mocha were taken in at 100s to 105s for mixed; 33 bales of low quality selling at 85s 6d per cwt.

TEA.—Transactions by private contract have been smaller than usual during the week, and the market is now inactive. The stock in the United Kingdom on the 1st inst. was 76,500,000 lbs, against 75,000,000 lbs at the same date last year.

RICE.—Cleaned rice is higher and in good demand, owing to the intelligence received from America. Carolina has sold freely at 24s to 25s. East India is firmer and rather dearer, especially for white Bengal. Moderate transactions have occurred by private treaty: Necrancie Arracan, 10s to 10s 6d; Rangoon, 10s; white Bengal, 10s 7½d to 11s; Bassein, 9s 9d per cwt.

IMPORTS and DELIVERIES of RICE to May 4, with STOCKS on hand.

Stock	30900	52400	77750	85700

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—Pimento is steady, and offering less freely than of late. 339 bags by auction sold at 2⅝d to 3d per lb for low to good quality. 60 barrels Jamaica ginger partly sold at 50s to 63s. 470 boxes cassia lignea brought 87s to 91s for middling to good quality. 70 cases buds, deficient in flavor, realised 64s to 72s per cwt. No transactions of interest have occurred by private contract.

SALTPETRE.—Good to fine grades of Bengal have again advanced 6d, and, including 1,050 bags offered by auction, about 4,000 bags changed hands to yesterday (Thursday): refraction 5½ to 3, 38s to 38s 6d; 10½, 34s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to May 4, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	4825	5270	7700	4150
Delivered	4200	4775	6620	5630
Stock	4450	4350	4000	5150

Deliveries last week 415 tons.

COCHINEAL.—This article remains quiet. 127 bags Honduras went as follows: silver, 2s 5d to 2s 9d; low black, 2s 5d to 3s 10d per lb.

SHELLAC.—The market is quiet. A parcel of orange sold at 8*l* 12s 6d to 8*l* 17s 6d for fair quality. 115 chests good DC were bought in at the reduced price of 9*l* 15s per cwt.

INDIA RUBBER is quiet: good East India nominally 1s 3d to 1s 3½d per lb.

METALS have again become inactive. Scotch pig iron 47s 6d per ton. Straits tin has declined: good quality selling at 123s to 123s 6d per cwt. Spelter is dull, and may be quoted 18*l* to 18*l* 5s per ton.

HEMP.—Manilla is again very dull. On Wednesday, 375 bales partly met with purchasers at 20*l* 10s. for fair current roping quality, worth about 21*l* 10s last week. The sales of jute on Wednesday were large, which further depressed quotations about 10s, and 7,700 bales chiefly sold at 11*l* 12s 6d to 20*l* 10s per ton for low to good quality.

OILS.—Sperm remains without alteration. A large demand prevails for linseed oil, and the price had advanced to 30s this morning. Rape is again dearer, owing to the bad accounts received of the seed crops on the Continent: foreign refined, 42s 6d to 43s; brown, 40s 6d. Export inquiries continue to be made for cocoa-nut: Cochin, 47s 6d: Ceylon, 46s to 46s 6d. Palm firm, and fine is quoted 45s 6d to 46s per cwt Olive neglected.

LINSEED.—An active demand prevails at 1s to 3s advance. Bombay cannot now be bought under 56s; Calcutta on the spot, 52s to 53s 6d as to quality, and a parcel daily expected has been sold at 51s, cost, freight and insurance, including bags; a cargn very fine clean Odessa is reported sold at 54s, cost, freight and insurance to Continent, but fair average would only command 52s to 52s 6d, over which rates could not be obtained delivered United Kingdom, but there are buyers at 53s 6d for shipments up to September: there is an export demand for Catania in warehouse at 56s. Our importation into London since 1st January has been 201,044 quarters, against 142,398 quarters the corresponding period last year.

TURPENTINE.—Owing to the critical position of American affairs, there has been great excitement in the market during the week, and several thousand barrels have changed hands at prices ranging from 36s up to 57s per cwt; but, pending further intelligence, prices have become quite nominal, some holders demanding 60s, whereas others feel disposed to realise at 50s to 53s for American in barrels. Only 240 barrels are known as being on the way from New York, and shipments from Southern ports are very uncertain. We have no rough here.

HIDES.—118,700 East India offered yesterday, sold with greater spirit and obtained full rates.

TALLOW.—The market, which for several days has been rather dull, is now steady, but there does not appear to be much animation in the demand. Y.C., 58s to 58s 3d; for delivery to the end of June, 58s; last three months, 55s per cwt.

PARTICULARS OF TALLOW.—Monday, May 6.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—A steady demand prevailed for West India, and 3,500 casks sold during the week. The market generally closes about 6d per cwt cheaper. At the public sales, 7,820 bags Mauritius, 662 bags Bengal, and 300 bags native Madras only partly sold.

COFFEE.—359 casks 183 barrels and bags plantation, and 284 bags native, went off at previous quotations.

SPICE.—1,442 bags Penang pepper sold steadily at 3½d to 3¾d; 49 bags good to fine white, 6¾d to 7¼d per lb.

SALTPETRE.—1,135 bags Bombay were taken in at 31s 6d per cwt for refraction 69½ to 40½ per cent.

COCHINEAL.—650 bags barely one-fourth part sold: Honduras silvers, 2s 4d to 2s 9d per lb.

SAFFLOWER.—110 bales Bengal part sold at 3*l* 17s 6d per cwt for ordinary.

GAMBIER part sold at 15s 9d to 16s 3d per cwt.

RED SANDERS WOOD sold at 6*l* to 6*l* 7s 6d per ton.

OIL.—460 casks palm part sold at 39s to 44s 6d. A large quantity of cocoa-nut was offered and partially disposed of: Sydney, 43s 3d to 47s 4d; Ceylon, 46s to 46s 3d; a few lots of Cochin, 46s 3d to 46s 6d per cwt. 52 tuns sperm were bought in at 103*l* 15s to 104*l*. 50 tons seal went at 33*l* to 36*l* 15s per tun. Linseed, 30s 3d per cwt.

TALLOW.—725 casks 48 barrels 460 boxes various kinds by auction sold: Australian, 50s 6d to 52s 9d; South American, 50s 3d to 55s; Odessa, 49s 6d to 55s 3d. East India bought in. Y.C. quiet. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very steady this week; no material alteration to note as respects prices. Treacle continues scarce and very firm. Dutch crushed neglected; no alteration in price.

GREEN FRUIT.—Market improved owing to the backward state of home vegetation, which creates an extra demand for foreign fruits. A cargo of Valencia oranges, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. St Michael and Terceira realised prices in accordance with condition and quality. Black Spanish nuts advanced 3s per barrel. Barcelona likely to improve. Para nearly off the market.

DRY FRUIT.—Notwithstanding the dulness of trade in fruit, there is very little sign of lower prices.

COLONIAL WOOL.—The second series of colonial wool sales for the present year commenced on Thursday. The attendance of buyers, both home and continental, was good; the latter bought pretty freely. Prices ruled the same as at the close of the last sales.

FLAX unaltered.

HEMP.—Market very quiet, and rather lower prices accepted during the week.

COTTON.—Sales of cotton from Friday, 3rd May, to Thursday, 9th May, inclusive:—4,400 bales Surat at 5¾d to 6¼d for middling to good sawginned, at 5¾d for middling fair Broach, at 5¾d to 5⅞d for fair to fully fair Dhollera, at 5 7-16d for Mangarole; 1,500 bales Tinnevelly at 5¾d to 6 3-16d for middling fair to good; 500 bales Western Madras at 5¼d to 5 5-16d for fair to good fair. Throughout the week an active demand has prevailed, and a large business has been transacted; the better qualities of sawginned have been eagerly purchased, and have advanced ⅜d per lb, whilst Surat, Tinnevelly, and Western Madras are only ¼d per lb dearer: the market closes with great firmness. 131 bales cotton from Trinidad, 20 Smyrna, and 11 Carriacou are advertised for public sale on Thursday, 16th inst. P.S.—Market steady. Sales to-day, 150 bales fair Tinnevelly at 6d.

TIMBER.—The trade in wood is excessively dull, and prices generally are lower. There is some reduction in the prices at the ports of shipment, but not sufficient to induce the trade to import.

METALS.—The metal market has been again brought to a stand still by the adverse state of affairs in the United States. Copper keeps firm in price with a fair demand, but the late buoyancy has somewhat subsided. Iron is without change. Tin is a trifle easier to buy. Spelter has fallen in price about 5s per ton, and is quiet at the reduction. Lead continues to be rather neglected. Tin-plates suffer again from the cessation of American orders.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	57	3
Fat by ditto	2	11½
Yellow Russian	59	6
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market rather brisk, commanding full prices; deliveries very large. Friesland butter very dull; a great quantity left on hand, which will have the effect of reducing prices. Other provisions about the same as last week,

METROPOLITAN CATTLE MARKET.

MONDAY, May 6.—The total imports of foreign stock into London, last week, amounted to 2,095 head. In the corresponding period in 1860, we received 4,229; in 1859, 1,485; in 1858, 1,344; in 1857, 1,213; in 1856, 272; and in 1855, 2,031 head.

For the time of year the supply of foreign stock here to-day was only moderate. On the whole, however, its quality was good. Sales progressed slowly, but at full prices generally. The arrivals of beasts fresh up from our own grazing districts were rather limited, and there was a slight falling off in quality compared with many previous weeks; nearly all breeds moved off slowly, and last Monday's currency was with difficulty supported. The very best Scots sold at 5s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 2,000 Scots, crosses, &c.; from other parts of England 560 various breeds; and from Scotland 600 Scots and crosses, the latter in prime condition. We were fairly supplied with sheep as to number, but their general quality was very middling. Prime Downs and half-breds commanded a steady sale at full currencies: all other breeds were a dull inquiry, at previous rates. The best Downs, out of the wool, produced 5s per 8 lbs. Our quotations now refer solely to shorn sheep. Prime lambs were scarce and in request, at full prices; otherwise the lamb trade was rather heavy. About 250 lambs came to hand from the Isle of Wight. Calves—the supply of which was limited—sold readily at very full prices. Pigs commanded previous rates, but the demand for them was by no means active. The supply was moderate.

SUPPLIES.

	May 7, 1860.	May 6, 1861.
Beasts	3740	3900
Sheep and lambs	25350	21190
Calves	149	118
Pigs	520	470

THURSDAY, May 9.—Our market to-day was but moderately supplied with beasts. Prime breeds commanded a steady sale at last Monday's prices. Otherwise the beef trade was heavy, at barely late rates. Down and half-bred sheep were scarce and in request at extreme quotations, but long-woolled sheep were a dull inquiry at previous currencies. Lambs were in moderate supply and sluggish request on former terms. Prime small calves were firm in price; superior calves, however, ruled somewhat heavy. Pigs and milch cows realised quite Monday's quotations.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	10	Prime Southdown sheep	4	10	5	2
Second quality ditto	4	0	4	4	Large coarse calves	4	8	5	2
Prime large oxen	4	6	4	8	Prime small ditto	5	4	5	8

Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	0
Second quality ditto	3	10	4	2	Suckling calves.....each	20	0	32	0
Prime coarse-woolled do.	4	4	4	8	Quarter old store pigs	24	0	30	0

Lambs, 6s 0d to 7s 4d.

Total supply—Beasts, 980; sheep and lambs, 6,960; calves, 150; pigs, 320.
Foreign supply—Beasts, 160; sheep, 1,200; calves, 85.

NEWGATE AND LEADENHALL.

MONDAY, May 6.—The supplies of all kinds of meat are much restricted, and the trade rules firm, with an upward tendency in prices.

FRIDAY, May 10.—Very moderate supplies of both town and country-killed meat are on sale here, and trade generally rules firm at fully previous currencies.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	0	3	4	Middling mutton	4	2	4	8

Inferior mutton	3	8	4	0					

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, May 6.—During the past week the arrivals both coastwise and by rail have been liberal, and a further reduction in price had to be submitted to with all second sorts. The following are this day's quotations:—Yorkshire Flukes, 120s to 140s; Lincolnshire Regents, 80s to 100s; Dunbar red soil ditto, 120s to 140s; North Berwick, 105s to 120s; Perth, Forfar, and Fife ditto, 80s to 100s; ditto, ditto, ditto Rocks, 75s to 80s; ditto, ditto, ditto Reds, 70s to 80s; French Whites, 60s to 80s; Belgian ditto, 60s to 70s; Dutch ditto, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, May 10.—These markets have been well supplied with potatoes. Good and fine samples have moved off steadily, at full quotations; but for inferior qualities, the trade is in a sluggish state, on rather easier terms. Dunbar Regents may be had at from 140s to 160s per ton.

HOP MARKET.

BOROUGH, Monday, May 6.—We have no change to report in our market, which continues firm, with a good demand for the best descriptions of yearlings and the best qualities of the last growth. Inferior sorts receive but little attention. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 140s, 189s.

FRIDAY, May 10.—A steady business is doing in all good and fine samples of hops, at full prices; but in low qualities, the business doing is much restricted, at late currencies.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 15s to 2*l* 0s per load. A slow trade.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s and straw, 1*l* 15s to 2*l* 0s per load. A fair demand.

COAL MARKET.

FRIDAY, May 10.—Wall's-end:—Hetton 18s—Haswell 18s—Stewart's 18s—South Hetton 18s—Tees 17s 9d—South Kelloe 17s—Heugh Hall 16s—Cassop 17s—Kelloe 17s—Eden Main 16s—Harton 16s—Framwellgate 16s 3d—Aberdare Steam 18s—Fothergill's 18s 3d—Tanfield Moor Butes 13s—North Percy Hartley 15s 3d—Bebside Hartley 16s 9d—Davidson's Hartley 16s 9d—Hasting's Hartley 16s 9d. Ships at market, 70; sold 41

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 10.—Our public sales as regards East India and Persian wools, of which 10,900 bales were brought forward, have gone off very well. All long-stapled descriptions were eagerly competed for, and brought very high prices in consequence. The other wools offered on the 9th and 10th inst. did not command the same attention, and a considerable portion of them was withdrawn.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 10.—A good attendance at to-day's market. Wheat meets a ready sale at an advance of one penny per cental. Flour good consumptive demand, prices a shade dearer. Indian corn rather more doing—mixed, 34s 6d; Galatz, 36s to 36s 6d. Beans without change. Oats and oatmeal rather better. Sales at extreme rates of Tuesday.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 10.—There is little or no change to notice this week in the market for manufactured iron, the demand for both Staffordshire and Welsh continuing on only a limited scale. In Scotch pig iron there has been great dulness, caused more particularly by the recent very unfavourable accounts from America. Copper remains unchanged, as also lead. Tin plates are in fair request.

The Gazette.

TUESDAY, May 7.

BANKRUPTS.

W. M. Bruster, Swansea, letter press printer.
H. Carter, Oxford, painter.
G. Elliott, Farnham, blacksmith.
J. Pheby, Brudenell place, New North road, dealer in hams.
R. Pratt, Great Yarmouth, bricklayer.
C. Bailey and H. J. H. Skinner, Colchester, and Lime street, City, manufacturing chemists.
G. Todd, jun., Cheyne walk, Chelsea, builder.
H. Blake, Shide, near Newport, Isle of Wight, corn merchant.

J. F. Ruffle, Coleman street, bill discounter.
S. Harvey, Birmingham, gold and silver chain manufacturer.
J. Smith, Patrick O'Neill, and H. D. Leaman, Russia row, Milk street City, warehousemen.

DEATH.—On the 7th inst., at Cambridge heath, Hackney, Mrs Mary Jones, relict of the late Samuel Beverley Jones, Esq., of Bow lane, Cheapside, and only daughter of the late Thomas Taylor, Esq., of Walworth, better known as Plato Taylor, the great Greek scholar, in her 72nd year.

THE SPINAL HOSPITAL.—The perusal of the report of the surgeon of this hospital, Mr Thomas Carr Jackson, affords some satisfactory information as regards the state of perfection to which this branch of medical science has been carried, inasmuch as, out of 371 persons who, suffering from bodily deformity of all kinds, sought the aid of this charity during the past twelve months, 98 were discharged cured, and 84 were materially relieved. With respect to the remainder of the above number, 48 were slightly benefited, 10 relinquished treatment prematurely, 15 were unhappily incurable cases, and 146 still remain under treatment. So far, the institution appears to be progressing favourably; but when it is further stated that numbers of unfortunate individuals are refused, we may almost say a cure of their deformity, in consequence of the limited funds of the hospital, surely the charitable public cannot refuse their exertions by aiding its active surgeon and committee in carrying out to their fullest extent the intentions of its promoters. The above figures are a sufficient guarantee that all contributions will not be given in vain. We would remind our readers that the hospital, which is not endowed, suffered severely from the failure of Messrs Strahan, Paul, and Co.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 27th of April amounted to 516,855*l*, and for the corresponding week of last year to 506,230*l*; showing an increase of 10,625*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 225,758*l*, and for the corresponding week of 1860 to 223,792*l*, showing an increase of 1,966*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 6.—The railway market to-day showed further depression on the publication of the detailed American news. American securities were irregularly quoted, and occasionally exhibited a further decline. Illinois Central shares were last quoted 40 to 39½ dis., and New York and Erie, 19 to ¼. Mines were also dull; St John del Rey, however, improved. Joint stock banks and miscellaneous descriptions closed about the same as on Saturday.

TUESDAY, May 7.—The railway market experienced a further decline, and remained with a heavy tendency to the close. The sales proceeded chiefly from the provinces, and appeared, to a great extent, speculative; but at the same time investments were checked by the less favourable appearance of the traffic returns. Midland and South-Eastern were especially affected. North-Eastern, Great Northern, Caledonian, and Sheffield were also very flat, and nearly all the other principal stocks showed a decline. Indian guaranteed stocks were generally steady, but East Indian did not maintain the advance of yesterday. Great Western of Canada shares showed a fractional decline. Foreign shares were heavy, especially French, Brazilian, and Lombardo-Venetian. American railway securities showed a slight tendency to recover, and Illinois Central and New York and Erie shares were higher. New Brunswick and Nova Scotia bonds receded. Mines were dull, at an occasional decline. No material change occurred in joint stock banks. In miscellaneous descriptions, Peninsular and Oriental Steam shares advanced, while Victoria Dock stock was quoted lower.

WEDNESDAY, May 8.—The railway market was again severely depressed, and closed without recovery at the lowest point of the day. The fall arose from sales, mainly speculative, several of the leading stocks being scarce for immediate transfer. Midland, South-Eastern, and Great Northern were especially heavy, and declined about 1 per cent. London and North-Western and Lancashire and Yorkshire also receded. Colonial stocks were less flat than British, but still presented an unfavourable appearance. Grand Trunk declined to 19¾ to 20, and Great Western of Canada shares to 11½. Foreign descriptions were dull, especially French. No alteration occurred in American securities. Mines were quiet, but comparatively steady. United Mexican, however, receded. The transactions in joint stock banks were on an average scale, but previous prices were barely maintained,

THURSDAY, May 9.—British railway stocks improved to-day, the late decline having brought in purchasers. The absence of any change at the Bank also contributed to strengthen the market in the afternoon. At the close of the Stock Exchange, London and North-Western was quoted 94 to ¼; Midland, 121⅛ to ⅜; Lancashire and Yorkshire, 109¼ to ½; Great Western, 71⅛ to ⅜; South-Western, 94¾ to 95¼; North British, 62½ to ¾; South-Eastern, 80⅜ to ⅝; Caledonian, 96½ to 97; and Eastern Counties, 49 to ½. Colonial descriptions showed no material alteration. In the foreign market, Great Luxembourg shares were rather dull, at 6¾ to ⅞. There were few transactions in mines, and in one or two cases a decline took place.

FRIDAY, May 10.—The railway share market showed renewed heaviness. A decline of ¼ to ⅜ per cent. took place in most of the principal stocks. London and North-Western stock was quoted 93½ to 94; Great Western, 70¾ to 71¼; Midland, 120¾ to 121¼; Lancashire and Yorkshire, 108¾ to 109¼; South-Eastern, 80 to 80¼; Eastern, Counties, 48¾ to 49¼; Great Northern, 109½ to 110½; and Caledonian, 96¼ to ¾. Lombardo-Venetian Railway shares were rather flat, at 13-16 to 11-16 dis. ex div. Canadian Railway shares ruled dull, nor was there much inquiry for Indian.

A NEW SCENT.—Mr. Rimmel has a new invention for perfuming apartments, which we pronounce successful. It is strongly recommended by several members of the medical profession.

CRYSTAL PALACE.—The "Opera Concert" on Friday went off satisfactorily, and Madame Grisi sang "Home, sweet Home," with great effect. The efforts of the other singers were quite equal to former occasions; and the orchestral performances were also well carried out.

TEA.—DR HASSALL'S

("The Chief Analyst of the Sanitary Commission of the LANCET on Food,") Report on the Teas and Coffees sold by Messrs STRACHAN and CO., 26 Cornhill, London, E.C.:—"Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs Strachan and Co., I have subjected the whole of them to Microscopical Examinations and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory."

A full report of the above analysis, also list of prices, can be had on application to Messrs Strachan and Co., 26 Cornhill, E.C., London.

Carts to all parts of London daily.

ALLEN'S PATENT

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

AT HAMBLY HOUSE ACADEMY,

Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

DR CURTIS'S MEDICAL WORK. "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

"THE DERBY."—

A light elegant Coat to be worn with or without another, and will not show or be injured by the dust, and every description of Clothing, &c., for visitors to the Races, and for Tourist and Excursionists.

BRADFORD, YORKSHIRE.

FARGATE, SHEFFIELD.

SPECIAL NOTICE.—The establishments will be closed on Wednesday and Thursday next, the 15th and 16th of May, and re-opened on Friday morning, the 17th of May, as usual.

KEATING'S COUGH LOZENGES.—

Judged by the Immense Demand, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

COLLARD AND COLLARD'S NEW

WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

TRADE 8/2 MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

FURNITURE CARRIAGE FREE.—

Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free. This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co., Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

MEDICAL ADVICE.

DR WATSON, U.S., F.R.A.S., &c.

(specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

HOLLOWAY'S OINTMENT AND

PILLS.—Changes of season are always trying to mankind, from the variability of temperature—now increasing, then depressing the circulation. Hence the prevaleuce of throat affections, chest complaints, and disordered digestion at this season. For all this catalogue of ailments Holloway's Ointment, rubbed thoroughly twice a day over the parts affected, will be found universally serviceable in preventing, checking, or curing each and all, however severe the attack. It is remarkably curative in cases of relaxed, inflamed, or ulcerated throats; while for glandular enlargements it is a specific. In coughs, colds, asthma, and bronchitis, Holloway's Pills should be taken simultaneously with the friction of the Ointment over the chest. Ease will soon follow this treatment, and health will return.

CURES OF COUGHS AND COLDS,

by Dr LOCOCK'S PULMONIC WAFERS From Mr James Drury, Stone Bow, Lincoln:—"I am authorised by several ladies and gentlemen—whose names I can give—to state that Dr Locock's Wafers have proved of the highest efficacy to them for colds, coughs, hoarseness, wheezing, influenza, sore throat; and in almost every sale I hear of benefit obtained by their use." Dr Locock's Wafers give instant relief, and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

WOTHERSPOON and CO., Glasgow and London.

KEATING'S PALE

NEWFOUNDLAND COD LIVER OIL, perfectly pure, nearly tasteless, and free from adulteration of any kind, having been analysed, reported on, and recommended by Professors Taylor and Thomson, of Guy's and St Thomas's Hospitals, who, in the words of the late Dr Pereira, say, that "The finest oil is that most devoid of colour, odour, and flavour," characters this will be found to possess in a high degree. Half-pints 1s 6d, Pints 2s 6d, Quarts 4s 6d, and Five-pint Bottles 10s 6d, Imperial Measure.

79 St Paul's Churchyard, London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

CLERICAL ATTIRE.—

E. MOSES and SON having studied every variety of British costumes, are always ready to supply Clergymen of all denominations with clothing either for clerical duties or daily dress.

From the HOMEWARD MAIL:—"We give an instance of the rapid process of depopulation in many parts of the north-west:—At the beginning of last February there remained only 40 persons able to lift a basket of earth, in a village that comprised only a month before more than 300 able-bodied men and women;—the rest had either perished, gone in search of relief to other districts, or were unable to move. In a village named Arungpore,—in former times overlooking a fine lake,—out of 200 inhabitants, 80 only were found capable of any exertion when the commissioner visited the place. But the most harrowing account is from the district of Bullubgurh, where no less than 2,800 men, women, and children are said to have died of sheer want Judging from these facts, and from information received from various parts of India, we may safely conclude that the gloomiest accounts published of this awful visition are not exaggerated."

By the Bombay mail received on the 6th of May, the following telegram was forwarded;—"The famine still prevails and extends—the distress has not yet come to the worst—the European resources have been nearly exhausted." It is therefore certain that for some months relief must be sent from England, and that the efforts which have been put forth must not be relaxed, if we would save from death of the most appalling kind thousands of our fellow-creatures. The cry of distress is heard throughout the land; the young, the middle-aged, and the old are all alike stricken down, and Christian duty bids us seize the opportunity to demonstrate that our religion is based upon Christian charity.

The foregoing extracts prove the fact, that a famine of unexampled severity exists, and that the peoples of India urgently call for a display of that benevolence for which this country has so long been noted. Government is quite alive to the necessity of action, and it is generally understood that the cost to the public treasury, from remission of taxation, loss of revenue, relief of distress, and employment of labour, will not be less than four millions sterling; but there is still much to be done by private efforts, for the old and infirm, and those unable to work, cry aloud in their misery.

The Committee gratefully acknowledge that their exertions have been thus far nobly seconded. Her Most Gracious Majesty the Queen, the Royal Family, the Nobility, the various City Companies, and public generally, have contributed largely to the fund; in consequence £85,000 has been already remitted to India (independent of many provincial subscriptions) for distribution, through the local authorities of the districts most urgently requiring relief; but until the autumnal rains shall have replenished the earth, no local relief can be expected, and as this cannot be before November or December next, the Committee urgently appeal to all those who have not hitherto subscribed to do so forthwith, and thus to aid the good work.

The Committee have not ventured to base their appeal upon any special grounds, although there are, doubtless, many sufficiently important to justify their doing so; they simply call attention to the fact, that a country much larger in extent than the United Kingdom, containing ten millions of inhabitants, has a population of two millions between whom and death there is nothing but charity, and the Committee are convinced this is enough to satisfy their fellow subjects, that, independent of the many other claims India has upon us, it is our bounden duty to extend to her relief in her hour of need.

Subscriptions may be remitted direct to the Mansion House, or through any banker in the United Kingdom to the credit of the Indian Famine Relief Fund with the Bank of England.

The Committee gratefully acknowledge the receipt of several church and chapel collections, and trust that all clergymen and nonconformist ministers who have not already done so will cause collections to be made in aid of the Fund.

The mails via Marseilles are despatched on the 3rd, 10th, 18th, and 26th of each month, when all sums received up to date are remitted direct to the authorities.

The General Committee meet at the Mansion House the first Friday in each month, the Sub-Committee every Marseilles mail day.

All communications should be addressed to the Honorary Secretaries at the Mansion house, E.C.

EAST INDIAN RAILWAY COMPANY.

—The Directors are prepared to receive Tenders for FIFTY-THREE LOCOMOTIVE ENGINES, as per specification and drawings now open for inspection at these offices. Tenders, marked "Tender for Locomotives," must be delivered in sealed envelopes, addressed to the undersigned, on or before 12 o'clock at noon, on Tuesday the 14th of May instant. The Directors are not bound to accept the lowest or any tender.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, London, May 1, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £50.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, April 9, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

MID-WALES RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors of this Company are prepared to receive tenders for Debentures, under the Company's Act of 1859, at 5 per cent. per anuum, for terms of 3, 5, or 7 years.—Applications to be made to Messrs Shephards, Pelly, and Allcard, Stock-brokers, Threadneedle street, London, or to the Secretary of the Company, at the Company's offices, Shrewsbury.

R. S. FRANCE, Secretary.

CHINA AND JAPAN (COAST AND RIVER) STEAM NAVIGATION COMPANY, Limited.

Capital £300,000.

First issue, £150,000, in 15,000 shares of £10 each. (2,500 of which shares will be reserved for China.)

Deposit 5s per share on application, and 15s per share on allotment. Calls not to exceed £2 10s each per share, at intervals of not less than three months.

DIRECTORS.

W. R. Adamson, Esq., late of China (Messrs Adamson and Co.)
Harry Borradaile, Esq., Director of the Scinde and Punjaub Railways, and the Indus Steam Flotilla Co.
George Braginton, Esq., Banker, Torrington.

G. Lathom Browne, Esq., Director, Cape Town Railway and Dock.
James Nugent Daniell, Esq., late H.E.I.C. Civil Service, China.
Henry B. Loch, Esq., C.B. (attached to the late Special Embassy to Pekin,) 11 Brook street, Grosvenor square.

(With power to add to their number.)

BANKERS.

Messrs Dimsdale, Drowett, Fowler, and Barnard, 50 Cornhill.

SOLICITORS—Messrs Flux and Argles, 68 Cheapside.

STOCK BROKERS.

Messrs Towgood and Strachan, 33 Throgmorton street.
George E. Seymour, Esq., 38 Throgmorton street.

SHIPBROKERS AND MARINE SUPERINTENDENTS.

Messrs Robertson and Co., Newman's court, Cornhill.

SECRETARY—J. Spencer Price, Esq.

OFFICES—No. 12 Old Broad street, London, E.C.

This Company is formed for the purpose of supplying what has long been urgently required, and which, from the increased, and constantly increasing, growth of our commerce, is daily becoming more and more necessary; viz., regular, speedy, and safe communication along the extensive line of coast and in the inner waters of China.

For conducting an immense coasting trade, the Chinese possess nothing but unwieldy junks, which are unable to perform their voyages except with the favourable monsoon; while European commerce, in the China waters, is carried on in sailing vessels, with the addition, recently of a very limited number of steamers owned by private firms; the postal and general passenger traffic being confined to the semi-monthly service of the Peninsular and Oriental Company between Hongkong and Shanghae.

To meet the necessities of both foreign and native trade, it is proposed to construct a fleet of steamers, which shall be the means of establishing regular communication between the ports and places to which foreigners will have access, and of providing for the conveyance of passengers, mails, and general merchandise.

It is intended to commence with the construction of six steam vessels, as the Directors propose to limit the operations of the Company until experience has proved in what way they can be best extended with advantage to the shareholders.

Power (under the control of the shareholders in general meeting) will be taken by the deed for a future increase of capital; and provision will be made for extension of the Company's operations between China and Japan, as found expedient.

The extent of the trade already existing—its certain expansion—and the manifest necessity for the use of steam—warrant the conclusion that the Company may rely upon being able to find ready employment for their vessels at a scale of charges that will make the profits ample.

Forms of application for shares addressed to the Directors, may be obtained from the Secretary, at 12 Old Broad street, London, E.C.; or from the Brokers of the Company; but no application will be considered, unless a deposit of 5s for each share applied for shall have been previously made with the Bankers of the Company.

AIR CIRCULATING AND ANTI-GREASE HATS

—Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. First quality, 21s; second ditto, 17s, cash. To be had wholesale at the manufactory, Union street, Southwark, S.E.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

CREDIT FONCIER OF FRANCE.

THE GENERAL MEETING of the Shareholders was held on the 24th April, 1861, and the following are the principal passages of the REPORT presented by M. L. FREMY, Councillor of State in Extraordinary Service, on the operations of the year 1860:—

"Gentlemen,—

"Your Society, founded for the purpose of ameliorating the conditions of mortgage loans, has not for a single day lost sight of the great object of its institution. It has constantly sought with unflagging zeal, and perseveringly applied, all the improvements which were calculated, by turning to the advantage of the borrower, to propagate the useful innovation of loans at a long date, to be reimbursed by a sinking fund.

"To be able at all times to meet the requirements of landowners, your administration adopted the system of loans on bonds, which places at the disposal of borrowers an inexhaustible source of capital, and maintains the charges in exact proportion to the current price and the oscillations of the market. At the same time that it introduced this system so marvellously elastic and adapted to all circumstances, to periods of prosperity as well as to critical times, the Society neglected no means for securing an easy investment. It created a loan office, the funds of which were to be especially devoted to advances on those securities; it established extensive relations in the departments, with the concurrence of the Receivers-General of Finances, and the support of the corporation of Notaries; and, thanks to these efforts, it has had the satisfaction of seeing a constant increase in the value of the securities issued to borrowers. At present, a loan on 5 per cent. bonds is really equivalent to a loan in cash. As for the 4 per cent. bonds, their price has been 485f during the year 1860, and at that rate the annual payment for a loan contracted for fifty years does not exceed 5f 82c per cent., sinking fund included.

"Though the borrower has the faculty of anticipating the reimbursement, your first contracts nevertheless imposed the obligation of paying, in that case, an indemnity fixed at 3 per cent. of the capital reimbursed. A decision of your council of administration of the 13th July, 1859, now sanctioned by the law of 6th July, 1860, Art. 9, has reduced this indemnity to the insignificant proportion of one-half per cent., so that all obstacles to anticipated reimbursements have been entirely removed, and a loan contracted nominally for fifty years may last as short a time as the debtor pleases. . . . . .

These advantages, being duly appreciated by the public, have caused a most remarkable increase in the number and amount of your mortgage loans at long date. You were well pleased, in 1858, with a total of mortgage loans at long date amounting to 30 millions and divided among 277 borrowers; in 1859, with a sum of 26 millions, divided among 343 borrowers. The year 1860 has doubled all those figures. The number of mortgage loans at long date, during its course, is 709, and their amount 48 millions. This rapid progress has been further accelerated during the first three months of 1861. In that short period, 242 mortgage loans at long date have been realised, amounting to the sum of 30 millions.

"The whole of the mortgage loans at long date made by your Society since its origin at present amounts to 220 millions, thus considerably exceeding the sum of 200 millions, so frequently mentioned in official documents and in your meetings as destined to be the expression of the normal existence and the evidence of the definitive success of the Credit Foncier Society.

"At the same time that it laboured assiduously and successfully to develop the kind of business which constitutes your chief attribution, your administration did not think proper to omit adding thereto certain operations which mutual ties and a common object connected therewith, and which can only be united with mortgage loans to give and receive an active impulse—we allude to the *Credit Communal*, the *Credit a l'Industrie des Constructions*, and lastly the *Credit Agricole*.

"Loans to communes, departments, and syndical associations entered into your attributes as soundly understood, and as defined by your statutes ever since 1855. Those statutes give you, in fact, the general mission of promoting, by loans at long date, the cultivation of the soil and the improvement of landed property. Now, what is the object of the loans contracted by communes, departments, and syndical associations? You all well know what it is, and it will suffice for me to repeat the terms in which the Government itself defined that object: 'The works undertaken by syndical associations for draining, irrigating, and constructing dikes, are especially intended to render the soil more productive; those undertaken by departments and communes, as making new roads and new streets, always increase the value of the adjacent estates.'*

"It is also to second the progress of real estate that, while reserving your loans at long date for estates whose revenue is durable and certain, you were unwilling to refuse your aid to persons who wish to build, and who can only offer you as security the ground on which the edifices are to be erected. After having, in their interest, of ourselves and without any intermediate agency, granted loans at short date, you acquired the conviction that you could afford them more effectual and more extensive aid by connecting with your Society the Builders' Auxiliary Discount Bank (Sous-Comptoir des Entrepreneurs), the principal object of which is also the advancing loans on mortgage security. . . . . .

"Lastly, as you are aware, several persons, without fully understanding the imperative provisions of your statutes, forgetting the object, the essential character, and even the very name of Credit Foncier, reproached your Society with reserving all its favours for real property. They accused it of leaving without assistance and without credit all tenant-farmers and those who could not give you as security property regularly constituted and of a value equal to double the loan solicited.

"However unfounded this complaint, which was based on an evident confusion between *Credit Foncier* and *Credit Agricole*, my honourable predecessor, as far back as 1857, proposed that you should meet it by conferring a new benefit, and deprive it of all cause and pretext, by favouring the creation of a new Society possessing a distinct capital to be especially devoted to discounts and loans to agriculture. This Society was to be united to you by the bond of a common administration. Without imposing on you any financial responsibility, it was to profit by your extensive relations and your tried organisation. I have unceasingly prosecuted the realisation of this idea, and in your meeting of the 27th of April, 1859, I had the honour of submitting to you in detail the bases of a project which received your approbation, and the execution of which was sanctioned by the law of 20th July, 1860, assuring to the new Society, with an eventual guarantee of interest, the moral support of the State. The capital of the *Credit Agricole* was chiefly subscribed by the shareholders of the Credit Foncier and without making any appeal to the public. Its statutes have been approved, and it has commenced operations under the direction of your administration.

"Thus, during the course of 1860 all the projects you had long since formed were finally carried out. The Credit Foncier is now, for the first time, in possession of the attributions and collateral aids which complete it, and which, in the mind of its founders, were to be the natural consequences of its development. . . . . .

"The year which has given greatest extension to your domain is also that which has witnessed the increase, in proportions previously unknown, of the number and amount of your mortgage loans. Similar progress is to be remarked in the principal branches of your old affairs, and coincides with the auspicious commencement of your new operations. The balance of our deposits of funds has constantly stood at about 100 millions, and the general movement of our establishments, which was 1,208 millions in 1852, have amounted to 2,033 millions in 1860, thus showing an augmentation of 800 millions.

"Your credit has constantly increased in the midst of this last development of business. At the same time that the issue of your mortgage bonds was developing itself, a loan of 37,500,000f, in 3 per cent. bonds with premiums, intended to provide the means of lending to communes, was taken up in three days.

"Such are the results which you will be able more completely to appreciate on perusing the detailed report, which we now proceed to lay before you, on each of the operations of the year 1860.

"LOANS.

"The loans of all kinds made in 1859 amounted to the total of 33,857,000f. Those of 1860 amount to 69,475,345f.

"MORTGAGE LOANS AT LONG DATE.

"The amount of the mortgage loans at long date realised in the year 1860 is 48,054,300f; and their number 709. In 1859 the number of loans at long date was 343, for a sum of 26,386,300f; whence it follows that the increase in number is more than double, being 107 per cent., and the increase in the amount 90 per cent.

"With regard to the sums lent, the mortgage loans at long date are subdivided as follows:—

	Number.	Representing a sum of
		f
Loans of 1,000,000 and upwards.....	2	5,500,000
— 500,000 to 1,000,000	6	4,002,000
— 100,000 to 500,000	90	20,909,000
— 50,000 to 100,000	111	8,517,000
— 10,000 to 50,000	314	8,121,500
— 10,000 and under.....	177	1,004,800

"The average of the loans comprised in the last category is 5,777f, and it includes loans of 1,000f, 1,500f, and even 500f, which proves that your administration does not disdain any kind of affairs, and that, without being able to remove the obstacles or difficulties which arise from the nature of things, and from the imperfect state of our mortgage laws, it gives the same prompt and devoted attention to small proprietors as to great ones." . . . . .

After stating the situation of the mortgage loans at short date, which, since the law of 19th May, 1860, have been replaced by credits opened at the Builders' Auxiliary Discount Bank, and the loans for draining, which, in 1860 as in 1859, did not attain the development hoped for, the Report proceeds to give an account of the loans made to departments, communes, and syndical associations, in virtue of the law of 6th July, 1860.

"The first communal loan was concluded on the 20th August, 1860; it was for a sum of 8,200,000f, and was contracted by the city of Lyons, whose example, before the close of the same year, was followed by the towns of Marseilles, Havre, and Cette. Already, in 1860, the communal loans realised amount to 19,178,145f. You will no doubt be struck with that figure, which extends over a few months only, and yet amounts to more than two-thirds of the mortgage loans at long date realised during the whole year. Though we by no means expect the frequent recurrence of operations so extensive as those of the large towns above-mentioned, we may nevertheless look forward to a good development of this description of loans.

"From the 1st of January, 1861, to the present time, thirteen more communal loans have been realised for a sum of 5,588,783f, which raises to 24,766,928f the total of the sums hitherto lent in the execution of the law of 6th July, 1860.

"Moreover, conditional contracts for a sum of 8,800,000f have already been entered into with certain towns which wished to secure our assistance before obtaining the definitive approbation of their loans.

"Many other affairs are projected and will be carried out as soon as the communes, departments, and syndical associations, now awaiting the decisions of the superior administration or of the Legislative Body, shall have obtained necessary decrees or laws."

The Report then passes to the chapter relating to the issue of bonds. It appears that the number of bonds issued in 1860 was 122,420, for a sum of 46,718,800f; that the marketable value of the 3 and 4 per cent. mortgage bonds, the firmness of which was remarkable in 1859, further improved in 1860, and that the 4 per cent. bonds have several times been at par.

The meeting unanimously voted the different resolutions submitted to it.

"The following table shows the average price of these securities for the month of December in 1858, 1859, and 1860:—

	4 per cent.		3 per cent.	
	500f	100f	500f	100f
Years.	f c	f c	f c	f c
1858	474 90	93 03	446 15	87 37
1859	474 19	94 22	451 46	90 51
1860	493 45	99 0	469 28	96 48

With respect to the *communal 3 per cent. bonds*, the Report then says:—

"The communal three per cent. bonds form part of a loan of 75 millions represented by 150,000 bonds of 500f each. These bonds, besides the interest payable on 1st of May and 1st of November, are entitled to prizes amounting to 300,000f yearly, and drawn every six months. They are to be paid off at par, as drawn by lot every six months, for fifty years, beginning from 1st of November, 1860.

"The number of bonds to be paid off every six months is determined by your council of administration, according to a sinking fund calculated for a period of 50 years at 5 per cent. interest.

"At the beginning of October last, his Excellency the Minister of Finance authorised your Society to make, on the loan of 75 millions, a first issue of 37,500,000f in 75,000 communal obligations, producing 15f interest. These obligations were issued at the rate of 445f, with interest to run from the 1st November, 1860. The first instalment paid on subscribing was 85f on each bond; the remainder is payable every two months, in seven instalments, the last of which will be due from the 20th to the 30th December, 1861.

"You are aware how eagerly the public responded to our call. The subscription was opened on Thursday, the 18th October, 1860, and closed on the Monday following. In conformity with Art. 9 of the conditions, the subscriptions received during the last day underwent a reduction of not less than seven-eighths.

"The number of subscribers in the first three days, Thursday, Friday, and Saturday (the 18th, 19th, and 20th), was 6,550, and their subscriptions amounted to 72,828 obligations. In the fourth day, 2,246 subscribers applied for 20,818 bonds.

"With respect to the individual amount of the sums demanded, the subscriptions are divided as follows:—

6,455 from 1 to 5 bonds.
1,248 — 6 — 10 —
645 — 11 — 25 —
498 — 26 upwards.

This rapid subscription, and immediate allotment of a new security are proofs of the soundness of your credit.

"We have renounced the faculty of omitting the whole or part of the surplus of the loan of 75 millions before the 1st November, 1861.

"DEPOSIT OF CASH,

"On the 31st December, 1860, the balance of our deposits of cash was 97,902,884f, 10c, viz.:—

	f	c
"In accounts current	96,448,384	10
On deposit notes (bons de caisse)	1,454,500	0
	97,902,884	10

"The number of accounts on the 31st December was 6,212.

"DIVISION OF THE PROFITS OF THE YEAR 1860.

	f	c
"The gross profits of the year 1860 amounted to.....	12,637,615	71
The expenses were	8,525,607	47
Net profits.....	4,112,008	24
"There has been distributed to shareholders—		
5 per cent. as provisional interest	749,843	75
	3,362,164	49

which we propose to employ as follows:—

	f	c
"1. To the Statutory Reserve Fund: 20 per cent., the maximum authorised by the Statutes,.....	672,433	0
2. To the payment of a dividend of 17f 50c, which would make, with the 12f 50c already paid, a revenue of 30f, representing 12 per cent. on the 250f paid up for each share ..	1,050,000	0
As to the sum of	1,639,731	49

which constitutes the surplus, we would employ it in completing the liberation of that part of our social capital immobilised in the houses occupied by the offices of the Company.

"If you approve our proposals, our reserves would be thus constituted:—

	f	c
Statutory Reserve	1,861,311	61
Reserve in real estate.....	2,388,587	49
Provident Fund intended to meet demands on bonds.....	1,756,442	38
Total.....	6,006,341	48

"Thanks to these important reserves and especially to the development of our operations, we can look forward to the future with all confidence."

In the second part of the Report two resolutions are submitted for the approbation of the shareholders.

One of them relates to the modification of Art. 16 of the contract of 19th March, 1859, between the Credit Foncier and the Builders' Auxiliary Discount Bank. This modification has for its object to permit the Credit Foncier to approve, in case of need, the opening of credits with the Builders' Auxiliary Discount Bank to double the amount of the social capital of the two establishments, that is, to 70 millions.

The second resolution has for its object the creation of a pension-fund for the clerks employed by the Credit Foncier, and for their widows and children. The Society, besides an endowment of 40,000f which it immediately grants to this fund, will pay into it every year a sum equal to a deduction of 4 per cent. on the salaries of the persons employed, or about 25,000f.

* Preamble to the Law of 6th July, 1860.

SOUTH AUSTRALIAN BANKING

COMPANY.—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, and Robe. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

BANK OF BRITISH NORTH AMERICA.

Incorporated by Royal Charter.

The Directors of the Bank of British North America do hereby give notice, that the Yearly General Meeting of Proprietors will be held, pursuant to the Deed of Settlement, on Tuesday, the 4th June next, at the Office of the Corporation, 7 St Helen's place, Bishopsgate street, at One o'clock precisely, when the election of the three Directors in the room of those going out by the provisions of the deed will take place.—By order of the Court, C. McNAB, Secretary.

London, May 9, 1861.

LONDON CHARTERED BANK OF AUSTRALIA.

Incorporated by Royal Charter.
Paid-up capital, £775,000.

CHAIRMAN—Duncan Dunbar, Esq.
DEPUTY-CHAIRMAN—William Fane De Salis, Esq.
Offices, 17 Cannon street, E.C.

Letters of Credit and Bills of Exchange are granted on the Branches of this Bank at Sydney, Melbourne, Geelong, Ararat, Ballaarat, Dunolly, Maryborough, Back Creek, Lamplough, and Inglewood.

Drafts on the Australian Colonies negotiated and sent for collection.—By order of the Court,
JAMES STRACHAN, Secretary.

UNION BANK OF AUSTRALIA.

London Office, 38 Old Broad street.

The Directors of this Bank grant LETTERS of CREDIT and DRAFTS on its Branches as under, viz.:—

NEW SOUTH WALES.
Sydney | Orange
Bathurst | Goulburn
QUEENSLAND.
Brisbane.
VICTORIA.
Melbourne | Ballarat | Portland
Geelong | Castlemaine |
SOUTH AUSTRALIA.
Adelaide | Port Adelaide
TASMANIA.
Hobart Town | Launceston
NEW ZEALAND.
Auckland | Christchurch (Canterbury)
Wellington | Lyttelton (Canterbury)
Napier (Hawke's Bay) | Dunedin (Otago)
Nelson | Invercargill (Otago)

They likewise negotiate approved Bills on the Colonies, and send out Bills for collection, the terms for which may be obtained on application at the offices of the Bank.

N.B. Letters of Credit and Drafts may also be procured of Messrs Glyn and Co., 67 Lombard street.—By order of the Board, H. W. D SAUNDERS, Secretary.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.
Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, March 23, 1860.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.
Paid-up capital, £500,000. Reserve fund, £50,000.

COURT OF DIRECTORS, 1860-61.
William Howard, Esq., Chairman.
Donald Larnach, Esq.
William Sohiory Grey, Esq.
George Garden Nicol, Esq.
George Palmer Robinson, Esq.
George May, Esq.
Alexander Anderson, Esq., Chief Manager.
David Trail Robertson, Esq., Inspector and General Manager.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit, and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertake the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 62 Threadneedle street, London.

Office hours, 10 to 3; Saturdays, 10 to 2.

James Case, Esq., Liverpool.
James Walker, Esq., Manchester.
Messrs S. Angas and Co., Newcastle-on-Tyne.
Messrs Jas. Watson and Smith, 8t Vincent place, Glasgow.

In bringing the London and Provincial Discount Company (Limited) under the notice of the public, the Directors wish particularly to call attention to the distinctive principles on which they are determined to conduct business—viz., to avoid heavy preliminary and working expenses, to limit the amount of discount of even the best bills, and to offer facilities to trade and professional bills, for which there is at present no opening, and, lastly, to establish branches in the large provincial towns, which as yet have not one Joint Stock Discount Company, and where the rate of discount rules higher than in London.

Acting upon these principles there can be no doubt of success.

Prospectuses, with full particulars, may be obtained from the brokers; or at the offices, 46 and 47 Cornhill, E.C.

FORM OF APPLICATION FOR SHARES.

To the Directors of the London and Provincial Discount Company (Limited), 46 and 47 Cornhill, E.C.

Gentlemen,—Having paid the required deposit, I request you to allot me shares in the above-mentioned Company; these, or any less number that you may allot to me, I agree to accept, to pay all calls when due, and sign the Articles of Association when required.—I am, Gentlemen, your obedient servant,

Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

NEW ZEALAND LOAN.—

The undersigned, agents appointed by the Governor of the above colony, in virtue of the New Zealand Loan Act, 1860, passed by the General Assembly of New Zealand, to raise a Loan of £150,000 for the public service of that colony, hereby give notice, that they will be prepared to receive up to Monday, the 20th May inst., at 2 o'clock precisely, at the office of the Union Bank of Australia, 38 Old Broad street, London, sealed Tenders, in writing, of parties who may forward the same, addressed "Tenders for New Zealand Loan," or attend in person therewith. Such tenders will then be opened in the presence of all so attending, and read publicly, and the purchasers be forthwith declared, provided the price be not under the minimum to be contained in a sealed paper to be laid on the table.

The Debentures for £100 each, with Coupons attached, will be dated 1st July next, and bear interest from that day at 6 per centum per annum for 30 years, both principal and interest being payable at the Union Bank of Australia, London.

Payment for the amount that may be allotted will be required as follows:—

£10 per centum on the purchaser being declared
20 — on or before 20th July next
20 — on or before 20th August next
25 — on or before 20th September next,
and the balance on or before 21st October next.

(Signed) JAS. J. CUMMINS.

HELMUTH SCHWARTZE,
54c Moorgate street buildings.

THE FOLLOWING VERY VALUABLE FREEHOLDS, in London, consisting of the White Hart Tavern, but now more commonly known as the Metropolitan Tavern, in Holborn, at the corner of Warwick court, and opposite Chancery lane; and of Nos. 3, 4, 5, and 6, Mincing lane, City; and of Nos 37, 146, and 148, Fenchurch street, City; and of Premises in Moddiford court, attached to No. 3 Mincing lane, and more commonly known as No. 39 Fenchurch street, will be SOLD by AUCTION, unless previously disposed of by private contract, of which due notice will be given, in pursuance of orders of the High Court of Chancery, made by his Honour the Vice-Chancellor Sir Richard Torin Kindersley, as the judge to whose court is attached the cause of Wright v. Vernon, and the causes supplemental thereto, by Mr JOHN DUCKWORTH, the auctioneer appointed to sell the same, at the Auction Mart, near the Bank of England, on Thursday, the 20th day of June, 1861, at 12 for 1 o'clock. The PREMISES in Mincing lane, Moddiford court, and 37 Fenchurch street, form one large block suitable for the erection of one large fine superstructure with many sets of chambers on each floor.—Printed particulars, with plans annexed, will shortly be ready, and may then be had on application to Mr Thomas Smith, solicitor, 15 Furnival's inn, London, E. C.; Mr H. J. Godden, solicitor, 1 Clement's lane, London, E. C.; Messrs King and M'Millin, solicitors, 4 Dane's inn, Strand, W. C.; Mr S. R. P. Shilton, solicitor, Nottingham; Mr Duckworth, the auctioneer, at Barnet, Herts; Mr Thomas Smith Woolley, South Collingham, Newark; and Mr John Young, of 35 King street, Cheapside, London, E. C.; at the Auction Mart; and at the White Hart Tavern. The premises may be viewed on application to the tenants.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

HARVESTING MACHINERY; for the Colonies, Russia, Spain, Algeria, &c., &c. SAMUELSON'S specially constructed Reaping Machines, requiring no skilled labour, £15; Combined Reaping and Mowing Machines, £24; Self-Raking Reapers, £36; Horse Rakes, £7 10s. Subject to the usual export terms.
B. SAMUELSON, Britannia Works, Banbury, and 76 Cannon street west, City, London.

A FIRST-CLASS COMMISSION House in Dublin is open to represent a Tea House, of good standing and business capabilities, in Ireland. References exchanged.—Address, in the first instance, W. X., W. Walton, 17 Harp lane, E.C.

CLERK.—THE ADVERTISER who has lately returned from South America, is desirous of a re-engagement, either at home or abroad. Has a thorough knowledge of bookkeeping and accounts and is well acquainted with Spanish.—Address E. G., Messrs Mackie and North's, 29 Threadneedle street, E.C.

EMPLOYMENT OF MONEY, with partial employment of time.—£500 required, for which security will be given over leasehold property. This is an eligible opening for a Gentleman who can post books, and has a few hours to spare any part of the day. Unexceptionable references given and required.—Apply, by letter, to Mr Hutchinson, Accountant, 7 Tokenhouse yard, Lothbury, London, E.C.

THE "TIMES," £1 1s per QUARTER free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. NEW ZEALAND LOAN.—The undersigned, agents appointed by the Governor of the above colony, in virtue of the New Zealand Loan Act, 1860, passed by the General Assembly of New Zealand, to raise a Loan of £150,000 for the public service of that colony, hereby give notice, that they will be prepared to receive up to Monday, the 20th May inst., at 2 o'clock precisely, at the office of the Union Bank of Australia, 38 Old Broad street, London, sealed Tenders, in writing, of parties who may forward the same, addressed "Tenders for New Zealand Loan," or attend in person therewith. Such tenders will then be opened in the presence of all so attending, and read publicly, and the purchasers be forthwith declared, provided the price be not under the minimum to be contained in a sealed paper to be laid on the table.
The Debentures for £100 each, with Coupons attached, will be dated 1st July next, and bear interest from that day at 6 per centum per annum for 30 years, both principal and interest being payable at the Union Bank of Australia, London.
Payment for the amount that may be allotted will be required as follows:—
£10 per centum on the purchaser being declared.
20 — on or before 20th July next
20 — on or before 20th August next
25 — on or before 20th September next,
and the balance on or before 21st October next.
(Signed) JAS. J. CUMMINS.
London, May 4, 1861. JOHN MORRISON.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

[redacted]H AUSTRALIAN BANKING

OMPANY.—Incorporated by Royal Charter, letters of Credit and Bills issued upon Adelaide, [redacted]ille, Gawler, Robe, and Wallaroo. Approved [redacted]gotiated and sent for collection. [redacted]description of Banking business conducted [redacted]ictoria and New South Wales, through the Com- Agents. WILLIAM PURDY, Manager. Old Broad street, E.C.

COMMERCIAL BANKING

COMPANY of SYDNEY, NEW SOUTH WALES.
Incorporated by Act of the Colonial Legislature.
London Office, No. 33 Cornhill.
LONDON BOARD.
John Gilchrist, Esq. | Frederick Parbury, Esq.
Edwin Brett, Esq.

The London Board of Directors grant Letters of Credit payable on demand, and Bills of Exchange at thirty days' sight, on the Sydney office, and on the following branches of the Bank in the Colony of New South Wales, viz.:—

Albury	Goulburn	Maryborough	Shoalhaven
Cooma	Kiama	Morpeth	Wollongong
Eden	Maitland	Queanbeyan	Yass

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.
EDWIN BRETT, Manager.
No. 33 Cornhill, London, E.C.,

ORIENTAL BANK

CORPORATION.
Incorporated by Royal Charter, 30th Aug., 1851.
Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, March 23, 1860.

CHARTERED MERCANTILE BANK

of INDIA, LONDON, and CHINA.
Incorporated by Royal Charter.
Paid-up capital, £500,000. Reserve fund, £50,000.
COURT OF DIRECTORS, 1860-61.
William Howard, Esq., Chairman.
Donald Larnach, Esq.
William Sollory Grey, Esq.
George Garden Nicol, Esq.
George Palmer Robinson, Esq.
George May, Esq.
Alexander Anderson, Esq., Chief Manager.
David Trail Robertson, Esq., Inspector and General Manager.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit, and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertake the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours, 10 to 3; Saturdays, 10 to 2.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital, £750,000. Reserve Fund, £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

NEW SOUTH WALES.

Cornhill, May, 1861.

THE TRUST AND LOAN COMPANY

of UPPER CANADA.

Notice is hereby given, that an Annual General Meeting of Shareholders in this Company will be held on Friday, the 31st May, at One o'clock p.m., at the offices, 65 Moorgate street, for the purpose of declaring a Dividend on the Capital Stock of the Company, and electing Directors and Auditors for the ensuing year.

The Transfer Books will be closed on the 21st instant, and re-opened on Thursday, the 13th June, on which day the dividend will be paid.—By order,
F. FEARON, Secretary.
65 Moorgate street, May 16, 1861.

THE TRUST AND LOAN

COMPANY of UPPER CANADA. Incorporated by Royal Charter. Capital £1,000,000.
DIRECTORS.
The Right Hon. Edward Pleydell Bouverie, M.P., President.
William Chapman, Esq., Deputy Chairman.
James Hutchinson, Esq. | William G. Thomson, Esq.
Charles Morrison, Esq. | T. M. Weguelin, Esq.
BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.
65 Moorgate street, London.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.
Capital £200,000.
PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.
DIRECTORS.
The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Charles Donaldson, Esq.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith Collingwood.
E. W. Thomson, Esq., President of the Board of Agriculture.
BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and 10 years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents, Brunton and Son, Auction Mart chambers, Bartholomew lane, London.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

MID-WALES RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors of this Company are prepared to receive tenders for Debentures, under the Company's Act of 1859, at 5 per cent. per annum, for terms of 3, 5, or 7 years.—Applications to be made to Messrs Sheppards, Pelly, and Allcard, Stock-brokers, Threadneedle street, London, or to the Secretary of the Company, at the Company's offices, Shrewsbury.
R. S. FRANCE, Secretary.

TEWKESBURY AND MALVERN RAILWAY.

—Notice is hereby given, that an Extraordinary General Meeting of the Shareholders of the Tewkesbury and Malvern Railway Company, will be held at the Company's Offices, 2 Bridge street, Westminster, S.W., on Tuesday, the 21st day of May now next ensuing, at the hour of Twelve o'clock at noon precisely, for the purpose of authorising the exercise of the powers conferred upon the Company for the borrowing upon mortgage or bond any sums not exceeding in the whole the sum of £48,000.
D. J. HENRY, Chairman.
RICHARD STEPHENS, Secretary.
Company's Offices, 2 Bridge street, Westminster, S.W., May 2, 1861.

EASTERN BENGAL RAILWAY

COMPANY.—The Directors are prepared to receive Applications at par for Debentures, which will bear interest at the rate of £5 per cent. per annum, payable half-yearly by coupons attached to the deeds.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council.

The principal will be repayable at the end of five years from the 12th of April, 1861, but the holder of a debenture will have the option of renewing it for a further term of five years, on giving notice 12 months previously to the expiration of the first term.

Assignments of these securities, if endorsed thereon, are exempt from stamp duty by the 16th and 17th Victoria, cap. 59.

No debenture will be issued for less than £50.

The form of application can be obtained at the office.—By order of the Board, J. T. WOOD. Secretary.
No. 24a Gresham street, E. C., London,
11th April, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,
JAMES WALKER, Managing Director.
Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

EAST INDIAN RAILWAY

COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications, on or before Saturday, the 11th of May, 1861, for Debentures at par to the extent of £1,000,000 sterling, for five years, renewable for a second term of five years, bearing interest at the rate of 5 per cent. per annum, which will be payable by coupon at the Bank of England half-yearly.

The Debentures may be paid in full or in four equal instalments at intervals of three months. The Bonds will be dated on the 1st April, 1861, and will bear interest at the rate of 5 per cent. per annum from that date on all moneys paid on or before the 31st May, 1861.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council, as will appear on the face of the bonds under the signature of the proper officer in that behalf, and the holders will have the option, after the expiration of 12 months from the date of the bonds and thenceforward, upon giving one month's notice, at any time before the same become payable, of converting them into Extension Shares of £20 each, bearing 5 per cent. interest, under the contract entered into with the East India Company, the said shares when issued being convertible into stock, and participating in the profits of the Company.

Forms of application may be obtained at the offices of the Company.—By order of the Board,
D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk, New Broad street, London, E.C., May 10, 1861.

Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Translation.

I, RAMON CASTILLA, PRESI[illegible] of the Republic of Peru, hereby decree

Art. 1. The Government of Peru will be p[illegible] receive tenders for the consignment of huan[illegible] United Kingdom of Great Britain and Ireland[illegible] the countries bordering upon the Baltic Sea[illegible] separate tenders for the consignment to Barba[illegible] Australia, and each of the other British colonies, exce[illegible] ing the Island of Mauritius, within 120 days from the[illegible] present date, 28th of March, 1861, and attended with the same formalities that were adopted for the presentation, opening, and adjudication of the last tenders for the consignment of huano to France, Belgium, Holland, Germany, Italy, the United States, and England, and keeping in view the Legislative resolutions passed in Congress on the 10th November, 1849; 3rd September, 1860; and 18th February, of the current year; and the previous invitations to tender issued by the Government on the 12th May, 1860.

Art. 2. Any company and its partners who may form part of another distinct one are prohibited from tendering for more than one consignment; it not being understood, however, by this that the actual consignees are excluded from doing so.

Art. 3. To enable the Government to take into consideration the tenders that may be made, they will have to be formed in accordance with the following conditions:—

1. The Government will fix the number of tons of huano to be exported annually.
2. The Government will determine at the commencement of each year included in the contract, the price at which the huano is to be sold.
3. The Government reserve the right of ordering the suspension of charters as soon as they calculate that a sufficiency of huano has been provided to last till the expiration of the contracts.
4. The Government reserve the right of transferring the stock of huano remaining unsold on the expiration of the contracts, against repayment of the charges and one-half of the commission.
5. The Government will allow the consignees interest at the rate of four per cent. per annum on the advances the Government may receive, and will be entitled to the profit that may result from exchange operations on such reimbursement of the advances as may be made out of Peru.
6. The Government will allow two and a half per cent. for commission, guarantee, and brokerage, to be charged on the gross proceeds of the sales; and the consignees will not be allowed to charge any commission for chartering or brokerage either to the Government or to vessels under the Peruvian flag; nor must they charge more than two and a half per cent. to vessels under other flags.
7. The term of the contracts is to be four years, reckoning from the date of the conclusion of existing contracts.
8. Before ratifying the new contracts, as well as at any subsequent period when it may be deemed advisable, the Government shall be at liberty, in conjunction with the Fiscal of the Supreme Court or his substitute for the time being, to demand from the parties tendering, and also from those with whom the contracts may be made, to find better security, and if not satisfied with the guarantees offered, the Government shall be at liberty to break off the negotiations, and also to cancel contracts made.
9. The Government, in drawing up the contracts with the parties who will obtain the preference for the consignments, reserve the right of introducing into the said contracts all such clauses as they may deem expedient for better securing the upright management of the interests confided to the consignees.
10. Any question arising between the Government and the consignees is to be decided in the Tribunals of Peru, and in accordance with the laws of the country.

The Minister of Finance and Commerce is charged with the execution of this decree, and its publication and circulation.

Given in Government house, Lima, March 28, 1861.
Juan José Salcedo. RAMON CASTILLA.
Published by authority of His Excellency the Peruvian Minister, Don Juan Ygnacio de Osma.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.

CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

EARLY PARTICIPATION IN PROFITS.

CLERICAL, MEDICAL, AND GENERAL LIFE ASSURANCE SOCIETY, 13 St James's square, London.

Policies in existence on Jun 30th, 1861, will participate in the Seventh Bonus to be declared in January, 1862; so that persons who complete Assurances before June 30th, 1861, will share in that Division, although one Premium only will have been paid.

Tables of Rates and Forms of Proposal can be obtained of any of the Society's Agents, or of

GEORGE CUTCLIFFE, Actuary and Secretary.

Government Officials.—Reduction in Scale of Premiums

THE EUROPEAN ASSURANCE SOCIETY ISSUES POLICIES of GUARANTEE,

at reduced rates, for Officials in on under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for Bank and Railway Clerks, and persons in commercial employments.

Further reductions on the combination of Life Assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief Office, No. 2 Waterloo place, Pall Mall, London.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1861, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

LONDON BOARD.

President—The Right Hon. the Earl of Mansfield.

DIRECTORS.

P. Anstruther, Esq.	H. M. Kemshead, Esq.
Charles Balfour, Esq.	John Kingston, Esq.
Robert Collum, Esq., M.D.	J. R. Robertson, Esq.
J. E. Goodhart, Esq.	Hugh F. Sandeman, Esq.

George Ramsay, Esq., Manager.

FREDK. G. SMITH, Secretary to the London Board.

No. 37 Cornhill, London.

UNIVERSAL LIFE ASSURANCE SOCIETY, No. 1 King William street, E.C.

Established under Special Act of Parliament in 1834.

The Twenty-Seventh Annual General Meeting of this Society was held on the 8th instant.

The progressive improvement of the Society's business enabled the Directors to declare the sum of £204,537 2s 7d as the profits for the last Five Years, one-fifth of which is divisible among the Policy and Shareholders, in the proportion of three-fourths to the former, and one-fourth to the latter. The Directors have, however, restricted the actual division to the sum of £23,828 18s 8d, which still affords the large reduction of 45 per cent. from the premiums of all Policies entitled to participate in the profits, being 5 per cent. in excess of the reduction of last year. The effect of this reduction upon the Interests of Policy-holders will be understood by stating that the premium in 1861 upon a Policy for £1,000 effected in 1856 on the life of a person aged 40, would be reduced this year from £31 10s to £17 6s 6d, and others in proportion.

	£	s	d
New policies were issued during the past year for	147,750	0	0
Yielding annual premiums of	6,183	3	11
Policies have been issued since 1834 for	6,464,652	14	11
The claims paid since 1834 amount to the sum of	1,106,596	8	8
The amount assured under existing policies is	2,183,974	14	8
The amount of existing assets exceeds	770,000	0	0

By order of the Board,

M. E. IMPEY, Secretary.

SPECIAL NOTICE.

PELICAN LIFE INSURANCE OFFICE, Established in 1797,

No. 70 Lombard street, E.C., and 57 Charing cross, S.W.

DIRECTORS.

Octavius E. Coope, Esq.	Henry Lancelot Holland, Esq.
William Cotton, Esq., D.C.L., F.R.S.	Wm. James Lancaster, Esq.
John Davis, Esq.	John Lubbock, Esq., F.R.S.
James A. Gordon, Esq., M.D., F.R.S.	Benjamin Shaw, Esq.
Edwd. Hawkins, Jun., Esq.	Matthew Whiting, Esq.
K. D. Hodgson, Esq., M.P.	Marmaduke Wyvill, Jun., Esq., M.P.

Robert Tucker, Secretary and Actuary.

BONUS.

All Policies effected on the Return System, and existing on the 1st July, 1861, will participate in the next division of profits, subject to such of them as have not then been in force for five years, being continued until the completion of that period.

LOANS

On Life Interests in possession or reversion: also upon other approved security in connection with Life Assurance.

*** For Prospectuses, Forms of Proposal, &c., apply at the Offices as above, or to any of the Company's Agents.

IMPERIAL LIFE INSURANCE COMPANY, No. 1 Old Broad street, London, E.C.

Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.

James Gordon Murdoch, Esq., Deputy-Chairman.

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

Schedule of all sums of money, bonds, and other securities received by the Administrator General on account of each estate remaining under his charge, together with the payments made thereout, and the balances prepared up to the 31st December, 1860, under Section XXXIV. of Act No. VIII. of 1855;

Schedule of all administrations whereof the final balances have been paid to the persons entitled to the same, specifying the amount of such balances, and the persons to whom paid. Prepared from the 30th June to the 31st December, 1860, under Section XXXIV. of Act No. VIII. of 1855.

And that the said Schedules are open to the inspection of the public in the department of the Official Agent to the Administrators General at this office.

India office, May 21, 1861.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

A FIRST-CLASS COMMISSION House in Dublin is open to represent a Tea House, of good standing and business capabilities, in Ireland. References exchanged.—Address, in the first instance, W. X., W. Walton, 17 Harp lane, E.C.

CHINA—INDIA.—A GERMAN, long engaged in first-class houses both here and abroad, corresponding fluently in English, French, and German, wishes an engagement in China or India. First-class references.

CLERK.—THE ADVERTISER, who has lately returned from South America; is desirous of a re-engagement, either at home or abroad Has a thorough knowledge of bookkeeping and accounts and is well acquainted with Spanish.—Address E. G., Messrs Mackie and North's, 29 Threadneedle street, E.C.

TO CAPITALISTS.—WANTED, £10,000 in a Manufactory, yielding large profits. An advance of one-fourth of this sum will only be required at present, for which security of ample value will be given.—Letters to be addressed to F. W., care of Mr Perks, stationer, 110 St Martin's lane, London, W.C.

TO ACCOUNTANTS AND ASSURANCE COMPANIES.—A professional Accountant, who has been practically engaged in business in a large provincial town for a period of fifteen years, is desirous of forming an engagement in London, so as to be introduced to a more extended sphere of business. He is thoroughly conversant with mercantile and bankrupt law and procedure, and is also an experienced actuary, and well acquainted with all departments of Assurance business. The Advertiser would engage with an Assurance Office as Actuary or Manager, either with or without liberty to practise on his own account, or would be happy to meet with a professional accountant requiring assistance to whom his acquirements as an actuary might be an additional advantage.

The Advertiser is well-known to William Thomas Thomson, Esq., Manager of the Standard Life Assurance Company, Edinburgh, to whom he is permitted to refer, and who will be happy to communicate confidentially with inquirers on this subject.

EMPLOYMENT OF MONEY, with partial employment of time—£500 required, for which security will be given over leasehold property. This is an eligible opening for a Gentleman who can post books, and has a few hours to spare any part of the day. Unexceptionable references given and required.—Apply, by letter, to Mr Hutchinson, Accountant, 7 Tokenhouse yard, Lothbury, London, E.C.

THE "TIMES," £1 1s per QUARTER free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. Magazines, Periodicals, and all London Newspapers supplied to order by W. ABBOTT, Newspaper and Advertisement Agent, 7 Little Tower street, London, E.C.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO., Old Furnival's Distillery, Holborn.

To be obtained only at their Distillery

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and CO., Sworn Brokers, (Successors of Holmes, Hall, and Sons,) Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

CONTRACT FOR SHOES.—

Department of the Comptroller of Victualling and Transport Services,

Somerset House, 23rd May, 1861.

The Commissioners for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give Notice, that on Thursday, the 13th June next, at half-past One o'clock, they will be ready to treat with such persons as may be willing to Contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, Gosport, and Plymouth,

SHOES.

Sizes.	Deptford. Pairs.	Gosport. Pairs.	Plymouth. Pairs.
5	3,500	600	800
6	5,100	800	1,900
7	9,500	1,800	2,500
8	9,600	2,900	1,900
9	5,300	300	400
10	1,700	150	...

When to be delivered.—One-third of each quantity in 2 months, another third in 2 months, and the remainder in 4 months from the date of contract, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the shoes.

Their Lordships reserve to themselves the power, when the tenders are opened, of contracting either for the whole or for such part thereof only, as they may deem fit, or for a greater quantity, or of not contracting for any.

No tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office, at the victualling yards at Gosport and Plymouth, or to the officer conducting the packet service at Liverpool, or to the Collector of Customs at Bristol.

Separate tenders must be made for each place, and no attention will be paid to any offer not so made.

Patterns of the shoes may be seen at the said office, and also at the victualling yards at Gosport and Plymouth.

Particular attention is called to the recent modifications of the conditions of the contract, which may be seen at the said office, and at the victualling yards at Gosport and Plymouth, and also at Liverpool and Bristol.

No tender will be received after half-past One o'clock on the day of treaty, and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words, "Tender for Shoes," and must also be delivered at Somerset House.

Translation.

I, RAMON CASTILLA, PRESIDENT

of the Republic of Peru, hereby decree—

Art. 1. The Government of Peru will be prepared to receive tenders for the consignment of huano to the United Kingdom of Great Britain and Ireland, and to the countries bordering upon the Baltic Sea; and separate tenders for the consignament to Barbadoes, Australia, and each of the other British colonies, excepting the Island of Mauritius, within 120 days from the present date, 28th of March, 1861, and attended with the same formalities that were adopted for the presentation, opening, and adjudication of the last tenders for the consignment of huano to France, Belgium, Holland, Germany, Italy, the United States, and England, and keeping in view the Legislative resolutions passed in Congress on the 10th November, 1849; 3rd September, 1860; and 18th February, of the current year; and the previous invitations to tender issued by the Government on the 12th May, 1860.

Art. 2. Any company and its partners who may form part of another distinct one are prohibited from tendering for more than one consignment; it not being understood, however, by this that the actual consignees are excluded from doing so.

Art. 3. To enable the Government to take into consideration the tenders that may be made, they will have to be formed in accordance with the following conditions:—

1. The Government will fix the number of tons of huano to be exported annually.

2. The Government will determine at the commencement of each year included in the contract, the price at which the huano is to be sold.

3. The Government reserve the right of ordering the suspension of charters as soon as they calculate that a sufficiency of huano has been provided to last till the expiration of the contracts.

4. The Government reserve the right of transferring the stock of huano remaining unsold on the expiration of the contracts, against repayment of the charges and one-half of the commission.

5. The Government will allow the consignees interest at the rate of four per cent. per annum on the advances the Government may receive, and will be entitled to the profit that may result from exchange operations on such reimbursement of the advances as may be made out of Peru.

6. The Government will allow two and a half per cent. for commission, guarantee, and brokerage, to be charged on the gross proceeds of the sales; and the consignees will not be allowed to charge any commission for chartering or brokerage either to the Government or to vessels under the Peravian flag; nor must they charge more than two and a half per cent. to vessels under other flags.

7. The term of the contracts is to be four years, reckoning from the date of the conclusion of existing contracts.

8. Before ratifying the new contracts, as well as at any subsequent period when it may be deemed advisable, the Government shall be at liberty, in conjunction with the Fiscal of the Supreme Court or his substitute for the time being, to demand from the parties tendering, and also from those with whom the contracts may be made, to find better security, and if not satisfied with the guarantees offered, the Government shall be at liberty to break off the negotiations, and also to cancel contracts made.

9. The Government, in drawing up the contracts with the parties who will obtain the preference for the consignments, reserve the right of introducing into the said contracts all such clauses as they may deem expedient for better securing the upright management of the interests confided to the consignees.

10. Any question arising between the Government and the consignees is to be decided in the Tribunals of Peru, and in accordance with the laws of the country.

The Minister of Finance and Commerce is charged with the execution of this decree, and its publication and circulation.

Given in Government house, Lima, March 28, 1861.

Juan José Salcedo. RAMON CASTILLA.

Published by authority of His Excellency the Peruvian Minister, Don Juan Ygnacio de Osma.

London, May 11, 1861.

The Political Economist.

THE MERCANTILE DIFFICULTIES OF THE AMERICAN CIVIL WAR.

It is very important that thinking men of business should comprehend the exact difficulties to which our commerce with America is exposed at the present juncture. But many practised men of business do not find it very easy to understand them. There seems to be a puzzle in the subject, and not unnaturally, for its precise state is the result of very ancient controversies, and is hardly intelligible without a reference to very ancient doctrines.

There are in the nature of things two questions which inevitably arise out of every naval war. First, What is to be done with neutral goods on board the ships of belligerents and enemies? Secondly, What is to be done with enemies' goods on board the ships of neutral nations? And with respect to these there are two old jurisprudential theories, and a third modern theory, less logical perhaps than either of them, but more favourable than either to the interests of commerce, and therefore more beneficial than either to the increase of civilisation and the progress of mankind.

The first of these old theories is the rigid English theory. We looked under our old law, and irrespective of what was agreed on quite recently at Paris, exclusively to the *ownership* or property in all goods and merchandise. Whatever belonged to the nation with which we were at war we took *wherever* we could find it; and whatever did not belong to our enemies we did *not* take, wherever it might be. Accordingly, when we found enemies' goods on board neutral vessels we took them undeviatingly and upon principle: when, on the other hand, we found the property of neutrals on board an enemy's ship, we uniformly restored it to its true owners, though we took the ship as lawful prize.

The second of the old theories is the continental theory, which has been advocated by many able jurists, and which has played a very great part in history. Upon this theory the flag of the vessel is an undeniable and irresistible presumption of the ownership of the goods it is carrying as cargo. You are not at liberty to inquire into the facts; whatever is indicated by the selected presumption, that you are to assume. Whatever goods you find on board a ship *bonâ fide* entitled to carry a neutral flag, those goods are, by an infallible presumption, the property of neutrals. On the other hand, whatever goods you find on board an enemy's ship, these are, in like manner, to be incontrovertibly regarded as enemies' goods.

It will strike any one who reads these two series of precisely conflicting statements, that neither of them are the international rules which the interests of commerce at all times demand, and which in later ages, when the world is complicated, and when war is always either impending or actual, those interests imperatively require. For the good of commerce it is desirable that the greatest possible facility should be given to trading operations at all times, by all persons, and under all circumstances. Accordingly, it would be desirable that *cargoes* should be free wherever they should be found; that, in conformity with the old English theory which looks to facts only, neutral goods should never be touched on board enemies' ships; that, in conformity with the continental theory which regards only an artificial presumption, all goods whatever should be unmolested and free that are found on board a ship that is truly and really neutral. This is the principle recognised by the Congress of Paris. According to the declarations we quoted last week:—

"2. The neutral flag covers enemies' goods, with the exception of contraband of war.

"3. Neutral goods, with the exception of contraband of war, are not liable to capture under the enemy's flag."

As we, in the interests of commerce, have on former occasions urged, it is most desirable that these rules should be carried further, and that trading ships should not be interfered with, exceptional cases being disregarded, even when belonging to actual belligerents. But we need not complicate an intricate topic just now with any speculative suggestions. *As a fact*, the rule laid down by the Congress of Paris was, so to speak, a compilation from the two opposed codes of naval war which divided the European world; from the one it selected the doctrine "that free ships make free goods," and from the other the doctrine that only enemies' goods are to be seized on board any vessel of any country.

As is well known, however, the American Government never recognised the decisions of the Congress of Paris: it was invited to accede to those decisions, but it did not. The present American law is, therefore, exactly what our own old law was before the Congress of Paris; it exactly embodies what we have called the rigid English theory. Its terms are concisely laid down by perhaps its greatest authority:—"The two distinct propositions that enemy's "goods found on board a neutral ship may be lawfully "seized as prize of war, and that the goods of a neutral "found on board of an enemy's vessel were to be restored, "have been explicitly incorporated into the jurisprudence "of the United States, and declared by the Supreme Court "to be founded in the law of nations."

What, then, is the consequence of the present state of the American law? It is this:—That English cargoes will be free on board any ship whatever; but that English ships will be searched by vessels of war and by privateers for American cargoes, without check, without control, and without appeal.

Moreover, as we last week pointed out, the Americans have exempted other nations from the necessity of this search. The ships of several other countries (cases of blockade excepted) will be able to carry goods from New Orleans to Liverpool without fear of molestation and under the cover of express compacts, though English ships will be

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l.*

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

Notice is hereby given, that the Seventh Ordinary General Meeting of this Company will be held at the Company's Offices in Flensburg, on Wednesday, the 26th June proximo, at Twelve o'clock, for the purpose of receiving the Report of the Directors and the Financial Statement of the Company, for the election of two English and two Danish Directors in place of those retiring, and for the appointment of three Auditors. The retiring members of the Board and Auditors are re-eligible, and offer themselves for re-election.

GEORGE GRENFELL GLYN, Chairman.
FREDERICK H. GEACH, Secretary.

60 Old Broad street, London, May 23, 1861.

Proprietors holding five shares and upwards are entitled to vote at the general meeting, either in person or in proxy. The shareholders and proxyholders who may desire to attend the meeting are required to exhibit their shares, and to hand in a specification thereof at least one day prior to the meeting, to the Resident Director in Flensburg, or on or before the 18th of June to the Secretary in London.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £100, for five years, renewable for a second term of five years, bearing interest at the rate of 5 per cent. per annum, which will be payable by coupon at the Bank of England half-yearly.

The Debentures may be paid in full or in four equal instalments at intervals of three months. The Bonds will be dated on the 1st April, 1861, and will bear interest at the rate of 5 per cent. per annum from that date on all moneys paid on or before the 31st May, 1861.

The payment of the principal and interest is guaranteed by the Secretary of State for India in *Council*, as will appear on the face of the bonds, under the signature of the proper officer in that behalf, and the holders will have the option, after the expiration of 12 months from the date of the bonds and thenceforward, upon giving one month's notice, at any time before the same become payable, of converting them into Extension Shares of £20 each, bearing 5 per cent. interest, under the contract entered into with the East India Company, the said shares when issued being convertible into stock, and participating in the profits of the Company.

Forms of application may be obtained at the offices of the Company.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, E.C., May 21, 1861.

SWEDISH PROVINCIAL MORTGAGE BONDS.

—Loan for £450,000 Four per Cents., negotiated by Messrs Palmer, Mackillop, Dent, and Co., and Messrs C. Tottie and Sons.—Notice is hereby given, that the Half-Yearly Dividend on the above bonds, due on the first of June next, will be paid at the counting-house of Messrs Dent, Palmer, and Co., on that day, and every succeeding day (except Saturday), between the hours of 11 and 3.

The coupons, with a list in numerical order, must be left two clear days previously for examination.

Printed forms may be obtained on application at the office of Messrs Dent, Palmer, and Co., 11 King's Arms yard, E.C.

Coupons are not received on Saturdays.

London, May 20, 1861.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.

Capital £200,000.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Charles Donaldson, Esq.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith Collingwood.
E. W. Thomsen, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and 10 years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents, Brunton and Son, Auction Mart chambers, Bartholomew lane, London.

12 Hanover square, London, W.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Hampstead Heath.—A singularly attractive and valuable Property, situate in the Vale of Health, within a few minutes' walk of the station.

MESSRS DEBENHAM AND TEWSON will SELL, at the Mart, on Tuesday, June 18, at 12 (unless previously disposed of by private contract), a peculiarly valuable and unique FREEHOLD PROPERTY, known as Holly Lodge, situate in the centre of that delightful spot, so celebrated for its salubrity, and justly meriting its appellation of the Vale of Health, completely sheltered from the north, but open to the south and west, and commanding a panoramic view of the Metropolis. It consists of a moderate-sized villa, with very attractive grounds, embellished with well matured shrubs and timber. Gas and water services are laid on. A valuable plot of Building Land adjacent will be offered in a separate lot. Particulars of Messrs Goodman and Morley, solicitors, 70 King's Bench walk; and at the estate offices, No. 80 Cheapside.

Country Residences, with Land, within a short distance of London by road or rail; also Two detached Residences in the suburbs.

MESSRS DEBENHAM AND TEWSON will SELL by AUCTION, at the Mart, on Wednesday next, June 5, at 12 for 1, a commodious FREEHOLD RESIDENCE at Snaresbrook, surrounded by its own grounds, and affording accommodation for a large family; an excellent Residence and 22 acres of Land at Walthamstow; and a Residence with nearly 10 acres at Wood Green, Hornsey. Each of the above have good stabling and productive gardens; all are within a drive of about six miles from the City, and conveniently accessible by rail also.

On the same day will be Sold a detached Residence, with stabling and large gardens, situate close to Kilburn gate, St John's Wood; and a capital detached Cottage Residence, with stabling and large garden, near the Bow station.

The above are especially deserving the attention of gentlemen seeking a really comfortable residence for their own occupation. Full particulars and cards to view can be had of the auctioneers, 80 Cheapside, E.C.

SHANKS' NEW PATENT LAWN Mowing, Rolling, Collecting, and Delivering MACHINE, for 1861, mows the grass wet or dry, on lawns uneven or otherwise, in a much neater manner than the scythe, and at half the expense.

SOLE AGENTS FOR LONDON:—

TO CAPITALISTS.—THE OWNER of a Seventh Share in a Freehold Estate in one of the Home Counties is desirous of disposing of the same. The estate will shortly be sold by Public Auction, when the share will be realised. £9,000 has been offered for the estate, but refused. The Advertiser will take £1,200 for the share, having immediate use for the money, upon which the purchaser may safely calculate to realise shortly a large profit: until the property is sold will continue to receive a seventh share of the rental. —Further particulars of Messrs Wm. Eames and Co., 21 Abchurch lane, E.C.

TO ACCOUNTANTS AND ASSURANCE COMPANIES. — A professional Accountant, who has been practically engaged in business in a large provincial town for a period of fifteen years, is desirous of forming an engagement in London, so as to be introduced to a more extended sphere of business. He is thoroughly conversant with mercantile and bankrupt law and procedure, and is also an experienced actuary, and well acquainted with all departments of Assurance business The Advertiser would engage with an Assurance Office as Actuary or Manager, either with or without liberty to practise on his own account, or would be happy to meet with a professional accountant requiring assistance to whom his acquirements as an actuary might be an additional advantage.

The Advertiser is well-known to William Thomas Thomson, Esq., Manager of the Standard Life Assurance Company, Edinburgh, to whom he is permitted to refer, and who will be happy to communicate confidentially with inquirers on this subject.

HARVESTING MACHINERY; for the Colonies, Russia, Spain, Algeria, &c., &c. SAMUELSON'S specially constructed Reaping Machines, requiring no skilled labour, £15; Combined Reaping and Mowing Machines, £24; Self-Raking Reapers, £36; Horse Rakes, £7 10s. Subject to the usual export terms.

B. SAMUELSON, Britannia Works, Banbury; at Mr Samuelson's depots, Blackhall place, near the Cattle Market, Dublin; and 76 Cannon street west, City, London.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

THE GALWAY PACKET COMPANY AND THE LATE DIVISION.

It would seem that the morality of the financial Opposition is undergoing a very rapid and a very lamentable decadence. Mr Gladstone's Budget of this year raised, as we must all admit, several fair points of Parliamentary discussion. If the debate had been extended, as in the hands of a competent critic it might have been extended, to the recent effects and probable consequences of last year's Budget, it might have suggested many very interesting topics of financial discussion. But what has been the result? The final decision of Thursday evening, by far the most critical and the most watched by near observers of the entire Session, turned upon two points:—first, the legitimacy or illegitimacy of the revocation of the contract with the Galway Packet Company for the conveyance of the American mail; secondly, the appropriation by the leader of opposition of a surplus which many, perhaps most, of his supporters do not believe to exist,—two issues evidently unworthy of such a controversy.

The only real importance which in such a matter the Galway packet service can have is its momentary relation to the critical position of the Government. It would be no light matter if, for the sake of securing the votes of any members of Parliament at a grave moment, there had been any overtures for, or inchoate commencement of, a corrupt negotiation of any sort or kind. If any Administration should sink to the degradation of bartering public contracts for Parliamentary votes, the moral basis of a salutary representative Government is at an end. Those who engage in such a traffic may enjoy a momentary victory in Parliamentary conflict, but they are spending the *capital* of the Constitution, destroying the moral influence and the national authority of Parliament itself. We are, therefore, glad to be able to state with the utmost confidence and upon the most reliable authority, that not simply has there been no agreement, but there has been no *negotiation* between the present Government and the Irish members in Parliament. The matter was discussed as a matter of business, and we believe that nothing has passed between the present Government and the Galway Company, or between the present Government and any agent of that Company, which would not have passed between that Government and any other similar Company,—say, for instance, the Cunard Company,—upon a corresponding difficulty in packet administration. After all, whatever may be the political urgency, it is *possible* to consider a packet question apart from the paper duty, and apart from political votes, and we pledge our political reputation that it has been so considered.

The case against the Galway Company is a very clear case. Over and over again they failed to perform their contract. The letter of Lord Stanley of Alderley to the Treasury is conclusive:—"I have the honour to inform your lordships, "that owing to the Company having only one vessel ready "for survey by the time fixed for the recommencement of "the service, and owing to that vessel being seriously "damaged, and rendered unseaworthy, while proceeding "from Southampton to Galway to take up her station, the "Company were unable to convey the mails on the appointed day, and it was, therefore, in my power at once to "have declared the contract at an end. Under the circumstances, however, I refrained from doing so, and allowed "the recommencement of the service to be postponed until "the 9th of April. The mails were accordingly despatched "on that day, and on the 23rd April another approved "vessel was provided by the Company, and took her departure. The third packet from Galway should have sailed "on the 7th inst., but the Company have failed in offering on "this occasion any efficient vessel for the service, and I "have been under the necessity, therefore, of announcing at "the last moment that no despatch of mails could take "place. As it is now quite evident that the Company are "not in a position to fulfil their engagements, I have "caused a letter to be prepared terminating the contract." No matter of business can be clearer than that the Galway Company was utterly unable, perhaps from pecuniary weakness, but anyhow from some weakness, to perform its contract. It is disgraceful that even a few Irish members should have hoped to influence a Liberal Administration to give money to a Company, which had made such defaults under such circumstances, and after such licences, at any juncture of Parliamentary conflict.

It is quite true that the Irish members may be upon a fitting occasion quite right in taking care that Ireland enjoys proper postal accommodation with other countries. Every member of Parliament is daily teased with the postal requirements of his constituents. It would, for example, be fair that they should ask that certain packets should call at Queenstown, and that Ireland, which stands between England and America, should not be shut out from the communicating line to America, or other matters of detail might on a proper occasion be fully attended to; but the vital matter now is, whether *on this occasion* assurances have been held out to Irish members of any such privileges or of any privileges whatever, and this we with the utmost confidence and in the plainest words venture to deny.

No good man of business ever supposed that the Galway Packet Company would succeed. It was an attempt to use Parliamentary influence for commercial purposes. We give from Dod the notice of its founder, which is precisely copied from what he himself stated at his election:—"Lever, John Orrel, (Galway borough) a Liberal; and will give "his support to whatever Government promotes the influence "of Galway as a packet station."

Upon the present occasion Mr Lever voted *against* the present Government. No mercantile Company based on

THE PROSPECTS OF THE MONEY MARKET.

THE phenomena of the money market during the last few months have been remarkable, because the causes which have affected it have been unprecedented. The revolutionary crisis in America is one of the most unexampled and unexpected events that have ever happened in the world, and it is not wonderful that it should have had peculiar effects which no one could have anticipated beforehand, and which have baffled the propheeies of the most sagacious, well-informed, and experienced persons.

The balance of the direct trade between this country and America is always, as we have frequently shown, extremely adverse to England. For the last few years the figures have been—

	Exports from England to America.	From America to England.
	£	£
1856	22,616,877	36,047,773
1857	20,076,895	33,647,227
1858	15,793,701	34,257,515
1859	24,417,892	34,294,042
1860	21,613,111	44,728,271

The balance of the American trade was redressed by credits which England gives to America in other branches of her trade. England, as we have often before shown, has been the *drawee* of America. The purchases of the United States in China and India were not paid for by exports to China and India, but by drafts on this country. As we were indebted to America, she cancelled her debts on China and India by bills upon us. Now that American purchases in the East, in France, and in this country have fallen far short of those which would have been made under happier circumstances, it is no wonder that America has been able to draw much bullion from this country to rectify the balance so deranged. We have often shown that she would take out her debts in *cash*, and she has done so.

At what period the orders to the East from America began to decline it is not possible to know. But it is to be remembered that the American secession is no new matter; that Mr Lincoln was elected—in reality if not in law—many months ago; that ever since his election there has been a chronic uneasiness throughout the Union, which must have diminished their buying ability, which must have detracted from their consuming power, which must have reduced their orders to the East and to the world at large below their usual amount.

The precise amount of gold which America can draw from this country no one can by possibility conjecture. The accounts between nation and nation are too vast, involved, and complicated for theoretical analysis or statistical expression. An enormous sum she has taken from us, besides not sending to us her former supplies. It is not possible to say whether her effectual demand is now exhausted. Only experience can effectually decide.

The requirements of India are serious also. A large sum will be remitted to that country within a brief period, probably in actual bullion. The demands for railways amount, as we showed not long since, to the following sums:—

	£
1861-62	6,000,000
1862-63	3,250,000

which must seriously diminish both the surplus capital and surplus money of Europe for some time to come.

These causes tend to keep up the rate of interest in Lombard street, and there is another which is quite as important. We mean the effects of last year's bad harvest. We hear in Lombard street that "bankers are poor," and the meaning is that their customers are poor. For several years before 1860 the agricultural interest of England enjoyed singular prosperity. "Such large and such steady profits had not been made by the farmers for a long antecedent period. In 1860 the result was different. The losses of agriculture were great, and its profits were very small in comparison with previous years. In consequence the "bankers' balances," which are approximately proportional to the inland wealth of the country, are less than they used to be. The funds of Lombard street are diminished, and that diminution necessarily tends to raise the rate of interest.

But, on the other hand, there is a cause which is quite equally potent with all of these, and which tends to reduce the value of money. We mean the slackness of trade. It is of no consequence that the means of Lombard street are diminished, if the number of bills circulating there is diminished still more. There certainly is an indisposition to do business, which will counteract the demands upon our resources from India and from America.

There is likewise a subsidiary cause which may ultimately be very important, though, as it is of American origin, it necessarily partakes of the uncertainty of Transatlantic phenomena. American capital is certainly being sent hither for investment, and if the disturbances there are of long continuance, which is the preponderating probability, it is possible that much more may be sent here for security, and for profit, as we know that after 1848 so much was sent to us for similar reasons from all parts of Europe.

It is said, we believe truly, that many Continental banks are discounting long bills in this market at the current rates of Lombard street; and this shows that they consider those rates to be "good certainties," possibly to be better than those which will be current within a few months. Whether they are right or wrong in their conjectural anticipations, they are certainly right as men of business in taking a good rate "while it is going." When so many causes of such uncertain intensity are affecting the money market, it is only charlatanism to pretend to offer confident predictions. No prophecy is worth anything except it have a reason, and in a complex concurrence of unprecedented influences no reason can be worth very much. We, therefore, venture no pre-

SOUTH AUSTRALIAN BANKING COMPANY.

—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, Robe, and Wallaroo. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

35 Moorgate street, London.

INTERNATIONAL EXHIBITION, 1862.

—At a Preliminary Meeting of intending Metropolitan Exhibitors, held at the Mansion House, on Tuesday, the 28th ult., on the invitation of the Right Honourable the Lord Mayor, who presided, the following Resolutions were submitted, and agreed to nem. con.:—

1st. Proposed by Sir Thomas Maryon Wilson, Bart., seconded by Mr Hunt, of Messrs Hunt and Roskell,

That in order to promote a full representation in the International Exhibition of the present state of the numerous Metropolitan Industries, which are detailed in the list published by Her Majesty's Commissioners, to allot space among Metropolitan Exhibitors, and generally to advise Her Majesty's Commissioners, it is expedient that intending Exhibitors should form themselves into Trade Committees for each of the classes and sub-classes of the Exhibition not already assigned to any National Committee.

2nd. Proposed by Mr P. Graham, seconded by Mr Thornthwaite,

That to faciliate business, each Trade Committee elect a Sub-committee of Management, to consist of three persons.

3rd. Proposed by Mr Crace, seconded by Mr Huber,

That the Right Hon. the Lord Mayor be requested to allow a general meeting of the Exhibitors to be held at the Mansion House when convenient to his lordship, and that the Society of Arts be requested to allow the use of the Great Room in the Adelphi for the meeting of the Trade Committees.

4th. Proposed by Mr. De la Rue, seconded by Mr Vignoles,

That the best thanks of this meeting be given to the Right Hon. the Lord Mayor for the use of the Mansion House on this occasion, and for the ability with which he has presided; and to Mr Cole for the valuable advice he has rendered to this meeting.

Local Board of Health Office, Fareham, June 1, 1861.

INVESTMENT.—

The Fareham Local Board of Health invite Tenders from persons who are willing to advance them a sum of from £4,000 to £5,000 (as may be required), on Mortgage of the General District Rates of the Parish of Fareham, Hants,—such sum to be repaid by annual instalments during the next 30 years. Interest to be paid half-yearly.

Sealed tenders, stating the rate of interest, and endorsed "Tender for Loan," to be addressed to the Chairman of the Local Board of Health, Fareham, not later than Thursday, the 13th day of June, instant.—By order of the Board, JAMES TAYLER, Clerk.

DIRECTORS OF PUBLIC COMPANIES.

One or two gentlemen are required to complete the Board of a Public Company having objects which will readily be recognised by Capitalists as certain to insure high commercial position and success.—Address, "Company," Wylde's Reading Rooms, Leicester square.

MID-WALES RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors of this Company are prepared to receive tenders for Debentures, under the Company's Act of 1859, at 5 per cent. per annum, for terms of 3, 5, or 7 years.—Applications to be made to Messrs Sheppards, Pelly, and Allcard, Stock-brokers, Threadneedle street, London, or to the Secretary of the Company, at the Company's offices, Shrewsbury.

R. S. FRANCE, Secretary.

THE EAST INDIAN RAILWAY COMPANY

require Materials for 200 lineal miles of TWISTED WIRE FENCING, and the Directors will be prepared to receive Tenders for the same, on or before 12 o'clock at noon, on Tuesday, the 11th of June next.

Specifications and forms of tender, upon which only tenders will be received, can be obtained upon application at the Company's offices, Alderman's walk, New Broad street, London. The Directors do not bind themselves to accept the lowest or any tender.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 28th May, 1861.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from Monday, the 17th day of June, 1861, to Friday, the 12th day of July, 1861, both days inclusive, for the purpose of making up the interest account to the 30th day of June, 1861.

The interest warrants will be forwarded on the 12th July to the proprietors who are registered in the Company's books on the 15th day of June instant.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, June 4, 1861.

N.B.—Transfers will not be received at the office while the books remain closed.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

CALEDONIAN RAILWAY.—

Contract for Stores, for the year ending 30th June, 1862.

The Directors are prepared to receive Tenders for the supply of the undermentioned STORES:—

No. of Contract.		No. of Contract.	
1.	Bags, Baskets, Ropes, Canvas, &c.	25.	Lamps and Lamp Furnishings.

In One neat Volume, price 5s, with Map and numerous Illustrations,

BLACK'S GUIDE TO SURREY,

including a full Description of the History, Antiquities, and Topography of the County.

From the ATHENÆUM, June 1, 1861.

"To one of the most pleasant and picturesque of English Counties, this is one of the most efficient Guides that we have yet met with. It is convenient in form, correct in its information, legibly printed, and well illustrated. We could not award higher praise. It is a book, not merely for the hand or pocket of the tourist, but for his library and consultation afterwards. It has not accompanied us in travel; but by aid of its pages, we have again gone over many a route, sat down in many a valley, ascended many a hill, tabernacled at many a hostelry, and sallied forth once more rejoicing. Next to making is the pleasure of remembering it; and this pleasure we have enjoyed in this volume, and are thereby all the better enabled to award it the commendation which it justly merits."

Edinburgh: A. and C. Black. London: Smith and Son, Strand; and at the railway stations.

Price One Shilling,

PAMPHILIUS; OR, THE HEAD AND HEART LEGACY.

Dedicated to the Rising Generation.

Profits devoted to the Mechanics' Institution and the School Charities of Paisley.

PREFACE.

"The author publishes the OUTLINE of a CHEQUERED LIFE, not with a view to fame, name, or gain, but solely to stimulate youth to emulation by showing how an untaught boy rose step by step to the honourable position mentioned in these pages."

Sale, 340 Strand; Simpkin and Marshall, Paternoster row; Darton, Holborn hill; and all booksellers

NATAL.—LANDS AND FARMS FOR SALE.

Sugar, Cotton, Indigo, and Arrowroot Lands; Sheep, Cattle, and Corn Farms, varying in extent from 6,000 down to 600 acres, of the finest quality, and some in advanced cultivation.

Mr J. S. Colborne, land and estate agent, of Natal, making a temporary stay in England, is authorised to dispose of various Estates in that colony, on terms exceedingly favourable to purchasers, either for investment or occupation.

The advertiser is provided with maps, plans, and deeds of these estates, and begs that any persons desiring to negotiate, or requiring information, will apply to him at 11 Clement's lane, Lombard street, E. C. Letters to the care of Mr F. Algar.

COLONY OF NATAL.—FOR SALE, a most compact and valuable SUGAR ESTATE, in full working order, within 16 miles of Durban, in extent 1,600 acres, 40 acres of which are now planted with sugar-cane, and 50 acres prepared for planting. The buildings consist of sugar-house, dwelling-house, workshop, stable, and other outhouses; coffee trees in bearing; the garden is abundantly stocked with every description of tropical fruits; machinery is in complete working order, including centrifugal and steam-engine for driving the same. The first Prize Cup of the Natal Horticultural Society has just been awarded to the Proprietor for the best samples of Sugar, grown on this Estate. Water-power may be made available for any purpose. The Estate is well adapted for the cultivation of coffee, cotton, tobacco, arrowroot, and general produce. Titles clear, and terms of payment liberal.—Apply, by letter, to J. S. Colborne, care of Mr F. Algar, 11 Clement's lane, Lombard street, London, E.C.

PERUVIAN FOUR-AND-A-HALF PER CENT. EXTERNAL DEBT, proceeding from the Six per Cent. Internal.—The Coupon falling due on the 1st of July next will be paid by the financial agents, Messrs Antony Gibbs and Sons, on that or any following day, between the hours of Eleven and Two. Lists may be had on application on and after the 20th inst., and the Coupons must be left three clear days for examination.
15 Bishopsgate street within, London, June 15, 1861.

ROYAL ASYLUM OF ST ANN'S SOCIETY, by Voluntary Contributions offering Home, Clothing, Maintenance, and Education to Orphans and other necessitious Children of Parents once in Prosperity.—The next Half-yearly Election will take place on Friday, August 9.

Subscriptions gratefully received by Messrs Spooner, 27 Gracechurch street, and by
E. F. LEEKS, Secretary.
Office. 2 Walbrook, E.C.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and Co., Sworn Brokers,
(Successors of Holmes, Hall, and Sons.)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S.W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added..	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

SPECIAL NOTICE.

PELICAN LIFE INSURANCE

OFFICE, Established in 1797,

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.
Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman.

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

NORWICH UNION FIRE

INSURANCE SOCIETY.

NOTICE.—MIDSUMMER RENEWALS.

Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988 368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E. C.

SIX-PER CENT. DEBENTURES.

CANADA LANDED CREDIT

COMPANY,
Incorporated by Act of the Parliament of Canada.
PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.
DIRECTORS.
The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. M. Cameron, M.L.C.
R. L. Denison, Esq., Treasurer Board of Agriculture.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
Charles Donaldson, Esq.
E. W. Thomson, Esq., President Board of Agriculture.
BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, and the debentures, may be had at Messrs Brunton and Son, stockbrokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT

COMPANY.

Notice is hereby given, that the Half-Yearly Interest on the Company's Debentures will be paid on and after the 1st of July, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, E.C.

J. SYMONS, Secretary.

"THE CELEBRATED

INDISPENSABLE SUIT,"

In an immense variety of Patterns and Textures of Walking, Riding, Travelling, or Business, from 30s. To be obtained only of

E. MOSES and SON,
Ready-made and Bespoke Tailors, Hatters, Hosiers, Drapers, Bootmakers, and General Outfitters.
London Houses:—
Corner of MINORIES and ALDGATE.
NEW OXFORD STREET, corner of HART STREET.
Corner of TOTTENHAM COURT ROAD and EUSTON ROAD.
Country Establishments:—
SHEFFIELD and BRADFORD, YORKSHIRE.

CHINA—JAPAN.

A German Gentleman, aged 26, long engaged in first-class houses, corresponding fluently in French and German, and well acquainted with Manchester goods, is desirous of meeting with an engagement for China or Japan.—Address C. A., 18½ Exeter street, Strand.

CHINA.—A MERCANTILE FIRM

in China desires to engage the services of a well-qualified Gentleman to proceed to that country. He must not be under 25 years of age, and must have had experience in a responsible position in a Commercial House in Great Britain in connection with Eastern trade.—Apply by letter only, with full particulars and references which will be treated as confidential, to Kathay, care of Messrs W. Dawson and Sons, 74 Cannon street, City E.C.

SPAIN OR SPANISH AMERICA.—

Wanted, by a Gentleman possessing a knowledge of Manchester goods, an engagement in a capacity in which a thorough acquaintance with Spanish and French would be useful. References highly respectable and satisfactory.—Address R. P., care of Messrs Dunnill, Palmer, and Co., Manchester.

WANTED, BY A GENTLEMAN,

having a small income, Employment. Salary not such a consideration as an engagement in a house of business.—Apply by letter to W. A., care of Mr J. Gilbert, 18 Gracechurch street.

WANTED, BY A YOUNG GERMAN,

aged 26 years, a situation in a Merchant's or Broker's office. He has had eight years' experience in business, is well acquainted with German and French Correspondence, and possesses good references.—Address R. C., 18½ Exeter street, Strand.

WANTED, A SITUATION AS

Accountant, Confidential Clerk, Foreign and English Correspondent, or any similar post of responsibility in a Mercantile firm, Railway, Banking or other public company, by a gentleman, aged 41, for 9 years chief accountant, &c., of an important public company, well acquainted with general business, and proficient in the French, German and Spanish languages. Excellent testimonials; security if required.—Address L. M. N., Messrs Pettle and Son, 15 Royal Exchange, E.C.

WANTED, BY A GENTLEMAN

representing a first-class House in the Manufacture of Colours and Drysaltery, a Commission for the sale of Oil, Turpentine, Glue, or any article where the samples are not bulky, in London, Lancashire, Yorkshire, and Ireland. The present is a favourable opportunity for any House wishful to extend their business, as the advertiser has been connected with the above House for a number of years, and possesses a first-rate connection.—Apply, by letter, to H. B. C., Post Office, Manchester.

PARTNERSHIP.—

The advertiser is desirous of purchasing the whole or part share of a Retiring Partner in a bonâ fide old-established business (not retail). He is prepared to invest £3,000 immediately, more hereafter: lately retired from the most responsible office in one of the first Public Companies in London. Age 39.—Address A. B., care of Messrs Cowdell and Boyce, Solicitors, 21 Abchurch lane, E.C.

PARTNERSHIP.—

A Partner is about retiring from a Brewery, and the firm are prepared to treat with a Gentleman introducing £15,000 in his place. The business is very old established and prosperous, and the position of the firm well known and of the highest respectability.—Principals or Solicitors may obtain particulars of Mr H. Salter, 17 Abchurch lane, E.C.

TO CAPITALISTS.—WANTED TO

borrow, a sum of £3,000 to £4,000 on Mortgage of valuable freehold property and business premises, situate in the colony of Natal, for a term of 7 to 10 years.—For particulars, apply by letter to J. S. Colborne, care of Mr F. Algar, 11 Clement's lane, Lombard street, London, E. C.

TO CAPITALISTS SEEKING

Partnership or advance Investments.—A gentleman with from £2,000 to £10,000 may be admitted into a Half-Partnership in a wholesale staple trade, the profits varying from 15 to 20 per cent. The advertiser has an extensive and valuable connection and thorough knowledge of his business, having been engaged in it 20 years. References exchanged.—Address E. S., care of Brooks and Beal, 209 Piccadilly.

TO CAPITALISTS.—

An opportunity for any person having the command of £15,000 to join the advertiser in Purchasing Freehold Warehouses, Dwelling-houses, Dock and Wharf Property, in Upper Canada, valued at nearly double the amount, suitable for ship-builders, brewers, saw-mill proprietors, and others. The property cannot fail eventually to become immensely valuable. Part of the property is let at about £800 per annum.—Address A.Z., New rooms, 66 Cheapside.

TO ACCOUNTANTS AND

ASSURANCE COMPANIES.—A professional Accountant, who has been practically engaged in business in a large provincial town for a period of fifteen years, is desirous of forming an engagement in London, so as to be introduced to a more extended sphere of business. He is thoroughly conversant with mercantile and bankrupt law and procedure, and is also an experienced actuary, and well acquainted with departments of Assurance business. The Advertiser would engage with an Assurance Office as Actuary or Manager, either with or without liberty to practise on his own account, or would be happy to meet with a professional accountant requiring assistance to whom his acquirements as an actuary might be an additional advantage.

The Advertiser is well-known to William Thomas Thomson, Esq., Manager of the Standard Life Assurance Company, Edinburgh, to whom he is permitted to refer, and who will be happy to communicate confidentially with inquirers on this subject.

stopped, examined, and not improbably (considering what sort of persons are likely to fit out many of the privateers) maltreated and robbed, while going side by side to the same destination.

As we showed on the occasion just referred to, such an anomaly *must* not continue. English ships must at once be placed on an even footing with the ships of the most favoured nation. According to the most recent, though we as yet fear uncertain intelligence, the Confederate States are willing to recognise the rule that "free ships make "free goods," and as their old jurisprudence recognises that the goods of neutrals are never to be seized, this (if it should be hereafter confirmed) is all which it is most important to us to ask from them. They will still, it is true, be continuing the barbarous and degrading practice of privateering, which all Europe has renounced and which the entire morality of civilisation forbids; but we shall not suffer from it much. The declaration just made, if it only have been made, will sufficiently protect us. But as respects the North—the United States—we are still in a most unsatisfactory position; our ships may still be stopped, searched, and scrutinised by any ship of war of theirs or any privateer which they may authorise.

Such is the general law as respects commerce with America. But there is also a special branch of the subject which will practically be important—the law of blockade. The reason upon which this law is rested by jurists and was founded in fact, is very different from the reasons we have just been considering. We have been hitherto concerned with the conditions under which commerce may be carried on during a war with one of the belligerents; we have now to consider the case when *no* commerce is permitted at all. A siege is one of the oldest incidents of warfare, and entails of necessity peculiar consequences.

In a siege—and what is called a blockade is only a siege by sea—it is a principal object to distress the besieged by cutting off their trading connections with the external world. It is advisable, as far as possible, to prevent their obtaining subsistence by a commerce of import, and to prevent their earning a livelihood by a commerce of export. Neither the belligerent nor the neutral is to be permitted to carry on any trade by sea with the blockaded place.

To a valid blockade two conditions are necessary:—*First*, that there should be an efficient blockading force. Attempts have at various times been made by various nations to throw whole countries under a commercial interdict by decree. Notice has been given that the whole coast is not to be approached by the ships of neutral countries. But such decrees are contrary to the accepted law of nations and to common sense. There is no real siege, the ordinary trade of the coast in its own vessels is going on as usual, and it is pure commercial evil for commercial evil's sake to ruin the commerce carried on in the ships of neutrals. The legitimate object of a blockade is to distress the enemy by cutting off the entire trading communication, and less than this is of no use in a military sense at all.

And, secondly, a blockade must not only exist in fact and reality, and not on paper only, but it must be made known to those whose commerce is to be interdicted. The most common and proper way of effecting such an object is an authentic communication to the Executive Governments of neutral countries. But such a notification is not absolutely necesssary. If the captain of the ship can be proved in matter of fact to know of the existence of the blockade, the vessel is not permitted to escape the ordinary penalties through any formal deficiencies in the technical communication.

The penalty of a breach of blockade is the simple *confiscation* of ship, and, in most cases, of the *cargo*. If, therefore, the cotton ports of the Southern States of America are blockaded by the Northern States, we trade with them at our peril. Neutral ships which are shut up in the blockaded port at the beginning of the blockade may indeed, by the courtesy of nations, be permitted to come out. But there is no other exception. If the avowed intention of the Northern President should be strictly carried out, no ship, of whatever nation, will be able to bring a bale of cotton from New Orleans, Charleston, or Savannah.

It is deeply to be wished that it may be only merchants and men of business who need think of these considerations. But it is very possible that they may exact the attention before long of the whole nation. A squabble at sea is the most likely cause of war to a maritime nation; and the present juncture is unfortunately very likely to be prolific in such squabbles. We have to do with the privateers of the South—the worst privateers, probably, that the world has ever seen; we have to do with the ships, perhaps with the privateers also, of the North—in the days of their prosperity the most punctilious, overbearing, and contentious Government which the world has ever seen, and now, in the bitterness of adversity and the false shame of humiliated pride, perhaps likely to be more overbearing and contentious than ever.

THE VICISSITUDES OF FINANCIAL OPPOSITION.

It is believed that the Opposition intend to raise a further discussion on the expediency of repealing the paper duty, but it is not easy to see how a consistent case can be made out for such a policy. At the outset of the discussion, Mr Disraeli had the choice of two distinct lines of opposition. He could either deny the reality of the surplus, or propose a different mode of dealing with the surplus; but he could not in reasonable logic do both. If there is no surplus, it is idle to discuss the different modes of dealing with it. If you propose a reduction of duty different from that proposed by the Government, you admit for good and for evil that you have at your disposal sufficient money to remit that duty. No more evident dilemma of the schools was ever more apparent than this.

But Mr Disraeli, whose warmest admirers do not reckon among his conspicuous merits a very far-sighted consistency, has not perceived what would be called in France the "logic "of the situation," or if he did perceive it, he has chosen for some purpose which he knows to disregard it. He admitted the reality of the surplus in the most express and confident terms, to the evident wonder and surprise of very many of his own supporters: he even went further, he voted for Mr Horsfall's amendment, which would have entailed a greater loss of revenue than the proposal of Mr Gladstone. And we cannot comprehend, and we think it will puzzle the thinking part even of his own supporters to comprehend, how, after this admission, he can change his argumentative tactics, and deny the existence of this excess of revenue which he only a few weeks since proposed to appropriate.

Our own opinion upon Mr Gladstone's Budget we have given formerly at great length; and we have seen no reason to change or modify it. But we think there should be a decent consistency in the tactics of a financial opposition, and that essentially opposite lines of argument should not be urged upon exactly the same question, without the least change in any of the critical and essential circumstances.

CIVIL WAR: THE PRICE AND THE PROFIT.

The Americans are just now standing in one of those critical positions and at one of those perilous moments of a nation's life which determine its fate and its character during many future years and, possibly, many unborn generations. The ground is very narrow, and even as we write is being washed from beneath our feet:—the moment is very short, and perhaps has already passed away. On what may now be decided—nay, too probably on what has been already done—will depend vast good, or almost incalculable evil. The peaceful disruption of the Union we should welcome most hopefully, as an almost unalloyed advantage. A civil war we cannot but regard as an almost unmitigated mischief. A breach cannot be healed by internecine hostilities; but it may easily be widened into an impassable gulf. Even if a re-junction were possible, and as desirable as the Northern Federalists appear to deem it,—who can hope for it through the medium of war? The South can never again expect to dominate the North. The North cannot seriously expect to subjugate the South; nor, as we have often urged, would it be worth their while to do so. To *lure* the seceders back into the Union would be a grand, and might be a beneficent achievement: to *force* them back neither is feasible nor would be profitable.

Neither party, therefore, can subdue or re-embrace the other—probably by no means, certainly not by fighting.

But each may inflict upon its antagonist such fearful injury and suffering as will leave a legacy of undying hatred to their children and their children's children. The material mischief wrought by civil strife between the two sections of the Union will be as nothing to the ferocious passions which it will engender. The havoc it will make in their prosperity will be trifling in comparison with the havoc it will make in their morality, and their civilisation. For, observe, it will not be like a duel between two courteous foes, who exchange shots with unruffled tempers and no consequences. It will not even be like a pugilistic contest between two angry English yeomen, who shake hands before the mill and share a pot of porter after it. It will be deadly, it will be vindictive, it will be bitter. It will partake both of the barbarism and the relentlessness which have shocked us so much in the narratives of personal encounters among individual Americans. It is impossible to foresee what extremes belligerents may not permit themselves, when reciprocal inflictions are every day inflaming tempers which combine Anglo-Saxon stubbornness with Indian ferocity. Let us look forward for a moment to the *possible* developments which such a conflict may assume—the frightful extremities to which, step by step in the progress of exasperation, it may ultimately lead. The navies of the North blockade the Southern ports; close, if they can, all their issues to European markets; shut in, and by so doing render worthless, because unsaleable, all those teeming products of tropical plantations by which planters purchase their luxuries and comforts, and in the growth of which they employ their slaves. The Southerners may *live* undoubtedly under such a blockade, for they can grow their own sugar, cattle, tobacco, rice, and Indian corn. But conceive the state of mind of some millions of men, who have hitherto been dependent on foreign commerce for nearly all articles of consumption, when deprived of wine, of tea, of clothing, and with wheat driven up almost to a famine price;—and at the same time, in order to maintain the conflict, taxed to an extent that only the most prosperous condition of trade could make endurable. Conceive the feelings of thousands of the population, thrown out of all their usual avocations, and driven by idleness and privation into habits of marauding, plundering, and piracy.

Then turn to the other side of the blotted and disfigured picture,—the rich commerce of the North preyed upon by Southern privateers; the merchants of Boston and New York deranged in their transactions, struck at in their credit; their debtors and customers turned into enemies and repudiators; their wealth deeply eaten into in order to support a war of which they perceive more clearly day by day the hopelessness and the waste, while day by day their passions and their pride become more inveterately interested in bringing it to a triumphant issue—even though that triumph must be inevitably barren. They will not be able to bear its continuance; they will not be able to swallow the humiliation of confessing themselves discomfited and baffled:—may they not at last, in their perplexity and exasperation, be tempted into the supreme desperation of endeavouring to excite a servile war, and, in their frenzied and overheated brains, elevate the crime of Slave-insurrection, as the Southerners have already elevated the crime of Slavery, into a solemn duty and a sacred right? Which party would conquer in the strife, if it ever reached so horrible a development as this, we do not care even to speculate: but that such a development should be among its not impossible and perhaps not very remote contingencies, is enough of itself to make the most infuriated opponents pause before they strike the first blow. We will not enter, even for a passing moment, into any strategic estimate of probabilities. It would be rash, and almost irrelevant, to ask with which party lie the best chances of mastery. We content ourselves with the position—which even excited passion must, we think, admit to be irrefragable—that, to whichever side the balance may incline, the mutual mischief inflicted must be literally incalculable; and that the completest *victory* which it is possible for the North to achieve would bring no *success* worth achieving. As we have said over and over again, stripping the question at issue naked, it resolves itself into this:—"Why "should the Federal Government fight to prevent the Slave "States doing that which they will do just as certainly after "defeat or after victory, as before the battle?—nay, which "is already done, and which not the most sanguine Abolitionist believes can be undone?" Mr C. Clay, indeed—in that strange letter which he has addressed to the *Times*, and which is a very model of feeble reasoning and questionable taste—would fain persuade us that his constituents know clearly what they are about to fight for, and that they really propose to themselves to subjugate the seceding States, and believe they shall easily succeed in doing so. We can only say in reply that we have never met any sober countryman of his bold enough to avow the same project, or to entertain the same expectation.

But while we look with such grief and deprecation on the prospect of a sanguinary and unnatural conflict between brethren for an undefined purpose and a barren triumph, we are optimists enough to contemplate the prospect of a peaceful separation and an amicable partition of joint possessions with much hope and even with positive satisfaction. We do not see why both parties, why Europe, why humanity at large, may not then be gainers by the catastrophe. The two Republics will be free, each in its own sense and according to the dictates of its own experience, to amend that constitution which the one Republic had so long felt, and sometimes avowed, to be full of perils and defects. They may become friendly rivals and competitors in the art of democratic statesmanship. They may strive with each other as to which shall first bring to perfection a system of genuine self-government. They may profit by each other's errors, may grow rich by each other's prosperity, may grow strong by each other's progress. The North, when it has shaken off the fetter, the complication, and the disgrace of its former connection with Slave institutions, may become single-minded, honest, humane, and just, in its internal as in its foreign policy. It need no longer have its best and truest feelings lacerated by the scandals of a Fugitive Slave Law, nor have its reputation as a lover of consistent freedom stained by the restrictions on liberty of speech and writing which deference to Southern interests and prejudices has hitherto compelled it to impose or to connive at. There will be nothing now to prevent it becoming as civilised in manners and as stainless in conscience as any European State. Its 20,000,000 of freemen, with their wonderful energy, their elastic genius, and their rapid multiplication, must always ensure to the Northern Federation a proud and powerful position among the great nations of the world;—and if, as we hinted last week, they can—now or ultimately, by deliberate arrangement, by direct purchase, or by gradual absorption—draw the boundary line so as to include *free* Virginia, *free* Maryland, and *free* Kentucky and Missouri, they will be the possessors of a territory which, for extent and variety and richness of resources, will leave them without excuse for coveting any other lands.

How will it be with the South? The Slave States also will be left with a noble empire and an almost boundless field. What they will do with their grand opportunities and their heavy responsibilities we will neither affect to prophesy nor stop to conjecture. They may no doubt misuse them grievously,—or they may profit by past experience and by newly-acquired security and independence, to face their own great domestic difficulty as wise and good men should. We are even much inclined to hope that the institution of Slavery may be mitigated, and that the Negro population may be better off than of late, both as to actual condition and remote prospects. Certainly, the change can scarcely be for the worse. Under the influence of irritation from the ceaseless reproaches of Northern Abolitionists—as to the sting of which there can be no question; and under the influence of fear as to unconstitutional interferences—for which we are bound to say we believe there was no ground,—the Planters and Slaveowners of the South have gradually goaded themselves into a state almost of frenzy on all matters relating to THE critical question, which has at once perverted all their natural good sense and poisoned all their natural good feeling. It is not unreasonable to hope that, when once they become a homogeneous Republic—a congeries of States in all of which Slavery is a recognised and *undisputed* system—*controversy* on the subject may cease and *consideration* of the subject may begin. When the minds of their more farseeing and sagacious statesmen are no longer maddened and blinded by a position of daily self-defence, they will surely be compelled by the undisguised greatness and peril of the question, to turn all their powers to its study and its solution;

and the ingenuity and hardihood which is now devoted to defending the indefensible and canonising the atrocious, may then be concentrated on the more reputable and more profitable task of facing and conjuring without delay a danger and a puzzle which, sooner or later, *must* be met and overcome. The *continuance* of the old Union had done nothing either for the limitation or the mitigation of Slavery: year by year, census after census, its area extended and its worst features became exasperated;—the *disruption* of the Union can scarcely be so utterly unprofitable. If the menaced war either was or pretended to be a war for the extinction of Slavery, or for the limitation of its area with a view to its extinction, then it might be a righteous even if not a hopeful war:—*not* being waged for such an end, it is not a just one, and it cannot come to good.

During this week two remarkable State papers from the two sides of the American dispute have appeared, and it will surprise no one who knows anything of the history of revolutions that they are utterly beneath the importance and the dignity of the great events to which they relate. The State papers of revolutions are rarely on a level with their subject: they are of necessity an attempt to speak the language of law at a time when there is no law; they endeavour to bring within the jurisdiction of constitutional rules a time which has no rules; they necessarily affect a tone of elaborate discussion, which, at a time of excited passion and sudden conflict, is unseasonable and unreal.

Mr Jefferson Davis occupies himself in an attempt to prove that the South have, under the written constitution of the United States, a legal right to secede and separate. No worse argument on the law of the case was ever offered by an eager advocate to impatient though long-suffering judges. There is not the shadow of a question that the United States were a Union; that they had formed advisedly and deliberately a single real State in the same sense that England is a real State or France is a real State. Upon mere dry law, Louisiana and South Carolina have no more right to secede than Cornwall or South Wales. But those who discuss law at periods of revolution are talking hydrostatics to the ocean. The passions of men and the intense interest of enormous events have lifted men into a world which for a moment has no law,—where everything is confusion—where every one's ideas are unsettled—where an appeal to old statutes is absurdity and pedantry.

Nor on the more substantive part of the case is Mr Jefferson Davis more successful. He hopes to prove that the North has been the aggressor; but the obvious facts are too effectual for refined argument. He alleges that the North have encouraged Abolition Societies, which have interfered with the "property" of the South. It would be more to the credit of the North if it had; but we all know that the Anti-Slavery agitation was bitterly unpopular at the North; that bare discussion was hated; that whatever was effected, was effected by a small minority of earnest men, in defiance of the expressed wishes of an overwhelming and very oppressive majority.

Nor, on the other hand, is the logic of Mr Seward more in accordance with invincible and incontrovertible facts. As becomes a man with a weak argument he is eloquent. "You cannot be too decided or too explicit in making known "to the French Government that there is not now, nor has "there been, nor will there be any—the least—idea ex-"isting in this Government of suffering a dissolution of "this Union to take place in any way whatever. There "will be here only one nation and one government, and "there will be the same Republic and the same Con-"stitutional Union that have already survived a dozen "national changes and changes of government in almost "every other country. These will stand hereafter, as they "are now, objects of human wonder and human affection. "You have seen, on the eve of your departure, the elasticity "of the national spirit, the vigour of the national Govern-"ment, and the lavish devotion of the national treasures to "this great cause. Tell M. Thouvenel, then, with the "highest consideration and good feeling, that the thought of "a dissolution of this Union, peaceable or by force, has "never entered into the mind of any candid statesman here, "and it is high time that it be dismissed by statesmen in "Europe."

But no wise man begins a difficult and dangerous war with language like this. The language of confident exultation is, as we know, becoming in those who are taking their armour off; but very unbecoming in those who are putting their armour on. The answer to Mr Seward is the map. The geography of the Southern States is no contemptible trifle. To attempt to hold that vast area against the will of its numerous and dispersed inhabitants is the most futile dream which ever passed over the excited brain of a rhetorical American; and the hope that there is any party in the Gulf States opposed to secession, and anxious for a reunion to the North, seems, if it be possible, still more chimerical. Mr Seward will no more prove that the North can conquer the South, than Mr Jefferson Davis can prove that the South have a legal right to secede from the Union.

THE PRESENT ATTITUDE OF HUNGARY.

We have not thought it necessary, nor indeed would it have been very feasible, to draw attention week by week to the slow progress and the varying aspects of the chronic controversy between Austria and Hungary;—but the masterly address recently proposed to the Diet at Pesth by M. Deak, which has almost certainly by this time been adopted by that assembly, so distinctly defines the position taken up by the Magyar nation and proclaims the demands on which they are determined to insist, that we cannot have a better opportunity than the present for a succinct statement of the respective attitudes assumed by the disputants and the probable direction which events may be expected to pursue.

The Hungarians, then, have adopted a strictly legal, constitutional, and historical ground whereon to entrench themselves,—and herein lies their chief strength. They have their own ancient, time-honoured, often-confirmed, and never-surrendered institutions—their distinct national existence, which has never been denied—their formal and specific political rights and immunities, which have been accepted and sworn to by the House of Hapsburg with many solemn repetitions. The connection of Hungary with Austria has always been purely and exclusively a *dynastic* one—never a *national* one. Hungary is not a portion of Austria; it is simply an hereditary possession (under distinct conditions) of the head of the House of Hapsburg. The Emperor of Austria is, if he chooses to be crowned at Buda and to swear to the Hungarian Constitution, the King of Hungary,—exactly as the Sovereign of England, if a male, was also the King of Hanover. But as the distinct nationality of Hanover was brought out into relief by the devolution of the Crown of England on a female, so would the distinct nationality of Hungary be brought out by the devolution of the Crown of Austria on a minor;—as in that case, by immemorial law and usage, the nearest male relation becomes Regent in the Austrian Empire, while the Count Palatine becomes Regent in Hungary. The young Emperor of Austria no doubt endeavoured, after the events of 1849, to incorporate Hungary with the rest of the Empire, but he never succeeded. He was never accepted as Sovereign by the Magyars; he was never crowned at Buda; he never swore fealty to the old Constitution of the State; he never, in a word, fulfilled any one of the conditions on which alone the Crown of Hungary can be legally held; and in the eye of the law, not the present Emperor, but his feeble old uncle—who in 1848 abdicated *as Emperor of Austria but never as King of Hungary*—is the reigning monarch of the Magyar nation.

The Hungarian Diet, therefore, stand upon their old nationality and their indisputable hereditary rights. They ask for nothing new. They require merely that what has been illegally omitted shall now be supplied, and that what has been illegally committed shall now be formally annulled. They ask simply that the abdications of the uncle and father of Francis Joseph shall be officially communicated to them, and that all the despotic and unconstitutional ordinances which have been issued by the Vienna Cabinet since 1849 shall be publicly revoked. The nation, then, as well as the monarch, will be placed *rectus in curiâ*—clear in the eye of the law; and Francis Joseph may then seat himself upon his hereditary throne, and, when once crowned, may step into undisputed possession of his constitutional rights as legitimate Sovereign of Hungary. The old dynastic connection will thus have

been resumed where it was broken off, and the distinct national existence of the Kingdom will have been restored.

This is what the Hungarians now offer as the clear and only condition on which they can renew their allegiance and accept Francis Joseph of Austria as their ruler. Right or wrong, this is their ultimatum—the ultimatum of that moderate party of which M. Deak is the respected spokesman, and which, since the lamented death of Count Ladislaus Teleki, has become paramount in the councils of the country. A reunion on these terms would give to the Emperor of Austria all the power in Hungary that he ever legally possessed,—certainly as much as experience has shown he can be safely trusted with,—certainly enough to be well worth grasping at in the present aspect of affairs. It gives him at least as much as is theoretically possessed by the Queen of England, and would give him as much as she possesses practically, could he but make himself as popular and as beloved as she. It leaves, no doubt, a distinct Hungarian Ministry, whose counter-signature (as with us) is in most cases needed to give Imperial decrees validity. It leaves a distinct Parliament which, like our own, must assent to all legislative enactments, which *may* refuse the supplies, and which alone can impose the taxes. It leaves, no doubt, with this Diet the power of granting or withholding new levies of troops, and of declining to provide for the expenses of any war which it does not sanction. But it constitutes the Monarch Commander-in-Chief of all the forces actually in the field, and it compels the Diet to place the whole Hungarian army, with due equipment, at his service, *if he be attacked* in any portion of his dominions. That is, Hungary is bound to support him in a defensive, though not in an offensive, war.

Such are the Hungarian proposals and demands. They claim no new rights; and, notwithstanding the warnings of repeated perfidies,—which might well warrant the most obstinate distrust,—they ask no new securities. If the Emperor were wise, he would close at once with M. Deak's address. But we fear there is no great prospect of his doing so. He is bent upon inducing the Hungarians to send deputies to his new Constitutional Parliament at Vienna, where they would be swamped by an overwhelming majority of representatives from those portions of the Empire which belong to the German Confederation,—to whose interests their own would be sacrificed, and in whose preponderance their cherished separate existence would be merged. He will, therefore, probably refuse, and again summon them to elect deputies. This being of course out of the question, nothing remains for them but to fold their arms in passive resistance, and for Francis Joseph to do what he can by active force. The first thing to be done will be to collect the taxes;—but as these have not yet been voted by the Diet, and as the county and communal authorities (the old recognised local functionaries for such purposes) are of the same mind with the Diet, and will not collect them till they have been lawfully so voted; and as no other officials now exist who can collect them,—they must be levied by the Austrian soldiers, if they are to be levied at all. And what this means, and what this leads to, we all know too well.

This we believe to be, succinctly set forth, the present position of the dispute, and the issue of it which at present appears most likely. If, contrary to appearances, Francis Joseph should for once be temperate and sagacious, the subject will enter on a new phase, the bearing of which on Austrian power and Venetian independence we shall then be called upon to consider.

THE CUBAN SLAVE TRADE.

Among those "experiences" at the Foreign Office of which the present Premier occasionally gives the House of Commons and the public the benefit, none was more significant than that which related to the comparative morality of strong and weak States on points of international obligation. Lord Palmerston, in answer, if we recollect rightly, to some imputation of adopting a different standard of treatment in proportion to the means possessed by the State in question of resisting or resenting interference, avowed a difference of tone, and justified it by the fact that the weaker the nation is, the less sensitive it is to those considerations of national honour and integrity which are the basis of our intercourse with the greater Powers and of our friendly appeals to them on any international difficulty. The weaker States—he told the House in so many words—speculated on their own weakness, and on the probabilities of the forbearance which the disparity of forces would secure, or of the sympathy which they might obtain from the ignorance or jealousies of other nations, ventured on gross breaches of international law and solemn engagements which greater States would have shrunk from as national dishonour. How to deal with such delinquents,—who are always parading their weakness as a sevenfold shield, and under its shelter setting at defiance all the ordinary comity and duties of nations,—is a problem which even Lord Palmerston has not found it easy to solve consistently with the conflicting claims of humanity and justice. A strongly-worded despatch, a biting Parliamentary allusion, or even a naval demonstration, have proved but feeble antagonists to this sublime insolence of the weak. It is, we fear, an inevitable concomitant of the superior urbanity of modern Governments, and can only be slowly removed by the wider spread of feelings of national morality. One great hope is derivable from the fact that the delinquent States are by this time so well ascertained, and their real character is becoming so much a matter of general notoriety, that the plea *in misericordiam* will not be much longer admitted in the tribunal of civilised nations. Bondholders and philanthropists—differing widely as they sometimes may in their views of political and social morality—are agreed on this point. Their grievances vary, but those at whose hands they are experienced are pretty generally identical, and their "case" has to encounter very much the same difficulties. We do not know how far we are justified in reckoning Spain, after her recent successful raids in Morocco, and her latest successful "transaction" with that dealer in nationalities, General Santana, at St Domingo, in the category of weaker nations. But, certainly, up to a very recent period her most flagrant acts of bad faith have been sheltered from justice in that character, and they possess in an eminent degree the type of that class of offences. Lord Palmerston's Government have recently been again taunted by the anti-English press of Paris with using unwarrantable language with respect to this *quasi*-feeble State; and it may be not entirely out of season to see on the strength of what ascertained facts they thought themselves justified in speaking thus plainly. A despatch, which has just been presented to the Houses of Parliament, gives us the materials for doing this within a very small compass. Mr Crawford, Her Majesty's Judge in the Mixed Commission Court at the Havana, has sent in his report, dated February 5th of the present year, of the actual condition, characteristics, and prospects of the Slave Trade in the Spanish island of Cuba.

It is a point of some importance at the outset that we have still to speak of the Slave Trade to Cuba as an existing fact, when a quarter of a century ago the Spanish Government entered into a solemn engagement to suppress it. And now we find Her Majesty's agent commencing his report to our Foreign Secretary with a prelude that "it is again his "disagreeable duty to state to his Lordship that the Slave "Trade continues to be carried on from this island upon the "most extensive scale, and that, so far from its having be-"come odious in the opinion of the public, there are more "persons even of capital and influence engaged in it "than ever." In this state of things the Spanish Government itself is directly implicated. "Her Majesty's Government," writes Mr Crawford, "have all along "been made aware of the demoralising effects of this "most abominable traffic, and that there were always "to be found amongst the Spanish officials some who were "so base as to sell their honour for a consideration. Many "have been the victims of their venality, who have been dis-"missed from their commands, but in no one instance have "we seen that the officers who have so disgraced themselves "and the Royal service to which they belong have been "otherwise punished or degraded; and thus it is, that "having held an office or appointment long enough to "enrich themselves by the bribes they have received, they "are displaced, retain the money so acquired, and are "allowed to retire on their fortunes. This state of things, "which began soon after the ratification of the treaty with "Spain for the abolition of the Slave Trade, has gone on "and continues, *and it is now most thoroughly systematised (by*

" *a tariff in some instances, the charge being paid to an agent*), " *and the blood-money is divided according to the scale, the* " *higher and lower officials receiving each their proportions.*"

There are now actually more slaves in Cuba than there were in 1835; whereas, according to the rate of mortality, they ought now to be extinct, if a large and continuous importation had not since taken place. During the long second administration of General Concha, the traffic was really carried on on a much greater scale than in the time of his predecessor, although the General had the effrontery to write home to his Government that it was almost put an end to; " and it is fully as extensively prosecuted now, under the " government of General Serrano."

Since the year 1858," when there was such outcry about " our cruisers in these waters boarding American ships, the " traffic has been almost exclusively carried on by vessels under " that flag, which fit out and sail from the United States; " and such has been the effect of the impunity enjoyed by " the Slave-traders that the American masters and crews no " longer hesitate to continue on board, and have brought all " their energies and cunning into operation to avoid their " own Government cruisers, as well on the coast of Africa as " in the waters of Cuba, *from the last-mentioned of which all* " *Her Majesty's vessels of war have been withdrawn for the* " *last two years.*" Indeed it is on the coast of Africa alone that the slavers encounter any serious difficulty in their voyage. The high price commanded by the slaves actually landed allows a vast margin of profit to the adventurer—one successful voyage covering the loss of *ten* empty vessels and of *five* taken after the shipment of the Negroes at the coast. The table of expenses, &c., and profits is a curious one:—

	dollars.
Cost of vessels and provisions	25,000
Cost of 500 negroes at 50 dollars	25,000
10 per cent. mortality	2,500
Wages and gratifications to master and crew	30,000
Blood-money for landing 450 slaves, at 120 dollars each	54,000
	136,500
One year's interest till paid, at 10 per cent. per annum	13,650
	150,150
Sale of 450 slaves at 1,200 dollars each	540,000
Profit on the adventure	389,850
Or 77,970*l* sterling.	

The total number of slaves introduced during the past year 1860 is estimated by Mr Crawford at 24,895, while those who were captured only amounted to 3,642. " Several " of the wealthy proprietors have even lent their estates " for hire, whereon new-landed negroes have been afforded " the protection accorded to the Slave-trader by the Penal " Law of 1845 (article 9);" and the most notorious of those engaged in the traffic are loaded with honours and decorations of Spain, and even in some cases ennobled.

On the strength of near nineteen years' experience, Mr Crawford states it as his decided opinion that " there is no " intention on the part of the Spanish Government or its " officers to carry out the provisions of the treaty;" that " there is no faith or belief to be attached to their promises " or professions in that respect," but that, " on the contrary, " their whole study is, how to evade their performance." He is quite satisfied that the Government of Spain, if resolved " to put an end to the Slave Trade, and fulfil their obligations " to Great Britain, has the means there at command; they " can do it whenever they please, and it would not affect " their dominion of the island, nor endanger its safety as a " dependency of Her Catholic Majesty."

There is one faint ray of hope. May not Spain be induced to do from motives of policy and lasting profit what she refuses to do from humanity and good faith? The cost of each imported slave labourer to the planter is enormous and ruinous, amounting, as Mr Crawford estimates, to 138*l* sterling for the year, or 8s 10d for each of the 313 working days in a year. This Mr Crawford vouches for as a moderate estimate, and if compared with the price of labour in our free West India Islands the inference is clear. " It is possible that, " if Her Catholic Majesty's Government could be con- " vinced of the gradual, but no less certain, ruin of the whole " agricultural interest in Cuba," to which their policy is leading, "they would issue orders to be carried into effect ' at all hazards for the suppression of the Slave Trade." Against one plan of professed substitution for slave labour Mr Crawford enters a warning protest, and it is extremely important that the attention of the English public as well as of the Government should be drawn to this point. " Should a proposal which has been made to the Spanish " Government, *and which is now being urged by every means* " *and influence at Madrid*, be approved, the object of which " is the importation of Negroes from Africa, *under contracts* " *for a period of years, as free labourers*, the parties here, " projectors of this speculation (for it is nothing else), are " well aware that the Negroes in Africa will not willingly " contract themselves to come here and work; and I have " good reason for stating to your Lordship that their plan is " to contract with the Kings for all the prisoners they " can deliver at certain places at so much for each; and the " farce of a contract is to be enacted, when in reality the " basis is slavery, and every Negro has been paid for by the " Company that is to engage in this new deception, *which is* " *only awaiting the* sanction of the Spanish Government to " be carried out on a very extended scale by parties of great " wealth and influence."

INDIAN RAILWAYS, AND THEIR EFFECT UPON THE MONEY MARKET.

THE recent announcement of a possible Indian loan for railway purposes has attracted to those securities an unusual degree of attention. And not unreasonably, since, though their general position is very interesting, their momentary circumstances are of peculiar importance. It is often alleged that enough is not done by the English Government for public works in India; and it may perhaps be right to complain, for, with the peculiar resources of the Government of India, it is possible that more might still be achieved. But in any other country than England it would have been thought that a great deal had been achieved already. If an ordinary despotic Government had done what the English Government have done for Indian railways, the eulogiums from half the world would have been emphatic and unceasing. If a French Government had achieved one-tenth part of it, the French newspapers would have unanimously announced that nothing comparable had ever happened in the world, and that the " era of industry " had at last arrived.

What have the English done for railways in India? They have laid out an enormous sum in *mere interest*—a sum which any other people would have thought excessive if it had been an advance of principal—and they have invested a very much larger sum as principal also. The figures are these:—

	£
Interest actually paid by Government of India	5,299,709
Less receipts from net profits to 30th June last	880,331
	4,419,378

And on the more important capital account, which tells us how much has been achieved by the natives of and residents in India, and how much by the capitalists of England, we have:—

	£
Amount raised in India by last advices	669,952
Amount raised in England by shares £26,890,723	
— — by debentures 6,835,770	
	33,726,493
	34,396,445

showing that all but the most inconsiderable portion of the capital necessary for the construction of railways has been sent from England to India, and that the sum itself is one which scarcely any country but England could have parted with without being conscious of it in some degree.

Such is, in the brief but expressive language of figures, the history of the past. What are the probabilities of the future? It is estimated that fifty-six millions, or thereabouts, will be the entire cost from beginning to end of all the works which have already been sanctioned by the British Government. But a large part of this has been already expended, and a small portion relates to comparatively unimportant works, which may be fairly postponed for the present. The figures are:—

	£
Estimated total cost	55,680,000
Less amount already expended £34,042,128	
— — to be postponed 7,500,000	
	41,542,128
Remaining to be expended	14,137,872

which, according to an approximate estimate, will be distributed over the next four years thus :—

		England.	India.
	£	£	£
1861—62	8,000,000	2,000,000	6,000,000
1862—63	4,000,000	750,000	3,250,000
1863—64	1.500,000	300,000	1,200,000
1864—65	500,000	100,000	400,000

showing that there will a drain *of no less than six millions of English capital this year from England to the East.*

It was expected that the Railway Companies would have at their disposal a considerable sum of money to meet at least the commencement of this large demand upon them, but such is scarcely the case. It was *estimated* that

	£
The amount at the credit of the Companies would be...	1,978,399
It is only	354,317
Difference	1,624,082

which shows a large difference between anticipation and reality, and gives but dubious and hesitating auguries as to the future.

The legal powers of the Indian Railway Companies are undoubtedly considerable. They can raise

	£
By calls	1,360,700
By issue of new shares and debentures	6,546,139
	7,906,839

But in the present state of the money market it is not very certain how far these powers could be made effectual. For many months the ordinary value of money has been such as scarcely to induce most persons to embark their money on a remote venture to India. The common rate of interest in Lombard street has been so high as to discourage all distant investments. And one incidental effect of the Sepoy mutiny —since it is the peculiarity of such great and anomalous events to leave in very many quarters unmistakeable traces of their occurrence—has been to limit the borrowing power of the Indian Railway Companies by bringing the Indian Government itself into the money market as a borrower. Although the Railway Companies were assisted with the credit of the Indian Government, that Government was itself straining all its resources for other purposes to the very utmost.

It is, therefore, highly probable that the Railway Companies, if left to themselves, would have very great difficulty in raising the sums they required,—speaking of course of them as a class, and not concerning ourselves with the special position of any one among them. The Government has already advanced 682,000*l* to certain Companies, and it is likely, we may say certain, that the system thus commenced will have to be continued.

It may at first sight seem strange that the Indian Government should be able to borrow that which the Railway Companies *with the guarantee of the Indian Government* cannot borrow for themselves, and even after every explanation it *is* rather strange. The tastes of the lending part of the public are peculiar, and it is not possible to give a scientific explanation of inclinations which are not founded upon any very careful investigation or very rational argument. It is true that the Indian Government guarantees absolutely the debentures of the Indian railways, and guarantees, not perhaps absolutely and mathematically, but still sufficiently and practically, 5 per cent. upon the shares also. The abstract, the philosophic security, if we may use the expression, may be the same in the two cases. But, nevertheless, it will in fact be found that Sir Charles Wood can borrow in 5 per Cent. India Stock when the Companies could not borrow even upon debentures. And the money-dealers know this well—it is their business to know it. You could "float," to use the technical term, "5 per Cent. Indian Stock" upon the Stock Exchange far more easily than you could float the same amount of railway debentures. Capitalists would be most willing to take exactly what they would have the greatest facilities in disposing of. Sir C. Wood will, therefore, unquestionably be able to aid the Railway Companies in their existing difficulties. He will be able to borrow the money for them; and, doubtless, unless the value of money much alters in the course of the year, it will be necessary for him to do so.

We need not point out the effect of his large investment of English capital at so great a distance. It must tend, whether the Companies borrow it or whether Sir C. Wood borrows it, to raise the value of capital here, and to make the market of Lombard street more restricted and stringent than it would otherwise be.

Agriculture.

AGRICULTURAL LABOURERS.

THEIR WAGES AND DWELLING PLACES.

A PAPER was recently read at the Statistical Society on the wages of agricultural labourers by Mr Purdy, by which it was shown that the average wages of agricultural labourers in England and Wales in the year 1824 were 9s 4d a week, and that they have now advanced to the average of 12s per week. This increase of 2s 8d amounts to 29 per cent. It is true that the rates of rural wages vary greatly in different districts. Thus, while in Herefordshire, Devonshire, Dorsetshire, and Wiltshire wages are now from 9s to 9s 6d a week only; in Westmorland, Cumberland, Yorkshire, Durham, and Northumberland rural labourers are paid from 13s to 15s per week; and in Surrey, Kent, and Southampton intermediate rates, from 12s to 13s a week, prevail. There is, however, nearly the same proportionate advance in agricultural wages in the high and the low-priced districts. Although the weekly increase in the amount earned is not of large money value, yet it represents and indicates a condition of advance and comparative prosperity, and will fully account for the uneasiness with which the agricultural labourers have borne the wretched cottage accommodation which is actually provided for them in nearly all our agricultural districts. The subject, as all who note what is passing in those districts well know, is one which demands and in some sort receives much attention. Some large proprietors are building new and improving their old cottages, and a few even are overdoing the matter by erecting cottages which the habits of the labourers do not enable them to appreciate, nor their ordinary earnings to furnish with tidiness and comfort. But by far the greater number of proprietors do nothing. Nor is the urgency of this matter confined to England, for in Scotland the present state of the labourers' dwellings has been much condemned, and the means of their improvement are much discussed.

In Scotland, however, the practice of boarding servants hired by the year is far more prevalent than it is at present in England, and what are called "bothies," *i.e.*, separate rooms where the yearly servants board and lodge, have of late called forth much, and perhaps needless objurgation. A paper on the past and present condition of farm servants, as applicable to Scotland, lately read by Mr Geddes at the Morayshire Farmer's Club, in Elgin, deals with the subject in a very sensible way, and presents views justified by long experience and free from prejudice. Mr Geddes refers to an experience, as man and boy, of nearly forty years, in intimate connection with farming pursuits in Morayshire, having been brought up in the farm he now occupies, and said that, so far as regards "what is called their moral conduct," he cannot perceive any material difference now and forty years ago. Then "there were no bothies so termed in this district, neither were there any cottages for farm servants in close proximity of the steading. The servants, whether married or single, men or women, were all fed in the farm-kitchen. The men slept in an outhouse, generally in close proximity of the stable, commonly a barrack, and by no means a very inviting place, there being but little light and not much cleanliness. Their beds, however, were regularly made every day, and as regarded warmth there was not so much to complain of. The women slept in the farm-house, and were supposed to be under lock and key." This, however, did not prevent irregularities, but the younger servants were in some degree under the influence of the older. Even the ploughmen who had separate cots for their families usually fed in the farm-kitchen. The present workmen are "more intelligent and better educated," and are more skilful than their predecessors, and are altogether more efficient, but they are more independent, and earn considerably more wages.

Bothies originated in the change which took place in the character and habits of the farmers, which had the effect of widening the distance between master and man. There were often disputes as to the food supplied, and it became a mutual relief to place the men out of the house, where they might provide their own food. Thus bothies "have since more and more become the fashion." Nor is a well-conducted bothy worse than the farm-kitchen "for the morals and conduct of the inmates," but rather the reverse. A well-conducted bothy is "a comfortable, clean, tidy, well-kept place—with plenty of light and plenty of fire—surrounded by meal-chests, a table, chairs, and the necessary culinary furniture. For such a place a woman is employed to clean out the bothy daily, light the fire, heat the water, and bake the bread; every man has his own store or chest containing his own feeding allowances, and any thing else he may choose to treat himself to, such as tea, coffee, and butter." In a separate apartment are the beds, which is swept out daily, and proper rules being laid down

and insisted on,—periodicals and the like being provided,—there are few more happy or robust labourers in Scotland than the well-conducted inmates of a bothy. Model bothies have been erected—one, for instance, by Lord Southesk, in Forfarshire, where, adjoining the kitchen or eating-room, there is a room for washing well supplied with water, and a passage off which small cells or sleeping-rooms—each man having one to himself—are placed on either side. Here each man has his meal-chest and his other belongings. Cottages are by all the farmers considered to be most desirable, but their erection must mainly depend on the proprietors. But "it is a great mistake to insist upon building expensive and extensive cottages for farm servants. They do not require them; in fact I have seen, in many instances, that they are anything but desirable for them, their families or means not being co-existent.....The farm servant has enough to do to furnish two rooms and a closet with the plainest furniture.....Expensive cottages will cost three times the money, and not suit the purpose one bit better." Convenience and good taste may be equally consulted without excessive outlay. This we hold to be a most important point. Throughout Great Britain cottages are wanted,—no large cottages—not such as a few landlords build in rivalry to each other—but plain, moderate-sized dwellings, such as fairly meet the wants and habits of the inmates. Neither need cottages be all of one size,—all labourers have not large families. Every farm ought, therefore, to have a sufficient number of cottages for the principal and constant labourers, and they must, like the farm, be under the exclusive control of the farmers.

Then there is much needless despondency often expressed as to the condition of farm servants. Mr Geddes, of course speaking of the Scotch labourers, says:—"I do not say that our farm servants are without reproach, yet I maintain that as a body they are fully equal in morality and general intelligence to most other classes of their own position in life.....Believe me they are not worse than other classes of their standing in town or country." Then they are generally well conducted. "With regard to their honesty, in so far as touches money, I can vouch for it. As a body they are scrupulously so."

Within the last ten or twelve years poaching has increased among farm servants, and it leads to many evils, and not the less so that many of the farmers "rather give a tacit encouragement to it than otherwise." This arises from the preservation of game by the landowners, "which," says Mr Geddes, "I know rankles in the bosom of many men suffering from such a cause."

The labourers "are on the move to social improvement. Better wages and full employment are doing their work, it may be slowly, but surely, and should our business as farmers be prosperous, you may rely on it that the work will proceed steadily. On the other hand, if well-meaning people will go on pointing the finger of scorn at our people, why, they will be brought eventually to lose their self-respect.....I suspect you will find that farm servants hold but few entries, comparatively speaking, in the criminal calendar of our country, while I could point to many who have themselves, or the sons of men who have, been in the position of farm servants, now ranking as tenants of the best farms of the country, and who, in the position which they have attained, are a credit to the country, both as farmers and members of society."

In a discussion which followed the reading of this paper, Mr Cushny said:—"My own impression with regard to farm servants as a class is, that if they are not better, they at least are certainly not worse than any equally numerous class in the country. He desired to see greater numbers of crofts and cottages for agricultural labourers. And they should be treated as independent men. Mr Cushny said:—"I hold that, although it is your duty, and is the duty of every employer, to provide for your servants decently; though it is your duty to set him a good example of social and religious duty; though it is your duty to give him good advice; yet if you (the master) go beyond this, and interfere with the domestic privacy of the servant, with his liberties as a British subject, then I say you go entirely out of your place, and, however good your intentions, you may do much mischief. I do not wish to see your Ladies Bountiful entering the cottages of your rural labourers, dictating how to wash the dishes or feed the pigs. British subjects ought to be left to the freedom of their own will in these things. The difficulty under which you labour is how to find suitable accommodation."

The want of cottage accommodation he hoped might be remedied by the measure lately introduced into the House of Commons, to enable the owners of settled estates to charge their estates with money expended in building cottages. We hope so too. We fear, however, that the seat of the evil lies much deeper. The proprietors in England are but too much inclined to that vexatious interference which was so deprecated at the Morayshire Farmers' Club, where they build any cottages, while no facilities for charging the cost of cottages on the estate are likely to overcome the reluctance, produced by various causes and motives, to localise the population on their estates. Neither do they generally contribute to the educational means of the districts in which their estates lie. In the recent report of an Assistant Education Commissioner, it is said, "But rare, indeed, are the instances of landowners, who, wherever they have property, seem to feel it a first duty to do something for the social and moral elevation of the people," and special instances are cited in corroboration of the reproach.

Literature.

COMMERCIAL LITERATURE.

THE MYSTERY OF GOLD AND CURRENCY. By H. C. Effingham Wilson.

THIS is one of the hundred pamphlets which yearly illustrate the old remark that the currency is "a subject upon which it is pleasanter to write than to read." Hundreds of persons every year strike out anew, by the force of their own minds, some scheme which has, as they think, unmistakeable advantages, and they never dream of asking whether it has been thought of before, and whether it has not been exposed before. The writer on whom we are commenting has a plan for issuing two sorts of Bank of England notes,—one convertible, to be issued in exchange for gold, and the other inconvertible, to be issued in the discount of bills, for which latter he is astonished that "any one should ask for gold." The plan has often been discussed before, and is in substance the same as that which was suggested by Mr Twells, in his examination before the Committee of the House of Commons in 1859. "H. C." is, however, more distinct in one respect than most of his co-theorists. He gives a plate of his inconvertible bank note, which is as follows:—

"CREDIT-NOTE.

"No.—— No.——

"BANK OF ENGLAND.

"The holder of this note is entitled, on demand, to Credit in account at the Bank of England, to the amount of One Hundred Pounds.

"(Date)————1861————(Date)

"For the Governor and Company of

"£100 the Bank of England,

"————"

What this note exactly means, even now that we have it in express terms before us, we cannot very distinctly tell our readers. What is a "credit of a hundred pounds" in a banker's ledger except a promise by the banker to pay a hundred sovereigns to the person credited? It is as much a promise as a convertible bank note, is subject to the same objections, and possesses analogous advantages. All these questions come back to the old question "What is a pound?" on which "H. C." has thrown no new light whatever. If it is not a certain weight of a certain precious metal, he has not told us what it is.

COLLIERIES AND COLLIERS: a Handbook of the Law and Leading Cases relating thereto. By JOHN COKE FOWLER, Barrister-at-Law, and Stipendiary Magistrate for the District of Merthyr Tydfil and Aberdare. Longman.

THIS is a very sensible account of the law relating to collieries, prepared by a magistrate of experience in the coal district of South Wales. It is not written for the most part in legal phraseology, but gives a clear statement of the principal points which a man of business desires to know, in such terms as a man of business can very readily understand. The following account of the risks incurred by "working out of bounds," no uncommon circumstance in working underground in the dark, may serve as a specimen:—

The working of coal beyond the limits to which the proprietor of the mine is entitled, is sometines a source of great mischief. It is not only the loss of the coal itself which may be involved, but the barrier left by the neighbouring miners may be broken through, and thus bring about calamitous results to life and property. The remedy for this injury is an action of trespass. In an action of trespass for taking away coal under such circumstances, the plaintiff is entitled to recover the value of the coal at the time of its severance from the soil, and the trespasser cannot claim any deduction therefrom in respect of the expense incurred by him in getting the coals, unless there is a real disputed title. This value is the selling price at the pit's mouth, after deducting the expense of carrying the coals from the place in the mine where they were got to the pit's mouth. The plaintiff is also entitled to compensation for all injury done to his soil by digging, if the approach be made from the surface by new excavations. The estimate of the loss from the removal of the coal depends upon the value of the coal at the time of its severance from the soil; and the defendant has no right to any deduction in respect of royalty payable by the plaintiff to the mine-owner on coals got from the mine.

THE FAMINE IN THE NORTH-WEST PROVINCES OF INDIA: How We might have Prevented it. By JOHN DICKINSON, F.R.A.S., F.R.G.S., Hon. Secretary to the India Reform Society. London: P. S. King, 34 Parliament street, S.W. 1861.

THIS pamphlet is on a subject of very great interest and very great difficulty. The writer thinks that the English Government might have prevented the famine in the North-West Provinces of India,—not of course that it could have ensured rain to the territory under their rule, but that the effect—the unintended effect, but still the effect—of its measures has been the impoverishment of the people, and their consequent inability to endure a famine. He considers that the proximate causes which have produced this result are the land settlement of the North-West Provinces, which the last race of the "old" authorities consider to be

a *chef-d'œuvre*, and the cessation of public works, more especially of those connected with irrigation, which has been caused by the mutiny and the deficit. And the root of all evils he considers to be the inveterate habit of "thinking for the natives," which English officials avow, and in which they glory: he would rather say *learn from* the natives; they know their own habits, the wants of their own country, their own desires; they have probably some means of meeting these which will permanently be as good as or better than those which Englishmen can invent for them. We quote the concluding part of his pamphlet:—

I shall pause here for the present, having recently published my opinion of the judicial administration; but it may be useful to recapitulate the steps which, in my opinion, ought to be taken at once, viz.:—

1st. To renounce our exclusive claim to "think for the natives," and admit them to a leading share in the civil administration of their own country, for which they are so well qualified that we cannot conduct it successfully without them.

2nd. To reduce the land-tax in the North-West Provinces, and establish the people's proprietary right to the land.

3rd. To adopt a definite policy for public works, on the basis proposed by Colonel Strachey.

4th. To urge the Indian Minister to introduce, and help him to carry, the three measures he has promised: for the reform of the judicial system; for opening the covenanted Civil Service to the natives; and for establishing local Legislative Councils in the different Presidencies.

But I must address a few serious words to the reader in conclusion. I have now devoted my life for nearly twelve years to organising, with a few earnest friends, an agitation against every successive Government of this country, to obtain reforms in the Indian administration. I gladly admit that we have got something done. In many details of the administration, and in the state of public opinion, there is, I grant, a decided progress and improvement, since the year 1850. But to prove that nothing has yet been done at all commensurate to the requirements of the people, I have only to point to one great fact, the famine in the North-West Provinces. Now, why have our efforts thus comparatively failed? I will answer the inquiry by another; Why was the question of Parliamentary Reform postponed this Session, although the Cabinet were pledged to take it up, and the leaders of both the great parties in the State had admitted the justice, and even the necessity of settling it? The reason given, and generally accepted by the people, was, that it is simply impossible to force measures through Parliament, which the country and the House of Commons do not ask for. So it is with India Reform; unfortunately, they do not ask for it. But what are the results of their indifference? Once more, they are Wars, Pestilence, Pauperisation, the Practice of Torture, Financial Deficits, Rebellion, Famine, and I fear that the worst calamities are yet to come; we are trifling with dangers that may be fatal to the Empire. The fears I expressed in 1852 were verified to the letter in 1857. But I can do no more; I have done my duty to India; Reader, God grant that you may do yours!

GENERAL LITERATURE.

MY OWN LIFE AND TIMES: 1741—1814. By THOMAS SOMERVILLE, D.D., Minister of Jedburgh, and one of His Majesty's Chaplains in Ordinary. Edinburgh: Edmonston and Douglas.

THE favourable reception which Dr Alexander Carlyle's Autobiography has met with from the public has probably led to the publication of the present biographical reminiscences of a brother minister of the Church of Scotland. In point of interest, neither the subject-matter nor the descriptive powers of the writer will bear comparison with Dr Carlyle's unique performance; but the work before us has nevertheless considerable claims to attention, and if inferior in animation and humour, is almost always agreeable reading, and marked throughout by clear and shrewd good sense. The autobiography was written in the years 1813 and 1814—the author surviving to the year 1830, and the publication of the work being deferred for so long a time in compliance with his express wish. The Editor has performed his part with admirable judgment and taste,—his notes are not unnecessarily numerous or long, and are always useful and to the point,—and the book *is* "got up" in a manner extremely creditable to the publishers.

Dr Somerville is best known to fame as the author of two historical works on the reigns of William III. and Anne, which enjoyed some reputation in their day, and are still spoken of with respect as careful, laborious, and impartial productions by those whose studies have led them to an examination of that period of history. He was by birth a member, and ultimately the sole representative of one branch of the ancient and noble family of Somerville, and more distantly related to Lady Elliot, wife of Sir Gilbert Elliot, the father of the first Lord Minto. It was at Minto that Dr Somerville obtained his first ministerial settlement, and the Elliot family seem to have been throughout warm and attached friends to him. His grandfather was one of the Episcopalian non-jurors of the Revolution of '89,—his father, who was a Presbyterian minister of the Church of Scotland, was for a long time an inmate in the family of Lord Somerville, of whose affairs he had the principal direction. Our author had the misfortune to lose his mother when he was a young child, and was brought up chiefly under the care of his relative, Mr Dickson, minister of Dunse. He thus lost almost entirely any intercourse with his father; but, as he was an only son, he philosophically argues that in all probability this removal from the sphere of parental partiality was a fortunate event for his future character. From the school at Dunse, then under the tuition of a freethinking schoolmaster, Mr Cruikshank,—Dr Somerville proceeded in 1756 to the University of Edinburgh, of the condition of which at that time and of its principal professors he gives some account. During his first session at college he lost his father. He had been minister of Hawick, and our author dwells with filial reverence on his generous and delicate sympathy with the unfortunate, and his hospitality. On the latter point he gives us some curious illustrations of the social economy of those days:—

I have spoken of my father's hospitality. It may be amusing to the reader to be more particularly informed with respect to the mode of entertaining, common in families like this at the period to which I now allude. Company was rarely invited to dinner. I remember only two or three occasions on which dinner parties took place in my father's house. Several of the neighbours were invited to an entertainment of this kind after killing the *mart*, which was salted for winter provision, as no fresh meat was found at that season in the market. It was called the *spare-rib* dinner, because the principal dish on the table consisted of a roast of a portion of the *mart*, which went by that name. Another formal dinner also took place in every family on one of the holidays about the beginning or end of the year. Uninvited visits often occurred, and were always received with pleasure. In my father's house, the entertainments, given on such occasions were not expensive or ostentatious, but good and substantial. The usual beverage was strong ale, with a small glass of brandy; and at more formal dinners—often indeed—claret punch. Both rum and whisky were beginning to be introduced; but I remember my father protested against this practice as an innovation; and when any of his visitors preferred punch, he had to send to the grocer's for a single bottle of rum.

The south of Scotland (Dumfries, Peebles, and Roxburghshire), was at this time supplied with ample store of claret and brandy from the Isle of Man. The claret, I have heard, cost not above 1s 6d or 1s 8d per bottle; the brandy, 1*l* per anchor, or 6d per bottle. The strong ale, excellent in quality, was brewed at home, and cost about 2d per bottle; the malt tax being moderate, and no excise upon home brewing.

One of this Mr Somerville's intimate friends was the poet Allan Ramsay, and our author, on his authority, indignantly protests against the insinuation that the "Gentle Shepherd" was not actually composed by Allan. On the death of his father, Dr Somerville moved his sisters to Edinburgh, and established them there with himself in a house near the Netherbow Port, which had been placed rent-free at their disposal by a cousin. This, under their straitened circumstances, was a great boon. He now began to prepare himself for the ministry, and entered finally as a student in the Divinity Hall. He also accepted the post of tutor to a son of Mr Burges, who had married a daughter of Lord Somerville, at whose house Dr Somerville was a frequent visitor. He became about the same time a member of the "*Belles Lettres*" and "Theological" Societies, which introduced him to the acquaintance of several men of future public eminence, such as the first Lord Melville, and some of the leading men in ecclesiastical circles. His remarks on the social tavern meetings which followed the latter gatherings contrast curiously with the satisfied manner in which such convivalities are noticed by Dr Carlyle. Dr Somerville confesses how agreeable they were, and had evidently entered into them with some zest at the time; but he shakes his head with grave sadness at the retrospect, and praises the sobriety of a later period. There is much the same tone of deprecation of the heat of controversial feuds in his account of the Ecclesiastical divisions in the Church of Scotland at this time. Here again the contrast is curious between our author's account and that of Dr Carlyle, and the comparison is much to the advantage of the former. It is clearly from his pages and not from that of the sarcastic and prejudiced advocate of the "patronage" party that we shall gather the best account of the real character of the contest and of the leaders on both sides. Some of these to whom injustice is done by Dr Carlyle are estimated with a much more discriminating candour. Although not one of the "high-flying" party, as Dr Carlyle calls them, Dr Somerville could see what was good in their case, and what was weak in that of their opponents. His remarks on schism are curious. He seems to have regarded the existence of dissent as a most wholesome element for the Church—a sentiment which at once identifies him with a set of thinkers who are little in favour at the present day. He was himself a firm adherent of the Established Church of Scotland, but mixed freely with the dissenting clergy during his visits to England, and conceived a much more favourable idea of them than Dr Carlyle with his episcopal leanings was ever able to do. With such men as Dr Richard Price he was on terms of some intimacy, and speaks of them with great respect—notwithstanding grave theological differences of opinion, and an equally wide divergence on political questions. For Dr Somerville—though he may be ranked as a Whig historian of the past—was a Tory of the reign of George III., a devoted adherent of Pitt, and equally hostile to the policy and person of Fox, from whom he considered himself to have received an intentional slight in the ignoring of his history in the Whig statesman's fragment on James II. On the American war and the expulsion of Wilkes, our author's views were decidedly Tory, although he admits that in the former case historians in future times may come to a different conclusion. On the subject of the removal of the Test Act, however, he sided with the majority of his brethren in the ministry of Scotland, and was thrown on the support of the Whig politicians; and again, he took the decidedly unpopular side in Scotland by resisting the No-Popery clamour, which led to lamentable results in that kingdom as well as in England. It is on the subject of politics that our usually calm and moderate

autobiographer warms up into something like a partisan feeling. The French Revolution is too much for even his moderation. His remarks illustrate well the state of feeling engendered by that event in many minds:—

At the commencement of the French Revolution I had too precipitately expressed my wishes for its success, and hailed it as the dawn of a glorious day of universal liberty and happiness; nor were my sentiments changed by Mr Burke's eloquent publication, which, when I first read it, appeared to me to contain the ranting declamations of aristocratic pride and exuberant genius, rather than to flow from the dictates of sober reflection, and a sound and liberal understanding. The atrocities committed in Paris in August and September 1792 opened my eyes, and converted my joy into bitterness and sorrow; and the persons whom I had admired and praised as the models of patriotic virtue and the benefactors of the human race became the objects of my detestation and abhorrence. To those to whom I am not intimately known, it would appear mere affectation were I to describe the grief, the agonising sensations which preyed on my heart, and how deeply my happiness was invaded by those tragical events which were the first results of the French Revolution. They entirely engrossed my thoughts, haunted my imagination with frightful dreams during the night, and rendered me fretful and unfit for business during the day. I was perhaps blameably offended, because many of my friends did not enter into my sentiments and feelings. I was vexed and irritated to observe with what indifference and coldness the basests actions and the most flagitious crimes were mentioned in promiscuous company and in the ordinary course of conversation. It mortified me to think that the feelings of humanity were so faint and languid, and often altogether wanting, in many of my countrymen. Execrable, above all, in my estimation, were those hypocritical professors of philanthropy, who, upon the chimerical computation of distant and more extensive good, could harbour in their bosoms any inclination to extenuate the guilt, and diminish the horror, of those unparalleled atrocities which, in our times, have stamped an indelible stain upon human nature. Although the war with France had not been justifiable and necessary, as I believe it to have been, on the ground of righteous self-defence, yet the tendency of the principles adopted by the National Assembly upon the very outset of their deliberations; the enormities which daily resulted from them; the approbation of these principles, and the vindication of these enormities, shamelessly avowed by members of the British legislature, and which were spreading and fermenting in the minds of the populace, imposed upon every neighbouring state a moral obligation for lifting up the standard of hostility against the revolutionary armies of France. The safety of all surrounding nations was at stake. The very existence of civil society was in danger.

Under these impressions I felt it to be my duty, and a gratification to the best affections of my heart, to counteract, as far as I was able within my narrow sphere of influence, the diffusive contamination of anarchical principles. I dedicated a great proportion of my time to visiting the families of my parishioners, and exerted myself, by simple arguments adapted to their capacities, and by kind expostulations, to guard them against delusions destructive of their present and future happiness. But the misrepresentations, falsehoods, and libellous attacks on the constitution and Government, circulated among the lower orders of the people with address and industry seldom exemplified in the cause of truth and righteousness, rendered all my exertions unprofitable and fruitless, and lessened my authority and usefulness in the discharge of my ordinary professional duty. There were few even of better rank and education who were not affected in some degree with the plausibility of the accusations brought against our excellent constitution.

The treasonable correspondence, however, carried on by individuals and associated bodies in Britain with the revolutionary demagogues in Paris, the exuberance of calamities and crimes raging there, over tacts of sedition committed by British subjects, and the declaration of war against England by the National Assembly, at length concurred to open the eyes of every person possessed of the smallest spark of humanity and patriotism, and to justify those spirited measures, to which, under the blessing of Providence, we are indebted for deliverance from dangers beyond all comparison the most gigantic and formidable that ever occurred in the annals of Britain. To the memory of Mr Pitt, the veneration and gratitude of every patriotic citizen is due to the latest generations.

Dr Somerville, after one disappointment in love, succeeded in securing as his wife a lady of whom he speaks in terms of unbounded affection, and his life appears to have been in general a happy one. Like Dr Carlyle, he made several visits to the metropolis and other parts of England, and although he does not narrate the incidents of his journeys at equal length, they supply some curious touches of men and manners as they then were. We should have preferred, indeed, that the social aspects of the age should have been treated by our author more in connection with particular incidents, instead of being reserved for a general summary in the latter part of the autobiography. This chapter, however, is quite as curious and much more reliable than Lord Macaulay's hypothetical sketch of the state of England in the reigns of the later Stuarts. Thus, speaking of the state of Scotland in his early life, our author says:—

English blankets were almost unknown; and one of the burdens unrepiningly submitted to by the last generation was the pressure of from five to ten pairs of blankets during the hours devoted to rest. Box-beds, still to be seen in cottages, from which the air was almost entirely excluded during the night by means of sliding doors, were in general use, in spite of all experience of the pernicious effects of this arrangement. Such, however, as the beds were, in entertaining visitors, it was not reckoned any deviation from respect to assign one bed to two guests, even although the two gentlemen, or the two ladies, as the case might be, thus assorted, might be before unacquainted with each other, or of different age and rank.

At the time I refer to, almost every house in town or country was provided with a stone seat (often covered with turf), projecting from the front wall, which went by the name of the *dais*, and which afforded the members of the family, in fine weather, the means of enjoying the fresh air—too seldom admitted into the house—and of receiving passing visits from their acquaintances. The *dais* formed a convenient resort for gossips. Although no window tax then existed, the windows were fewer as well as smaller than they are now. Another common appendage was the *loupin'-on-stane*, a small erection of wood or masonry, for the accommodation of ladies in mounting or dismounting their horses. At that time, almost all ladies were accustomed to travel on horseback, even when going to church or paying visits. They rode on pads behind their husbands or servants.

The shops in the country towns were small and ill-lighted, with naked walls, seldom plastered, and often not even floored or paved. In such towns, many of the houses consisted of no more than one storey, and when of two storeys, had the access to the upper rooms by an outside stair, sometimes unrailed and therefore dangerous. The doors and passages were so low, that to make one's way to the apartments, one had to assume a stooping posture. The windows were latticed like prisons. This was the state of all the older houses. In inland districts, most of the houses were thatched with straw; many cottages, and some churches, with heath. The Tower of Hawick, now the principal inn, was the only slated house there in the year 1757. Near the sea-coast, slates and tiles were more common.

In all the principal towns, and in many of the villages, the market cross was, in my early days, still extant. It was used as a convenient place of rendezvous, as well as for public proclamations and other official purposes. Most of the towns, too, retained their ancient gateways at the chief approaches from the country.

The wages of servants since the period of my becoming a householder in 1770, have advanced at least fourfold. I then paid one of my maid-servants 1*l* 5*s*, another 1*l* 10*s*, for the half-year; and my man-servant 4*l* yearly. The annual wages of a man-servant of the same kind may now be stated at 16*l* or 18*l*, besides board; and the wages of a maid-servant at 7*l* or 8*l* per annum. Mr Scott, who resides at Monklaw in my parish, at an advanced age, has informed me that his father, fifty years ago, hired his female servants for 10*s*, with a pair of shoes, for the half-year; and his ploughmen for 1*l* 5*s*, with the like gift, or *bountith* as it was then called.

Whether owing to their having less hard work during the day, or from habits of industry and frugality, servants were accustomed to dedicate the winter evenings at the kitchen fire to some home manufactures now unknown; for instance, to giving the finishing work to their shoes. At that time none of the ploughmen, and few of the women servants, purchased their shoes in a complete state. The shoes of the men, called *brogues*, were made of leather tanned from horse hides, and, as purchased, had only a single sole (they hence went by the name of *single-soled shoes*). It was the part of the purchasers to double, sometimes to treble the soles with their own hands. Servants and labourers were always provided with the necessary tools for this work. The shoes were extremely clumsy, but did not cost above a fifth or sixth part of the price of those which they now wear.

The volume supplies many other amusing proofs of the changes in manners and the conveniences of life which have taken place since Dr Somerville's time; but for these and the references--generally too brief—to his contemporaries in public and literary life we must refer our readers to the volume itself. We may say, however, that the notice of George Whitfield, during his visits to Scotland, is particularly interesting, and on the whole rather favourable. With Wesley our author had evidently less sympathy, though he does justice to some parts of his character. He himself preserved his faculties unimpaired to the last, and officiated on the Sunday preceding his death. The volume is a valuable contribution to the "contemporary history" of the eighteenth century, and will be an authority as well as a book of reference to our future Macaulays for that period.

LIFE IN THE SEA; or, The Nature and Habits of Marine Animals. Written and Compiled by LASCELLES WRAXALL. Houlston and Wright, 65 Paternoster row.

THIS entertaining volume gives a complete, though necessarily brief account of almost all the denizens and marvels of the sea and shore, from the huge whale down to the microscopic mammaria that flash in "golden fire" over the waves. It is, as its author meant it to be, a thorough "popular handbook of the natural history of the submarine kingdom;" containing enough of scientific information to make it instructive while it amuses. The descriptions are assisted with numerous cuts of the creatures less commonly known, or more peculiar in form, among the strange inhabitants of the deep waters.

SKETCHES OF FOREIGN NOVELISTS. By GEORGIANA GORDON. James Hogg and Sons.

IN noticing a book of this sort, it is not necessary to say more than that the selection of Foreign Novelists to be represented is judiciously made, though in the nature of things very limited; and that the abridgments and translations are done with care and spirit. "The endeavour," to use the author's own words, "has been to write neither a criticism nor a translation, but to seize the characteristic features of each story, and to set up a sign-post, as it were, indicating the way to those who wish to go further." No unnecessary office this in the wilds of French novel literature, and it is to French and German novels that this entertaining volume restricts itself.

THE ORIGIN, NATURE, AND HISTORY OF WINE. Its Use as a Beverage Lawful and Needful to Civilised Man. A Lecture by CHARLES ELLIS. F. S. Ellis, 33 King street, Covent garden.

THIS lecture is sensible in its views, and moderate in tone. It asserts the purely natural origin and the wholesomeness of good wine, and defends its temperate use against the wholesale attacks of the teetotallers. We think that Mr Ellis has the best of the argument as a question of right or wrong. The other question of expediency he leaves to individual judgments, only maintaining the freedom of each man's conscience in this matter, and the superiority of temperance over total abstinence.

THE ART-JOURNAL. April, 1861.

THE ART-JOURNAL. May, 1861. Arthur Hall, Virtue, and Co.

THE two last numbers of the "Art-Journal" contain some engravings of much interest and beauty. We would specially draw attention in the April number to Wilkie's picture of "The Wounded Guerilla," Turner's "Death of Nelson," and a charming statue by Mrs Thornycroft, full of airy grace, called "The Skipping Rope." The May number gives a very graceful picture of Mr Sant's, executed last year, of the Princesses Helena and Louisa,—Turner's grand composition of the "Snow Storm,"—and "Temperance," a very simple and pleasing statue by Mills Brothers. The "Examination into the Antiquity of the Likeness of our Blessed Lord" is continued in both numbers, and increases in interest as it proceeds. The papers most worthy of notice after these are in the April number a chapter on "Rome, and her Works of Art," and in the May number one on the life and works of T. S. Cooper, A.R.A.

THE EARL OF DERBY. Photographed from the Life, by J. E. MAYALL.

THIS portrait of Lord Derby may be classed among the most successful productions of photographic art. As a portrait it is excellent; the expression is that of eager attention,—one of those passing but characteristic attitudes of the features which photography is so well calculated to give, and which often recall a countenance more vividly than a highly artistic portrait, which aims at rendering the more permanent character of the physiognomy. As a photograph it is peculiarly successful in the management of the light and shade, being quite free from the exaggerated shadows and harsh lights that so frequently deface the productions of this art.

THE DRAWING-ROOM PORTRAIT GALLERY OF EMINENT PERSONAGES. Principally *from* Photographs in Her Majesty's Private Collection, and *from* the Studios of the most Celebrated Photographers in the Kingdom. Engraved on Steel by D. J. POUND. With Memoirs by the most able Authors. The London Joint Stock Newspaper Company (Limited).

THE present is the second series of this publication, which deserves to become a very popular one. The selection of eminent persons is a very judicious one, including statesmen, divines, artists, and miscellaneous celebrities, such as Paul Morphy, the great chess player, and Sir Jamsetjee Jeejeeboy. The portraits are for the most part very good, and the engravings of first-rate quality. The Prince of Wales as a Colonel in the Army forms the frontispiece to the present volume.

Furne et Cie., Paris.——Suggestions on Popular Education. Murray.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS)

PARIS, Thursday.

According to the Customs returns, which have been brought out to-day, the import duties in April last were 9,629,000f, whilst in the same month of last year they were 8,956,000f, and in that of the year before 16,582,000f. This is the first time that the import duties have presented an increase since the great commercial reforms made by Imperial decrees and the English treaties were carried into effect. For the first four months of the present year the total import duties were 35,560,000f, and in the corresponding period of last year 47,302,000f, of the year before 58,571,000f. A very marked increase has taken place in *the quantities* of the principal sorts of merchandise imported for consumption.

	Four months of 1861.	Four months of 1860.	Four months of 1859.
Sugar .....quintals	612442	368818	444102
Coffee	129199	60081	102940
Hemp	114147	79750	85353
Cotton	703415	200746	320636
Wool	109345	34915	78701
Pig iron	226416	116063	118092

The exports for April are on the whole not unfavourable.

A Committee of the Legislative Body proposes various modifications in the Government Bill for the abolition of the sliding scale on grain, and the substitution of moderate fixed duties for it. These modifications are, in substance, a uniform duty for all grain, no matter from what country it may be brought; a reduction in the duty on imports of grain by foreign vessels, but an increase of 25c the 100 kilogs (from 75c to 1f) on foreign flour; and a lower duty for rice in straw than for rice in grain.

The Bank of France opened a subscription the day before yesterday for the railway bonds it has undertaken to issue for the Companies, and is to continue it to the 28th. The number and terms of the issue are as follow:—Ardennes, 86,000 at 291f 25c; Eastern, 80,000 at 292f 50c; Lyons and Mediterranean, 268,000 at 293f 75c; Southern, 72,000 at 292f 50f; Orleans, 140,000 at 293f 75c; Western, 137,000 at 292f 50c. These different sums are to be paid in three instalments, one of the odd figures from the 1st to the 28th June, the other two of 100f each from the 1st to the 10th October, and from the 1st to the 10th December. The bonds are to be paid off at 500f by annual drawings, and are to bear 15f interest. That they will be readily subscribed there is no doubt, but the providing of the large sum they will necessitate may, it is feared, present serious inconvenience.

The Government is evidently determined to keep the promises it has made to French fishermen as a set-off to what they call the "sacrifices" they have to bear by being exposed to English competition: it has just decreed that such of them as are engaged in the herring and mackerel fishery may take free of duty an unlimited quantity of the "national salt" they may require to salt on board, also that they may employ foreign salt for the same purpose, provided it be taken from the bonding warehouses in France, and shall have paid a duty of 50c the 100 kilogs.

The agricultural journals draw attention to a new system of preserving wheat, which may not be without interest in England. It consists of pits dug in the earth lined with masonry or brickwork, which is afterwards coated with thin sheet iron. The War Department by way of experiment had 576 quintals (the quintal is 2 cwts) of wheat buried for the space of 25½ months in such pits, and the result was that the grain was preserved in excellent condition, and that it only lost in weight 7 kilogrammes, about 15 lbs. It is said that the War Department is so satisfied with this result, that it contemplates applying the system on a grand scale.

The shareholders of the Isthmus of Suez Canal held their annual meeting a few days back. From the report presented by the Directors, it appeared that the sum disbursed in the year from the 30th April, 1860, to 30th April, 1861, was 13,336,643f, of which 10,830,671f were for works, the rest for interest on shares, expenses of management, &c. What has been done under the head of works was represented to be this:—The completion of the preparatory operations indispensable for assuring the occupation of the lands conceded and the organisation of works; the digging of a canal about 17 miles long for carrying the water of the Nile to the centre of the Isthmus; the construction of store-houses, sheds, and houses covering a superficies of 6,000 square metres; the purchasing of a large *materiel* for earthworks, &c.; the opening of the quarries of Mex, near Alexandria, for the extraction of materials destined for the construction of Port Said; the purchase of wood, iron, coal, lime, cement, provisions, &c., required in the works; the conveyance to the central point of the Isthmus of 13,800 wheelbarrows, of machinery for sawing, and of more than 20,000 planks; the preparations for the works from Lake Timsah to the Mediterranean, a length of 47 miles; and finally, the assembling of 8,000 workmen and the concentration of all that is necessary for executing the earthworks at the rate of 25,000 cubic metres per day. The balance in hand on the 30th of April last was 26,106,424f, of which 16,010,445f are stated to be invested in bonds of the Egyptian Treasury. The report at considerable length answers attacks made on the projected canal in the British Parliament and in certain English newspapers, and affirms that it will certainly be executed. The Directors summon such of the shareholders as have not paid up the first call of 200f per share to do so forthwith.

The following are the quotations of the Bourse:—

Annexed is an account of the markets:—

FLOUR.—The quotation at *Paris*, yesterday, was 74f to 75f the sack of 159 kilogs for good qualities, and 70f and 71f to 73f for other sorts. The four marks which were not much offered, were 72f 75c to 73f for the present month, and 73f to 73f 25c for June.

WHEAT.—At *Paris*, yesterday, transactions were not important, and prices were from 38f for ordinary to 41f 50c for choice the sack of 120 kilogs. In the provinces, 59 markets present a rise of from 10c to 1f 50c the hectolitre, 30 a fall of from 4c to 1f 25c; 37 are reported firm, 43 without variation, 7 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were much less considerable than in the week preceding; they were only 9,417 bales, and the closing prices were 1f to 2f lower for very low, and 1f lower for low qualities, other sorts being unchanged. Low New Orleans was consequently 103f the 50 kilogs, and very ordinary ditto 110f. The arrivals were 19,907 bales. On the first two days of the present week, business was not active, and prices had a downward tendency. Yesterday, the quotation of low New Orleans was 102f 50c to 103f.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular. 475 sacks Hayti Port-au-Prince and Jacmel, 78f 50c to 79f the 50 kilogs in bond; 1,298 ditto Cape, 80f to 81f 50c; 2,150 sacks Rio, not washed, 65f 50c to 72f; 100 *ditto* washed, for delivery, 65f; 28 sacks Santos, disposable, 73f; 140 sacks La Guayra, 88f; a small lot of Guadaloupe, "habitant," 136f duty paid. Various lots of damaged Hayti, Porto Rico, Rio, and Santos were also sold by auction. The arrivals exceeded 3,000 sacks. This week, Ceylon plantation has been sold at 120f duty paid; Java, 112f 50c; Santos (damaged), 60f to 79f in bond. At *Bordeaux*, last week, business was not active. 365 sacks Guayra *grage*, 90f to 91f in bond; a lot of Santiago, 96f to 98f; 440 sacks Mysore, 109f duty paid. Some lots of damaged Mocha were also disposed of. This week, nothing important is recorded. At *Nantes*, this week, there have, thus far, been no transactions of importance. At *Marseilles*, last week, 4,000 sacks Maracaibo went at 81f, with discount; 3,200 Rio, 62f to 72f; some lots of Mocha of Alexandria, 110f to 120f.

SUGAR.—At *Havre*, in the week ending Friday, business was not very active: a small lot of French West India went at 49f the 50 kilogs duty paid, and one of ditto "usine" at 63f; 32 casks new Havana, 36f 50c in bond; 34 ditto, old, 34f 50c; 1,140 ditto new for delivery, 34f 25c to 34f.50c. The arrivals were about 1,000 casks and 3,400 sacks, the latter Pernambuco. This week, Havana has been at 34f 50c to 34f 75c. At *Bordeaux*, last week, business was not important, and quotations were: French West India, 49f 50c to 51f; Reunion, 52f 50c to 53f. This week, no sales have been made. At *Marseilles*, last week, 4,400 sacks Reunion went at 53f; 800 casks Havana, 38f, and 4,000 sacks Pernambuco, 35f. This week, some damaged Mauritius has been sold.

INDIGO.—The sales at *Havre*, in the week ending Friday, consisted of 5 cases Bengal at prices kept secret, 19 ditto at 60c above the estimates, and 11 cases Manilla at prices not stated. The arrivals were 873 cases. This week, various lots of Bengal have been sold at 20c to 1f 10c premium, and some lots of ditto and of Manilla at prices kept secret. At *Bordeaux*, last week, 115 cases Kurpah, 129 Bengal, 44 Madras, and some small lots of Mexico and Java were disposed of; prices firm. This week, there have been some small sales.

HIDES.—At *Havre*, in the week ending Friday, business was not active: 503 Buenos Ayres dry at 115f the 50 kilogs; 500 ditto salted cow at 65f 50c; 500 Monte Video salted, 74f; 2,888 horse, salted La Plata, 88f the 100 kilogs; 230 ditto Ireland, 60f ditto; 1,500 Rangoon cow, salted, of indifferent quality, 50f the 50 kilogs. The arrivals were large, exceeding 20,000. This week, Buenos Ayres cow has been at 123f 50c; Monte Video salted, 73f; Texas, 74f 50c; Valparaiso dry, 95f.

WOOL.—Business at *Havre*, in the week ending Friday, was regular: 70 to 80 bales La Plata unwashed at 1f 5c to 3f 5c the kilog; and 28 Chili unwashed, 2f 50c. The arrivals exceeded 2,500 bales. This week, Buenos Ayres unwashed has been at 225f the 100 kilogs.

TALLOW.—At *Havre*, in the week ending Friday, about 60 casks Buenos Ayres was sold at 67f 50c the 50 kilogs. The arrivals were 22 casks. This week, Buenos Ayres has been at 67f 50c. At *Paris*, yesterday, the 100 kilogrammes were 136f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 101f to 102f the hectolitre; Montpellier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 125f; and beetroot, first quality, 106f.

AMSTERDAM, May 21.

It may interest some of your readers to learn that the great commercial association called the Vereeniging Voor Volksolijt and the Dutch Fishery Commission intend to have in this city, in September next, a grand international exhibition of nets and implements of all kinds employed in all sorts of fishery, from that of whales to that in rivers, of the instruments and materials used in salting and packing fish, of the apparatus employed in the artificial production of fish, &c.

Correspondence.

THE STATE OF COMMERCE IN CEYLON.

TO THE EDITOR OF THE ECONOMIST.

SIR,—My present communication being addressed chiefly to the moneyed classes of your metropolis, permit me to make use of your columns for that purpose; and here let me remark that your interesting and instructive pages are highly appreciated in this island, as I have no doubt they also are wherever British commerce reaches.

Our complaint is of our poverty. Although an important British colony, with an annual import and export trade of six millions sterling, and a population of nearly two millions (of whom about 6,000 are Europeans, not including the military), we have no money market, neither wealthy capitalists nor banks confining their business strictly to local investments. The Government establishments, consisting of the Loan Board and Savings Bank, have but very limited means, and dealing, as they do, in trust money, their business is entirely confined to loans and advances on very stringent terms, upon the mortgage of household property situated within the limits of the principal towns.

True, we have the agencies of two very influential Indian banks, but these institutions are strictly and avowedly banks of *exchange*; and although they generally use a portion of their means in discounting the promissory notes of their best customers, yet it is evident they do not consider themselves bound to do so at all times, for they frequently stop discounting when exchange is more profitable, thereby paralysing the import trade of Colombo, and creating an unpleasant dead lock, as at the present moment. In making these observations, no reflection is intended to be cast upon these institutions, which are extremely useful to the public, and have done good service in times of need; but all the writer wishes is to state the truth (which ought to offend no one), without detracting from the merits of either, or interfering with the "vested interests" of any body.

It must be observed that all our imported goods (with the exception of grain) are sold on credit, varying from four to six months, the buyer giving that most convenient of all negotiable securities, namely, an inland bill of exchange, and frequently reselling the goods to third parties upon similar terms. This is the utmost extent to which a single transaction can be multiplied amongst us, and you must allow that the system is a very simple and safe one. We have very few accommodation bills, but these can be easily avoided, and, on the whole, I have no hesitation in stating that our trade, both foreign and inland, is conducted on very sound principles; and, with life and property as secure as in England, our only regret is that we have not sufficient means to foster our daily increasing commerce.

It may excite a smile of contempt in England, whose metropolis alone possesses a floating capital of one hundred millions sterling, when I state that the whole of our spare wealth does not most probably exceed half a million! Yet such is the fact so far as I have been able to ascertain from the most careful inquiries; and this will not be wondered at when I add that we have no permanent residents here of any opulence. On the contrary, the European settlers consider themselves as so many birds of passage, without a single tie to bind them to their temporary home; and whose utmost care is to remain just long enough to acquire a competency wherewith to return to the lands of their birth. Most of the mercantile firms in existence here are agencies of English and Scotch houses, doing a commission business, whose partners carry away their capital and profits with them when they leave. Even these valuable plantations of coffee, which form the nucleus of our trade, and to which everything else is merely accessory, are owned principally by absentee European proprietors, and cultivated by means of capital which has to be imported every year at a considerable expense. Unfortunately, Ceylon is like a sieve, which retains none of the golden streams that run through it.

The natives of the island are in the aggregate the poorest nation on the face of the earth, and I really do not believe that they have increased in wealth during the past half-century, except to a most imperceptible degree. Their contact with European life and manners has accustomed them to European wants and luxuries, and it is as much as they can do to "make both ends meet." From the highest to the lowest, all must pay in cash for the imported rice, which is their staff of life; and to close the category, even our labour is imported, and drains us of our rupees. No wonder, then, that Ceylon should continue to be "poor but industrious," as she has been aptly described, and it is in the hope of being of some service to her that I now address you.

The resources of the two banks for exchange purposes are, I believe, quite ample, as they have never been questioned; but what we urgently require is a bank with a moderate capital, making its exclusive business the cashing of approved trade bills, on fixed discount credits, as is usual with banks in London and elsewhere. At present, no merchant having remittances to make can be sure of being able to convert his local bills into cash for the purpose of investing it in foreign exchange; and the trader or shopkeeper, with engagements to meet, finds himself in the same unpleasant situation.

The Bank rate of discount for bills under four months is now, and has been since the beginning of last year, 12 per cent. per annum; 18 per cent. is thought a moderate figure outside, and it is not uncommon for the chetties of the bazaar to charge as much as 24 per cent!

Loans granted by private parties on the security of landed property are usually done at 12 per cent. per annum; anything below this rate being the exception and not the rule. Nay, we have known instances in which a bonus has been extracted in addition to this onerous rate; so that it is evident the introduction of more capital into the island for these purposes will be hailed by the public with great satisfaction.

There is, in short, a fine field here for a capitalist or an association wishing to invest money safely and profitably. I have not exaggerated in the least, and shall briefly conclude with the fervent ejaculation, "Come over and help us."—Yours, faithfully,

Colombo, Ceylon, April 17, 1861. A MERCHANT.

BANK OF ENGLAND DISCOUNTS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—It cannot be doubted that the value of money influences the great transactions of the world, therefore the rise and fall in that value, as indicated by the rate of discount, must be interesting not only to the financier, the merchant and the manufacturer, but indirectly to all classes of the community, by causing an increase or decrease in the price of all commodities. For the information of your readers I beg to annex the copy of a return which I have prepared and inserted in the 5th edition of my "Popular Tables," only adding thereto the facts published in the *London Gazette* of last night.—I remain, Sir, &c.,

CHARLES M. WILLICH,
Actuary, University Life Assurance Society.

25 Suffolk Street, Pall Mall, S.W., May 18, 1861.

The following Table shows the alterations in Bank Discounts from 1858 to 1861, with the Amount of Bank Notes issued, and of Bullion held, at the respective periods: also the Average price of Wheat in each year, and the price of 3 per Cent. Stock on the days of Change.

Price of 3 per Cent. Red.	Price of 3 per Cent. Cons.	Date.		Minimum Rate per Cent.	Bullion.	Bank Notes Issued. Held by the Public.	In reserve by Bank of England.	Total.	Average price of Wheat.

COMMERCIAL AND MISCELLANEOUS NEWS.

A report from Calcutta to the 18th of April, says:—"The produce market still continues in the same depressed state as reported for some weeks previously. In the import market a slight improvement is noticeable, which is expected to increase as the rivers open up communication with the interior the country. All denominations of Government of stocks have gone lower, having touched 4a discount for the 5½ per Cents. There has since been a slight rally, but sales for a lac or so could not be effected, except at a reduction. The market closes weak. There is no change of importance to note in the money market. There is less money seeking employment, but the miserable state of trade checks demand, and former rates are accepted.

The following commercial intelligence is dated Bombay, April 27:—The close of our season for imports is now rapidly approaching, and with gloomy prospects for many articles, supplies of which have proved excessive. The transactions during the above period aggregate a comparatively small amount, and generally show a further decline on previous prices. Importers have, on the whole, displayed less inclination to force sales, while, owing to the irregularity of bazaar clearances, dealers are indisposed to buy to any extent, unless at a great concession. For cotton enhanced rates have been demanded and paid, owing to the improved accounts received from England. The staple, however, does not maintain a firm position, while there are sellers but no buyers at our present quotations. Linseed commands higher prices than quoted in our last, and as parcels come to hand they are speedily taken up at our quotations. The money market continues easy, and the Bank's rates have been reduced 2 per cent., making 9 per cent. for loans on Government paper, and 11 per cent. on other securities.

Statement of deposits and coinage at the United States Mint in Philadelphia, for the month of April, 1861:—

The total quantity of coal and coke exported from the various coal ports of the United Kingdom during the month of April was of coal 746,116 tons, and of coke 29,227 tons. Of this quantity, which shows a very large increase when compared with the returns for the preceding month, Newcastle-upon-Tyne exported 226,829 tons of coal, and 14,704 tons of coke; Shields, 7,416 tons of coal, and 275 tons of coke; Ayr, 340 tons of coal; Blyth, 11,038 tons of coal; Amble, 5,412 tons of coal; Sunderland, 118,737 tons of coal, and 3,499 tons of coke; Seaham, 4,432 tons of coal; Stockton, 395 tons of coal; Hartlepool and West Hartlepool, 56,656 tons of coal, and 5,650 tons of coke; Hull, 13,916 tons of coal; Goole, 19 tons of coal; Middlesborough, 13,201 tons of coal, and 3,913 tons of coke; Maryport, 3,590 tons of coal; Liverpool, 57,770 tons of coal; Whitehaven, 1,087 tons of coal; Cardiff, 97,777 tons of coal, and 467 tons of coke; Newport, 16,633 tons of coal; Llanelly, 14,513 tons of coal; Swansea, 40,545 tons of coal, and 415 tons of coke; Greenock, 9,386 tons of coal; Alloa, 5,775 tons of coal; Glasgow, 7,791 tons of coal, and 102 tons of coke; Port Glasgow, 2,519 tons of coal; Charlestown, 6,385 tons of coal; Grangemouth, 8,962 tons of coal, and 132 tons of coke; Inverkeithing, 2,660 tons of coal; Borrowstoness, 2,739 tons of coal, and 70 tons of coke; and St David's, 9,583 tons of coal. The quantity of coal, coke, and culm shipped during the month to different ports in the United Kingdom was, of coal 703,589 tons; of coke, 2,821 tons; and of culm, 10,833 tons. Of this quantity, which is not quite equal to the shipments made in the month of March, Newcastle shipped 143,436 tons of coal, and 1,294 tons of culm; Shields, 82 tons of coal; Blyth, 8,604 tons of coal; Amble, 402 tons of coal; Sunderland, 130,137 tons of coal; Seaham, 54,639 tons of coal; Hartlepool and West Hartlepool, 92,043 tons of coal, and 314 tons of coke; Stockton, 50 tons of coal; Middlesborough, 10,804 tons of coal, and 356 tons of coke; Goole, 7,187 tons of coal; Ayr, 8,054 tons of coal; Swansea, 22,085 tons of coal, and 7,076 tons of culm; Alloa, 804 tons of coal; Borrowstoness, 4,348 tons of coal; Cardiff, 88,048 tons of coal, and 722 tons of coke; Inverkeithing, 771 tons of coal; Whitehaven, 12,652 tons of coal; Llanelly, 35,236 tons of coal, and 3,757 tons of culm: Charlestown, 5,100 tons of coal; Newport, 53,369 tons of coal, and 132 tons of coke; Maryport, 25,605 tons of coal, and 3 tons of coke; and St David's, 133 tons of coal. During the month 4,385 vessels were engaged in the home, and 2,979 in the foreign coal trade.

An account of the amount of bank notes authorised by law to be issued by the several banks of issue in Ireland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 4th day of May, 1861:—

Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,180,938
Rest	3,271,980	Other Securities	19,722.847
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6 906,189	Notes	5,820,380
Other Deposits	11,201,313	Gold and Silver Coin	835,161
Seven Day and other Bills	626,844		
	36,559,326		36,559,326

Dated the 23rd May, 1861. W. MILLER, Deputy Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank-post bills)	29,441,404	Securities	29,825,785
Public Deposits	6,906,189	Coin and Bullion	11,995,101
Private Deposits	11,201,313		
	38,548,906		41,820,886

The balance of Assets above Liabilities being 3,271,980*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£262,405
An INCREASE of Public Deposits of	181,602
A DECREASE of Other Deposits of	390,226
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	73,910
A DECREASE of Bullion of	387,345
An INCREASE of Rest of	10,374
A DECREASE of Reserve of	159,115

The above return shows the effect of the renewed drain of bullion to America, although the diminution in the latter is less than might have been anticipated. The falling off in the reserve is not excessive, while the decrease in the other securities arises from less pressure in the money market.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,119,891	£ 21,005 281	£ 21.988,081	£ 21,917,405	£ 20,441,404
Public deposits	6,582,509	4,931.120	5,684,168	7,666 533	6,906,189
Other deposits	8,743,887	13 987,923	17,017,706	12,569,848	11,201,313
Government securities	13,593,235	10,526,563	11,281,376	9,728,943	10,180,938
Other securities	11,931 795	14,579,458	19,298,574	19,936,674	19,722,847
Reserve of notes & coin	8,541,454	12,396,032	10,660,794	9,395,905	6,655,541
Coin and bullion	13,568,049	18,112,402	17,407,969	15,844,195	11,995,101
Bank rate of discount	2 p. c.	3 p. c.	4½ p. c.	4 p. c.	6 p. c.
Price of Consols	98	97⅞	92½	95	91⅞
Average price of wheat	38s 8d	44s 6d	54s 4d	52s 2d	54s 4d
Exchange on Paris (shrt)	25 5	25 2½ 10	25 7½ 12½	25 10 17½	25 32½ 40
— Amsterdam ditto	11 16½ 16¾	11 15	11 12 13	11 14½ 14¾	11 18 19
— Hamburg (3months)	13 8¼ 8¾	13 6¼ 7	13 3¼ 3¾	13 5¼ 5½	13 9 9¼

In the corresponding week of 1851, news had arrived that the Southern Rights Convention, sitting at Charleston, had passed a resolution to the effect that "the State of South Carolina cannot submit to the wrongs and aggressions perpetrated by the Federal Government and the Northern States without dishonour and ruin, and that it is necessary to relieve herself therefrom with or without the co-operation of other Southern States." Another resolution expressly asserts the right of secession to be essential to the freedom and sovereignty of the States of the confederacy. It does not appear however, that any action came of these proceedings. The Liverpool cotton market had, notwithstanding, been depressed owing to over-speculation. In London, the Great Exhibition was achieving a daily increasing triumph.

In 1858, the supply of money was exceedingly large, and the rate of discount in the open market did not exceed 2¼ per cent. The Brazilian Four-and-a-half per Cent. loan of 1,526,000*l* at 96½ had been announced, and commanded 1 per cent. premium. Since then, however, a decline has taken place to 88½.

In 1859, although the Bank of England minimum was kept up at 4½ per cent., the rate for the best bills in the open market had fallen to 3 to 3¼. The question whether coal should be considered contraband of war engaged discussion. Since the outbreak of the war in Italy, numerous financial and commercial disasters had occurred in Germany and other parts of the Continent.

In 1860, uneasiness respecting the future course of Continental politics still prevailed, but not to an equal extent as for some weeks previously. The Bank of England had just reduced their rate from 4½ to 4 per cent. The Committee of the Stock Exchange had suspended several brokers for transacting speculative business for Pullinger, the fraudulent cashier of the Union Bank of London.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,237,908*l*; in 1858, a deficiency of 591,535*l*; in 1859, a deficiency of 2,280,868*l*; and in 1860, a deficiency of 7,366,826*l*. In 1861, the deficiency is 8,521,534*l*.

DISCOUNT AND MONEY MARKET.—Notwithstanding that the drain of specie to America continues unchecked, the money market, this week, has shown increased ease. It appears that the heavy demand previously experienced arose more from alarm than from any real requirements, and hence, now that a reaction has taken place, the trading community find themselves over-supplied with capital. The best short paper can at present be negotiated at 5½ per cent. while six months' bills are taken at 6 per cent. On the Stock Exchange money has been more abundant, partly in consequence of 210,000*l* India bonds having been paid off at the Bank for which the requisite notice was given a year ago, and loans on Government securities can be obtained for limited periods at 4 per cent.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	1½
Amsterdam	3	3
Turin	6	5½
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

The following notice has been issued with regard to the Exchequer bills falling due in June:—

Office of Her Majesty's Paymaster-General,
Whitehall, 24th May, 1861.

EXCHEQUER BILLS.

N.B. This being the first issue of Exchequer bills under the Act of the present year, the attention of holders is specially called to the following particulars.

The Exchequer bills, dated in the month of June, 1860 (per Act 23 Vict., cap. 20, Anno 1860), with the interest due thereon, will be paid off on the 11th June, 1861, when the interest will cease. Such bills will be received at this office daily, from half-past 10 till 3 o'clock, until the 4th day of June, 1861, inclusive.

Printed forms, containing instructions for the preparation of the lists, and the arrangement of the bills, may be obtained on application at this office.

The holders must write or stamp their names on the face of each bill, and they must insert their names and addresses in each list, but where the names of holders are inserted in the body of the bills, the indorsements of such holders must be obtained previously to their lists and bills being left for examination.

New bills, prepared in accordance with the provisions of the Act 24 Vict., cap. 5, dated the 11th day of June, 1861, may be obtained in payment of the principal of the whole, or part, of the Exchequer bills advertised for payment, on the claimants specifying in their lists the amount of new bills required by them.

The interest of the said bills will be payable by coupons half-yearly on the 12th December and 12th June at the Bank of England. The rate of interest will be advertised from time to time in the London *Gazette*. Such rate for the half-year to the 11th day of December, 1861, will be 3*l* 15s per cent. per annum.

The bills will be current from year to year for a period of five years, commencing on the 11th June, 1861, at the option of the holders, and they will be payable for duties, aids, and taxes at any time during the last six months of every year—viz., between the 11th December in each year and the 11th June following.

The new bills, together with the interest on the bills left on or before the said 4th day of June for exchange, will be issued on the 12th day of June, 1861, when the claimants must attend at this office to sign receipts for the payment of principal and interest.

Notice will be given yearly of the days on which holders of the new Exchequer bills who may be desirous of being paid the principal moneys must send their bills to the Bank of England for examination and payment.

Payment, in money, may be obtained at this office for any Ex-

chequer bills which have been advertised for payment, upon the claimants leaving the bills for examination one day prior to that on which such payment is desired.

N.B. All Exchequer bills dated prior to June, 1860, have been previously advertised to be paid off.

The tenders for the New Zealand debenture loan of 150,000*l* were opened on Monday at the Union Bank of Australia. The minimum fixed was 101¾, and the tenders at and above that price amounted to 18,400*l* only, out of 84,000*l* applied for. A further small sum has since been taken up.

ENGLISH FUNDS.—There has again been scarcely any change in Consols during the week, and the final prices this evening were 91½ to ⅝ for money, and 91¾ to ⅞ for the account, or the same as last Friday. The occurrence of the holidays has in a great degree affected business, but even making this allowance, the general transactions have been much below the average. The steadiness in prices is chiefly in anticipation of the dividend, as the public appear for the moment rather sellers than buyers. The adverse political news from America is to some extent counterbalanced by the rise in the exchange.

A further rally has taken place in Exchequer bills, and the market closed this afternoon with a firm appearance, the last quotation being 5s discount to par. India bonds have experienced a fresh reduction, leaving off at 22s to 16s discount.

Another slight reaction has taken place in the new Indian Five per Cent. loan, to 101 to ¼, the public having ceased to invest for the present, and the supply of stock being rather large.

FOREIGN STOCKS.—The transactions in this department have again been limited, and the principal feature is a rise in Turkish Six per Cents. of 1858 on the publication of the correspondence appearing below. The 1854 loan has also improved in sympathy. Mexican receded on Saturday on the later unfavourable intelligence from Mexico, and has remained throughout the week with a heavy tendency, closing especially flat to-day. Spanish descriptions continue in some demand. Russian and Brazilian stocks have been slightly firmer.

French Three per Cents. left off this evening at 69f 40c, or a fraction lower than last Friday.

The following correspondence has been published respecting the last Turkish Six per Cent. loan. It confirms the announcement by telegraph of the decision of the Ottoman Government to remit monthly the revenue especially assigned to this stock:—

11 King's Arms yard, Moorgate street, May 21.

Sir,—For the information of the holders of the bonds of the Imperial Turkish loan of 1858, we request the insertion of the enclosed copy of a communication we have this day received from the Turkish Embassy.—We are, &c., DENT, PALMER, and Co.

Bryanstone square, May 20, 1861.

Gentlemen,—Referring to my letter to you of the 1st inst., on the subject of the decision concerning the monthly remittance of the funds for the service of the Ottoman loan of 1858, I have the honour to send you enclosed herewith a copy of an official despatch, dated the 1st inst., from His Highness Aali Pacha, the Minister for Foreign Affairs; which, as announced by His Highness's telegram of the 30th ult., confirms the adoption of this decision.—I have the honour to be, &c., (Signed) C. MUSURUS.

Messrs Dent, Palmer, and Co.

(TRANSLATION.)

Ministry of Foreign Affairs of the Sublime Porte, May 1, 1861.

Monsieur l'Ambassadeur,—I have received your despatch, dated the 18th of April, No. 1,163, enclosing the copy of a letter addressed to your Excellency by Messrs Dent, Palmer, and Co., relative to the request which they had previously lodged for the monthly remittance of the funds destined for the payment of the interest and sinking fund of the loan of 1858.

The Imperial Ministry of Finance, to which I had communicated in due course your despatch of the 24th of January, No. 1,128, together with the enclosures containing that request, having only recently communicated to me its decisions that henceforward the customs revenues of Constantinople and the other funds applicable to the said loan shall be remitted, month by month, direct to the treasury of the syndicate of the loan, I hastened to inform you of it by my telegram, dated April 30.

This decision will apply likewise to the service of the loan for the current year; and the necessary orders have already been given to this effect in the proper quarter.

I beg you to communicate the foregoing to Messrs Dent, Palmer, and Co., and, if you think it necessary, to the bondholders.

I would fain hope that the decision, which you will be so good as to inform them of, followed quickly by its practical application, will produce the desired effect of satisfying all the interests concerned.—I beg you, Monsieur l'Ambassadeur, to receive, &c., &c., (Signed) AALI.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills.

RAILWAYS AND OTHER SHARES.—The market for British railway stocks has been very inactive this week, but has generally showed steadiness. The traffic returns continue chiefly to influence the market, and as they still remain favourable, the quotations of the leading stocks are fairly supported, notwithstanding the effect of the disruption in America. The principal fluctuations have been in Lancashire and Yorkshire, which at one period attained a rise of nearly 1 per cent., but has since experienced a reaction. This afternoon there was a renewed speculative demand on the approach of the settlement, and most of the leading stocks suddenly advanced, Midland being especially buoyant. The rise, however, was not fully maintained, and the tone at the close was less firm than at one period.

In the colonial market, Indian guaranteed stocks have been in good demand, and are steadily improving. There is evidently an increased disposition to invest in these securities, which, although possessing at least the same advantages as the last Indian Five per Cent. loan, remain so much lower comparatively in price. Canadian descriptions are dull, Great Western shares having especially declined.

The only fluctuations of importance in foreign railways have been a rise in Lombardo-Venetian shares, followed by an almost immediate relapse. Brazilian descriptions have been rather more inquired for.

The Ottoman Railway Company have issued proposals for raising 250,000*l* in debentures at a price yielding 8 per cent. to the purchaser. The Company have a guarantee of 6 per cent. from the Turkish Government on their entire capital.

American railway securities have been rather depressed from sales of large consignments brought forward from the other side. A profitable business is now being transacted by the purchase of these securities at the low prices of New York, and their subsequent resale at the higher quotations of the London Stock Exchange. To this cause is partly attributable the drain of specie to America. To-day there has been rather a better feeling, but the leading stocks and shares are still lower than last Friday.

There have been few variations of any importance in the miscellaneous market. Great Ship Shares improved yesterday to 6s 9d to 7s 3d, on the reported negotiations for a charter by the Federal Government of the United States as a transport; but a reaction has since occurred to 6s 3d to 6s 9d. The new Natal Land shares are quoted ½ to ¾ premium, and China and Japan Steam ⅛ to ⅜ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The tendency this week has again been upward, except as regards Paris, which is slightly lower.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:

Gold.—The Copenhagen, with 205,000*l*, has arrived from Melbourne, but as there is not much demand for bar gold for export, the greater part of the amount will be retained here. Sovereigns, however, continue to be sent to America in considerable quantities, the America having taken 258,724*l*, the City of Washington 207,000*l*, and the Borussia 30,000*l*, making a total of 6,037,000*l* since November last year, and further sums are likely to be sent. The other exports comprise 9,987*l* per Ceylon to India and China, and 25,000*l* per Peninsula to Cadiz. A considerable amount of gold coin has been received from Turkey, and we may now daily look for further arrivals from Australia. In addition to the vessels mentioned in our last as being on the way from Melbourne, may be added the Norfolk, which was to sail on the 13th April, and would probably bring a considerable amount. The total of gold sent into the Bank during the week has been about 70,000*l*.

Silver.—The silver ex La Plata has been sold at a fractional improvement in price, and we quote the price as 60⅞d per oz standard. There is, however, but little doing, and the market is quiet. The Ceylon has taken 237,094*l* in silver specie to India and China, and the Shannon 5,000*l* to the West Indies.

Mexican Dollars.—Although the price is slightly firmer, the market is very quiet, and there is scarcely any business to be reported.

Exchange on India for drafts by banks at 60 days' sight. Bombay and Calcutta continues 1s 11¾d to 2s; Madras, 1s 11⅝d to 2s. Bills with documents Bombay and Calcutta, 1s 11½d to 1s 11⅝d.

India Government Loan Notes.—The quotations for these securities are quite nominal; 5½ per Cents. are about par, and 5 per Cents. about 94.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 78s 3d to 78s 6d per oz, in demand; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, scarce. Silver—Bar silver, 5s 0⅞d per oz std; bar silver, containing 5 grs gold, 5s 1⅛d per oz std; fine cake silver, 5s 5½d per oz; Mexican dollars, 4s 11½d per oz; Spanish dollars (Carolus), 6s 6d to 6s 8d per oz.

The amount of foreign gold purchased by the Bank since the making up of the account in this evening's *Gazette* is about 21,000*l*, while nearly 100,000 sovereigns have been withdrawn for America, exclusive of any sums that may have been taken from the Liverpool branch.

The steamer sailing with the Bombay mail on Monday will take 191,891*l*, of which 3,000*l* is for Alexandria, and 28,011*l* in gold and 160,880*l* in silver are for Bombay. The Government send 50,129*l* on this occasion.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension has taken place of M. Antoine Psichari, a highly respectable merchant in the Levant trade. The direct liabilities are now greatly reduced, and are not believed to exceed 20,000*l* or 30,000*l*. The assets are stated to show 30s or 40s in the pound, but are understood to include a large debt from the Turkish Government.

In the Court of Bankruptcy immediate certificates of the second class have been awarded to Messrs Davies and Troughton, the Shoreditch bankers. This decision has created considerable surprise, and it is understood that the assignees intend to appeal.

The following circular has been issued with regard to the affairs of Mr E. Vitalis, who suspended some time back in the Greek trade:—

7, Gresham street, May 24, 1861.

RE E. VITALIS.

Since my circular of April 25th, announcing the "pro forma" adjournment of the meeting of creditors of this estate until May 27th, Mr Vitalis has returned to London with the information that the two principal debtors to his estate (Messrs Schneider and E. Glavany) have effected arrangements in Constantinople to pay a composition of 12s in the £ as follows, viz.:—

Messrs Schneider and Co.

5s in the £ on the collection of the sum of 15,000*l* due to them by H. M. the Sultan (expected to be paid forthwith).

3s on 31st August, 1861, and 4s on 30th April, 1862.

Guaranteed by the private property of Mrs Schneider.

Messrs E Glavany and Co.

4s at 5 months from 1st April, 1861.

4s at 10 months from 1st April, 1861.

4s at 16 months from 1st April, 1861.

These settlements have, however, been made conditionally that a release be given to Mr E. Vitalis on all bills bearing either his acceptance or endorsement.

Messrs G. P. Vitalis and Sons have likewise arranged to pay in full, in four equal instalments, at 3, 6, 9, and 12 months' date.

The liabilities of this estate having all matured in sufficient time for the bills to be sent back on Constantinople, it is presumed that few, if any, remain outstanding on this side.

Any holders of bills upon which this estate is liable will be pleased to forward me their assent to this arrangement forthwith. It is but right that I should add that the firms of Messrs Schneider and Glavany have both pledged themselves to pay if possible the remaining 8s in the £, so that prospectively it may be hoped no ultimate loss will accrue.—I am, yours faithfully,

CHARLES F. KEMP, Public Accountant.

A meeting of creditors of Messrs Ede and Co., Levant merchants, who suspended in January, was held yesterday, when it was resolved to accept the following settlement, viz., 5s in the pound in cash, 5s at six months, 5s at nine, and 5s at twelve months, with interest at the rate of 5 per cent. per annum. This arrangement had been previously agreed by a meeting of creditors in Constantinople. Messrs Ede will liquidate earlier if the assets can be realised more quickly than is at present expected.

At an adjourned meeting of creditors of Mr James Crichton, flax merchant, of Dundee, it was resolved to accept a composition of 3s in the pound for the ordinary creditors, while those holding claims on the joint account between Messrs Staig and Steuart and Mr Crichton will receive 8s 6d. The arrangement is without security in either case. The estate is to be wound up under the supervision of Mr C. F. Kemp, the accountant.

A meeting of creditors of Messrs Yorke and Co., of the Peterborough and Oundle Bank, has just taken place at Peterborough. The liabilities were estimated to be 163,606*l*, and assets 53,625*l*, exclusive of furniture, plate, &c. It is expected that the creditors will eventually receive about 5s in the pound. A strong opinion was expressed against going into the Court of Bankruptcy, notwithstanding that some items in the balance-sheet appeared to require investigation. It was finally resolved to wind up under a deed of assignment, the committee of creditors being assisted by Mr Ball, of the firm of Quilter, Ball, Jay, and Co., accountants.

Messrs R. Clarke and Sons, cotton-spinners, of Manchester, have stopped payment. At a meeting of their creditors their liabilities were stated to be about 33,000*l*, with assets expected to yield 6,000*l* or 7,000*l*. A composition of 2s 6d in the pound has been offered.

PUBLIC COMPANIES.—The annual meeting of the Chartered Mercantile Bank of India, London, and China, took place on Tuesday, when the report announcing dividends for the past year at the rate of 10 per cent., free of income tax, was unanimously agreed to. With reference to the comparatively unsatisfactory result of the operations of the last twelve months—the total profit of 1860 having been 51,274*l* against 74,560*l* in 1859—it was explained that the diminution is attributable to the low rates of interest in India and China, and a falling-off in the exchange business. The bank

has also experienced serious disappointments, the principal being the large loss by bad debts, more than 21,000*l* having been written off on this account against about 3,000*l* in the previous year. Extra charges have also been increased, including the cost of starting two new establishments at the Mauritius and Penang, to the amount of 8,000*l*, and the business in China has suffered from the sickness of some of the principal officers. It was also mentioned that the cause of the bank not having subscribed to the Indian Famine Relief Fund here arises from their having already contributed in India. A proprietor having made some observations on the character of the management, it was replied that the Directors exercise a close supervision over the whole of the affairs of the establishment, and encourage the zeal of the officers in every way. It is not intended to declare a bonus until the present reserve of 50,000*l* shall have been raised to 100,000*l*.

The Oriental Gas Company have also held their general meeting this week, when a satisfactory report was presented, and a dividend declared at the increased rate of 4½ per cent. per annum, free of income tax. The business of the Company was stated to be augmenting steadily, the public and private lights having increased from 2,110 in December, 1859, to 3,213 in the same period of 1860. Since the commencement of the present year the progress has been more rapid, the monthly increase in the first quarter being 180 lights, against 71 in 1860 and 29 in 1859. It may now be considered that the Company has fairly emerged from the difficulties consequent on the mutiny of 1857 and the succeeding disorganisation of Indian finance. In the past year eight miles of additional mains have been laid in Calcutta, and the consumption of gas in the new districts has fully answered expectation. About one-third of the private lights are used by natives. The increased demand in the present year is partly attributable to the reduction in the cost of fitting, which, being now performed by the Company, is much less than it had been under the old arrangement with the contractors. A further supply of workmen and material have been sent out to meet this demand, and to provide for the expense thereby incurred, the remainder of the new capital will be called up in July.

The report of the Trust and Loan Company of Upper Canada, issued preparatory to their meeting on the 31st, recommends a dividend at the rate of 8½ per cent. per annum; that one-half of the profit over 6 per cent. per annum, and the usual charge for interest, amounting together to 3,474*l*, be carried to the reserve fund, in accordance with the Royal Charter of Incorporation; and that 250*l* be applied to the redemption of preliminary expenses. There will then remain the sum of 67*l* to the credit of the next half-year's accounts. The reserve has been charged in the past six months with the sum of 858*l*, being the ascertained loss on the Wolfe Island Railway and Canal Company's debentures, and, after making this deduction and appropriating the sum above referred to, it will now stand at 33,446*l*. The Directors congratulate the proprietors on the satisfactory progress of the Company, and have pleasure in stating that the latest advices from the colony are highly favourable.

PRICE OF BULLION.

	£	s	d
Foreign Gold bars (standard) ..... per ounce	3	17	9
Mexican dollars	0	4	11½
Silver in bars (standard)	0	5	0½

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 7-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.6½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 7-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 104¼ to 105 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for the loss of interest occasioned by the delay in coining, the apparent profit on sending gold to America is much diminished.

Imports of the week ..... 193,500 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was only a limited supply of English wheat on offer at Mark-lane to-day; nevertheless, nearly all kinds moved off slowly, at barely Monday's currency. Foreign wheat, the show of which was large, moved off heavily on former terms. Barley was very dull; but malt commanded previous rates. All other kinds of produce, including flour, were a slow inquiry. The imports from abroad, this week, amount to 33,110 quarters of wheat; 4,790 barley; 47,740 oats; 270 sacks and 40,760 barrels of flour.

At Liverpool, this morning, trade generally ruled heavy, and prices had a drooping tendency.

There has been a lively demand in the Liverpool cotton market throughout the present week, the total sales amounting to 81,000 bales, and including 46,000 bales to the trade, 19,000 bales on speculation, and 16,000 bales for export. Quotations are $\frac{1}{8}$d to $\frac{1}{4}$d per lb higher than on Friday last. The accounts received this week from America being regarded as very favourable for holders of cotton, they have withheld their stocks from the market with much firmness, expecting, notwithstanding the large shipments due from the East Indies, to do better ere long. The market closes to-day very firm; sales, 12,000 bales.

"Our cotton market has rather hardened since our last report of the 4th inst.," write Messrs Briggs and Co., of Alexandria, on the 11th inst., "and prices are decidedly higher, although we make no quotable difference, as it is difficult to define positive classifications where the lots are so extremely mixed as they now are; so much so, indeed, that out of the reported sales a large proportion is rejected out of nearly every lot. The weekly transactions have been:—169 bales low ordinary, at 6$\frac{1}{2}$d to 6$\frac{3}{4}$d; 1,247 bales ordinary to middling, at 6 9-10d to 7$\frac{1}{2}$d; 400 bales good middling to fair, at 7$\frac{3}{4}$d to 8d; 169 bales good fair, at 8 21-100d to 8 35-100d; 13 bales good to fine, at 9$\frac{3}{4}$d per lb f.o.b.; total, 1,998 bales. Freights are at 9-16ths per lb in full by steamers; sailing ships may be quoted at 6-16ths to 7 16-ths. Exchange.—London, at 95 piastres per £ sterling; France, 5f 30c to 5f 31c per dollar of 20 tariff piastres, with few takers."

The public sales of tea held this week have gone off steadily, and prices have been well supported. The demand by private contract is somewhat restricted.

Good and fine qualities of raw sugar have changed hands to a moderate extent, at previous currencies; but low and damp parcels have moved off heavily, on rather lower terms. Refined goods have supported previous rates.

Plantation coffees have commanded full quotations; but all other kinds have moved off heavily, at about stationary prices.

There has been much less activity in the demand for all kinds of rice, and, in some instances, the quotations have had a drooping tendency.

Public sales, comprising 2,431 serons Guatemala indigo, have been held. Considerable animation was shown throughout, and fully four-fifths were sold, principally to exporters, at an advance as compared with the currency of February last of 6d per lb for the low and ordinary, and 6d to 9d for all other qualities. General quotations ruled as follow:—Flores, 7s 3d to 7s 9d; Sobres, 6s 6d to 7s; Cortes, middling to fine, 5s 3d to 6s 3d; Cortes, ordinary, 4s 3d to 5s; Cortes, low, 2s 11d to 4s per lb.

Messrs Layton, Hulbert, and Co. report the last indigo sales as follows:—

The quarterly sales of indigo comprised 5,662 chests (620 being in B catalogue). During the progress of the sale 2,422 chests were withdrawn, leaving 2,098 chests Bengal, Benares, &c., 309 chests Oudes, 263 chests Madras, 570 chests Kurpah; total, 3,240 chests. The sale opened with spirit, which rather improved than diminished through the four days of its progress, notwithstanding a rise in the Bank rate to 6 per cent. on the 16th instant. The competition for soft Bengals suitable to Germany, consumers, and Kurpahs was steady and constant; fine Russian qualities were in less demand, and dry-leaf Madras, not readily saleable at the prices demanded, were chiefly bought in. Prices may be quoted as under:—Bengal—Fine blue, per lb, 8s 9d to 9s; fine purple and violet, 8s 3d to 8s 8d; good do., 7s 10d to 8s 2d; middling and defective, 7s 6d to 7s 9d, 2d to 3d per lb higher; consuming, fine, 7s 3d to 7s 6d; ditto, good, 6s 8d to 7s 2d; ditto, middling, 6s to 6s 6d, 5d to 7d per lb higher; ditto, ordinary, 5s to 5s 10d; ditto, ditto, and lean, 3s 9d to 4s 9d, 6d to 8d per lb higher compared with February sales. Oudes—Good plant, 4s 10d to 6s; middling, 4s to 4s 9d; ordinary, 2s 10d to 3s 10d, 4d to 6d higher compared with February sales. Madras—Velore, none; middling and good, 3s 6d to 5s; ordinary, 1s 6d to 3s 4d, 3d to 4d higher compared with February sales. Kurpah—Fine, 7s 3d to 7s 9d; good, 6s to 7s; middling, 4s 6d to 5s 9d; ordinary, 3s 3d to 4s 3d; low and earthy, 1s 6d to 3s, 6d to 8d higher compared with February sales. The quantity sold, including several of the withdrawn parcels disposed of before and during the sale, is 3,000 chests, of which it is estimated that 1,800 are taken for export and 1,200 for home use and resale. 650 chests were bought in.

There has been a full average business doing in Scotch pig iron, at full quotations. Most other metals have commanded previous currencies. The Dutch Trading Company's annual sale of Banca tin is announced for the 26th June, when 138,453 slabs will be offered, and 20,000 slabs more if they should arrive in time. Last year the sale consisted of 151,513 slabs, and the price 79f 50c, that of 1859 was 139,128 slabs at 82f 50c, and that of 1858 was 190,842 slabs at 68f 20c. The market remains very quiet.

Most kinds of rum have changed hands somewhat freely, at full quotations. Brandy, owing to the unfavourable accounts in reference to the appearance of the vine in the South of France, is held for more money.

Linseed oil has sold to a fair extent, at 29s 6d per cwt on the spot. Other oils have continued steady in price. Spirits of turpentine, 48s to 50s per cwt.

We have very little change to notice in the value of tallow. For the time of year, the market is steady at 48s for P. Y. C. on the spot. The price for May to June is 58s; and October to December, 54s 6d to 55s per cwt. Town tallow is 54s net cash.

"Financial affairs," says the *New York Shipping List* of the 11th inst., "have become still more feverish, while the dullness and depression in trade circles have become intensified. The money market has become more stringent, and the best houses often have much difficulty in finding accommodation, while rates have a decided upward tendency. Scarcely any accommodation is extended for less than 7 per cent. for good securities and first-class names, while for names less known rates vary from 18 to 24 per cent. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 5½
Do. other good securities	6 7
Prime endorsed bills, 60 to 90 days	5½ 6
Do. 4 to 6 months.....	6½ 7
First-class single signatures	6½ 7
Other good bills	8 9
Names less known	18 24

The receipts of produce at the chief points of transportation in the West are becoming heavier, and the movement all along the canals is said to be very active. At this port the receipts down the North River have been very considerable within the three days, Wednesday being the first day that grain was received to any extent. On that day, the receipts of wheat alone were upwards of 100,000 bushels. Distrust in commercial circles would seem to be spreading, while the anxiety about the probable further effect of the war on produce of every description, as well as on manufactures, agriculture, and commerce, is naturally increasing. It is argued that even if the war be soon brought to a termination, a great derangement of business will follow, and many departments necessarily suffer materially before business circles again wear a healthy and thrifty aspect. Meanwhile general trade is very dull and steadily decreasing, while prices of nearly all commodities are declining. The chief staples of the South are an exception to the rule, however, holders being firm, and insisting upon full prices. At the stock market, the aspect of things has been varying."

There has been a good demand for cotton throughout the week, and on some days much excitement has appeared. Prices have had a hardening tendency in American, and we have raised our quotations ⅛d per lb. The import is again heavy, showing a further increase in stock. Long-stapled kinds have not varied in price, the demand being limited. East India fully maintain former rates. The sales to-day are 10,000 bales. There is a fair demand, at full prices. The reported export amounts to 16,320 bales, consisting of 10,480 American, 370 Brazil, and 5,470 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

In most of the markets held in the manufacturing districts, this week, the demand for goods, both for export and home use, has been very moderate. In prices, however, no change has taken place, and no increase of importance has taken place in the warehoused stocks. The iron trade has shown signs of firmness; but the demand for coals has continued limited.

MANCHESTER, May 23.—This has been almost a blank week in Manchester business, the races and other amusements occurring in the town, and most buyers and sellers being accordingly absent. Where prices have been tested, they have been rather against spinners and manufacturers both for home and export; but as extremely little production is going on this week throughout the district, sales have been inconsiderable, and no attempt made to induce them. The state of the cotton market prevents many sellers from coming down in price, but has no effect whatever in stimulating the excessively inert demand.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The indisposition to buy wool continues, and when sales are forced some concession must be made. The supply of wool held by the trade is an average one for the time of year, and a larger quantity is left over in the country than was to be found last year. Noils and Brokes—There is no quotable change to report either in demand or price. But little business has been passing in yarns either in the home or export market. The supply still exceeds the demand, and we hear of sales being effected at ruinous prices, and of more machinery being stopped. This time last year yarns were 12½ per cent. dearer than now, and the fall in wool is comparatively very slight. The demand for pieces has been of the most retail character.

HUDDERSFIELD.—The demand for black doeskins has been again quiet. The country trade assumes a more healthy aspect.

LEEDS.—The market in the cloth halls this morning was of a very quiet character; there were few persons in attendance, and only an isolated sale took place here and there. There are a few buyers in the town, but merchants complain that they are exceedingly chary in their transactions. Altogether the prospects of trade continue without any sign of improvement. Prices, under the circumstances, are remarkably firm.

ROCHDALE.—The wool market has been again inactive, there being an absence of demand, except for noils and brokes, the production of which is very limited. Could they be obtained, they would fetch higher prices than they have been quoted at of late.

BELFAST.—Several new openings have been made for the sale of white linens. More extensive transactions have been done with the Hanse Towns, and Holland promises well for this season. A better feeling is said to exist in the New York markets, and goods are wanted in the South. On this side there is little doing as to exports. Some parcels were sent out this week to finish outstanding orders. In the home market a steady demand may be reported.

WOLVERHAMPTON.—The official list of prices of Staffordshire, finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 7s 6d to 3*l* 10s; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales),

No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites from 3*l* 2*s* 6d to 3*l* 7*s* 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 8.—The market for State and Western flour has continued dull and heavy, at prices tending in favour of the purchaser. The transactions for the three days foot up 27,000 bbls, including 12,000 yesterday. Canada flour is in steady demand at about previous quotations. Southern flour is in limited request, and the market steady at previous quotations.

EXPORT from 1st to 7th May.

	1861. barrels	1860. barrels
Wheat Flour	44,489	25.372

There is little or no change to note in the market for wheat, which remains quiet, without essential variation in values. The receipts during the past two days have been rather more liberal, but no considerable quantity is expected until next week, when the stock will probably be considerably augmented by receipts through the Erie canal. The transactions for the three days comprise 135,000 bushels. Corn is dull, heavy, and fully 2 cents per bushel lower, with sales to the extent of 95,000 bushels, including 50,000 yesterday, at 65 to 72 cents for white Southern, and 65 to 67 for Western mixed.

EXPORT from 1st to 7th May.

	1861. bushels	1860. bushels
Wheat	263.070	52,697
Corn	287.592	24,081

NEW YORK, May 11.—There has prevailed a fair demand for State and Western flour during the past three days, and prices are pretty well supported. Canada flour is steady, with a fair demand, at slightly improved prices. The market for Southern flour remains without noticeable change. The demand is moderate, but holders are firm. Prime qualities of wheat have continued active, and for the most part have realised previous rates. The common kinds have been dull, however, and prices have given way to the extent of 2c and 4c per bushel. Corn is heavy and decidedly lower.

NEW YORK, May 16.—The trade for flour is in a heavy state, and prices are with difficulty supported. Wheat commands but few buyers, at barely late rates; and corn moves off slowly, though without material change in value.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Nearly the whole of the leading markets held this week have been scantily supplied with English wheat. Good and useful qualities have mostly sold at full prices; but low and damp parcels have met a heavy sale, at barely late rates. Foreign wheat has commanded less attention; nevertheless, no quotable change has taken place in prices. The barley trade, owing to the prevailing warm weather, has become much less active, at about previous currencies. There has been a fair sale for malt; but oats have moved off slowly, and the quotations have had a drooping tendency. Both beans and peas have realised extreme rates; but the flour trade has been devoid of animation.

The latest advices from New York state that flour was tending downwards; but that wheat and flour were steady in price. Most of the Continental markets are firm for good wheat, barley, and oats. Other kinds of produce, however, appear to be somewhat neglected.

The Scotch markets have been less active than in several previous weeks; nevertheless, prices have continued tolerably firm. The shipments of produce to the South have fallen off.

In Ireland, inferior wheats have had a drooping tendency; whilst the demand for other articles has been much restricted, at about stationary prices.

The accounts from most parts of England state that the young wheats have considerably improved in appearance within the last ten days, but that, with some exceptions, they are very thin upon the ground. Certainly the crop, at present, does not look very promising.

At Mark lane, to-day—owing to the continuance of favourable weather—the wheat trade was in a most inactive state; indeed, the demand ruled heavy in the extreme, and in medium and inferior qualities of both English and foreign wheat, sales could only be effected by submitting to a reduction in prices, say of about 1s per quarter. Really fine samples, however, fairly maintained previous rates. For barley, there was very little inquiry, and grinding qualities were rather cheaper. In malt, beans, and peas, a limited business was transacted, at late rates; but oats moved off with great heaviness, at a decline of 6d to 1s per quarter. The flour trade was dull, and American parcels—in consequence of the large arrival—were difficult of disposal, except at a reduciton of quite 6d to 1s per barrel.

With regard to the floating trade, Mr Edward Rainford furnishes us with the following observations:—"Since the 15th inst., there have been 79 arrivals off coast for orders, comprising 33 cargoes of wheat, 29 maize, 12 barley, and 5 miscellaneous, viz.:—Wheat, 3 from Alexandria, 1 Oporto, 2 Trieste, 1 Marianople, 13 Odessa, 3 Santander, 1 Venice, 4 New York, 1 Samsoun, 1 Berdianski, 1 Sulina, 2 Ibraila; maize, 4 from Leghorn, 3 Philadelphia, 2 Galatz, 1 Odessa, 3 Ibraila, 2 Sulina, 2 Marseilles, 3 Alexandria, 1 Baltimore, 4 New York, 1 Saffi, 1 New Orleans, 1 Boston, 1 Venice; barley, 2 from Alexandria, 1 Sulina, 2 Ismail, 1 Constantinople, 4 Ibraila, 1 Odessa; wheat and flour, 1 Santander; rye, 3 Odessa, 1 Marseilles. Some of these were sold before arrival. The trade in cargoes afloat has been inactive till to-day, when there has been more animation, and the following are the prices paid since this day week:—Wheat, arrived, per 492 lbs, Banat, 56*s*; Kanizza, 51s 6d and 54s 9d; Odessa Ghirka, 51s 6d; Venetian, 56s 9d; per 480 lbs, Sandomirka (2 cargoes), 58s; Ibraila (2 cargoes) 44s; soft Samsoun, about 50s; Saide, 39s, and another cargo equal to 39s. Maize, arrived, per 480 lbs, Ibraila, at 37s 0½d, 37s, and 36s 9d; for shipment in June, per 480 lbs, Ibraila, 31s. Barley, arrived, per 400 lbs, Ibraila (4,500 quarters), 25s 9d to 26s; Egyptian, 26s; on passage, Ibraila (April shipment), 25s; Galatz, 25s 4½d; now shipping, Odessa, 25s 5d. Rye, arrived, 32s 6d per 480 lbs, for the Continent."

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A quiet tone pervades the market, and arrivals have been rather large, owing to the change of wind. Moderate sales have taken place, which prevented any change in prices during the greater part of the week. Transactions in West India on Tuesday and Wednesday

amounted to 1,230 casks, including 371 casks Barbadoes by auction: dabs and brown, 35s 6d to 37s 6d; low heavy to fine yellow, 38s to 45s 6d per cwt. Eight floating cargoes of foreign have been sold for the United Kingdom at barely the previous value. The week's delivery amounted to 4,050 tons, making the total increase since the 1st January to the present date 3,000 tons. The stock remains 46,000 tons, against 55,950 tons in 1860 at the same period.

Mauritius.—Business to a moderate extent has been done by private contract.

Foreign.—Transactions privately include 2,500 bags clayed Manilla at 34s 6d to 35s, and 550 boxes Havana, No. 10 to 12½, 39s to 41s. Two floating cargoes of Havana, Nos. 10 to 12, sold at 24s 9d to 26s 6d for the United Kingdom; also one of Pernambuco at 22s, and three of Cuba muscovado at 23s 6d to 23s 9d. At auction, 1,063 casks 34 barrels Cuba partly sold at 33s 6d to 41s for brown to good yellow. 1,833 boxes Havana were mostly bought in at 40s 6d to 44s 6d for middling to fine strong yellow, and 47s to 47s 6d for white at 16s duty. 99 cases 2,615 bags Bahia partly sold at 33s to 37s per cwt.

Refined.—The market continues steady, and prices are unaltered on account of the small quantity offering.

MOLASSES scarce and wanted.

RUM.—The market is quiet, with rather a downward tendency. 200 casks Bengal have sold at 1s 8d, and current quality of Demerara in puncheons commands 1s 10d per proof gallon. The total stock is 23,930 puns 4,500 hhds, against 26,200 puns 6,400 hhds at the same date in 1860.

COCOA.—Nothing of interest has transpired in West India this day, and no public sales were held to yesterday. Considerable arrivals of foreign have occurred.

COFFEE.—The sales continue to go off with spirit, and last week's prices have been fully maintained. 783 casks 391 barrels plantation Ceylon all sold at 67s to 73s 6d for fine ordinary to middling, and 74s to 79s for good middling to good. 2,013 bags native small berry to good ordinary, 61s to 62s; blacks and triage, 25s to 34s. 266 casks 333 barrels and bags Jamaica, 64s to 92s. 124 half-bales Alexandria Mocha were taken in at 90s to 92s for ungarbled. 40 bags Singapore sold at 63s for good bold; subsequently 577 bags ordinary were bought in at 60s. 440 bags Mysore: pale and yellowish, 66s 6d to 67s; small and pickings, 61s 6d to 62s. 2,000 bags Rio partly sold at 54s 6d to 63s for ordinary to good quality.

TEA.—Operations by private contract have been restricted owing to the public sales. These commenced yesterday, when 1,308 packages Assam sold readily at full rates. 8,916 packages China partly sold at full rates for green descriptions.

RICE.—The fine weather has quite unsettled the market, and prices show a downward tendency. 1,681 bags Bengal, by auction, found buyers at 11s to 11s 3d for middling, and 9s 9d for low yellowish broken white. A very small business is reported by private contract.

IMPORTS and DELIVERIES of RICE to May 18, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	22200	10450	8750	44100

Stock	31100	50100	75400	87850

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—There has been an improved demand for pimento, and prices are slightly firmer. 200 bags sold by auction at 2¾d to 3d for low to good, and business has also been done by private contract at similar prices. A parcel of white pepper has changed hands at rather under 5¼d, being lower. Only small orders have been executed in black at previous rates. 78 cases nutmegs sold at the former value: low small to fair brown, 1s to 1s 9d; fine, 3s 7d. 19 cases mace: common to fine, 11s to 1s 3d per lb. 150 barrels Jamaica ginger sold at 44s to 50s for the lower qualities, which went cheaper. 100 cases wormy Cochin were taken in at 57s per cwt.

SALTPETRE.—This article remains dull. Privately, Bengal, refraction 8¾ to 4¼, has sold at 35s to 37s 6d. 2,090 bags Bengal, by auction, were taken in at 38s to 39s, refraction 4¼ to 3¼, there being no buyers near these prices. 668 bags Bombay sold at 31s, refraction 57½ to 32¾ per cent.

IMPORTS and DELIVERIES of SALTPETRE to May 18, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	5300	5500	7775	4500
Delivered	4720	5170	7575	6075
Stock	4400	4160	3150	5030

Deliveries last week 260 tons.

COCHINEAL is firmer, with reduced supplies offering, and an attempt is being made to hold the sales less frequently—say once a month. 150 bags Honduras, by auction, went rather dearer: silver, 2s 5d to 2s 9d; black, 3s 5d to 4s 4d; Teneriffe silver, 2s 7d to 2s 8d; black, 2s 9d per lb.

OTHER DYESTUFFS.—Turmeric remains without further alteration. Cutch is quiet. No change in Gambier. Less inquiry prevails for safflower. 153 bales Bengal, by auction, partly sold at 3*l* 10s to 4*l* 7s 6d per cwt for ordinary qualities.

SHELLAC is at present in limited demand. By auction, a parcel of mixed button sold at 7*l* 10s, and D C orange at 9*l* 10s per cwt.

METALS.—All kinds are quiet. The Netherland Company's sale of tin is fixed for the 26th proximo, to comprise 138,500 slabs, or 20,000 more if imported in time, against 151,000 slabs last year. Our market remains inactive, and quotations are nominally unaltered. Nothing has been done in spelter during the week. Scotch pig iron last sold at 47s 9d to 48s per ton for mixed numbers. Copper and lead are unaltered in value.

JUTE.—Business has been done by private contract at last week's prices, but the market is now rather quiet. At auction, 6,034 bales, including some parcels offered "without reserve," sold at about the previous value: ordinary to fine, 13*l* to 20*l* per ton.

HEMP.—A few lots of white Manilla sold at 34*l* to 38*l* per ton. Roping sorts are quiet.

LINSEED.—With large arrivals a reduction of 6d has been accepted: Bombay, 55s 6d; Calcutta, 51s 6d to 52s 6d per quarter.

OILS.—Many floating cargoes of olive have sold: Gallipoli, 56*l*; Taranto, 55*l* to Cronstadt, and 20s per tun less for the United Kingdom. Transactions on the spot have been limited, and prices are quite nominal. Sperm remains dull, and the quotation is 102*l* 10s to 103*l* per tun. Now seal appears likely to open at 36*l* to 37*l* per tun. Palm quiet at 45s. Since last Friday, when the price of cocoa-nut declined 1s, several parcels sold for export: Ceylon, 45s to 45s 3d; Cochin, 46s 6d per cwt.

TURPENTINE.—American spirits firm at 49s per cwt. No rough here.

HIDES.—The sales of East India have gone off without much spirit: good to fine at extreme rates; common, rather cheaper.

TALLOW.—The market has been inactive, and last week's quotations are not maintained. 1st sort Y. C., 58s; last three months, 54s 6d to 55s per cwt. Owing to the sudden change in the weather, the consumers have restricted their operations.

PARTICULARS OF TALLOW.—Monday, May 20.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was quiet to-day, and some descriptions 6d cheaper. Grocery Porto Rico indeed gave way fully 1s. Of 13,800 bags Mauritius two-thirds sold. 520 bags Bengal: Goosery, 42s 6d; white Benares, 44s to 45s. 2,000 bags native Madras partly sold at 30s 6d to 32s. 320 casks Barbadoes at previous quotations; and 680 casks 260 barrels Porto Rico at 36s to 47s. The week's business in West India sugar amounts to 2,020 casks. A floating cargo of Havana, No. 11½ to 12, sold at 26s; one, No. 8 to 8½, at 24s, for the United Kingdom.

COFFEE.—271 casks 223 barrels and bags plantation Ceylon sold at full prices; also a few lots of native. 106 packages Mocha: low middling polish mixed at 96s. 240 packages Alexandria were bought in at 75s to 92s per cwt.

COCOA.—4,525 bags Guayaquil partly sold at 59s. 42 bags Trinidad were bought in.

RICE.—4,339 bags damaged Rangoon, by auction, sold at steady rates. 338 bags 2,000 pockets Bengal at 12s to 13s per cwt.

SALTPETRE.—A parcel of Bengal, refraction 10, has been sold at 35s per cwt.

TEA.—The sales concluded to-day. Canton gunpowder sold at rather easier rates, but other kinds obtained the full valuations. 3,865 packages found buyers.

COCHINEAL.—24 bags sold at easier rates: Honduras black, 3s 5d to 4s 4d; Teneriffe silver, 2s 6d to 2s 8d; black, 2s 9d to 2s 11d per lb.

SHELLAC.—334 chests were bought in.

OIL.—660 casks cocoa-nut, by auction, were mostly taken in, a few lots of Cochin selling at 45s 9d to 46s. The Ceylon was bought in at 45s. 180 casks palm partly sold at 45s per cwt.

TALLOW.—Y.C. 57s 6d on the spot, and 54s 6d for delivery to the end of the year. 335 boxes South American mostly sold at 52s 3d to 55s 3d; 60 casks Australian, 51s 6d to 56s; 43 casks North American, 51s 6d to 52s 6d. 160 cases East India partly sold at 49s. Town was reduced to 55s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is very steady; no particular alteration as regards prices. Treacle rather scarce. No demand for Dutch crushed.

GREEN FRUIT.—A further improvement in the market. Parcels of St Michael's, Terceira, and Valencia oranges, sold by Keeling and Hunt at public sale, went at an advance, the warm weather creating an increased demand. Lemons of good quality were in request; inferior difficult of sale. Nuts of all kinds without alteration: Black Spanish remain in stock; Barcelona firm in price; Pera dull.

DRY FRUIT.—At a public sale of raisins on the 22nd ult., about 100 tons of Cheeme were sold at 30s to 31s, being a reduction of 1s per cwt; low reds, in barrels 27s to 29s, boxes 29s; Sultanas, 41s to 42s. Currants are held with a firmness which prevents any extensive business being done. Clearances good.

COLONIAL WOOL.—The sales continue without any change in price.

FLAX unaltered.

HEMP.—Market quiet, and but little doing.

COTTON.—Sales of cotton, from Friday, 17th May, to Thursday, May 23d, inclusive:—1,500 bales Surat at 6½d to 6¾d, good fair to fine sawginned; 5½ to 5¾d, middling fair to fair Dhollera; 5¼d to 5⅝d, middling to middling fair Oomrawatty; 5¼d, fair Mangarole; 5⅝d, good fair Compta: 500 bales Western Madras at 5⅛d to 5¼d, fair to good fair. The market opened heavily, and until Tuesday there were no reported sales; since that period, owing to the great activity in the Liverpool market, caused by more warlike accounts from America, an improved demand has prevailed, and a fair business has been done daily. Prices of Surat have generally advanced ¼d per lb, particularly sawginned. Western Madras is also slightly dearer. In Tinnevelly there have been no transactions. P.S.—Steady. Sales to-day, about 200 Jumbaseers at 5¾d per lb.

SILK.—Market quiet; prices unchanged. Telegram from China reports only 1,200 bales settled for in the last fortnight. Report of the new European crop rather unfavourable.

TOBACCO.—Considerable sales have been effected, at an advance on previous quotations of ¼d to 1d per lb, and which might have been fur-

ther augmented, but for the unwillingness of holders to operate, except in limited quantities.

LEATHER AND HIDES.—There was no public market on Tuesday at Leadenhall, being Whitsuntide. The business of the past week shows no change; the demand is still limited, and prices unaltered.

METALS.—Business keeps very quiet in metals, but without any new feature. Copper is in fair demand for English, but foreign continues to be neglected. Iron is wholly unchanged. Tin appears to be rather drooping in price. The annual Dutch sale of Banca comes off on the 26th proximo, when about 150,000 slabs are expected to be offered. Spelter is lower in price, with still a downward tendency. Lead also is drooping in price. Tin plates experience a limited demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	0
Fat by ditto	2	10
Yellow Russian	59	0
Melted stuff	37	0
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market steady at 74s f.o.b.; very little fine quality landed. Revolution in the butter trade; best Friesland fell to 86s.

METROPOLITAN CATTLE MARKET.

MONDAY, May 20.—The total imports of foreign stock into London, last week, amounted to 5,430 head. In the corresponding period in 1860, we received 5,215; in 1859, 3,865; in 1858, 1,239; in 1857, 2,344; in 1856, 1,761; and in 1855, 2,673 head.

There was a full average supply of foreign stock on sale in to-day's market. Amongst it were 100 oxen from Spain, in good condition. On the whole, the trade was inactive, at about last week's prices. Although the show of home-fed beasts was rather limited, the demand for all breeds was in a sluggish state. Prime Scots and crosses realised last Monday's currency, viz., from 4s 8d to 4s 10d per 8 lbs; otherwise, the beef trade was the turn in favour of buyers. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 2,400 Scots, &c.; from other parts of England, 300 of various breeds; and from Scotland, 720 Scots and crosses. The general quality of the beasts was prime. Really prime Down sheep were scarce and in request, at from 5s to 5s 2d, and, in some instances, 5s 4d per 8 lbs; all other breeds, however, were a slow inquiry, at the prices realised on this day se'nnight. Prime lambs were in fair request, at Thursday's decline in value; inferior lambs were very dull, but not cheaper. The veal trade was heavy, at a decline in prices, compared with Monday last, of 8d per 8 lbs; the top quotation was 5s per 8 lbs.

SUPPLIES.

	May 21, 1860.	May 20, 1861.
Beasts	3480	3540
Sheep and lambs	22920	20460
Calves	180	143
Pigs	420	390

THURSDAY, May 23.—There was only a moderate supply of beasts on offer in to-day's market, nevertheless, all breeds moved off heavily, at a decline in the quotations, compared with Monday, of 2d per 8 lbs. The top figure for the best Scots was 4s 8d per 8 lbs. Prime sheep were scarce, and in request at full prices, otherwise, the mutton trade was in a sluggish state, on former terms. There was a fair sale for the best Down lambs; but other breeds were somewhat heavy. We have to report a dull inquiry for calves, at about Monday's currency. In pigs, very little was doing at late rates; but milch cows were firm in price.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	6	Prime Southdown sheep	4	10	5	2
Second quality ditto	3	8	4	0	Large coarse calves	4	0	4	6

Prime Scots, &c.	4	6	4	8	Large hogs	4	0	4	4
Coarse and inferior sheep	3	4	3	8	Small porkers	4	6	4	10
Second quality ditto	3	10	4	2	Suckling calves.....each	23	0	32	0
Prime coarse-woolled do.	4	4	4	8	Quarter old store pigs	23	0	30	0

Lambs, 5s 8d to 7s 0d.

Total supply—Beasts, 970; sheep and lambs, 6,860; calves, 190; pigs, 270.
Foreign supply—Beasts, 250; sheep, 1,100; calves, 100.

NEWGATE AND LEADENHALL.

FRIDAY, May 24.—The supplies of meat on sale here are large, and owing to the unfavourable weather, the trade is in a sluggish state at barely late rates.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	0	Middling mutton	3	10	4	4

Large Pork	4	0	4	4	Lamb	5	4	7	4
Inferior mutton	3	2	3	8					

HOP MARKET.

BOROUGH, Monday, May 20.—Our market has been somewhat less active the last few days, but from the few good samples on offer prices are firm, and the tone of the trade healthy. We have a few reports of fly, to the extent of from one to five on a leaf, from the Weald of Kent and East part of Sussex. The duty is estimated at 150,000*l*. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 140s, 189s.

FRIDAY, May 24.—As regards good and fine samples of hops, the market may be considered firm, and prices are well supported. Medium and inferior qualities, however, are a heavy sale, at about previous currencies. The duty is 140,000*l* to 150,000*l*.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, May 20.—During the past week the arrivals coastwise have been large for the season, and the prices of the former week were not maintained; trade very dull at the following quotations:—Yorkshire Flukes, 120s to 140s; Lincolnshire Regents, 80s to 100s; Dunbar red soil ditto, 120s to 140s; North Berwick, 105s to 120s; Perth, Forfar and Fife ditto, 80s to 100s; ditto, ditto, ditto Rocks, 70s to 80s; ditto, ditto, ditto Reds, 70s to 75s; French Whites, 60s to 80s; Belgian ditto, 60s to 70s; Dutch ditto, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, Friday, May 24.—These markets have been well supplied with old potatoes, and a few samples of new have been on sale, for which 15s to 17s per cwt has been obtained. For the former, the trade is in a sluggish state, at, in some instances, rather easier currencies. York Flukes are quoted at 135s to 150s; Scotch Regents, 90s to 140s; Dunbar do. 140s to 160s; other kinds, 70s to 85s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 12s to 2*l* 2s per load. Trade heavy.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade dull.

COAL MARKET.

FRIDAY, May 24.—Wall's-end:—Stewart's 17s 6d—South Hetton 17s 6d—Trimdon Hartlepool 16s 3d—Hartlepool 17s—Braddyl's Hetton 16s 6d—Russell's Hetton 16s 6d—South Hartlepool 15s 9d—Wharncliffe 15s 3d—Kelloe 16s 3d—Thorpe 14s 9d—Tunstal 16s. West Hartley 16s—North Percy Hartley 15s—Davidson's Hartley, 16s—Hasting's Hartley 16s. Ships at market, 42; sold, 32.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 24.—There is not much business doing here this week, partly owing to the Whitsun holidays and partly to the public sales in London being still in progress.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 24.—Market very dull. In absence of buyers, quotations almost nominal. Wheat 2d, flour 6d, Indian corn 1s to 1s 6d, beans 6d, oats 1d, and oatmeal 6d, lower.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 24.—The demand for manufactured iron during the past week has been but limited, prices for good brands remaining without alteration. In Scotch pig iron, there have been but few transactions, with very trifling fluctuation in price. The copper market very flat, and little doing in any other metals.

The Gazette.

TUESDAY, May 21.

BANKRUPTCIES ANNULLED.

W. Reading, Mortimer street, Cavendish square, coachbuilder.
P. H. Wood, Manchester, brewer.
T. Retaken, late of Swansea, grocer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 11th of May amounted to 518,470*l*, and for the corresponding week of last year to 513,910*l*; showing an increase of 4,560*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 228,458*l*, and for the corresponding week of 1860 to 226,434*l*, showing an increase of 2,024*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 20.—The railway market was firmer in the morning, several stocks showing an advance; but on the publication of the later news from America a reaction took place. In the colonial market, Indian guaranteed stocks continued in fair demand and firm. East Indian advanced to 100 to , while Grand Trunk of Canada remained at 19½ to 20. There was no change of importance in foreign descriptions. In American securities, Illinois Central shares were higher. Mines were inactive, and in several cases showed a reduction, especially East Caradon, St John del Rey, and United Mexican. Miscellaneous descriptions left off about the same as on Saturday.

TUESDAY, May 21.—The railway market, to-day, was steady, but without business, the present stagnation being increased by the occurrence of the holidays. Lancashire and Yorkshire and Great Western were in more demand, and closed about ¾ per cent. higher; the latter stock at one period experienced a more considerable advance. York and North Midland, South-Eastern, Caledonian and Sheffield were also firmer. London and North-Western and Midland showed an unfavourable tendency, but left off without alteration in price. Indian guaranteed stocks continued in demand, and in several cases a fresh rise took place. Canadian descriptions remained at former prices. In the foreign market, South-Austrian and Lombardo-Venetian shares improved to par to ⅛ pm. American railway securities were rather dull, and Illinois Central shares declined 1 dol. There was little doing in mines, but the quotations generally showed steadiness. Joint stock banks closed about the same as yesterday. In miscellaneous descriptions, Canada Land shares were quoted lower.

WEDNESDAY, May 22.—The railway market remained inanimate, and the daily transactions continued unimportant. The final quotations were in several instances lower than yesterday, especially of Midland, Lancashire and Yorkshire, London and North-Western, and South-Eastern. Great Western and Caledonian, on the other hand, advanced. No change of importance took place in colonial descriptions. In the foreign market, Great Luxembourg shares improved, while Lombardo-Venetian relapsed to ⅛ dis. American railway securities generally closed the same as yesterday. Panama bonds, however, were lower. The bargains in mines were moderate, and in several descriptions a decline was shown. In joint stock banks the new shares of the London Chartered of Australia were flatter on the announcement of the call. Miscellaneous descriptions left off without alteration.

THURSDAY, May 23.—In the railway market there were few transactions, and prices generally closed the same as yesterday. Lancashire and Yorkshire, however, and Great Western receded, while Great Northern and Sheffield showed a slight improvement. In the colonial market, Indian guaranteed descriptions continued firm, and East Indian experienced a further advance. Canadian were dull, Great Western shares closing at 10⅞ to ⅞, and Grand Trunk stock, 19½ to 20. In foreign railways Bahia shares improved. American railway securities were flat, Illinois Central and New York and Erie especially exhibiting a reduction. There was scarcely any business in mines, and the principal change was a rise in East Caradon.

FRIDAY, May 24.—The market, to-day, was firmer in character. The principal advance was in Midland stock, which has risen to 120½, "buyers." There was also arise of fully ½ per cent. in Lancashire and Yorkshire, and ⅛ to ¼ per cent. in several of the other principal stocks. London and North-Western stock was quoted 93½ to 94; Great Western, 72 to ¼; Lancashire and Yorkshire, 109¼ to ⅜; Caledonian, 96¾ to 97¼; South-Eastern, 79⅞ to 80⅛; and Eastern Counties, 49½ to ⅝. Lombardo-Venetian Railway shares were quiet, at 3-16 to 1-16 discount. Great Western of Canada, Antwerp and Rotterdam, and East Indian Railway stocks were in better demand. Mining shares ruled very inactive at about previous quotations.

The Economist's Railway and Mining Share List.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

IMPORTANT NOTICE.
GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the GLENFIELD STARCH, we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL, perfectly pure, nearly tasteless, and free from adulteration of any kind, having been analysed, reported on, and recommended by Professors Taylor and Thomson, of Guy's and St Thomas's Hospitals, who, in the words of the late Dr Pereira, say, that "The finest oil is that most devoid of colour, odour, and flavour," characters this will be found to possess in a high degree. Half-pints 1s 6d, Pints 2s 6d, Quarts 4s 6d, and Five-pint Bottles 10s 6d, Imperial Measure.
79 St Paul's Churchyard, London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and Sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

KEATING'S COUGH LOZENGES.—Judged by the Immense Demand, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.
Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the world.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,
37 BEDFORD SQUARE, LONDON.
Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.
These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.
Dr L. La'Mert may be consulted in Glasgow until the 31st March at 56 Rosebank terrace, St George's road.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.
The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.
Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 29 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

CLERICAL ATTIRE.—E. MOSES and SON having studied every variety of British costumes, are always ready to supply Clergymen of all denominations with clothing either for clerical duties or daily dress.
E. MOSES and SON,
Merchant Tailors, Hatters, Hosiers,
Boot Manufacturers, and General Outfitter.
Corner of MINORIES and ALDGATE.
NEW OXFORD STREET, corner of HART STREET.
Corner of TOTTENHAM COURT ROAD and EUSTON ROAD.
Country Branches:—
SHEFFIELD and BRADFORD, YORKSHIRE.

ASTHMA.—ANOTHER CURE OF 39 Years' Asthma, by DR LOCOCK'S PULMONIC WAFERS.—17 Church lane, Hull.—SIR,—I have suffered more than I can describe from the effects of an asthma, which has for years rendered my days irksome, and my nights sleepless. It was brought on by cold while accompanying the retreat of Sir John Moore. I have had the ablest advice, but nothing has given me one-tenth part of the benefit which Dr Locock's Wafers have, &c. WALTER ERRINGTON, late Grenadier Guards. (Witness, Mr J. C. Reinhardt, druggist, Market place, Hull.) Dr LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice; they have a pleasant taste. Also, Dr LOCOCK'S FEMALE WAFERS, the best medicine for Females; have a pleasant taste. Full directions are given with every box. Price 1s 1½d, 2s 9d, and 11s. Beware of counterfeits.

MEDICAL ADVICE.
DR WATSON, U.S., F.R.A.S., &c. (specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD.
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 29 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used; nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

STEAM NAVIGATION OF the DANUBE.—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

HOLLOWAY'S PILLS.—HEALTH and VIGOUR.—To the most regular livers occasional disturbances of digestion will occur, which may be corrected at once by these famous Pills; the alterative and tonic powers of which cannot be too highly extolled. A dose now and then will prove salutary to every one; but a continued course must be taken by the confirmed invalid. It is wonderful how the appetite and digestion improve in proportion as the Pills exert their wholesome influence over the animal economy. They augment muscular strength and mental vigour. Holloway's Pills frequently cure disease of the digestive organs after all other medicines have failed to afford relief, and they are especially serviceable in disorders of the liver and kidneys.

PIANOFORTES.—CRAMER, BEALE, and CO. Every description on sale or hire, New and Second-hand. Lists gratis, post free.—201 Regentt street.

TEA.—DR HASSALL'S ("The Chief Analyst of the Sanitary Commission of the LANCET on Food,") Report on the Teas and Coffees sold by Messrs STRACHAN and CO., 26 Cornhill, London, E.C.:—"Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs Strachan and Co., I have subjected the whole of them to Microscopical Examinations and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory.'

A full report of the above analysis, also list of prices, can be had on application to Messrs Strachan and Co., 26 Cornhill, E.C., London.

Carts to all parts of London daily.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France; as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

FURNITURE CARRIAGE FREE.—Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free, This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co., Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value".

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

political support has ever prospered, or will ever prosper. An immense experience proves that corrupt business is bad business; and if any Irish members have, as would seem to appear from Father Daly's mission, *tried* to be bribed on the present occasion, we can only say that they adhered to the original principles propounded by Mr Lever, who was active in the foundation of the Galway Company; and they have been so unfortunate as, in this instance, to treat with a Government sufficiently prudent and sufficiently uncorrupt to decline all their overtures in the most explicit manner.

It is pitiful to have to complicate the final decision of an important financial question with the petty details of a local corruption. But the avowed argument of the leaders of the Conservative Opposition, though it is better, is very little better—at any rate is not worthy of them. It is easy for Mr Disraeli to draw out at length an ingenious series of historical statements, showing that he has always been invariably consistent throughout this entire discussion. *But if he had come in, what would he have done?*

He has admitted the surplus,—he has endeavoured to dispose of more than the surplus,—he has repudiated those who think Mr Gladstone too extravagant,—he has accepted the political guidance of those who wish to make much larger remissions even than the present Budget makes. If, therefore, he had come into office, he must have made those remissions. Yet every man of the world knows that half his own party would disapprove of his so doing,—that almost all of them sympathise with Mr Baring and Mr Hubbard, who consider Mr Gladstone too sanguine, who fear either an augmentation of expenditure or a diminution of revenue. Nothing in politics of late years has happened so flagrantly immoral as the attempt to steal office upon a Galway question disguised as an Imperial question, upon a packet service issue disguised as a paper duty issue; but it is nevertheless immoral enough for a great political party to follow, though it be only from habit and discipline, an old leader whom they distrust and despise, when he proposes financial reductions which, if he came into power, must be made immediately,—which would be the most pressing measures as soon as he was interested in the responsibility of the Exchequer, but of which scarcely any of the party approve themselves,—and which are infinitely more extravagant than those proposals of Mr Gladstone, to which, in private society, they apply unceasingly and perpetually that opprobrious epithet.

HOW TO KEEP OUT OF IT.

The more the mercantile community reflect on the possible consequences to *them* of the civil war in America, the more anxious they feel upon the subject. There cannot be a doubt or a question but that at any moment very trifling transactions may hurry this country into conflict with one or other of the belligerent parties. Painfully petty transactions have been commonly the cause of the great maritime wars of the world, and in the present case there are several reasons why petty quarrels are more than usually likely at sea. The war is not, as is commonly the case, a war between two great nations with two great fleets which monopolise all the fighting, and which are amenable to strict control:—it is a conflict between the two halves of what was recently a single State—one of which is wholly without a fleet, and both of which intend to rely on privateers as well as on proper ships of war; it is a *hand-to-hand* battle of individual vessels upon the ocean,—and while from the necessity of the case these vessels are exempted from all efficient supervision, they are manned by the most unscrupulous seafaring populations in the world, and are likely to be reinforced by the most accomplished vagabonds from all parts of the earth.

Our own position, too, is very peculiar. We wish to trade with both parties in the strife, and to stand well with both parties. But in the present state of reciprocal infuriation our very neutrality is a sort of censure upon—a kind of aggravation to both. Each of them claims, though upon very different grounds, the moral support of English public opinion; but that public opinion is suspended, and will not pronounce a distinct decision in favour of either, because it discerns grievous sins and errors in the conduct of both, and because it sees a low combativeness and a shameful bloodthirstiness both at the North and at the South. While our judgment is thus balanced, we must expect the usual fate of considerate partiality,—we must expect to be hated by the greater part of both sides. We must reckon on having to do with privateers from North and South, subject to no effectual control, and almost sure to be very wrath against us, and very likely to indulge in outrages which their respective Governments do not approve but cannot prevent.

Moreover, though we are as a nation neutral, and bound by principle and inclination to strict impartiality; yet individuals among us are likely, we may say are sure, to engage with each of the combatants in the sort of commerce most likely to give offence to the other. We are sure to supply both North and South with arms, ammunition, and military stores of every kind: they can buy them nowhere else so cheaply; they can hardly buy them anywhere else on a sudden and in the quantities which they require. We need not pause to point out how dangerous such a trade is during such a conflict and in the present temper of men's minds.

What, then, should be the conduct of our Government? Their first duty, it is certain, is one of extreme caution. A civil war, especially such a civil war, is not a thing to handle for the pleasure of it—is not a matter which should be touched, except after very careful reflection and for a very distinct purpose. We must not intervene in so terrible and anxious a confusion, except upon clear reasons of great duty to our own subjects or to others. There are, unfortunately, many indefinite points of international law which may lead us into considerable difficulty; but, as reasonable men, we should not be anxious to obtain a perfect code of naval warfare from the busy combatants in a rapid revolution. We must wait in the hope that many possible difficulties may never arise, and must deal with them if they come as best we may. But, nevertheless, we must not postpone what is present. One great difficulty has arrived, and others require prevention.

In the first place, the cruisers of the North may search our ships for Southern goods, and may then and there seize those goods. The South have abandoned this right unasked, and without any solicitation or negotiation of ours; but the North adheres to the old rule which we explained at length last week: they take the enemies' goods whenever they can find them in English vessels. They have by special treaties abandoned this right as respects several other countries, but in our case it remains in full force. Our position, therefore, is this: the cargoes of our ships may be seized by the privateers and cruisers of one of the belligerents, although that belligerent does not pretend to seize similar cargoes in the vessels of other nations, and the other belligerent would not seize them in any. We say advisedly that such a state of things *must* not continue. English ships must be put on the same footing as other ships by the Northern States of America as well as by the Southern. As the treaties of the United States with various other nations recognise the rule that neutral ships make neutral goods as "absolute and immutable," it is no hardship to ask them to adhere to it in our case; and we may have a war to-morrow if English ships are searched for every possible article that may perchance belong to the Confederate States, while side by side the ships of other nations are passing forward unchallenged and unsearched.

Secondly, it is most necessary that our traders should know what ports are only blockaded, and what articles are contraband of war and what are not. This is a far easier subject for a Government to deal with than the preceding. They have merely to ask that the belligerents will make known their own decisions to those whom they affect on occasions when it is their interest to make them known. It is the interest of the belligerent who establishes a blockade that it should be effectual, and it cannot really be so unless it is adequately made known to all traders who are likely innocently to violate it. Again, it is the interest of each party to the conflict that the other should not obtain the weapons of war—the means of carrying on the strife—from England: it is therefore the interest of both parties to inform all Englishmen which kind of goods are to be considered weapons of war and which are not—which will be seized as contraband of war and which will be permitted to pass free. On these points our Government have not to negotiate, but to inquire. They have only to ask questions which are necessary to the safety

of a very valuable part of our trade, and this we do not doubt they will do.

The subject before us is not a light one. A war with either of the belligerents would be a terrible calamity, but a war between England and the *Northern* States of America would be the most affecting misfortune which could happen to civilisation. The single good hope of the present painful instant is that the North may rise into a great, a free, and a noble community, free from the taint of slavery, and able to take that moral place in the world which the United States ought to have taken, but which they have long ceased to take. If England should be unfortunately hurried into a collision with this people at the crisis of their history, the results must be awful to them, to us, and to the world; and yet, while ships are subject to peculiar and great disadvantages, such an event is by no means unlikely.

THE STATE OF TRADE.

THE CIVIL DISTURBANCES IN AMERICA.

THE critical position of our foreign trade, and the recent rapid changes in the money market of Lombard street, give an unusual degree of interest to the Board of Trade Returns just issued, and those returns throw an unusually distinct light on our commercial position. We say that business is slack, and the returns prove it. Our exports for the four months ending the 30th of April were—

	£
In 1859	41,851,524
1860	41,834,347
1861	38,574,462

showing a diminution in our export trade at the rate of nearly 10 millions per annum. It may be said that this is not a large sum when compared with the whole export trade of England. Nor is it. But we are to remember that a small change in actual production will change a brisk trade into a slack trade, or a slack trade into a brisk trade. In all but the very worst times the great mass of production and of consumption goes on very much as usual. Very many are ruined when variations are vast, absorbing, or extreme.

Again: the returns supply two elements of critical importance to the present state of the money market. First, they show how much of our capital is absorbed in our import trade. The returns of the real value of the *three* months to the end of March are:—

	£
1859	23,298,064
1860	28,731,063
1861	34,311,627

showing an increase of nearly six millions on the quarter, and at the rate of about twenty-two millions on the year. year. By far the most important item is of course food:—

	Wheat. £	Wheatmeal and Flour. £
In 1859 we imported	1,327,718	533,286
1860 —	765,188	346,189
1861 —	5,060,154	1,776,791

And the augmentation of the import of barley, Indian corn, and other grain is considerable, though not of equal importance. Of the wheat the United States sent—

	£
In 1859	5,228
1860	82,899
1861	1,910,957

We need not observe that the continuation of these heavy drains on our resources is the main reason that capital is not so plentiful, notwithstanding the diminution in our export trade.

Secondly, these returns explain the scarcity of bullion. In the four months

	£
We have exported	8,476,159
— imported	6,586,208
Giving a difference of	1,889,951

The reason is that we have not received our usual supplies *from* America, and that we have sent unusual quantities *to* America.

We imported from America—

	Gold and Silver Bullion. £
In 1859	1,759,174
1860	808,733
1861	34,212

We sent to America—

	Gold and Silver Bullion. £
In 1859	10,406
1860	1,955
1861	3,168,313

and we should have experienced a yet greater scarcity of bullion if our exports to other quarters had been the same as in former years. They have, however, been considerably less. The exports of bullion were:—

	To France. £	To the East. £
1859	4,075,010	6,891,906
1860	2,641,239	5,063,142
1861	1,056,258	3,620,687

We see in these simple figures the record of the causes of much that has occurred in Lombard street.

On our trade with America these tables also throw an unusual light. Our commerce with the South and with the North is now for the first time divided in them. It appears that all our direct exports are to the North: the figures are:—

	£
Exports to Northern States	3,922,133
— Southern —	174,566

showing a startling contrast in the amount we actually sell to the two belligerents. The contrast is nearly as remarkable in what we buy, only it is reversed:—

	£
Imports into Great Britain from Northern ports	4,697,868
— — Southern —	9,136,186

It is therefore difficult to say with which of the combatants in this miserable struggle we are the most connected. One party supplies us with the materials of our industry, the other party purchases the fruits of that industry from us.

The effect of the American crisis and of our own bad harvest upon trade is very striking:—

	£
In the quarter ending March 31, 1859, we imported from America	6,901,609
— — 1860 — —	11,084,113
— — 1861 — —	13,834,051
In the quarter ending March 31, 1859, we exported to America...	6,202,943
— — 1860 — —	5,822,109
— — 1861 — —	4,096,679

showing that there is in 1861 a balance adverse to England of 9,700,000*l on the transactions of three months.*

THE PRACTICAL OPERATION OF THE AMERICAN CONSTITUTION AT THE PRESENT EXTREME CRISIS.

THE civil war between what were once the United States of America has excited an interest, not merely in England, but also throughout the civilised world, which has not been approached since the close of the great struggle of the revolted colonies with their mother country. The sudden outbreak of latent hatreds, the astounding rapidity of important events, were sure to excite earnest and attentive observation.

But sufficient attention has not been paid to the peculiar working of the American Constitution at the critical instant of the whole federal history. Every student of that remarkable document has been impressed with its extreme elaboration. Its primitive principle is the simple one of pure democracy, but in its details there is a singular accumulation of structural refinement and artificial combination. It has always been doubted whether the union of such a violent principle to such delicate machinery would be fitted for the exciting scenes and shifting requirements of a great crisis. The crisis has come, and what has been the result?

We fear it must be said that the result has been an unfavourable one. We do not speak now of the ultimate ending of the present struggle. We are never anxious to be prophets: we know too well the difficulty and complexity even in affairs reputed simple, and we certainly will not prophesy the issue of unprecedented and unexpected events. We are simply analysing the past. We only say that at the crisis of American history the peculiarities of the American Constitution have not corresponded to the hopes and wishes of its wise and well-meaning framers, but have for the most part been purely pernicious.

The decisive test of real excellence in a political Constitution at a great crisis is its tendency to place in power the statesmen of the country best fitted to meet it, and its further tendency to give them every possible help and attainable aid in the arduous enterprise of meeting it. Has the

American Constitution done this? It would be hardly too much to say that it has done the very contrary; that it has placed in power the very men least fitted to cope with the present emergency; and that it has encumbered them with great accessory difficulties while they were coping with it.

At the very outset of the quarrel the Constitution occasioned a needless danger. The South threatened to secede because Mr Lincoln had been elected President. Under almost any other free Constitution which has ever existed, and certainly under every good free Constitution, the Executive authority whose function it was to oppose secession would have been placed exclusively in the hands of those who were desirous so to oppose it. At an instant of violent irritation the dissentient minority were anxious to break loose from the control of the majority. The majority were at that time, whatever may be the case now, by no means fanatical or irritated or overbearing. They wished to preserve the Union, and under a well-framed Constitution they would have had the power of using the force of the State to preserve the State. But not so under the American Constitution as practically worked. An artificial arrangement prolongs the reign of each President many months after the election of his successor. In consequence the Executive authority was, during a considerable and critical interval, in the hands of those who by birth, habit, and sympathy were leagued with the dissentient minority. Mr Buchanan and his Ministers had always been attached to the party of the South, and were the last persons to act decisively against it. It is the opinion of many well-informed persons that there was a sufficient Unionist party in several of the seceding States to have prevented the present movement there if the Federal Government had acted with vigour and celerity. And, whether this be so or not, it remains a singular defect in the working of the American Constitution that it gave power at the decisive moment to those least likely to use that power well, —that just when a revolt was impending, it placed the whole Executive influence and the whole military force in the unfettered hands of the political associates of the revolters.

Nor does the accession of Mr Lincoln place the Executive power precisely where we should wish to see it. At a crisis such as America has never before seen, and as it is not, perhaps, probable she will see again, the Executive authority should be in the hands of one of the most tried, trusted, and experienced statesmen of the nation. Mr Lincoln is a nearly unknown man—who has been but little heard of—who has had little experience—who may have nerve and judgment, or may not have them—whose character, both moral and intellectual, is an unknown quantity—who must, from his previous life and defective education, be wanting in the liberal acquirements and mental training which are principal elements of an enlarged statesmanship. Nor is it true to say that the American *people* are to blame for this—that they chose Mr Lincoln, and must endure the pernicious results. The *Constitution* is as much to blame as the people, probably even more so. The framers were wisely and warmly attached to the principles of liberty, and, like all such persons, were extremely anxious to guard against momentary gusts of popular opinion. They were especially desirous that the President to whom they were intrusting vast power should be the representative, not of a small section of the community, but of a really predominant part of it. Accordingly, they not only established a system of double election, in the hope that the "electoral college" (of which the electors were chosen in certain proportions by each State) would exercise a real discretion in the choice of President, and be some check on popular ignorance and low violence, but they likewise provided that an absolute majority of that "electoral college" (a majority, that is, greater than one-half of the whole) should give their votes for the elected candidate. In any other event the election was to be void, and the right of choice lapsed in a peculiar and complicated way. The effect has been painfully different from the design. In reality, the "electoral college" exercises no choice: every member of it is selected by the primitive constituency *because* he will vote for a certain Presidential candidate (for Mr Lincoln or Mr Douglas, and so on), and he does nothing but vote accordingly. The provision requiring the consent of an absolute majority has had a still worse effect; it has not been futile, for it has been pernicious. It has made it very difficult to secure *any* election. A nation tends to split into many sections, and each section has its leader; each section has some one whom it would desire more than any one else to see at the head of the State when the great prize of that high place is put up for immediate competition. Still more, every section has its peculiar enmities and jealousies; every man of the least mark is sure to say something or to do something which will offend some large class; if he has had a long public life, probably he will have alienated many. In consequence it is only by a long previous deliberation and consultation that any Presidential election can ever be secured. If every one stood who pleased, and every one voted for whom he pleased, there would be no election at all. In practice each party selects at a preliminary caucus the most unexceptionable member whom they can find; they place various names in a complicated and successive "ballot," and it is not until some one of them gains a commanding majority that the party candidate is selected. Naturally, this very unexceptionable person is one of the most obscure members of the whole party: a very commonplace, ordinary person. He is almost always one of the lowest, the least known member of the party; and out of the party candidates so nominated the President is chosen. If the wit of man had devised a system specially adapted to bring to the head of affairs an incompetent man at a pressing crisis, it could not have devised one more fit; it would not probably have devised one as fit.

And when Mr Lincoln was elected, the practical working of the American Constitution prevented him from giving due attention to the arduous difficulties of the terrible position in which he was placed,—the most terrible position in which an inexperienced politician ever has been placed,—and compelled him to occupy himself with petty details of patronage, which in ordinary times would have been tedious, and which under a good Constitution would have been unnecessary. The effect of the periodical election of the President has been to make everything turn upon that election. Everything is regarded with a view to that:—great questions, public duties, political efficiency, are secondary to that. The whole patronage of the country is turned into one great bribe. After each election at which a new party is victorious, every political office, large and small, changes hands: the President who comes in turns out all the friends of his predecessor, and brings in all the friends he has secured by previous hopes and previous promises. The labour of this change of offices is immense. Mr Lincoln is described by eye-witnesses as having been overwhelmed and bowed down by the million minute difficulties which such a system inevitably causes, by the detestable necessity of deciding on the respective fitness of five thousand men for five hundred postmasters' places, by the nauseous accumulation of low detail with which he was burdened just when the very existence of the State was tottering.

Even now the Constitution of the United States is producing great evil. A President, especially a new, an untried, and comparatively untrained politician like Mr Lincoln, ought to be able to call to his aid a popular assembly, animated by all the feelings which a great crisis calls forth in a great people, and containing all the wisdom which the whole nation can collect to meet that crisis. Mr Lincoln has no such power. He can, it is true, convene an extraordinary session of the existing Congress; but that Congress was elected years since, when no such crisis as the present was ever thought of, when any one who dreamed of it would have been considered to be mad, when other hopes, other fears, and other thoughts absorbed the public mind. Such a Congress would be worse than useless as a counsellor, and might even be very dangerous as a restraint or as an opponent. Mr Lincoln is doubtless right in naming a distant day for its session. But what a commentary is it on the working of a political Constitution, that it compels an inferior, unknown, untried, and tired man to decide upon the national difficulties without aid and without control.

The moral is a plain one. The Constitution of the United States was framed upon a vicious principle. The framers were anxious to resist the force of democracy—to control its fury and restrain its outbursts. They either could not or did not take the one effectual means of so doing; they did not place the substantial power in the hands of men of education and of property. They hoped to control the democracy by

paper checks and constitutional devices. The history we have sketched evinces the result; it shows that these checks have produced unanticipated, incalculable, and fatal evil, but have not attained the beneficial end for which they were selected. They may have ruined the Union, but they have not controlled the democracy.

LORD GREY ON NEW ZEALAND.

It is easy to see why Lord Grey, in spite of the conspicuous ability and strong judgment which he lent to the management of colonial affairs under Lord John Russell's last Government, was always the most unpopular,—we might even use a much stronger word,—of English Colonial Ministers. Whether he thought it his duty to interfere, or abstain from interfering, with the local administrations of the different colonies,—and whether he did the one or the other, he did it with the same air of phlegmatic serenity,—he in fact despised the incipient efforts at self-government, not certainly always very wise, which he beheld. His *bias* was uniformly to believe that the consideration of all important questions in the colony was prejudiced by local passions, and was not benefited by the minuteness of local knowledge;—that the distant Colonial Secretary at home, with his partial and inaccurate knowledge, but with his perfect indifference to the party-interests of the colony, was usually in a far better position for judging colonial disputes than any man honoured with the confidence of the Legislative Assemblies could possibly be. It is true that Lord Grey limits his objection to *party*-government in a young colony, and expresses his belief in the value of representative institutions. In his speech on Wednesday he tells us:—"For himself, he might "say that he had always been of opinion that party-govern- "ment was but very little suited to a colony in the early "stages of its existence, and indeed until it had made some "very considerable progress; and that the real advantages "of representative institutions could, in such a case, be "enjoyed far more fully under the old system, in accordance "with which the Governor was responsible for the due exer- "cise of executive authority, not to the Assembly, but to the "Crown; while of course the power was reserved to the "Assembly to complain to the Crown of any mal-adminis- "tration on his part, and, if necesssary, to appeal to the "Imperial Parliament. The blessings of freedom could, he "believed, be more completely enjoyed under that old system "than under a party-government, and in that view he was "confirmed by the experience of that description of govern- "ment furnished by our Australian colonies, where the bur- "lesque of our own institutions which was exhibited was of a na- "ture, of which those who had watched their proceedings must "feel ashamed." The truth is, however, that no representative institutions of any vitality can be obtained when their vote is without practical weight in the administration, and to give the colonies representative institutions without any influence over the Executive, is to give them simply an effective organisation for clamouring for more influence.

However this may be, Lord Grey's strong disposition to refer any evil that may spring up in the colony to the mischief of party-government has certainly misled his clear intellect in judging this New Zealand war. He will not see the true causes;—he insists on seeing imaginary causes in the representative institutions, which he boldly proposes to suspend at once for three years to come. Let us examine Lord Grey's imaginary causes for the war. He says that the natives have for the last eight years been gradually getting more and more discontented with the British encroachments, and he ascribes it entirely to the want of power in the Executive, hampered by responsible advisers, to conciliate the natives, and to the outbreak of colonial passions against them. No one doubts the fact asserted, but how Lord Grey can attribute it to the interference of the representative Government, when his own model Governor, Sir George Grey, was involved in difficulties of precisely the same kind, and with regard to precisely the same land, at a time when no representative institutions were in operation, it is difficult to understand. Sir George Grey, in his despatch to Earl Grey, dated 2nd March, 1847, says, with regard to exactly the same tribe of natives who have originated the present conflict:—"These indi- "viduals [of the Ngatiawa in Taranaki] have been quarrel- "ling amongst themselves regarding their respective claims, "and in order that there might be much to pay for, have "prevented the Europeans occupying any additional land, "although many hundred thousands of acres of the richest "soil are lying perfectly neglected and useless, while many "European families have been left in comparative want. "Indeed, the inability of the natives to adjust their respec- "tive claims now makes them unwilling to allow the land "to be sold at all, and they constantly assert that those "natives who wish to sell land have no right to dispose of "it." Indeed, Sir George Grey adopted at one time with regard to this very block of land a policy far less favourable to the natives than the present Governor, instructing the Land Commissioner that "those natives who refuse to assent "[to the sale] must distinctly understand that the Govern- "ment does not admit that they are the true owners of the "land they have recently thought fit to occupy." It is true that he afterwards changed his policy and admitted the proprietary right in the individual occupiers, as the present Government of New Zealand have also done,—but it is certain that Sir George Grey was embarrassed throughout his administration by exactly the same difficulties, which have with few and short intervals been the permanent difficulty of the colony, and that it is by no means due to any causes which have begun to operate during the last eight years. The simple fact is, that the hostility of the natives to English encroachment has grown with the growing immigration, and their own decreasing numbers,—so that a crisis which was averted with difficulty on occasion of previous sales of land from the same regions—(sales which were conducted on exactly the same principles in every respect, and in one of which—the sale of the Bell Block—W. Kingi had already shown a disposition to interfere)—had become ripe for a last conflict in 1859.

When Lord Grey urges that a deeper cause of dissatisfaction than the land question is the absorption of educational funds to which the Maoris have a claim, to European interests, he makes a statement so new and unforeseen that it is impossible to contradict it. All we know is, that two or three years ago an elaborate scheme for establishing Maori Courts and an incipient jury system throughout the native districts was brought in by the native minister and sanctioned by the Assembly, and that it failed, we believe, principally from the complete apathy of the Maoris themselves.

Lord Grey's third cause of the war is the prominent responsiblity devolved on Mr Richmond, one of the representatives of the disturbed district Taranaki, in the New Zealand administration. He thinks that to see a representative of the very settlers with whom the dispute has arisen practically at the head of the Government, must make the natives feel utterly hopeless of attaining justice, and so drive them to desperation. The fact is, however, that Mr Richmond's remarkable abilities, and not his sympathy with the Settler party at Taranaki, have brought him to his present position. He was long exceedingly unpopular with a large number of his constituents for the resolutely conciliatory, or, as they said, compromising tone of his policy towards the natives. No politician in New Zealand has done more to raise the tone in which the rights of the natives is discussed than Mr Richmond. His speeches throughout his now tolerably long administration have been distinguished by a steady sympathy for the Maoris, and a deep sense of the obligation of the Colonial Government to serve, and protect, and civilise them, which, as we happen to know, often led him into views by no means acceptable to many of his fellow-colonists.

It is true that Mr Richmond, like all thinking men, is deeply convinced that the best service we can do the natives is to *govern* them,—mildly but firmly. And no government is possible without introducing and carrrying steadily out, something like a legal *system*. Lord Grey would have the Colonial Government waive every right, however clear, when it became evident that it was distasteful to the natives, rather than run the risk of war. We confess we see neither justice nor mercy in such statesmanship. The native party cry out for a popular tribunal to judge native land claims. There is nothing for which either the settlers or Government of New Zealand more heartily wish,—but it was the entire contempt of the natives for the decisions of such a

Court when it was established that caused its abeyance, and threw back the decision of questions of territorial title on the hands of the Executive Government. There could be no more cruel policy than to yield to native menaces when the Government are clear as to the justice of their claims. This is really the policy which pampers them into rebellion, —not the policy which tranquillises, while it educates them for the arts of peace.

A COMPARATIVE VIEW OF THE AMERICAN TARIFFS PRESENT AND PAST.

We reprint from a valuable American publication the following important table, showing the duties levied by each general tariff since the formation of the Government of the United States, upon nine leading heads of imports:—

	Distilled Spirits.	Glass.	China.	Sugar.	Coffee.
July 4, 1789	10 c. gallon	10 per cent.	10 p. c.	1 c. lb	2½ c. lb
August 10, 1790...	15 —	12½ —	12½ —	1½ —	4 —
May 2, 1792	28 —	15 —	15 —	1½ —	4 —
June 7, 1794	28 —	20 —	15 —	1½ —	4 —
March 3, 1797.....	29 —	20 —	15 —	2½ —	5 —
March 26, 1804...	29 —	22½ —	17½ —	2½ —	5 —
July 1, 1812, all duties doubled...	60 —	40 —	30 —	5 —	10 p. ct.
April 27, 1816 ...	42 —	20 —	20 —	3 —	5 c. lb
May 22, 1824	42 —	30 & 3 c. lb.	20 —	3 —	5 —
May 19, 1828	57 —	30 & 3 —	20 —	3 —	5 —
July 14, 1832	57 —	30 & 3 —	20 —	2½ —	Free.
March 2, 1833*

* Where the duty exceeds 20 per cent., the excess to be reduced biennially until it should cease, 1842.

THE LETTERS OF MARQUE IN THE CONFEDERATE STATES.

We give the following most important enactment of the Confederate States on conditions of privateering and the transit of neutral goods in neutral vessels:—

An Act recognising the existence of war between the United States and the Confederate States, and concerning letters of marque, prize and prize goods.

Whereas the earnest efforts made by this Government to establish friendly relations between the Government of the United States and the Confederate States, and to settle all questions of disagreement between the two Governments upon principles of right, justice, equity, and good faith have proved unavailing, by reason of the refusal of the Government of the United States to hold any intercourse with the commissioners appointed by this Government for the purpose aforesaid, or to listen to any proposal they had to make for the peaceful solution of all causes of difficulty between the two Governments; and whereas the President of the United States of America has issued his proclamation, making requisition upon the States of the American Union for 75,000 men, for the purpose, as therein indicated, of capturing forts and other strongholds within jurisdiction of and belonging to the Confederate States of America, and has detailed naval armaments upon the coasts of the Confederate States of America, and raised, organised, and equipped a large military force to execute the purpose aforesaid, and has issued his other proclamation announcing his purpose to set on foot a blockade of the ports of the Confederate States; and whereas the State of Virginia has seceded from the Federal Union, and entered into a convention of alliance, offensive and defensive, with the Confederate States, and has adopted the provisional constitution of the said States, and the States of Maryland, North Carolina, Tennessee, Kentucky, Arkansas, and Missouri have refused, and it is believed that the State of Delaware, and the inhabitants of the territories of Arizona and New Mexico, and the Indian territory south of Kanzas will refuse to co-operate with the Government of the United States in these acts of hostilities and wanton aggression, which are plainly intended to overawe, oppress, and finally subjugate the people of the Confederate States; and whereas, by the acts and means aforesaid, war exists between the Confederate States and the Government of the United States and the States and territories thereof, except the States of Maryland, North Carolina, Tennessee, Kentucky, Arkansas, Missouri, and Delaware, and the territories of Arizona and New Mexico, and the Indian territories south of Kanzas. Therefore,

Sec. 1. The Congress of the Confederate States of America do enact that the President of the Confederate States is hereby authorised to use the whole land and naval force of the Confederate States to meet the war thus commenced, and to issue to private armed vessels commissions or letters of marque and general reprisal, in such form as he shall think proper, under the seal of the Confederate States, against the vessels, goods, and effects of the Government of the United States, and of the citizens and inhabitants of the States and territories thereof, except the States and territories hereinbefore named; provided, however, that property of the enemy (unless it be contraband of war) taken on board a neutral vessel shall not be subjected to seizure under this Act; and provided further, that vessels of the citizens or inhabitants of the United States now in the ports of the Confederate States, except such as have been since the 6th of April last, or may hereafter be, in the service of the Government of the United States, shall be allowed thirty days after the publication of this Act to leave said ports and reach their destination; and such vessels and their cargoes, except articles contraband of war, shall not be subject to capture under this Act during said period, unless they shall have previously reached the destination for which they were bound on leaving said ports.

Sec. 2. That the President of the Confederate States shall be and he is hereby authorised and empowered to revoke and annul, at pleasure, all letters of marque and reprisal which he may at any time grant pursuant to this Act.

Sec. 3. That all persons applying for letters of marque and reprisal, pursuant to this Act, shall state in writing the name and a suitable description of the tonnage and force of the vessel, and the name and place of residence of each owner concerned therein, and the intended number of the crew; which statement shall be signed by the person or persons making such application, and filed with the Secretary of State, or shall be delivered to any other officer or person who shall be employed to deliver out such commissions, to be by him transmitted to the Secretray of State.

Sec. 4. That before any commissions or letters of marque and reprisal shall be issued as aforesaid, the owner or owners of the ship or vessel for which the same shall be requested, and the commander thereof for the time being, shall give bond to the Confederate States, with at least two responsible sureties, not interested in such vessels, in the penal sum of 5,000 dols; or if such vessel be provided with more than 150 men, then in the penal sum of 10,000 dols; with the condition that the owners, officers, and crew, who shall be employed on board such commissioned vessels, shall and will observe the laws of the Confederate States, and the instructions which shall be given them according to law, for the regulation of their conduct; and will satisfy all damages and injuries which shall be done or committed contrary to the tenour thereof by such vessel during her commission, and to deliver up the same when revoked by the President of the Confederate States.

Sec. 5. That all captures and prizes of vessels and property shall be forfeited and shall accrue to the owners, officers, and crews of the vessels by whom such captures and prizes shall be made; and, on due condemnation had, shall be distributed according to any written agreement which shall be made between them; and if there be no such written agreement, then one moiety to the owners, and the other moiety to the officers and crew, as nearly as may be, according to the rules prescribed for the distribution of prize money by the laws of the Confederate States.

Sec. 6. That all vessels, goods, and effects, the property of any citizen of the Confederate States, or of persons resident within and under the protection of the Confederate States, or of persons permanently within the territories, and under the protection of any foreign Prince, Government, or State in amity with the Confederate States, which shall have been captured by the United States, and which shall be recaptured by vessels commissioned as aforesaid, shall be restored to the lawful owners, upon payment by them of a just and reasonable salvage, to be determined by the mutual agreement of the parties concerned, or by the decree of any court having jurisdiction, according to the nature of each case, agreeably to the provisions established by law. And such salvage shall be distributed among the owners, officers, and crews of the vessels commissioned as aforesaid, and making such captures, according to any written agreement which shall be made between them; and in case of no such agreement, then in the same manner and upon the principles hereinbefore provided in case of capture.

Sec. 7. That before breaking bulk of any vessel which shall be captured as aforesaid, or other disposal or conversion thereof, or of any articles which shall be found on board the same, such captured vessel, goods, or effects shall be brought into some port of the Confederate States, or of a nation or State in amity with the Confederate States, and shall be proceeded against before a

competent tribunal; and after condemnation and forfeiture thereof shall belong to the owners, officers, and crew of the vessel capturing the same, and be distributed as before provided; and in the case of all captured vessels, goods, and effects, which shall be brought within the jurisdiction of the Confederate States, the district courts of the Confederate States shall have exclusive, original cognisance thereof, as in civil causes of admiralty and maritime jurisdiction; and the said court or the courts, being courts of the Confederate States, into which such causes shall be removed, and in which they shall be finally decided, shall and may decree restitution, in whole or in part, when the capture shall have been made without just cause; and, if made without probable cause, may order and decree damages and costs to the party injured, for which the owners and commanders of the vessels making such captures, and also the vessels, shall be liable.

Sec. 8. That all persons found on board any captured vessels, or on board any recaptured vessel, shall be reported to the collector of the port in the Confederate States in which they shall first arrive, and shall be delivered into the custody of the marshal of the district, or some court or military officer of the Confederate States, or of any State in or near such port, who shall take charge of their safe keeping and support at the expense of the Confederate States.

Sec. 9. That the President of the Confederate States is hereby authorised to establish and order suitable instructions for the better governing and directing the conduct of the vessels so commissioned, their officers and crews, copies of which shall be delivered by the collector of the Customs to the commanders when they shall give bonds as before provided.

Sec. 10. That a bounty shall be paid by the Confederate States of 20 dols for each person on board any armed ship or vessel belonging to the United States at the commencement of an engagement, which shall be burnt, sunk, or destroyed by any vessel commissioned as aforesaid which shall be of equal or inferior force, the same to be divided as in other cases of prize money, and a bounty of 25 dols shall be paid to the owners, officers, and crews of the private armed vessels commissioned as aforesaid, for each and every prisoner by them captured and brought into port, and delivered to an agent authorised to receive them, in any port of the Confederate States; and the Secretary of the Treasury is hereby authorised to pay or cause to be paid to the owners, officers, and crews of such private armed vessels, commissioned as aforesaid, or their agent, the bounties herein provided.

Sec. 11. That the commanding officer of every vessel having a commission or letters of marque and reprisal, during the present hostilities between the Confederate States and the United States, shall keep a regular journal, containing a true and exact account of his daily proceedings and transactions with such vessel and the crew thereof; the ports and places he shall put into or cast anchor in; the time of his stay there, and the cause thereof; the prizes he shall take, and the nature and probable value thereof; the time and places when and where taken, and in what manner he shall dispose of the same; the ships or vessels he shall fall in with; the time and places when and where he shall meet with them, and his observations and remarks thereon; also, of whatever else shall occur to him, or any of his officers or marines, or be discovered by examination or conference with any marines or passengers of or in any other ships or vessels, or by any other means, touching the fleets, vessels, and forces of the United States, their posts and places of station and destination, strength, numbers, intents, and designs, and such commanding officer shall immediately on his arrival in any port of the Confederate States, from and during the continuance of any voyage or cruise, produce his commission for such vessel, and deliver up such journal so kept as aforesaid, signed with his proper name and handwriting, to the collector or other chief officer of the Customs at or nearest to such port; the truth of which journal shall be verified by the oath of the commanding officer for the time being, and such collector or other chief officer of the Customs shall, immediately on the arrival of such vessel, order the proper officer of the Customs to go on board and take an account of the officers and men, the number and nature of the guns, and whatever else shall occur to him on examination material to be known, and no such vessel shall be permitted to sail out of port again until such journal shall have been delivered up, and a certificate obtained, under the hand of such collector or other chief officer of the Customs, that she is manned and armed according to her commission; and, upon delivery of such certificate, any former certificate of a like nature which shall have been obtained by the commander of such vessel shall be delivered up.

Sec. 12. That the commanders of vessels having letters of marque and reprisal as aforesaid, neglecting to keep a journal as aforesaid, or wilfully making fraudulent entries therein, or obliterating the record of any material transactions therein where the interest of the Confederate States is concerned, or refusing to produce and deliver such journal, commission, or certificate, pursuant to the preceding section of this Act, then and in such cases the commissions or letters of marque and reprisal of such vessels shall be liable to be revoked; and such commanders respectively shall forfeit for every such offence the sum of 1,000 dols, one moiety thereof to the use of the Confederate States, and the other to the informer.

Sec. 13. That the owners or commanders of vessels having letters of marque and reprisal as aforesaid who shall violate any of the Acts of Congress for the collection of the revenue of the Confederate States, and for the prevention of smuggling, shall forfeit the commission or letters of marque and reprisal, and they and the vessels owned or commanded by them shall be liable to all the penalties and forfeitures attaching to merchant vessels in like cases.

Sec. 14. That on all goods, wares, and merchandise captured and made goods and lawful prize of war, by any private armed ship having commission or letters of marque and reprisal under this Act, and brought into the Confederate States, there shall be allowed a deduction of 33⅓ per cent. on the amount of duties imposed by law.

Sec. 15. That 5 per cent. on the net amount (after deducting all charges and expenditures) of the prize money arising from captured vessels and cargoes, and on the net amount of the salvage of vessels and cargoes recaptured by the private armed vessels of the Confederate States, shall be secured and paid over to the collector or other chief officer of the Customs, at the port or place in the Confederate States at which such captured or recaptured vessel may arrive, or to the Consul or other public agent of the Confederate States, residing at the port or place, not within the Confederate States, at which such captured or recaptured vessels may arrive. And the moneys arising therefrom shall be held and are hereby pledged by the Government of the Confederate States as a fund for the support and maintenance of the widows and orphans of such persons as may be slain, and for the support and maintenance of such persons as may be wounded and disabled on board of the private armed vessels commissioned as aforesaid, in any engagement with the enemy, to be assigned and distributed in such manner as shall hereafter be provided by law.

The following are the conditions of blockade of the Southern ports of America:—

1. That the date of the commencement of the blockade in each locality will be fixed by the issue of a notice by the commanding officer of the squadron appointed to blockade it. It does not, however, appear to be intended that such notice shall be officially communicated to the Governments of neutral nations, or to their representatives in this country.

2. That fifteen days from the beginning of the effective blockade will be allowed in every case for neutral vessels already in port to put to sea.

3. That, until the fifteen days have expired, neutral vessels will be allowed to come out with or without cargoes, and whether their cargoes were shipped before or after the commencement of the blockade.

4. That, except in the last mentioned particular, the ordinary rules of blockade will be strictly enforced.

5. The armed vessels of the neutral states will have the right to enter and depart from the blockaded ports.

Agriculture.

SUMMER GRAZING.

INCREASING THE PRODUCTIVENESS OF PASTURE LAND.

COMPETITION is now operating upon a class of agriculturists who are proverbially slow to move from their ancient ways, the occupiers of feeding pasture land. The business of a grazier is one of much simplicity. As carried on in the midland districts of England, the chief locality of graziers, the business consists of purchasing store cattle and sheep, and feeding them to fatness during the spring, summer, and autumn on the natural herbage of grass land. On the best grazing lands cattle are chiefly fed, a comparatively small proportion of sheep only being used to follow the cattle. On inferior grass lands sheep are grazed in a much larger proportion. It is obvious that success in this branch of husbandry must depend in a great degree on the season,—a very dry or a very wet season being adverse to the rapid and complete fattening of grazing stock. Then much also must depend on the state of the markets for store stock at the time of purchasing, for when store beasts are high in price the grazier's margin for profit is considerably narrowed. There is, too, room for the exercise of judgment in the purchases of store animals, as well as in the management of them, such as the shifting them from pasture to pasture, the adoption of the right medium between understocking and overstocking the pastures, so as to keep all the animals as much as possible in a progressive state of improvement. For some years past we have heard pretty constant, and sometimes rather loud complaints from the occupiers of grazing farms, that their profits are diminishing; that, notwithstanding the high price meat has attained for some years, the great cost of store

stock has left but small returns for feeding; and that the competition of arable farmers, who stall-feed cattle, has pressed heavily on the grass-graziers. So far have these complaints gone, that at various periods we have found intelligent local agriculturists advocating the breaking up all or a considerable portion of grass land, not being what may be called first or second-rate feeding ground. And to some extent this has been done. There are, however, many inducements for both landlords and tenants to desire to retain grazing farms in their actual condition. Considerable cost must be incurred by and in consequence of the conversion of grazing into arable farms; it would often involve a complete change of tenants, and where the land is low lying or of a tenacious character the results might be far from satisfactory. Then a great outlay for buildings must be faced. Recent experience of the effect of wet weather, extending over a long period of time, has led many farmers and landowners to believe that there is less risk, if smaller opportunity for enterprise, on grass than on arable farms. All these and other considerations have their weight, due or undue, in preventing any wholesale conversion of our pasture lands into tillage. Perhaps there is much to be said on both sides. Probably every arable farm should have some grass land, while a portion of arable land would be most valuable to each grazing farm.

There is, however, no doubt that our pasture lands may be rendered much more productive than they are at present. Draining is greatly needed. So a partial application of the system of artificial feeding, which has proved so successful on arable farms, may be usefully adopted. This view of the subject was ably discussed at the London Farmers' Club on the occasion of a lecture by Mr Owen Wallis on "By what Means can the Feeding of Stock on Pasture Land in Spring, Summer, and Autumn be so increased as to supply the Demand of an increasing Population." The lecturer, recognising the increase of population and the advances of material prosperity in this country, confessed that the supply of meat had not kept pace with the demand. The price of meat is now higher than at any time since the close of the French war, and that although the manufacturers are now suffering what may he hoped is only a temporary depression. With a return of prosperity we may regard it as certain that prices of meat will range still higher than they have yet done. What, then, is to be done to increase our meat supplies? All but very inferior soils have been brought into cultivation. "We cannot therefore very greatly extend the area of production." The chief exceptions, Mr Wallis says, are the woodlands of England, which do not pay in their present state so well as they would do if cleared and brought into cultivation either as arable or pasture land, according to situation and circumstances. But it is "by the extension of our artificial pastures, the improvement of our permanent ones, and by calling to our aid the use of cake, meal, and other food, in conjunction with them [pastures], that we must look for the chief increase in the supply" during the periods of the year to which his paper referred. Pasture land improvement has not kept pace with that of arable land. Where the farm consists of both arable and pasture land, the latter is very commonly robbed for the benefit of the former. Instead of getting any artificial assistance, "most of the hay grown on old pastures, and consumed on farms of a mixed character, has found its way, when converted into manure, not to the land which produced it, and which was fully entitled to it, but to the arable portion of the farm." This is quite true. Then draining has been only partially and often ineffectively done on grass land. Indeed some of the occupiers of such land have a prejudice against draining. And this arises from the fact that wet pastures when first drained carry less stock in dry summers than before drainage, because the coarse grasses produced by the superabundant moisture disappear, while, if no extra dressing is given, the better grasses require a year or two to extend themselves over the vacant spaces. But that is no valid reason against drainage, the ultimate benefits of which are large and undeniable. "In the end, however," says Mr Wallis, "the drainage is highly beneficial and the outlay profitable. In my experience I have never yet seen an instance to the contrary." There is much grass land in England which has the repute of having once been good grazing land, but which is now such no longer. "It is owing to this deterioration and the consequent unprofitableness of many of the old pastures, that many of them were broken up. This has been one of the chief causes of the lessened supply of live stock." Another is the substitution of the four-course for the six-course rotation; and Mr Wallis advocated a return on many of the stronger lands to a six-course rotation. More stock might thereby be produced, while the corn grown on the reduced area would be produced at less cost. Both would be beneficial to the farmer. He recalled and reiterated the advice given by the late Earl Spencer to the Northamptonshire farmers, "to turn more attention to the breeding of their own cattle." Lord Spencer found "that his own home-bred steers paid him more per week from the time they were calved to the time they were sold fat, than the cattle he bought for grazing did for the last six months they were feeding." Not only is there a deficiency of young stock for the use of the summer grazier, "arising from the great extension of winter feeding," but the cattle bred on a farm are always found to thrive better than those purchased.

The number of half-fed beasts which are brought to market, especially towards the end of autumn, has often been a matter of observation and complaint. Mr Wallis justly considers it "a positive waste to send thousands of young beasts annually to be slaughtered that are barely in a half-fat state. This, however, is commonly done in the autumn of each year. These beasts are now grazed at so early an age that common pasturage alone does little more than support their growth; they are consequently unfit for the fat stock markets, and ought to be sent, if sold they must be, to the markets for store cattle. Thousands of them having attained maturity, would make really fair good beasts if kept another year, and are worth much more to keep than to sell." Experienced salesmen in the Metropolitan Market had estimated that the cattle sent to London during the grass season; that is from July to the end of November, do not on the average weigh more than about 80 stone (of 8 lbs); and that if they were "really and fairly in a fit state for slaughtering," and with only a little additional feeding, they would weigh on the average 10 stone per head more than they now weigh. Confessedly a large proportion of the cattle sent to market are insufficiently fed. Now the remedy is to supply the summer-fed beasts with a certain portion of cake or other artificial food. This, too, would enrich the pastures permanently. This has been tried in numerous instances with great advantage. The cake or meal is sometimes placed in boxes in the pastures, sometimes cake is thrown on the grass, and in dry weather is so consumed without loss. But the right plan is to have "hovels in the fields suitable for the accommodation of the number of beasts they will graze." These are as much needed for shade in the summer as for shelter in the winter. If the cattle were tied up in these sheds during the heat of the day, and "fed with a portion of cake or meal, and a small quantity of either good hay or chaff given to them, this waste [from racing about the fields when driven by gadflies] would not only be prevented, but they would be rapidly gaining flesh." Mr Wallis is of opinion "that under no circumstances can cake, meal, or hay be given with greater benefit" than under such circumstances. The sheds should have a good coat of thatch, or be covered with faggots or gorse, thatched over to keep the wood dry. These coverings are warm in winter and cool in summer, and are far better than slate roofs. The artificial food should only be given for about the last six weeks, as it will not answer to begin feeding lean animals in that way.

Mr Wallis commences with 4 lbs of cake per day, going up to 6 lbs; making the average for the six weeks 5 lbs per head daily. Egyptian beans ground and mixed with very finely cut straw chaff had also been given very successfully. This plan pursued through the winter, many grass-grazed animals might be brought to market early in the summer, when the Norfolk season has closed and beef is generally very scarce, while there would be less pressure from the grass districts in October and November, when more beasts are sent for sale than there is a demand for.

To this, as a general change of system, we meet with the old obstacles. Mr Wallis said: "I am rather diffident in recommending its [artificial food] extensive use, knowing that cautious men will be slow to adopt it. There are many who will use both artificial food and manure to any reasonable extent on arable land, where it is immediately available and can soon be exhausted, who will be rather backward in using either on permanent pasture; which, when once enriched by the tenant, remains for the future benefit of the landlord." That such a notion is foolish and shortsighted, if the tenant can adopt the system with profit, must be admitted. Yet, Mr Wallis says, "That there are some [landlords] who would be ready to take advantage of a tenant's capital so expended, is probably true; but such cases are, happily, the exceptions and not the rule.....But before cake or meal can be extensively used on pasture land, proper accommodation must be provided and arrangements made for the purpose. Among other things, the large fields must be divided." Sheds, also, must be erected, such as are before referred to, which must be furnished with good wide mangers and so forth. Here we see that the want of leases and consequent security of possession, and the absence of the requisite buildings and divisions of fields, to say nothing of want of draining, prevent the simple yet vast improvement in our grazing pastures pointed out by Mr Wallis.

Of the money value of the plan, he says the cost per head for cake will be about 20s, while the difference between the price of a ripe bullock and one not fully up to the mark is fully double that sum; besides which an extra number of beasts can be so fed on the same quantity of land, "and the rent, taxes, and rates being the same in both cases, a further additional profit is thus obtained, to say nothing of the rapid improvement of the soil." Like other agriculturists, the grazier must move on. "Feeling assured," says Mr Wallis, "that the time has arrived when we can no more depend upon grass alone for our supplies of beef during the grass season than we do upon roots alone during the Norfolk season. In short, we must adapt the practice of winter feeding to our old pastures with such modifications as circumstances require."

In a discussion which followed, Mr Wallis's views were generally acceded to, and several statements in corroboration of those views were made. Mr Hudson (of Castlemore) said, "That, considering the large demands that were made on the feeders of cattle in this country, they would not keep pace with the consumption unless something new was discovered for summer feeding; and he did not know of anything that would supply the market better than a little additional food in the shape of cake when the cattle were at grass." He had himself followed the plan with much advan-

tage. In reply to an inquiry as to the breed of cattle best suited for the purpose, Mr Hudson said "the best of every breed," but that the improvement in the cattle of Wiltshire from the extension of the breed of pure Shorthorns was "perfectly marvellous," and, he added, "the Shorthorn cattle were decidedly the cattle with which to feed the people of England. True, they might better please the pampered palate of the rich by the Highland Scot or the beautiful little Devon; but the million wanted a heavier class of cattle, and the million were the farmers' best customers." This is very true. The farmers, it is clear, are now applying the only sufficient test, the commercial principle, to their business. It is only required that the owners of land should apply the same principle to their own property, and the advance of English husbandry would be, to use Mr Hudson's phrase, "perfectly marvellous."

COMMERCIAL LITERATURE.

A Guide to Indian Investments, Interesting to Shareholders or Intending Shareholders in the following Joint Stock Companies:—East Indian Railway, Great Indian Peninsula Railway, Madras Railway, Scinde Railway, Indus Flotilla, Punjaub Railway, Bombay and Baroda Railway, Eastern of Bengal Railway, Calcutta and South-Eastern Railway, Madras Irrigation Company, Oriental Inland Steam Company, and Peninsular and Oriental Steam Company. By A Manchester Man. London: Trübner and Co. 1861.

This pamphlet gives a careful account of the various schemes for employing English capital in India, and takes a very favourable view of the prospective profit which may be anticipated from that employment. The writer gives a curious statement of the profits made by Indian capitalists who understand their own country. "The Indian railways," he says, "have been almost wholly constructed with English capital; but there are two companies running steamers on the Ganges which have been formed with Indian capital; and here the return, as might have been expected, has been very large. These companies have repeatedly paid dividends to their shareholders of thirty, forty, fifty, and sixty per cent., and even more than that on some occasions; nevertheless the capital attracted by these high rates in India has not been adequate to give such undertakings sufficient extension, and English capital has begun to flow in to supply the want."

On the other hand the author gives:—"The following table of Indian investments, paying five per cent. on the original stock, shows the return which will at once be obtained from 100*l* invested in any of the undertakings specified therein:—

	Present Return per Cent. on Cost Price.
East Indian Railway	5 1-16
Great Indian Peninsula Railway	5¼
Madras Railway	5⅜
Scinde Railway	5½
Indus Flotilla	5½
Punjaub Railway	5½
Bombay and Baroda Railway	5⅝
Eastern of Bengal Railway	5⅝
Calcutta and South-Eastern Railway	5¼
Madras Irrigation Company	4⅞
Oriental Inland Steam Company	11⅜
Peninsular and Oriental Steam Company	6 1-16

"It will be seen from this recapitulation, that by much the largest return to investors, at present prices, is made by the Oriental Inland Steam Company. But as this state of things is the result of exceptional circumstances already changing, it is quite doubtful how long this comparison may hold good; and as steam navigation on the Indian rivers has been found to yield larger returns than any other Indian investment, it may happen, that, even while these pages are passing through the press, the shares in this undertaking may have taken such an upward start as to render the above comparison of the existing scale of returns no longer accurate."

The general conclusion is, that "The two most pressing wants of India are, more abundant irrigation, and cheap means of internal transport, such as rivers and canals afford. Cheap transport implies cheap works; and past experience has shown, that irrigation and river-navigation in India are more profitable enterprises than railways."

We can recommend the pamphlet as sensible in tone, and as conveying a good deal of information upon Indian railways in a concise and unpretending form.

The Cotton Supply. A Letter to J. Cheetham, Esq., President of the Manchester Cotton Supply Association. By a Fellow of the Royal Geographical Society.

This little work is a comprehensive review of the districts of the globe adapted for the cultivation of cotton, and sums up in a few pages the advantages possessed by each quarter of the globe. The author deals with each country separately, commencing with Africa, where he would propose to do away both with the slave trade and slavery through an extensive cultivation of cotton by means of the return of the whole free negro population from Canada and the United States, an undertaking the difficulty of which is sufficiently startling. India may also produce great quantities; but, according to this work, the land tenure is said to be so injurious as to prove a formidable obstacle. The capabilities of Central America are then considered; and lastly, our own colonies are adverted to. From the West Indies the author looks for important moral as well as commercial results by the large and organised use of coolie labour, the introduction of which has been greatly facilitated by the late Chinese law permitting free emigration. The author incidentally mentions a fact not generally known, but still perfectly true, viz., that the acreage of the land at present cultivated for cotton in the Southern States is only about that of Yorkshire.

The Importance of Correct Bookkeeping, with Remarks on the General Employment of Professional Accountants. By Simmons and Elles, Accountants. London. 1861.

This pamphlet contains a summary of the arguments in favour of accurate bookkeeping, which will be readily endorsed by every one connected with trade. It also advocates the more frequent employment of professional accountants, and considers that by this means a great deal of irregular trading and loss may be averted. With the former view we are to some extent disposed to concur, but the latter argument is not in accordance with experience. One of the most disgraceful failures in the crisis in 1857 is a case in point. The house in question regularly appointed a professional accountant to examine periodically their books, and yet during the whole time it existed traded at a systematic loss, recklessly pledged goods, and in short was guilty of the grossest commercial delinquencies outside the pale of the criminal law.

GENERAL LITERATURE.

The English at Home. By Alphonse Esquiros. Translated and Edited by Lascelles Wraxall. 2 Vols. London: Chapman and Hall, 193 Piccadilly. 1861.

The essays which compose these entertaining volumes have been collected from the "Revue des Deux Mondes," in which they originally appeared as letters from England. The author, M. Esquiros, having been exiled from France in consequence of the *coup d'état* of 1851, sought refuge in Belgium, whence he passed into Holland. In the latter country, he tells us, he was "struck by the benefits spread over a small State by a national religion that offered no resistance to the development of liberty," and this gave rise to a resolve on his part "to study on a larger stage the political characteristics of Protestantism, the conditions of a representative government, and the influence of certain institutions on the moral and national life of a people." He came to England, where he seems to have been since residing. Here he found "incarnated in the manners, laws, and public life, that liberty which was pursued in France through so many struggles and has not yet been attained." His first idea was to write about the English constitution, but he wisely deferred this attempt, because, among other reasons, it appeared to him "that, before studying with benefit the political life of a people, and pronouncing on the value of its government, it was necessary to be thoroughly acquainted with its character, customs, resources, territory, and the precise state of the civilisation to which it had raised itself." The result of his studies in these preliminary fields appears in these essays, which he has been contributing for the last three years to the "Revue des Deux Mondes." He requests the readers not to judge of the present work as a whole, but only as a beginning, for his essays are still going on, and he has yet "to make known to France many other phases of the English character, and many other conquests of British civilisation, which are not at all indicated in these volumes." Nevertheless, these volumes, incomplete and miscellaneous as they are, "strive to attain an object," viz., "to refute, on the authority of facts, certain prejudices which prevail in France with respect to the English nation,"—prejudices which M. Esquiros regards as among "the most serious obstacles to the return of political life in France, as well as the greatness and good intelligence of the two nations."

By way of beginning at the very beginning, M. Esquiros opens his description of England by a somewhat lengthy but picturesque sketch of its geological history and extinct animals. Thence he proceeds to describe the various races whose successive incursions have contributed to form the English nation, and having sketched all this, he gracefully descends to the affairs of the present day. He has evidently set himself to study English life in every quarter to which he could penetrate, and, whenever possible, he groups different phases together under some leading idea, with that theoretic taste which so distinguishes his nation from ours. "Modern Europe," he says, "is divided into two groups: the Latin races, who drink wine; and the races more or less Saxon, who drink beer." He then gives us (in three chapters) the "his-

tory of beer," linking together under this head a lively account of the hop-picking in Kent, a description of the several processes in the manufacture of beer, some interesting details about the London draymen, anecdotes of the enigmatical titles of old inns, and a brief sketch of the Temperance Societies,—and the greater part of his descriptions are taken from personal observation. Next he treats of "the eccentric trades of England," which he divides into three branches,—the street musicians, the showmen, and the strolling players. Then he comes to "the minor trades of London"; "those who sell, those who seek, and those who clean." Among all these groups M. Esquiros mingled personally, extracting autobiographical anecdotes from wandering artists or London costermongers whenever he could find an opportunity. These anecdotes are good of their kind, and not without individual quaintness which mark them as substantially genuine; but occasionally the style in which the speakers deliver their sentiments is so palpably French that we feel pretty sure that we are only reading our author's paraphrase of the original. Such is not the case, however, in the autobiography of the coster at the "Mahogany Bar," who thinks that the Lord Mayor "can't be a bad man, as he likes *sprats*." This man's account of his conduct towards his children and their mother, painful as it necessarily is, shows a degree of capacity for the household relations, which, in such a class, it is encouraging to hear of.

M. Esquiros writes next of salt. Beginning with its geological antecedents, he proceeds to describe the salt mines of Cheshire, digressing to give a pleasant sketch of the old city of Chester,—and finishes by an account of the applications of salt to the various processes of agriculture and manufactures, especially to that of Sheffield steel. The remaining 230 pages of the book are devoted to military subjects. Military education, the manufacture of arms and ammunition, the history and present condition of the British army, the volunteers of 1803 and 1860, are successively described, and in a manly and candid spirit. The most interesting part of this section is that which relates to the recent volunteer movement. M. Esquiros seems to have been inexpressibly struck by the essential harmony which such a movement implies between the Government and the people. "The organisation of such a force," he says, "presupposes two things, which were never combined elsewhere: a government powerful enough to rest on the support of the nation, and a nation which has sufficient confidence not to abuse the *right of bearing arms*." And to this he recurs again and again with an ever fresh surprise and pleasure which show what a new phenomenon was before him. In this, however, he sees but one instance of that leading characteristic which he rightly attributes to us, the perception of which is the background of all his sketches,—viz., the *individuality* of the Englishman, which never disappears under centralising influences, and which, for good or for evil, distinguishes every sphere of social life. M. Esquiros has, in fact, appreciated the national character and institutions with a felicity very unusual in a foreigner, and his mistakes in matters of fact are few and unimportant. The following remarks will show the general bearing of his views:—

> What strikes me most in British civilisation and the English character, is the personality. In Belgium and Holland, I felt I had one foot still on the moral soil of France, which extends far beyond the frontiers. Here there is nothing of the sort; on the contrary, you feel yourself carried away by a civilisation, gifted like certain planets with a peculiar movement of its own. From this island, continental life appears like the French coast from Dover hill: it is a point scarce visible to the eye in the immensity of the mist. In the world of London, every foreigner is regarded by the lower classes as a Frenchman: before the Exhibition of 1851, he was too often a French pig. I conclude from this that the British masses only recognise the right of existence for two peoples in the world, themselves first, and then the French. It is not my opinion that the enlightened portion of the British nation is indifferent to continental affairs, but it regards the events taking place abroad principally with reference to its own interests.....There are, however, cases where the character contradicts itself, and one of these exceptions is so honourable that I am bound to quote it. In a court of law, the feelings of the judges and the public are always in favour of the foreigner. Each is then of opinion that the law is bound to protect the man whom his native soil does not protect.—(Pp. 133-5.)

> A nation so agitated by the tempest of business as the English needed an anchor, and found it in the family. Home holds a great place in British life. I like above all the word employed to characterise it; the *chez soi* is egotistic; the hearth only embraces a detail of domestic manners; but the English home expresses all that is most complete, delicate, and touching in the temple of the family and private virtues. There is in England an entire literature for the fireside; published at a cheap rate, and consisting of magazines, miscellanies, tales, and romances. This home library, I allow, if regarded æsthetically, is of no great value, and I can easily understand why the critics have generally disdained it; but it possesses a peculiar interest for the moralist. The Englishman is at home what he is in his island; not easily accessible, reserved, and cold; he does not endure his relations, but selects them; still, when the ice is once broken, displays a great, good, and generous heart. It is the same with the connection between the members of the family: the banishment of the "thou" from the language (in England it is only employed in addressing the Deity), spreads, at the first blush, a certain degree of indifference over the family bonds; but you speedily recognise beneath these sterner forms, a deeply-rooted attachment.—(Pp. 138-9.)

The great blemish of the book is the faultiness of the translation. In exchanging the French of the most accomplished Review in France for the slovenly English of Mr Lascelles Wraxall, our author's thoughts have put on a cloak of darkness which places them at a great disadvantage. Besides a general awkwardness and incompleteness of diction, this version displays several careless inaccuracies in the rendering, as, for instance, "aligned" for "aligné,"—a word which has no direct representative in English. But what we most dislike is the substitution of the adverb "like" for that of "as," a vulgarism which often recurs, as in the following sentence (p. 140):—"The shadows of night fell from the sky in large patches, like the black cloths are removed from the roof of a church after a funeral ceremony." It is a slight matter that Dr Prichard's name, which is frequently mentioned, is always spelt Pritchard, and the Bretons are designated Britons; but we cannot pardon the transformation of our old friend Kit's Coity House (a cromlech near Maidstone) into Kit's *City* House, as if the time-honoured old Druid were a London merchant of the present day.

We have given but a slight idea of the fund of entertainment contained in these spirited volumes, and must conclude by recommending them to the perusal of all who wish to hear what a discriminating and patriotic Frenchman has to say to his own countrymen of their ancient enemy and their present ally.

NOBLE TRAITS OF KINGLY MEN; or, Pictures and Anecdotes of European History: with a Bird's-eye View of the Grander Movements and their Leaders. Illustrated. James Hogg and Sons.

THE title of this book does it injustice. It would lead us to expect merely a haphazard collection of semi-historical, semi-biographical sketches, written with that mixture of high-flown sentiment and moral twaddle which is the approved style, just now, in books for the edification of young people. It is in fact a well-planned and thoughtfully-executed outline of the rise and growth of European civilisation, illustrated by a fuller treatment of its more marked epochs of transition, and of the great men who rose as leaders at such times.

A great deal of judgment is shown in the selection of these epochs; so that the reader's mind may be opened to a general comprehension of European history as a whole, while his particular attention is called to the development of the Germanic races. The tone of writing is earnest and liberal; the style clear, forcible, and sometimes picturesque. We can recommend this little book as an aid to the study of history, as well as a pleasant and prettily got-up addition to any boy's or girl's juvenile library.

THE LILY OF MOSSDALE. A Tale of 1832. By JAMES ROUTLEDGE. James Routledge and Co., Chichester.

THE "Lily of Mossdale" is a choice compound of bad grammar, conceit, and vulgarity; seasoned, according to a taste now much in vogue among tales of its class, with a strong flavouring of moral twaddle and religious cant. One specimen will, we think, be sufficient to convince our readers that we do it no injustice. "What thinkest thou I call the thing of beauty that lives for ever?—the blooming cheek, the silvery voice, and sparkling eye? Yes, even these, when they are knitted to a pure heart and lofty soul, which might otherwise be rendered—when they are found in the paths of righteousness. If they are not so knitted (don't shudder now!), they are only food for the crawling worm—the worm that bears into oblivion alike the worthless body and the polluted soul—unfit to be remembered—lost in the big waves of time for evermore. The lovely soul, then, my young friend Public, is the thing of beauty that lasts for ever, even though if blooming cheek, or sparkling eye, or silvery voice there may be none. But pardon me, we halt upon the threshold of a cottage which is no phantom of the brain."

HAVELOCK'S MARCH AND OTHER POEMS. By GERALD MASSEY London: Trübner and Co., Paternoster row. 1861.

THIS volume exhibits the usual faults which characterise Mr Gerald Massey's verses. His egotism and affectation do not diminish with time, and his misappropriation of epithets is so frequent and so reckless as to show that he takes but slight pains to penetrate the real meaning of what he is writing about. Perhaps the poem which gives its title to the volume is the best in the series, though it is occasionally disfigured by some unchristian hankerings after revenge. There are several poems on the author's favourite theme, his domestic losses and troubles,—on which he has gone on descanting year after year in successive volumes, with a monotonous, sentimental self-engrossment which is somewhat repulsive to our taste.

WYLD'S MILITARY MAP OF THE UNITED STATES. The Northern States and the Southern Confederate States, with the Forts, Harbours, Arsenals, and Military Positions. James Wyld.

MR WYLD'S map is the most convenient we have seen of the localities of the American civil war, and has the largest amount of new information.

LITTLE SUNSHINE; a Tale for very Young Children. By the Author of "A Trap to Catch a Sunbeam," &c., &c. London: Lockwood and Co., 7 Stationers' hall court, E.C. 1861.
A TALE written with good intentions, but considerably deficient in sense, and spoiled by much unhealthy sentiment.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The new treaty of commerce between France and Belgium concluded at Paris on the 1st of this month having been sanctioned by the Belgian Chambers, has been duly ratified by the Governments of the two countries, so that it has now force of law; and the same has been done with the navigation treaty, and with the treaty for the protection of literary and artistic property also concluded between the two countries.

Many of the stipulations of the treaty of commerce are to take effect within five days from the 27th of this month, the date on which the ratifications were exchanged; but the new tariffs on sugar are not to come into force until the 1st July next, and those on Belgian articles formerly prohibited in France until the 1st October next. The only part of the treaty of much interest to the English people is that which regulates the admission into France of Belgian articles which can compete with those of England. Generally speaking, the duties imposed are the same as those set forth in the English treaty, but in some cases they are lower. This, however, is of no consequence to the English, as their treaty contains an express stipulation that the duties imposed on their goods shall not be higher than those on the productions of other countries.

It may be useful to make a comparison between the principal points in the two treaties:—The duty on Belgian coal is to remain unchanged; but it will not exceed that on English. As to *metals*, they are to pay the duties set down in the English convention, with the exception of zinc in pigs, bars, or plates, which, instead of being taxed at 10c the 100 kilogs (2 cwts), are to be free. All articles in metal, including cutlery, are to pay the English rate of duties, with the exception of surgical, optical, and other instruments, which, instead of paying 10 per cent. *ad valorem*, are to be admitted free. On machinery, carriage, articles in wood, ships, boats, leather &c., &c., the duties are the same: but that on gold leaf, instead of being 100f the 100 kilogs, is put down at 50f *the kilog* (which however appears to be a mistake); and those on the items "leather: prepared skins, varnished, dyed, and morocco leather," and "ditto all other kinds," are reduced from 250f and 30f to 100f and 15f. Under the head of *textile fabrics*, flax or hemp combed, which in the English treaty is put down at 5f the 100 kilogrammes, is in the Belgian treaty free; and where the English treaty says, under the head of yarn of hemp or flax, that "twisted unbleached, and bleached or dyed shall pay same duties as single unbleached or single bleached or dyed yarns augmented by 40 per cent.," the Belgian treaty says that the augmentation shall only be 30 per cent. Under the head of *linens*, where the English treaty imposes a duty of 30f on "8 threads or less," the Belgian gives one of 28f, and instead of one of 90f, on 12 threads it fixes one of 65f; on bleached, dyed, or printed 8 threads or less, the Belgian treaty also fixes the duty at 38f instead of 40f; and on 12 threads ditto at 95f instead of 120f. On all sorts of drills the duty is to be 16 per cent. *ad valorem*, instead of the duties fixed in the English tariff. Net of thread is to pay 15 per cent. *ad valorem*. Yarns and tissues of flax or hemp mixed with other materials when flax or hemp predominates in weight, are to pay 15 per cent. *ad valorem*, instead of the duties in the English treaty. Combed jute is to be free instead of paying 3f. Tissues of jute mixed with other materials when jute predominates, are to pay 20 per cent. *ad valorem*, and 15 in 1864, instead of the duties fixed in the English treaty. Under the head of *cottons*, the item "yarn twisted in two strands unbleached" is to pay 30 per cent. instead of 50, and warped yarns unbleached also 30 instead of 50. Cotton tissues mixed with other materials when cotton predominates, 15 per cent., instead of the duties in the English treaty. Under the head *woollens*, the Belgian treaty fixes a duty of 30 per cent. *ad valorem*, instead of 50 on double yarn for weaving, bleached or not. Shawls, &c., which in the English treaty are comprised in the item "articles not denominated," and are taxed 15 per cent., are by the Belgian treaty to pay only 5. As to *silks*, the Belgian treaty provides that articles of dress, &c., made of silk shall pay the same duties as mixed tissues in which silk predominates. In *chemicals*, oxide of zinc and oxide and carbonates of lead are put down at 5f instead of 7f; turmeric in powder is not specially mentioned; colours, stearic acid, and glue and gelatine are put down at 5 per cent. instead of 10. Under the head of *various articles*, tresses in straw and straw hats, not specified in the English treaty, are put down, the former at 5f the 100 kilogs, the latter at 25c each; sea fish, taxed in the English treaty at 100f the 100 kilogs, is not mentioned; and molasses containing less than 50 per cent. of saccharine matter are put down at 11f instead of 14f. These are all the most important differences between the two treaties. As in the English convention, the Belgian one stipulates for a reduction of duty on many articles in 1864.

The Legislative Body has been occupied three days in discussing the Bill proposed by the Government for carrying into effect a measure which has long been needed here,—the abolition of the sliding scale of duties on the import and export of wheat and other grain, and of flour, and the substitution of fixed duties on the import of those articles, and the abolition of all duties on exports. With the evils of sliding scales on grain in general your readers are familiar, and those of the French scale in particular have more than once been explained in the ECONOMIST. It would, consequently, be a perfect waste of time to detail the arguments which with extraordinary elaborateness were produced both for and against the Bill; especially as unfortunately they presented no novelty. Let it suffice to say that superabundant proof was given that under the new measure French agriculture is perfectly capable of resisting the competition of foreign grain at a moderate fixed duty, and that its exports, particularly to England, will be largely increased. The Bill was adopted by 225 votes against 12. In the Paris correspondence of the ECONOMIST of the 6th April a translation of the Bill presented by the Government was given; but it has been modified by the Chamber, and now stands as follows:—

"Art. 1. The duties on the importation of grain, flour, and the other alimentary articles hereinafter denominated are established as follows:—

	Grain. The 100 kilogs. (Nearly 2 cwts.)	Flour. The 100 kilogs.
Wheat, spelt, and wheat mixed with rye:—By French vessels and by land	50c	1f
By foreign vessels	1f	1f 50c
Rye, maize, barley, buckwheat, oats, pulse, chestnuts, millet, vetches, &c.:—By French vessels and by land	free	free
By foreign vessels	50c	50c

	The 100 kilogs.
Bran of all sorts:—By French vessels and by land	free
By foreign vessels	50c
Bread and sea biscuit, semoulia in groats, native feculas, &c.:—By French vessels and by land	1f
By foreign vessels	1f 50c
Rice in straw:—By sea—By French vessels—From countries out of Europe	25c
The growth of countries of Europe	25c
Elsewhere (that is foreign customs entrepots)	1f 75c
By foreign vessels	1f 75c
By land—The growth of countries in Europe	25c
Elsewhere	1f 75c
Rice in grain:—By French vessels—From countries out of Europe	50c
Elsewhere	2f
By foreign vessels and by land	2f
Sago, salep, and foreign feculas:—By French vessels—From countries out of Europe	1f
Elsewhere	2f 50c
By foreign vessels and by land	2f 50c
Semoulia in paste and maccaroni:—By French vessels—From countries out of Europe	5f
The production of countries in Europe	5f
From elsewhere	7f
By foreign vessels	7f
By land:—The production of European countries	5f
Elsewhere	7f

"Art. 2. The grain, flour, and other alimentary articles above mentioned, and also potatoes, *are exempt from export duties*."

The Bill also contains a clause enacting that the decree of the 22nd August, 1860, relative to the import of grain and flour, and that of the 5th December of same year, relative to the importations of pulse and from meal made of it, shall continue to be acted on up to the 30th September, 1861, "in so far as their stipulations are more favourable than those of the present law."

The subscription for bonds of the Ardennes, Eastern, Mediterranean, Southern, Orleans, and Western Railway Companies, which was opened on the 21st, was closed on the 28th. It has obtained perfect success, but the Bank has not yet published details respecting it.

The *Journal des Chemins de Fer* says:—"It has been reported that negotiations have for some time past been going on between the Russian Government and the Great Russian Railway Company with a view to modify the conditions of the enterprise. The fact is perfectly exact. We learn that the negotiations are proceeding in a most favourable manner as regards the interests of the shareholders, and are to be brought to a close in a conference

which is about to be held in Germany. The Committee at Paris is to go to Dresden to attend the Conference."

The following are the quotations of the Bourse:—

Annexed is an account of the markets:—

FLOUR, at *Paris*, has again advanced, and yesterday the sack of 159 kilogs was 74f to 76f and 77f. The four marks for the current month and June were 75f to 75f 25c; June and July, 75f 50c.

WHEAT.—At *Paris*, yesterday, prices advanced, the quotations being 40f to 42f and 42f 50c the sack of 120 kilogs. As to the provincial markets, as many as 137 present a rise of from 1lc to 2f the hectolitre; in only 8 has there been a fall, which varied from 20c to 91c; and 28 are reported firm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 16,324 bales, and the importations 25,863. The closing prices were 1f higher for very low and low qualities, other sorts remaining unchanged. Low New Orleans was consequently 104f the 50 kilogs, and very ordinary ditto 110f. On Monday in the present week little was done, but on Tuesday and yesterday sales were brisk and prices firm.

COFFEE.—The demand at *Havre*, in the week ending Friday, was not very animated: 125 sacks Hayti Gonaives, 83f the 50 kilogs in bond; 313 sacks Rio, not washed, disposable, 69f; 827 ditto for delivery, 69f 50c; 150 sacks Santos, 74f to 79f in bond; 260 sacks Java, 112f 50c duty paid; a lot of Ceylon plantation, 120f; and a small quantity of Guadeloupe habitant for delivery, 136f. Some lots of Santos and Ceylon were also sold. The arrivals exceeded 9,000 sacks. This week, Rio has been at 60f to 71f; and ditto washed, 86f to 88f in bond; Hayti, 78f; Gonaives, 82f 50c; Santos, 73f to 75f; Java, 100f duty paid in bond. At *Nantes*, last week, 100 sacks of Port-au-Prince went at 80f, and some lots of damaged Singapore were disposed of. This week, no sales have taken place. At *Bordeaux*, last week, a small lot of Santiago went at 95f; 2,600 sacks Mysore, at 108f to 108f 50c. This week, Santiago has been at 95f; Guayra, at 82f (inferior) to 91f. At *Marseilles*, this week, 1,992 sacks Rio have been sold by auction at 55f 25c to 59f.

SUGAR.—At *Havre*, in the week ending Friday, business was not very animated: 71 casks French West India, 48f 50c duty paid; 338 ditto for delivery, same price; 425 casks Porto Rico, 47f 50c; 53 ditto, 51f 50c; 1,450 sacks Mauritius, 51f; 2,418 casks Havana for delivery, 34f 50c to 34f 75c in bond. Also, some lots of damaged Hayti. The arrivals were about 500 casks casks French West India and 8,729 sacks Mauritius. This week, French West India has been at 41f 60c duty paid; Havana, 35f in bond. At *Nantes*, a small lot of Reunion went at 55f 50c, and one ditto gros grain, 57f 50c. This week, some Guadeloupe usine has been sold at 54f to 60f. At *Bordeaux*, last week, business was calm, and closing quotations were French West India, 49f to 49f 50c; Reunion, 52f 50c to 53f. This week there have been no sales. At *Marseilles*, last week, business was not active: 1,200 casks Havana at 37f, and some damaged Mauritius. Nothing has been done this week.

HIDES.—Business at *Havre*, in the week ending Friday, was not active: 500 Buenos Ayres dry cow, at 123f 50c the 50 kilogs; 2,250 Monte Video salted, 73f; 2,500 Valparaiso dry, 90f; 152 ditto drysalted, 95f; 163 Texas dry, 74f 50c; 2,071 horse, Monte Video salted, 88f the 100 kilogs. The arrivals were about 17,000. This week, there have been no sales.

WOOL.—At *Havre*, in the week ending Friday, 9 bales Buenos Ayres were sold at 2f 25c the kilog. The arrivals were nearly 3,000. This week, Buenos Ayres unwashed has been sold at 105f to 200f the 100 kilogs; Monte Video, 237f 50c.

INDIGO.—At *Havre*, in the week ending Friday, business was very active, and prices rose: 350 cases Bengal, from 57½c to 1f 15c (and even more, it is said, for certain choice lots) above the estimates; 36 cases old Bengal, 50c to 70c premium; 4 Kurpah and 11 Manilla, at prices kept secret. The arrivals were insignificant. This week some Bengal has been sold at 1f 40c premium, and another lot at prices kept secret. At *Bordeaux*, last week, 22 cases Kurpah, 23 Madras, and 116 Bengal were sold, the two former sorts at an advance of 10c to 15c in price. This week the sales have been rather numerous: prices not stated.

TALLOW.—At *Havre*, in the week ending Friday, business was active: 100 casks La Plata went at prices kept secret, and 131 pipes at 67f to 68f 25c the 50 kilogs—the latter price for first quality. The arrivals were unimportant. This week, there have been no sales. At *Paris*, yesterday, the 100 kilogs were 132f 50c—a rather important decline on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. was at 100f; Montpellier of 89 deg. 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 125f; beetroot, first quality, 106f.

BRUSSELS, May 30.

In the discussion of the treaty of commerce with France in the Chamber of Representatives, complaints were made that the treaty will ruin the rag and paper trades, will greatly injure those in coal and iron, and also the manufacture of sugar; but the Chamber paid no attention to them.

Correspondence.

THE KOSSUTH NOTES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Several inquiries made to me in regard to an article in your journal of the 11th inst., "The Judgment on the Kossuth Notes," induce me to direct your attention to the paragraph in which you speak about the suit Farina *v.* Silverlock. What you state is perfectly correct; the first injunction obtained by Mr Farina was overruled on the 9th of July 1856. However, Mr Farina was referred to common law to prove that he had sustained damages by the sale of his labels. Mr Farina then brought an action in the Queen's Bench against Silverlock; and on the 12th December, 1857, a verdict was given for the plaintiff, damages 40s (the sum which Mr Farina had claimed, as he wanted it only for establishing his right).

Mr Farina then again applied to the Court of Chancery, and on the 1st of June, 1858, obtained an injunction against Mr Silverlock, which is in force still.

I should feel obliged if you would bring this fact, which is perfectly consistent with your views, before the notice of the public, because, by means of the article in your journal, people are induced to believe that in his action against Silverlock, Mr Farina was unsuccessful, and printers will sell his labels, and other people use them, to his injury.

I still may mention here that in last and previous years I found several printers who printed and sold his labels. However, proceedings in Chancery were not necessary, as on application they delivered their plates, blocks, &c., and stock of labels, and signed an undertaking in the form of an injunction, also paid costs.—Yours respectfully, A. D., Representative of J. M. Farina.

7 Old Jewry, E.C., May 29, 1861.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial report is dated Calcutta, April 22:—Import Market—Advices from the principal marts up-country are on the whole encouraging, stocks being so moderate as to admit of recent supplies meeting with ready sale on arrival. This news, added to the advices of short exports from England, would doubtless have the effect of hardening our prices, were it not for the continued anxiety manifested by many of our importing houses to sell at current rates. Money Market.—The amount of unemployed money in this market has been considerably diminished, but the demand for commercial purposes is so limited that it has not been found necessary to advance the rates.

Nine years have elapsed since the discovery of gold in Australia, and a comparison may now be drawn between the amount of that most precious metal which has been coined at the Royal Mint between the equal periods comprised between 1843 and 1851 and 1852 and 1860, inclusive:—

Year.	Gold Coinage. £	Year.	Gold Coinage. £	Year.	Gold Coinage. £
1843	6,607,849	1849	2,177,955	1855	9,008,663
1844	3,563,949	1850	1,491,836	1856	6,002,114
1845	4,244,608	1851	4,400,411	1857	4,859,860
1846	4,334,911	1852	8,742,270	1858	1,231,023
1847	5,158,440	1853	11,982,391	1859	2,649,502
1848	2,451,999	1854	4,162,183	1860	3,121,709

These figures exhibit a total coinage of 86,153,680*l*—*viz*, 34,431,958*l* in the first nine years, and 51,719,722*l* in the second. The yearly average between 1843 and 1851 was 3,825,773*l*, and between 1852 and 1860, 5,746,635*l*, showing an increase of as nearly as possible 50 per cent. The fact must also be taken into consideration that a very large number of sovereigns have been coined at the mint established in Sydney. The value of the silver coined has undergone considerable fluctuations, having reached its *maximum* in 1853, when it was 701,544*l*, while in 1848 it was only 35,442*l*. The copper coin struck fluctuated between 448*l* in 1850, and 61,538*l* in 1854. The total value of the silver coinage in the 18 years was 5,982,461*l*, and of the copper coinage 241,449*l*, the aggregate metallic issues of all descriptions having been 92,377,590*l*.

The latest advices from Trinidad state that trade was exceedingly dull for the season, and the metallic currency was never so low in circulation; in fact, no one seemed to have ready cash. The stoppage of a large mercantile firm had thrown a gloom over the trading community, and prospects were far from cheerful. The planters had been getting on briskly with sugar making, as the weather had become more settled and favourable.

It is only by making a detailed examination of the various branches of the export trade that their prodigious growth during the last 15 or 16 years can be fully appreciated. Comparing 1860 with 1845, the value of the exports of apparel, haberdashery, and millinery increased 286 per cent.; beer and ale, 316 per cent.; brass and copper manufactures, 76 per cent.; coals, coke, and culm, 242 per cent.; cotton manufactures, 120 per cent.; cotton twist and yarn, 42 per cent.; earthenware and porcelain, 74 per cent.; hardwares and cutlery, 73 per cent.; iron and steel, 246 per cent.; leather and leather wares, 66½ per cent.; linen manufactures, 60 per cent.; linen yarn, 80 per cent.; machinery, 325 per cent.; silk, 412 per cent.; silk manufactures, 163 per cent.; tin plates and tin and pewter ware, 143 per cent.; woollen manufactures, 57 per cent.; and woollen and worsted yarn, 280 per cent.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 29th day of May, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,812,530	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,824,972
		Silver Bullion	512,558
	25,812.530		25,812,530

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,916.605
Rest	3,221,123	Other Securities	19,636.908
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6 873,823	Notes	6,442.360
Other Deposits	11,643,565	Gold and Silver Coin	830,738
Seven Day and other Bills	535,600		
	36,827,111		36,827,111

Dated the 30th May, 1861. W. MILLER, Deputy Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,905,270	Securities	29,475,513
Public Deposits	6,873,823	Coin and Bullion	12,168,268
Private Deposits	11,643,565		
	38,422,658		41,643,781

The balance of Assets above Liabilities being 3,221,123*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£586,134
A DECREASE of Public Deposits of	32,366
An INCREASE of Other Deposits of	442,252
A DECREASE of Government Securities of	264,333
A DECREASE of Other Securities of	85,939
An INCREASE of Bullion of	173,167
A DECREASE of Rest of	50,857
An INCREASE of Reserve of	618,057

The above return shows the effect of the increased ease in the money market, and the consequent steady augmentation in the resources of the Bank. Notwithstanding the heavy shipment of gold to America last Saturday, there is a large increase in the bullion, attributable partly to the influx of sovereigns from the provinces, and partly to the daily purchases of foreign gold attracted here by the favourable exchanges. The reserve also presents a considerable augmentation. The decline in the other securities is less than might have been expected from the absence of demand for discount at the Bank this week.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,473,778	£ 20,900,692	£ 21,876,060	£ 22,117,101	£ 19,905,270
Public deposits	6,888,791	5,013,744	6,301,774	7,489,290	6,873,823
Other deposits	8,806,603	14,365,512	16,836,238	12,551,247	11,643,565

In the corresponding week of 1851, Parliament was chiefly occupied with the consideration of the Ecclesiastical Titles Bill, and with the affairs of the island of Ceylon. The Great Exhibition had been opened for 1s. No event of importance was announced from abroad, but the repressive policy in Italy, especially in the Papal States, was being carried to an extreme extent. The London money market was becoming rather tighter.

In 1858, first-class bills were discounted as low as 2¼ per cent., but extreme caution continued to be displayed in financial and commercial circles.

In 1859, the French and Sardinian armies in Italy had gained repeated successes over the Austrians. The definitive report of the French Minister of Finance relative to the loan of 20,800,000*l*, showed that the subscriptions had reached an aggregate of 100,382,000*l*. Prussia had announced a home 5 per cent. loan. The Bank of England had lowered their rate of discount from 4½ to 3½ per cent.

In 1860, the rejection by the House of Lords of the Paper Duty Repeal Bill was chiefly occupying attention. The nine hours' movement had recommenced among the metropolitan builders. The Committee of the Stock Exchange had suspended another stock-broking firm for dealing with Pullinger, the fraudulent cashier of the Union Bank of London. From abroad the principal topic of interest was the success of Garibaldi in Sicily, his entry into Palermo having just taken place.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,702,230*l*; in 1858, a deficiency of 419,016*l*; in 1859, a deficiency of 2,370,702*l*; and in 1860, a deficiency of 7,282,184*l*. In 1861, the deficiency is 7,993,343*l*.

DISCOUNT AND MONEY MARKET.—Business during the week has been partially suspended, and the demand for money has been very moderate. In the general market good bills have been readily taken at 5⅜ per cent., while the best short paper could be negotiated at 5½. To-day, owing to the settlement in foreign stocks and shares, there has been a slightly increased inquiry, but nothing to any extent. On the Stock Exchange, loans on Government securities were obtainable throughout the week at 4 per cent. until this morning, when the rate rose to 4½ per cent., while later in the day no business could be done under 5.

The Secretary of State for India in Council has given notice that after to-day the interest on India bonds not notified for discharge, is raised from 4 to 4½ per cent.

The following are the rates of discount in the principal cities of the Continent. The only alteration is a reduction in the rate at Brussels:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	1½
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2½
St. Petersburg	6	...

ENGLISH FUNDS.—The transactions in the funds have again been limited this week, and prices remained without change until yesterday, when a few purchases caused a rise of an eighth. To-day, the defeat of the Opposition on the paper duties question and the pacific declarations of Lord John Russell caused additional buoyancy, and a further advance has been maintained. Consols were last quoted this evening 91¾ to ⅞ for money, and 91⅞ to 92 for the 6th of June, or nearly a quarter per cent. higher than last Friday. The new account is fixed for the 10th of July, and the last price for that day was 92¼ to ⅜, or 90¾ to ⅞ ex div.

Notwithstanding the announcement of the rise in the rate of interest on Exchequer bills, the market has shown a dull tendency, and an improvement that at one period took place has not been supported. The final prices to-day were 6s to 2s discount for the March descriptions, and 3s discount to par for those of June. The increase in the rate of interest in India bonds did not transpire until after business hours, and the last quotation was 30s to 20s discount, or the same as yesterday, but, compared with last Friday, showing a further decline.

The India Five per-Cent. stock has been in better demand, especially this afternoon, and closed at 101⅜ to ½, being an improvement of ⅜ per cent.

FOREIGN STOCKS.—There has been little business in this department, apart from the fortnightly settling, which was concluded to-day. In several descriptions the tendency has been rather unfavourable. Turkish Six per Cents. of 1858 declined about 1 per cent. during the week, but have since partially rallied. Mexican also shows a further reduction. On the other hand, Brazilian stocks have been in better demand, the Four-and-a-Half per Cents. especially rising in anticipation of the dividend falling due to-morrow. Spanish and Portuguese bonds continue firm, particularly the former.

The final price from Paris, this evening, was 69f 40c, or the same as last week.

The latest advices from Honda, New Granada, state that General Mosquera had marched towards Bogota, and that a battle was impending between him and the Government

troops, which, it was expected, would decide the contest between the two parties. In the meanwhile the following letter has been received by the Committee of Spanish-American bondholders from the Provisional Government at Cartagena;—

To the Chairman of the Committee of Spanish-American Bondholders.

United States of New Granada Sovereign State of Bolivar, Cartagena, May 1, 1861.

I have the honour to communicate to you, in order that you may have the goodness to apprise the Committee over which you worthily preside, that the Government of the United States of New Granada does not recognise the arrangements entered into between the said Committee and the Minister Plenipotentiary of the Granadian Confederation, Senor Juan de Francisco Martin, and it therefore declares as non-subsisting the decree, in execution thereof, issued under date of the 4th of January of the present year, by the President, Senor Mariano Ospina.

These acts having taken place after the States of New Granada had assumed their sovereignty, and disavowed the authority of the said Senor Mariano Ospina, constituting themselves under the denomination of the "United States of New Granada," they cannot be subjected to obligations emanating out of engagements and official acts of agents or *employes* not their own.

It is for that reason that the Citizen, the Provisional President of the United States of New Granada, disavows the said arrangement; although he is disposed, and will do so with very good will, to enter into another, through the medium of his lawful agents, if not the same, even in more advantageous terms, which shall satisfy the exigencies of the creditors, and establish on a brilliant and solid footing the credits of the new Government.

In order that you may have the goodness to inform the Committee aforesaid of the extent and details having relation to the arrangement and the present note, I have the honour to forward to you an authentic copy of the decree of the 15th of March, 1861, issued by the Citizen, Provisional President of the United States of New Granada, Supreme Director of War.

With considerations of the highest esteem and respect, I subscribe myself, Your most obedient servant,

Juan M. de la Espriella,

The First Chargé of the Executive Power of the State.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

Railways and other Shares.—There has been little doing in the railwry market this week, and prices showed rather a flat tendency until the last two days, when the fineness of the weather, together with the proceedings in Parliament, caused a general advance, from which there has been little or no reaction. It is hoped that through the fine weather the traffic returns may show such an increase in the receipts from passengers as will counterbalance any falling off in the goods. The movements in this department continue chiefly regulated by the speculators in the provinces, the public doing little business therein, investments having latterly been diminished. Compared with last week, the quotations of the leading stocks show a nearly general advance.

In the colonial market the demand for East Indian guaranteed stocks has slightly fallen off, but prices still remain generally firm. Canadian continue dull, but without alteration in value.

In the foreign market there have been rather heavy fluctuations in Lombardo-Venetian, in response to speculative movements on the Paris Bourse. A steady rise has occurred in Great Luxembourg shares, owing to the improved prospects of the line, together with their comparatively low price. Dutch-Rhenish are also higher.

The subscription opened at the Bank of France for the issue of about 10,000,000*l* in railway obligations has been attended with marked success. The total of the tenders sent in has been more than three times the amount required. The railways chiefly in favour were the Orleans, for which the applicants will get only 16 per cent. of their subscriptions, and the Lyons, where the allotment will be 30 per cent. The deposit of 2,600,000*l* in cash at the Bank of France has been effected without the slightest pressure in the money market.

American railway securities have been quiet, and show no further change. The amounts brought over by the latest packets from New York for sale on this side are believed to have been much less than on previous occasions.

In the miscellaneous markets no movement of any consequence has occurred. Joint stock bank shares have, however, been rather more in demand. Great Ship closed dull at 5s 9d to 6s 3d. The new China and Japan Steam left off ⅛ to ¼ pm.; and Natal Land, ¾ to ⅝ pm.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Foreign Exchanges.—The rates show no material alteration this week, but the tendency is still upward.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:

Gold.—The Duncan Dunbar has arrived from Sydney, with 48,000*l*; and the Tasmanian, from the West Indies, has brought 80,000*l*; but, with the exception of the shipment of sovereigns to America, there is not any demand for export; consequently, the remainder of the gold *ex* Copenhagen, together with the arrivals from the Continent, have been sent into the Bank, making a total of about 300,000*l* purchased by that establishment since the date of our last circular. The Australasian has taken 221,300*l*, and the Glasgow 24,591*l*, to New York; and further amounts will be sent by the next steamer on Saturday. The Sultan has sailed with 28,011*l* for Bombay, and 3,000*l* for Alexandria.

Silver.—The Tasmanian, with about 280,000*l* in silver and dollars, has arrived from the West Indies; the specie will not be deliverable until Monday, the 3rd. There is but little doing in the silver market, and the price is rather lower; we quote it at 5s 0¾d per oz standard, with slight demand. The Sultan has taken 160,880*l* to Bombay.

Mexican Dollars.—Dollars are in but slight demand, and prices are rather lower; a considerable quantity has arrived by the Tasmanian, but are not on the market yet; we quote the rate as 4s 11¼d per oz, with but little business doing.

Exchange on India for drafts by Banks at 60 days' sight, on Bombay and Calcutta, continues as quoted in our last, viz., 1s 11¾d to 2s; Madras, 1s 11⅛d to 2s. Document bills on Bombay and Calcutta, 1s 11¼d to 1s 11⅜d.

India Government Loan Notes.—The market for these securities is, if anything, rather weaker. We quote 5½ per Cents. 99½ to par; 5 per Cents. 93¾ to 94.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 78s 6d per oz, last price, in demand; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, scarce. Silver—Bar silver, 5s 0¾d per oz std; bar silver, containing 5 grs gold, 5s 1d per oz std; fine cake silver, 5s 5¾d per oz; Mexican dollars, 4s 11¼d per oz.

The Prince of Wales is announced from Melbourne with about 89,000*l* in gold.

About 24,000*l* in bar gold and foreign coin was bought by the Bank to-day, making a total of 54,000*l* since the return in this evening's *Gazette* was made up.

Failures and Mercantile Embarrassments.—The suspension has been announced of the connected houses of Messrs W. Brandt and Co., of Archangel, Mr Charles Brandt, of St Petersburg, Messrs Brandt Brothers, of Riga, and Mr Richard Brandt, of London, with total liabilities of about 300,000*l*, of which about 70,000*l* only is estimated to be due in London. The failure was imminent some weeks since, but was then prevented by an advance from the Russian Government of 100,000*l*. It appeared, however, that this sum proved insufficient, and a second application to the Government being unsuccessful, it was found necessary to suspend. The connection was one of old standing and high respectability, and must not be confounded with the firms of Messrs William Brandt and Co., of St Petersburg, and William Brandt, Sons, and Co. (formerly E. H. Brandt, Son, and Co), of London, the members of the latter establishments, although relations, being entirely separate and independent. Up to 1848 they were together, but since then the houses of the two branches of the family have remained distinct. The books have been placed in the hands of Messrs Quilter, Ball, Jay, and Co., accountants.

A meeting of creditors of Messrs Theodore Ralli, Sons, and Co., who lately suspended in the Levant trade, took place on Tuesday. The statement of affairs of the amalgamated London and Marseilles firms showed direct liabilities 55,437*l*, and liabilities on bills receivable 81,287*l*, of which, however, not more than 19,348*l* is expected to come upon this estate. It is even believed that this sum may be reduced to about 4,000*l* only. The assets on this side represent 47,355*l*, in addition to which there is 11,879*l* balance due from the Calcutta house, and about 39,000*l* from Odessa, both of which items are fully expected to be realised. There is thus a considerable surplus, but Messrs Ralli have also about 15,000*l* to 20,000*l* more to receive from the Turkish Government. It was mentioned that satisfactory letters have been received from the Bank of France expressing a desire to deal indulgently with the failed houses in the Greek trade. It was ultimately resolved to adjourn until August, Mr Ralli to continue liquidating his estate, and to proceed to Constantinople for that purpose.

The creditors of Messrs P. Hava and Co. have also held a meeting this week, when a balance-sheet was read, showing that their direct engagements are 53,183*l*, and that other liabilities are expected to come upon their estate of 13,782*l*, making a total indebtedness of 66,965*l*. The assets of the house consist of good debts, shares, Turkish Six per Cents., dock warrants, &c., and are estimated to be worth 68,286*l*, exclusive of private property. The estate thus shows at least 20s in the pound, and there appears little doubt that the creditors will eventually be paid in full. It was resolved, after a short conversation, to adjourn for two months to allow the principal liabilities to run off, Messrs Hava in the meanwhile to continue liquidating their estate.

The creditors of Mr E. Vitalis, Greek merchant, at a meeting on Monday, agreed to the terms proposed in the circular published last week.

A numerously attended meeting of creditors of Messrs Pedder and Co., of the Preston Old Bank, has just taken place, when it was resolved to accept a composition of 10s in the pound, 6s 8d being payable within six weeks, and 3s 4d before the 10th of February, 1862. The estate is to be liquidated by five inspectors under the Private Arrangement Act. The creditors present represented claims for 600,000*l*.

Messrs T. D. E. Rodocanachi, Greek merchants, who failed at Manchester some time back, have offered their creditors 4s in the pound in instalments extending over eighteen months, and the proposition will be considered at a meeting to be held at Constantinople on the 10th of June. At a meeting held at Manchester, on the 20th of February, the liabilities were estimated at 274,882*l*, and the assets at 194,091*l*.

Public Companies.—The annual meeting of the National Bank was held on Tuesday, when the report announcing a dividend and bonus, at the rate together of 14 per cent. per annum free of income tax, was adopted after a short discussion. During the past year trade in Ireland has been generally good, although the agricultural interest have suffered to some extent by the deficiency in the harvest. The habits of thrift, however, latterly exercised by the farming population have so far counteracted this loss, that the deposits with the bank are only slightly below the amount at the close of 1859. The sum of 66,500*l* has been written off for the bad debts arising from the late failures in the leather trade, and nearly half of this amount, or 29,184*l*, has been furnished from former provisions for doubtful contingencies which have, contrary to expectation, turned out favourably. The business of the bank is steadily extending, as shown by the increase in the circulation. In 1845, the total circulation of all the banks in Ireland was 6,354,494*l*, and last year it was 7,047,600*l*, showing an augmentation of 693,106*l*. Of this increase, 500,246*l*, or five-sevenths of the whole, is in notes of the National Bank. The branch lately opened at Listowel is progressing satisfactorily, and another branch has just been established at Newcastle, county Limerick. The total number of branches is now 51, including the office in Dublin.

The annual meeting of the Ionian Bank was held yesterday, when a satisfactory report was presented, showing that the Directors have been able to raise the dividend from 5 per cent., at which it has stood for some time back, to 6 per cent. This step has not been taken without the fullest consideration, nor until it appeared nearly certain that the dividend will be maintained at the improved rate. Ample provision at the same time will continue to be made for all contingencies, including the writing off of 1,000*l* yearly from the building account. Since the renewal of the charter, the Directors have turned their attention to old dependencies covered by securities, and they have satisfied themselves that no loss will be experienced in their ultimate realisation. The character of the business has been satisfactory, and the political agitation occasionally prevailing in the Ionian Islands has had no sensible effect on the operations of the bank. No loss whatever has been incurred by the late failures in the Greek trade. The amount standing to the credit of profit and loss has been steadily increasing, the total on the 1st January, 1859, being 13,181*l*; in 1860, 17,087*l*; and in 1861, 21,114*l*. In the first four months of the current year, the profit realised has exceeded that of the same period of 1860.

A meeting of the London Discount Company, an undertaking now in course of liquidation, was held on Monday, to consider the propriety of awarding to the manager and submanager a year's salary in addition to any sum they may be entitled to receive under their respective agreements. It appearing, however, that by the latter they would already receive a year's salary, it was decided that an additional year would be excessive. This resolution was not considered to reflect in any way on the merits of the officers in question.

At a meeting of the Trust and Loan Company of Upper Canada to-day, the report was adopted, the dividend declared at the proposed rate of 8½ per cent. per annum, and the recommended appropriations to the reserve fund and to preliminary expenses were agreed to. The reserve now amounts to 33,446*l*.

The Madras Irrigation Company have just held their annual meeting, when a long discussion took place, and detailed explanations were given respecting the recent suspension of the works. The report was ultimately adopted, an amendment to the resolution to that effect being negatived.

At a meeting of the East India Steam Navigation Company, the proprietors were congratulated on the successful progress of the undertaking, and it was announced that the steamer and barges constructed for the Company have been shipped for Calcutta. With the view of increasing the operations of the concern, it was resolved to raise the capital to 500,000*l*. The remuneration of the Board, as

recommended by themselves, was changed from a fixed scale of fees to a percentage, to be afterwards determined, on the net profit.

The report of the Bank of British North America, issued preparatory to their meeting on Tuesday next, announces a dividend at the rate of 6 per cent. per annum free of income tax. The business in the present year thus far exhibits an important improvement over 1860. The lamentable events in the United States have not hitherto injuriously affected the interests of the bank; but with the view of strengthening the position of the concern, the Directors have made considerable additions to the specie held at the branches, the present total being 301,107*l*, against 194,160*l* the previous year.

At a meeting of the Great Ship Company this afternoon, a formal resolution was passed authorising the Directors to raise 35,000*l* in debentures. The whole of this sum has already been subscribed.

The prospectus of the Seend Iron Company (limited) with a capital of 100,000*l*, in 20,000 shares of 5*l* each, has been issued.

The annual meeting of the European Assurance Company has been held, and at which it was stated that the balance of the year of income over expenditure was 30,200*l* 16s 4d.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2½ per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 5-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 106 to 106½ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for charges and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 360,698 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Very little business was transacted both in English and foreign wheat at Mark lane to day, at about Monday's currency. Barley moved off heavily, on former terms. Oats were tolerably firm in price; but all other articles, including flour, were a dull inquiry. The imports from abroad, this week, are 13,090 quarters of wheat, 3,810 barley, 8,770 oats, 3,290 sacks and 15,110 barrels of flour.

At Liverpool, this morning, wheat sold steadily, at full prices; but other articles were a slow inquiry.

There has been a rather less animated demand in the Liverpool cotton market during the present week, there being no later accounts from America to produce any excitement in the market. The total sales of the week amount to 67,000 bales, including 45,000 bales to spinners, 10,000 bales on speculation, and 12,000 for export. Quotations are without change since Friday last. The market to-day closes steadily; sales 8,000 bales, without change in prices.

"Our cotton market has been very excited," write Messrs Briggs and Co., of Alexandria, on the 18th inst., "and a very much larger amount of business would have been done had there been a sufficiency of cotton to meet the demand. The note of weekly sales below will show how bare the place is of good staple, viz.:—207 bales low ordinary, at 6d to 7d; 2,990 bales ordinary to middling, at 7d to 8d; 332 bales good middling to fair, at 8d to 8¼d; 7 bales good fair, 8 31-100d per lb f.o.b.: total, 3,536 bales. Freights—By steamer quite steady at 9-16d per lb, and nominal for ships at 6-16d and 5 per cent. to 7-16d per lb, in full. Exchange—For first-class paper 95 to 95¼ piastres per £ sterling; France, 5f 30c to 5f 31c per dollar of 20 tariff piastres. Shipments in bales from 3d to 16th inst:—Great Britain, 5,048; France, 1,271; Austria, 776: total, 7,095."

There has been only a limited inquiry for all kinds of tea; nevertheless, prices have ruled about stationary.

We have received the following from Hong Kong under date the 15th of April:—

Canton Silk.—Quotations quite nominal. Tea.—During the fortnight a good business has been done, settlements amounting to 31 chops congou on the market, three contract chops, and about 5,000 half-chests Canton-packed tea. About 17 chops and the whole of the Canton-packed tea is said to be for Australia. Prices in the early part of the fortnight ruled slightly lower, but latterly they have gradually advanced, and a rise from the lowest point of fully 1½ taels has taken place. In scented kinds settlements are trifling, and the unfavourable advices from America have checked all operations in green teas. Foochow advices are to the 8th inst. Tea.—A very small business has been done during the fortnight. Arrivals of black have only amounted to about 7,000 chests of ordinary quality, and very little more is expected. No further supplies of green teas have come to hand, and no sales have taken place. Quotations show a decline of 5 mace to 1 tael on low and ordinary qualities of congou. Common Ningchows remain much as before. Shanghai advices are to the 6th instant. Silk.—During the fortnight settlements amount to only 1,000 bales, making the total settlements for the season 76,000 bales. Stock estimated at 6,000 bales, mostly of very inferior descriptions, there being nothing above good No. 4 Tsatlees and No. 3 Kahing Taysaams on the market. In the former a decline of 10 taels had taken place, and for very low qualities 20 taels, while in the latter there has been a fall of 10 to 15 taels, inferior remaining as before. Total export of silk from China to Great Britain is 76,049 bales, against the same time last year 58,820 bales, showing an increase for the season of 17,229 bales. Tea.—Scarcely any supplies have been received beyond some green teas purchased at Ningpo on foreign account, and some few contract blacks. Future receipt of blacks this season will be very small. Total export of tea from China to Great Britain is 76,567,700 lbs, against last year 73,406,500 lbs, or an increase for this season of 3,161,200 lbs. To the United States the export is 23,632,300 lbs, against last year 29,167,500 lbs, showing a decrease for this season of 5,535,200 lbs.

Good and fine raw sugars have mostly sold at full prices; but low and damp parcels have moved off heavily, on rather easier terms. Refined goods have continued heavy.

Messrs Morales and Co., of the Havana, writing on the 4th inst., observe:—

The events in the North causing shippers to shun American tonnage, whilst European vessels are very scarce and exact high rates, have beset the shipping business with additional difficulties, which have further been increased by the withdrawal of all the American steamers plying between this and New York. Sugars—Since the date of our last report (6th ult.) we had an active and firm market until the above events checked the demand. There are not many buyers now, and prices have declined. We quote:—Cucuruchos, Dutch numbers, 8 to 10, 17s to 18s 10d; ordinary yellows, do. 11 to 12, 19s 5d to 20s 1d; middling yellows, do. 13 to 14, 21s 4d to 22s 6d; fine yellows, do. 15 to 16, 23s 9d to 25s; florete yellows, do. 17 to 19, 25s 8d to 27s 6d; ordinary whites, 28s 9d to 29s 4d; middling do., 30s to 30s 7d; fine and florete do., 31s 3d to 32s 5d; muscovades, fair refining to fair grocery, 14s 11d to 16s 2d per cwt free on board. Really good sugars are held pretty firmly and command generally full rates. The tendency, however, is downward. We have had dry weather again. We estimate our stock here and at Matanzas, including hogsheads, at 350,000 boxes, against 300,000 and 362,000 at the corresponding periods in 1860 and 1859. The shipments of white sugar for Russia, including the vessels still loading, embrace about 26,000 boxes, against 14,000 at this period last year.

Somewhat large supplies of coffee have been on offer this week. Although the demand may be considered steady, prices have, in some instances, had a drooping tendency.

We have received the following communication from Messrs Fryer, Schultze, and Co., of Ceylon, under date the 30th April:—

The weather has been broken since our last issue, and shipments of produce have been retarded in consequence. The exports of coffee to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	263,299	against last year, cwts		251,579
Foreign Ports	17,403	—	—	16,859
Australia and India.....	9,193	—	—	6,499
	289,895			274,937

NATIVE COFFEE.

To Great Britain.....cwts	52,235	against last year, cwts		65,590
Foreign Ports.....	25,763	—	—	54,064
Australia and India.....	4,303	—	—	2,035
	82,301			121,689

Plantation coffee has found its way down in considerable quantities, but the weather has been much against curing operations, and though there is not much prepared coffee awaiting shipment, the stocks of parchment in Colombo and Kandy are large. The weather has been favourable for the estates, but the blossom is in most cases late, and the prospects for the next crop are not so favourable as they were. In native coffee there has been very little doing, and mostly on easier terms for ordinary parcels, superior lots commanding full prices. There appears to be very little more of this quality to come forward. Plantation coffee, low, nominal; ditto, mountain, 11s to 11s 3d per bhl: native coffee, unpicked, 39s per cwt; ditto, picked and dried, nominal. Cinnamon, plantation, 9d to 9½d; ditto, inferior, 6d to 7½d per lb.

There has been a moderate demand for most kinds of rice, and prices, generally, have ruled tolerably firm.

Saltpetre is a dull inquiry; nevertheless, we have no change to notice in the quotations.

M. Arles Dufour and Co., of Lyons, have favoured us with the following communication, under the date 27th of May:—

We beg to call your attention to the annexed report upon the progress of the silk crop. Notwithstanding the complaints arising in the most advanced districts, we may hope that the extraordinary abundance of seed and the unusually fine weather will lead to a result much superior to last year's. State of the Silk Crop.—France.—Vaucluse, Hérault—The complaints which had arisen last week are generally decreasing, and there is every hope of a result much superior to last year's. The first cocoons, of mixed quality, have been sold from 5f to 5f 50c. Gard—The worms are passing the 4th stage, and complaints are much less serious than at the same period last year. A far better result can, therefore, be expected. Isère—The worms are approaching the 4th stage, and giving rise to few complaints. Drôme—The losses at the 4th stage are very numerous in some districts, just in those extractions of seed which have been the most generally employed. Little hope of a better result than last year. Ardêche—At the 4th stage many complaints are arising, but the quantity of seed which has been laid out is so large, that the result is still expected to exceed last year's. Italy.—Piedmont—Accounts from all provinces are very satisfactory. Worms at their 3rd stage and abounding, complaints few, weather propitious. Lombardy, Frioul, Venetia—Worms at their 3rd stage, and few complaints arising till now. Seed abundant and weather favourable. Some contracts reported from Milan at 5f for 1st quality, and 4f 45c for cocoons of the lower districts. Romagnas—Worms from the 3rd to the 4th stage, without complaints. Tuscany—Several losses are reported amongst the seed which had passed the 4th stage; but the worms which fail are easily replaced. Spain—Crop almost entirely finished; inferior to last year's as regards quantity as well as quality. Cocoons sold from 6f 75c to 7f, some parcels even 7f 25c to 7f 50c. Last year's average price was 6f 25c to 6f 50c. This poor result is due principally to the bad and cold weather, which has done great injury to the trees at the beginning of the hatching. Levant.—Smyrna, 15th—Worms generally approaching the 3rd stage; some educations have passed the 4th without harm. Brutia, 15th—The hatching is not quite terminated, in consequence of the bad weather reigning.

The public sales of colonial wool continue to be well attended, both by home and foreign buyers. Good and fine wools move off steadily, at full prices; but other kinds are dull, and rather lower.

The following information refers to the state of the wool trade at Moscow:—"Our market is almost entirely cleared of common wools; only some 8,000 poods inferior fleece unsuited for export remaining in stock. Of the 110,000 poods purchased for spring shipment, the greater part of the common autumn wools (Donskoy and Tcherskoy) and a considerable portion of the fleece were taken for the Continent. Of lambs the bulk was very ordinary Donskoy. The total quantity of Zavolginsky wools sold at very extreme rates. In consequence, however, of improved water and railway communications between Moscow and the Zavolginsky districts, the new arrivals are expected much earlier in the season than hitherto. Tcherskoy lambs will probably reach Moscow in July, Zavolginsky lambs in August, and even autumns in September, so that they will reach us in time for shipment before the close of the navigation, instead of wintering, as hitherto, on the way.

There is less activity in the demand for rum at about previous quotations. Brandy, however, is held at very full prices.

Linseed oil has changed hands at from 29s to 30s per cwt. Most other oils support previous rates. Turpentine is steady in price.

The demand for tallow has been much restricted P.Y.C., on

the spot, has sold, to-day, at 56s 6d; May to June, 56s; October to December, 54s 3d to 54s 6d per cwt.

"We continue," says the New York *Shipping List* of the 18th inst., "to be greeted by exclamations of dulness and depression in trade circles from almost every point of the commercial compass. There are isolated exceptions, however, and in this category may be classified the breadstuffs department. Flour and grain have been in good request for export to European ports, chiefly to Great Britain, the already active spring trade having been stimulated by the opening of inland navigation, and the subsequent arrival of large quantities, and the increased facilities afforded for shipping direct from the boats at a comparatively small expense. In the financial world, it is almost unnecessary to say, things wear pretty much the same appearance, and we learn of scarcely anything of interest. Money has been pouring into the bank vaults so copiously during the past several months from California and England that they have been literally overflowing for some time; yet the prevailing opinion seems to be that the best possible course to be pursued is to keep it there, in the absence of the very best and safest employment. There is as little demand for accommodation as ever, and consequently the amount of capital which is being distributed is small. We quote:—Loans on call, stock securities, 6 to 7 per cent. per annum; ditto, other good securities, 7 per cent. per annum; prime endorsed bills, 60 to 90 days, 7 per cent. per annum; ditto, 4 to 6 months, 8 per cent. per annum; first-class single signatures, 7 per cent. per annum. The general dry goods trade remains without the least improvement, and there is next to nothing doing. Military goods remain firm, but all others are dull and nominal."

There has been a very fair demand for cotton throughout the week. The buyer has had an abundant choice, but has obtained little or no concession in price, holders being still indifferent about selling. A large amount of the American cotton here will barely, even at present prices, cover the cost, and the stock is certain soon to decrease. We have made no change in our quotations. Egyptians are in fair request, but difficult to move. Brazils remain unaltered. East India have been largely dealt in, at some slight concession in price. The sales to-day are 8,000 bales. Market quiet but firm. The reported export amounts to 11,410 bales, consisting of 5,340 American, 300 Brazil, and 5,770 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

In most of the manufacturing markets held this week, there has been an improved demand for fabrics suited to the trade in India, but the business done has been much restricted. Some of the continental houses have increased their purchases, and the home trade is decidedly healthy. Iron has sold to a fair extent, on former terms; but the coal trade has continued heavy.

MANCHESTER, May 30.—There has been a fair average business done, but attended both on the side of buyers and sellers with much doubtful feeling and uncertainty as to our prospects. Sales have chiefly been made in 8 lb 4 oz shirtings and certain descriptions of yarns for China, which are accordingly the turn stronger. A few of the India houses have also been picking up cheap lots of madapollams and other goods. But the bulk of the trade remains stagnant. Longcloths and some kinds of T'cloths are even quoted worse than before the holidays. Sales of yarns for the Continent have been fair, but for manufacturing purposes small.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The wool market is remarkably quiet. There is undoubtedly a giving way in price, consequent upon the absence of demand, and buyers are induced on this account to hold off even more than they would otherwise do. No new feature has appeared in yarns. There is just a small quantity of yarn selling both for home and export. Instances are not wanting where spinners will take rather less, though there is no general giving way in price. The fine weather has occasioned some improvement in the home trade for pieces. Spring goods are moving off pretty well.

LEEDS.—There has been a moderate attendance of buyers in the cloth halls this morning. The demand was far from being brisk, and the purchases were mostly confined to small parcels, chiefly of light mixtures. Till the autumn trade—that is, the purchase of goods suitable for the fall of the year—fairly sets in, it is probable the markets will be of a quiet character. There is no improvement among the manufacturers, several of whom, both within and without this borough, are working short time. Prices are steady, those of cloth as well as those of wool. The freedom with which French and other Continental buyers have operated at the current sales of colonial wool in London has compelled our own dealers and manufacturers to give the full currency of the past month, especially for the best qualities. The parcels coming to hand here from the sales referred to are reported to be in good condition. The present fine weather will improve the unshorn fleeces in England and Scotland, and make the yield, which is generally deemed satisfactory, much better than last year.

ROCHDALE.—The flannel trade has shown a little more animation to-day. The public market was of a quiet but steady character; and, considering the season of the year and other circumstances too well known to require pointing out, a fair business was done at the warehouses. Manufacturers are very fairly employed, but some of them complain of the paucity of orders. Yorkshire goods are not selling freely, but prices of them, as well as those of flannel, made in this district, are firm; and the same may be said in general of the price of wool, except those of long kinds, which are rather easier.

LEICESTER.—There is very little doing in any branch of the hosiery trade, either for shipping or for the home market; indeed, business is more dull than it has been for several seasons past. At Hinckley and the other country hosiery districts business is very inactive, and future prospects are not encouraging. The wool market continues tolerably firm; high quotations being still named for superior sorts. In yarn there is no important change.

NOTTINGHAM.—Nearly every branch of the lace trade remains in the same dull state as for a length of time past. The fine weather is doing very little for the wholesale houses, and the home trade generally is exceedingly flat for the time of year, with no immediate prospect of any change. Very little is doing for shipping, but more is expected to be done for the Continent shortly. The plain net trade remains extremely dull. In the silk branch, shawls, mantles, and lace for trimming are saleable. There is very little new to report in the hosiery trade. Yarns are high in price.

BELFAST.—The Linen Trade—There has been rather more business doing for the last week in white goods, and buyers from comparatively new seats of consumption have taken off pretty large lots of linens. To New York the exports have dwindled to a very low figure. A better feeling exists in the home market. Bleachfield operations are pushed on with the usual spirit. The turn-out of finished linens from these establishments has been very extensive for the past four months. Stocks at the warehouses are not much above those held at the end of May last year. Yarns—There has been less satisfactory business doing in the sale of fine warps. Low counts of yarns of all qualities sell slowly, and run into accumulation. Power-loom yarns sell freely, but, as these only form a small proportion of the spinnings of the local concerns, the bulk of stock begins to advance considerably. Flax—The steadiness of rates already noted continues to act on the markets, and material prices this week were very firm for all prime parcels of fibre. The range of rates in handscutched is 6s. 3d to 9s, showing an advance in the finer qualities of about 3d the stone; for milled rates were 7s to 11s 6d per stone.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 7s 6d to 3*l* 10s; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 18.—The demand for State and Western flour has been fair, but the market has, for the most part, ruled heavy, and common and medium grades have sold at somewhat lower rates. Prime shipping brands have brought prices equal to our previous quotations. Canada flour remains steady, with a fair demand at previous rates. The demand for Southern flour continues fair, and the market is somewhat firmer, while some descriptions have brought higher prices.

EXPORT from 1st to 14th May.

	1861. barrels	1860. barrels
Wheat Flour	109,304	44,093

Prime wheat continues in active request both for local milling and export, and full prices have been realised, while the market is daily growing firmer. The receipts per North River boats have been moderate, and a considerable proportion of the sales are to arrive. The exports to England continue very heavy by sailing vessels, and considerable engagements are reported per steamer Great Eastern, to sail 25th inst. Transactions for the three days amount to 455,000 bushels. Corn is in fair demand, at lower rates; the market closed steady and firm, the sales for the three days foot up 195,000 bushels, including 60,000 yesterday, at 52 to 56 cents for round yellow, 52 to 55 for new, and 55 to 56½ for old Western mixed, 45 to 50 for unsound.

EXPORT from 1st to 14th May.

	1861. bushels	1860. bushels
Wheat	581,639	141,577
Corn	405,262	83,560

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that very limited supplies of English wheat have been on offer in the various markets of consumption held this week, the demands for both red and white qualities has ruled heavy, and prices here had a drooping tendency. Foreign wheat have, too, commanded very little attention, and, to force sales, ex ship, 1s to 2s per quarter less money must have been submitted to. There has been much less doing in the barley trade; nevertheless, no quotable change has taken place in the rates previously paid. There has been a slow sale for malt, on former terms. Oats have continued to move off heavily, at slightly reduced currencies. Beans have given way 1s per quarter; but peas have mostly supported previous rates. The flour trade has ruled heavy, and prices have had a drooping tendency.

The accounts from most parts of the Uuited Kingdom are to the effect that a considerable improvement has taken place in the general appearance of the wheat crop, which, however, on some of the poor soils, is very thin upon the ground. Barley, oats, beans and peas are looking well.

Throughout the Continent wheat has been less active; nevertheless, scarcely any change has taken place in the quotations. The shipments to England are still on a fair average scale. Most descriptions of spring corn have commanded former terms; but the transactions have been only moderate. Advices from New York are to the effect that shipments of food to this country continued somewhat extensive, and that the supplies of wheat and flour on offer were large.

In Scotland, no quotable change has taken place in the value of any kind of produce. Generally speaking, however, the trade has ruled heavy.

The Irish markets have been inactive for wheat and most other articles, and, in some instances, prices have had a drooping tendency.

At Mark lane, to-day, there was a limited attendance of buyers, and for both English and foreign wheat, the trade ruled dull, whilst, to effect sales to any extent, lower rates had to be submitted to. Owing, however, to the small amount of business transacted, prices must be considered stationary. Barley, oats, beans and peas were a heavy sale, and the quotations had a drooping tendency. In flour, very little was doing, but no change of importance took place in its value.

With regard to the floating trade, Mr Rainford observes:—There have been 39 arrivals off coast for orders since this day week, comprising 11 cargoes of wheat, 19 maize, and 9 miscellaneous, viz.:—Wheat, 3 cargoes from New York, 1 Berdianski, 1 Naples, 1 Odessa, 4 Santander, 1 San Francisco; wheat and maize, 1 New York; flour, 1 Valparaiso; rye, 1 Odessa, 1 Marseilles; maize, 2 Alexandria, 1 Bermuda, 2 Salonica, 1 Norfolk, 1 Sulina, 4 New York, 1 Philadelphia, 1 Venice, 1 Baltimore, 4 New Orleans, 1 City Point; barley, 2 Odessa, 1 Sulina; beans, 1 Saffi; oats, 1 Odessa. There is a demand for wheat for the Continent, which has tended to keep up prices, or we should have had a very drooping market. As it is, business has been limited; and the fine weather, large arrivals, and other circumstances have caused a considerable reduction in the prices of maize. The following are the quotations since last Friday:—Wheat, arrived, per 492 lbs, Odessa Ghirka, at equal to 54s 4d, 51s, and 50s, and 2 cargoes (for the Continent) at 51s 6d; Berdianski (for the Continent), 53s; per 480 lbs, Polish Odessa (for the Continent), 54s 6d and 51s, and Sandomirka 57s; Polish Odessa (for the United Kingdom), 50s; Ibraila, 47s; Saide, 40s; Danubian (for France), 45s 6d. Rye, arrived, per 480 lbs, Odessa at 33s and about 34s 3d (both for the Continent). Maize, arrived, per 480 lbs, Ibraila, 2 cargoes at 36s, 1 with some damage, supposed 33s to 34s; per 492 lbs, Galatz, 2 cargoes to-day at 35s; on passage, per 480 lbs, mixed American, 35s 6d, condition guaranteed. Barley, arrived, per 400 lbs, Odessa, some damage, 25s; perfect, 26s 3d; Ibraila, 25s 7½d, 25s 6d; Galatz and Ibraila, 26s 3d; Egyptian (for the Continent), 27s 6d; Ismail, 25s 6d; Salonica, 26s 9d; Wallachian, 25s 9d;

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY MORNING.

SUGAR.—At the close of last week some floating cargoes of Havana were sold at 1s to 1s 6d under the quotations lately obtained. The market opened flatly on Tuesday, The increased supplies of Barbadoes and foreign muscovado brought forward have been only partially disposed of, at fully 6d reduction. Arrivals have been large, and the landings last week exceeded 7,300 tons, while the deliveries reached only 3,757 tons; still the stock on the 25th was 9,930 tons under the previous season's, viz., 49,300 tons. 1,800 casks West India sold during the three days, including a portion of 1,513 casks by auction, principally Barbadoes: yellow, 38s to 45s; brown, 35s 6d to 37s 6d; low heavy, 34s 6d to 35s; Jamaica, 35s to 38s 6d; grainy Berbice, 40s 6d to 44s 6d. The Netherlands Trading Company's sale of Java, held this week, went off rather above the rates obtained in March.

Mauritius.—The public sales on Tuesday comprised 5,036 bags, which went off without spirit, and the brown qualities were frequently 6d cheaper than last week. A portion was bought in, the remainder selling as follows: middling to fine crystallised, 40s to 45s; low grey to fine pale grainy, 37s 6d to 44s 6d; soft grey to fine grocery, 36s to 41s 6d; low to good brown, 30s to 35s 6d per cwt.

Bengal.—2,200 bags principally found buyers: good to fine Bally, 43s to 45s; Cossipore taken in at 43s to 43s 6d per cwt for middling yellow.

Madras.—1,374 bags native were partly disposed of at 30s to 30s 6d per cwt for middling to fair brown.

Manilla.—3,000 bags clayed sold by private contract at 34s 6d per cwt, also another parcel yesterday.

Other Foreign.—983 casks 350 barrels Porto Rico, offered by auction yesterday, partly sold at and after the sale as follows: brown, 35s to 37s 6d; low to very fine yellow, 38s to 47s. 767 casks 648 boxes Cuba were also partially disposed of: dark heavy to good brown, 34s to 36s 6d; low soft to fine yellow, 37s to 44s 6d. A floating cargo of Cuba muscovado is reported at 23s 6d; three of Havana, No. 9, 24s; Nos. 11 to 11½, at 25s 6d per cwt, all for the United Kingdom.

Refined.—The production is still moderate, and the market has been cleared of any goods offering at all cheap. To-day the market closes firmly, with few sellers under 51s 6d for common grocery descriptions. Crushed, 47s to 49s 6d per cwt.

MOLASSES.—100 tons Antigua have sold at 19s to 20s per cwt.

COCOA.—The market remains quiet, and the lower qualities of West India have been most depressed. Trinidad, by auction, partly sold at 55s to 78s for grey to very good red, with one lot of fine red at 87s 6d. Guayaquil has sold privately at 59s per cwt.

COFFEE.—This article maintains its firm position on the Continent, but here the market is scarcely so animated as of late, and the arrivals have been rather large. 810 casks 2,191 barrels and bags plantation Ceylon at the sales nearly all sold without any material change in prices: fine ordinary to middling, 67s to 73s 6d; good middling to good, 74s to 79s. 878 bags native sold at barely former rates: small berry to very good ordinary, 61s to 62s 6d. 118 casks 649 barrels and bags Jamaica: good ordinary to middling coloury, 62s to 72s 6d. 49 half-bales Mocha: small berry, mixed, 104s to 106s; inferior, 97s. 262 bags ordinary Singapore Java were bought in at 63s per cwt.

TEA.—The market has been quiet. Some inquiry, however, prevails for common scented caper. Public sales will be held next week, viz., on the 6th June.

RUM.—West India remains quiet. A few contracts have been made in Jamaica, of which particulars do not transpire: part at 3s 6d. 200 puns of foreign have sold since last Friday: Havana, 1s 8½d; Cuba, 1s 10d per proof gallon.

RICE was steady at the commencement of the week, with partial inquiries: fine Rangoon sold at 11s, fair at 10s 3d; Ballam 9s 9d; and good middling white Bengal at 12s 1½d. Since then the market has become very flat, and all kinds are only saleable at lower rates. By auction, 1,671 bags white Bengal went at 11s 6d to 12s per cwt for middling to good middling.

IMPORTS and DELIVERIES of RICE to May 25, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1857. tons
Imports	25360	11270	9250	46850

Exported	*...	7950	10300	6570
Stock	32800	49000	78900	90100

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICE.—The transactions generally have been upon a very limited scale this week. 115 bags pimento realised 2¾d to 3d for common to good. 387 bags common Penang and Batavia pepper were chiefly bought in at 3½d; also, 140 bags Singapore white at 5⅝d to 5¾d per lb for middling to good. 179 boxes cassia lignea were chiefly bought in: pile 2, 92s; pile 3, 86s; one or two lots of the latter selling at 85s. 39 casks Jamaica ginger went at 44s to 70s for ordinary to middling. 290 cases Cochin were chiefly bought in: wormy, 49s; bolder, 51s to 53s per cwt.

SALTPETRE.—1,532 bags Bengal, by auction, were partly sold at 38s per cwt for refraction 3¼, and the same price has been paid by private contract, but the market is now very flat. 254 bags Bombay, refraction 11¾, sold at 34s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to May 25, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1858. tons
Imported	5450	5700	7990	4550
Delivered	4900	5300	8050	6330
Stock	4350	4250	2800	4850

Deliveries last week 180 tons.

SHELLAC.—Several parcels have been taken by private contract at rather lower rates, but the market is now firmer. 168 chests in public sale subsequently found buyers as follows: good liver, 8*l* 7s 6d to 8*l* 15s; native liver, 8*l* 10s; dark garnet, 7*l* 10s to 7*l* 12s 6d; orange, 8*l* 17s 6d to 9*l* 2s 6d; button, 7*l* 12s 6d to 8*l* 17s 6d per cwt.

COCHINEAL.—300 bags went off flatly at fully 1d decline. Honduras silver, 2s 4d to 2s 9d; low foul black, 2s 4d to 2s 6d; Teneriffe silver, 2s 5d to 2s 7d; black, 2s 5d to 2s 11d per lb.

OTHER DYESTUFFS.—A few lots of Bengal safflower sold at previous rates. The market for Cutch is quiet. 800 bales of Gambier were bought in at 16s 6d per cwt, and since partly sold.

CAMPHOR remains at 12*l* per cwt, but the sales were very limited.

METALS.—The market remains very dull. Spelter has sold for forward delivery at 17*l* 5s per ton, which is much lower. Quotations of foreign tin have been almost nominal in the absence of business. Straits, 121s to 122s per cwt. Manufactured iron of all kinds is dull, and quotations unsettled. Scotch pig last sold at 48s 3d per ton. Copper continues quiet.

HEMP.—Manilla is dull, and the large shipments have checked all speculative inquiry.

JUTE.—No public sales have taken place, and there is not much inquiry by private contract.

OILS.—Linseed is quiet at 29s 6d to 29s 9d per cwt. Foreign refined rape, 42s per cwt, and the market has been inactive. Palm dull at the quotatations, and cocoa-nut is less inquired after. Olive offer upon lower terms.

TALLOW.—Foreign has declined fully 6d during the week, and the market is now dull. The reduction in town-melted last Friday has unfavourably affected the demand for foreign. 1st sort Y.C. on the spot is quoted 56s 6d; for delivery in the last three months, 54s to 54s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, May 27.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is nothing new to report either in English or Dutch markets for refined sugar.

GREEN FRUIT.—Market well supplied. Oranges improved in value: some parcels St Michael and Valencia, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. Shipments from the Azores are finished for the season. Black Spanish nuts nearly finished. Para and Barcelona lower. Lemons without alteration. The market depressed by arrivals of parcels from Messina out of condition.

DRY FRUIT.—Very few currants have been offered at the public sales this week, and prices are unaltered; the market rather stiffer than otherwise. For raisins a little more inquiry.

ENGLISH WOOL.—Trade very quiet.

COLONIAL WOOL.—The colonial sales will close on 6th June; they progress at former rates. The East India and low wool will be sold on 7th and 8th June.

HEMP.—The market remains in a quiet state; holders are not pressing their goods, as the cost in Russia remains high.

FLAX.—There is very little passing; a few sales of Egyptian lately made.

COTTON.—Sales of cotton, from Friday, 24th May, to Thursday, May 30th, inclusive:—1,200 bales Surat at 5¾d for fair Jumboseer, 5¼d to 5⅝d for very middling to middling old Oomrawatty, 5⅝d to 6d for good fair to good new Oomrawatty, 5¾d for fair Dhollera, 5⅝d for good fair Mangarole; 250 bales Western Madras at 5¼d for fully fair; total, 1450 bales. The market has been dull, and the transactions moderate; there is no change, however, to notice in prices, which are about the same as last week. P S.—Market unchanged. Sales to-day: 500 bales Surat at 5d to 5¼d.

SILK.—No change whatever in the silk market this week. All very quiet. Reports as to the European crops contradictory, but not on the whole favourable.

TOBACCO.—An active demand has existed for most descriptions of home trade qualities, and sales would have been considerably increased if holders had not demanded a further advance. About 80 hhds have been taken for the navy.

LEATHER AND HIDES.—During the past week there has been continued dulness in the leather market. At Leadenhall, on Tuesday, although the fresh arrivals were not large, the only article of which the supply was inadequate to the demand was good crop hides of 36 lbs to 50 lbs, which were much wanted. In prices generally there was no change of importance.

METALS.—Transactions in metals are reduced to the smallest limits. Copper is unchanged in quotations, but the demand, which is not large, runs entirely on English, the prices of foreign being too high. Iron continues to be in very small demand. Tin is somewhat easier to buy, and, from the tendency of the market, it appears probable that prices may go lower. Spelter is neglected, as also is lead. Tin plates are again sadly depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	9¼
Yellow Russian	50	0
Melted stuff	37	6
Rough ditto	21	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon firm at last week's prices. Fine in good demand. Hamburg 2s lower, and a bad sale. The price of Friesland was enhanced to 90s. quantity, 3,446 ¼-casks, 842 ⅛-casks. Other butter dull of sale. No inquiry for hams or lard.

METROPOLITAN CATTLE MARKET.

MONDAY, May 27.—The total imports of foreign stock into London, last week, amounted to 6,147 head. In the corresponding period in 1860, we received 6,972; in 1859, 3,762; in 1858, 2,132; in 1857, 2,229; in 1856, 1,647; and in 1855, 1,852 head.

Our market to-day was tolerably well supplied with each kind of foreign stock for the time of year. The demand for it ruled steady at full prices. The supply of English beasts here this morning was very moderate, but the quality of all kinds was good. Notwithstanding that the beef trade was in a sluggish state, the currencies realised on Monday last were supported. The best Scots and crosses realised 4s 10d per 8 lbs. The Scotch arrivals were remarkably prime. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 2,100 Scots, &c.; from other parts of England 300 various breeds; and from Scotland 750 Scots and crosses. No beasts came to hand from Ireland. The show of sheep was tolerably good, and the condition of most kinds exhibited a slight improvement, when compared with several previous weeks. Downs were in good request, at an advance in the quotations of 2d per 8 lbs. The general top figure was 5s 4d, but very prime stock made 5s 6d per 8 lbs. With lambs we were fairly supplied; nevertheless, the lamb trade was somewhat active, at extreme currencies. Calves were in moderate supply and fair request at very full prices.

SUPPLIES.

	May 28, 1860.	May 27, 1861.
Beasts	3930	3790
Sheep and lambs	28500	22410
Calves	130	166
Pigs	270	390

THURSDAY, May 30.—The supply of beasts on offer in to-day's market was only moderate, and all breeds moved off steadily at, in some instances, an advance in the quotations of 2d per 8 lbs. A few very superior Scots realised 5s per 8 lbs. Sheep the show of which was rather limited, moved off steadily at extreme rates, some of the best Downs having sold at 5s 6d per 8 lbs. There was a good consumptive inquiry for lambs, at from 5s 8d to 7s 4d per 8 lbs, being rather dearer. The veal trade was firm, at an improvement in value of 2d per 8 lbs, the best calves having produced 5s 4d. Pigs commanded very little attention, but milch cows were tolerably firm in price.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	10	Prime Southdown sheep	5	2	5	4
Second quality ditto	4	0	4	4	Large coarse calves	4	2	4	8

Large Pork	4	2	4	6	Lamb	5	8	6	8
Inferior mutton	3	6	4	0					

HOP MARKET.

BOROUGH, Monday, May 27.—The reports from every district of the plantations speak of a strong attack of fly, which has very much increased during the last few days. Our market is exceeding firm, but there is little business doing, owing to the scarcity of fine samples. The duty put at 140,000*l*. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 140s, 189s.

FRIDAY, May 31.—The accounts from the plantations are rather less favourable, and the duty has receded to about 120,000*l*. Our market, consequently, is firm, at full quotations; but the business doing is much restricted.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, May 27.—During the past week the arrivals coastwise and by rail have been good for the season; but owing to the very warm weather the consumption has fallen off more than one-half, and trade very dull at a reduction in prices. The following are this day's quotations:—Yorkshire Flukes, 110s to 130s; Lincolnshire Regents, 80s to 90s; North Berwick ditto, 100s to 110s; Perth, Forfar, and Fife ditto, 70s to 90s; ditto, ditto, ditto Rocks, 65s to 75s; ditto, ditto, ditto Reds, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, Friday, May 31.—The supplies of old potatoes are large considering the time of year, and the trade rules heavy, at from 60s to 130s per ton. New qualities are in very moderate supply, and prices range from 8s to 20s per cwt.

HAY MARKETS—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 14s to 2*l* 0s per load. Trade very dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 6s; and straw, 1*l* 15s to 2*l* 0s per load. A heavy demand.

COAL MARKET.

FRIDAY, May 31.—Walls End: Hetton 17s 6d—Haswell 17s 6d—Stewarts 17s 6d—South Hetton 17s 6d—Trimdon Hartlepool 16s 9d—Hartlepool 17s—Braddyls Hetton 16s 6d—Russell Hettons 16s 6d—South Hartlepool 16s—Heugh Hall 15s 3d—Kepier Grange 16s 3d—Cassop 15s 9d—Eden Main 16s—Thorpe 14s 6d—Tunstal 15s—Bell's Primrose 13s—Howard's Hartley, 15s 6d—Lambert's Hartley, 15s 3d per ton. Ships at market, 115

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 31.—We cannot report any change in our market as regards either demand or prices, and, as imports continue light, there is no accumulation of stocks except in East Indian wools, which are always held over for public sale.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 31.—Fair attendance at to-day's market. Wheat steady. Consumptive trade at Tuesday's prices. Flour firm in price, but not much business doing. Indian corn rather better inquiry: mixed, 31s; white, 33s 6d to 34s; Galatz, 34s 6d to 35s; beans, 1s lower; oats, nominally in favour of buyer.

METALS.

FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 31.—There have been no symptoms of improvement during the past week in the market for any description of manufactured iron, which continues much depressed. In Scotch pig iron there has also been great inactivity, but with prices remaining unaltered. Copper and lead both very dull and in limited demand. Little inquiry for metals generally.

The Gazette.

TUESDAY, May 28.

BANKRUPTCY ANNULLED.

W. F. and J. Hooper, New Leather market, Bermondsey, leather factors.

BANKRUPTS.

G. W. Hall, Lime street, merchant.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 18th of May amounted to 547,830*l*, and for the corresponding week of last year to 515,545*l*; showing an increase of 32,285*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 246,772*l*, and for the corresponding week of 1860 to 227,089*l*, showing an increase of 19,688*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 27.—The railway market continued without business, but in several cases a slight improvement was shown. In the foreign market there was a rise in Great Luxembourg and a fall in Lombardo-Venetian. American railway securities were heavy, especially Illinois Central shares and New York and Erie. No change of importance occurred in mines, joint stock banks, or miscellaneous descriptions. Victoria debentures closed at 105¼ to 106; Canada Five per Cents., 101¼ to ⅜; Ocean Marine Insurance, 3⅜ to ½ pm.; *Universal*, ½ to ¾ pm.; London and Provincial, ¼ dis. to par; Thames and Mersey, ⅝ to 1 pm.; Labuan Coal, 3 to ½ pm.; Natal Land, ¼ to ⅜ pm.; and Great Ship, 6s to 6s 6d.

TUESDAY, May 28.—In the railway market to-day, the preparation for the approaching settlement chiefly occupied attention, and showed an apparent undiminished speculative account for the fall. The investments of the public have also fallen off of late, since the less favourable traffic returns. One or two stocks, however, were in demand for delivery, especially London and North-Western, Great Northern, and Caledonian. Of other descriptions there was a fair supply. Compared with yesterday, the final prices showed an advance in Lancashire and Yorkshire, and a decline in Midland, South-Eastern and Sheffield. In the colonial market, Great Western of Canada shares were firmer, while Grand Trunk stock remained dull at 19½ to 20. Foreign descriptions were in little demand, except Great Luxembourg shares, which closed steadily at 7⅜ to ½. Lombardo-Venetian were again flat from the decline in Paris. No material change occurred in American securities, but the general tendency was unfavourable. Mines were inactive, but occasionally higher. Joint stock banks and miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, May 29.—In the railway market to-day, the attendance of dealers was limited, and business was at a complete stand. The closing prices, however, generally showed steadiness, and in some cases a slight advance took place, especially in Sheffield. Colonial stocks were inactive, at about previous quotations. In the foreign market, Great Luxembourg shares continued to improve. American railway securities closed the same as yesterday. Mines were dull, and occasionally showed a fractional reduction. No change of importance occurred in joint stock banks or miscellaneous descriptions.

THURSDAY, May 30.—The railway market opened steadily, and towards the afternoon improved, the final prices showing a general advance of ¼ to 1 per cent. Midland, Lancashire and Yorkshire, South-Eastern, and Sheffield were especially buoyant. In the colonial market there was no change of importance. Grand Trunk of Canada stock left off at 19½ to 20, and Great Western shares 10⅞. Buffalo and Lake Huron were dull. The principal movement in foreign descriptions was a further rise in Great Luxembourg to 7⅛ to ¾. Dutch-Rhenish and Lombardo-Venetian were also higher, the latter closing at ¼ to ⅜ discount. There were scarcely any transactions in American railway securities, but the general tendency was more favourable. Mines were in better demand, and in several descriptions an improvement took place, especially East Caradon and St John del Rey. United Mexican, however, were lower.

FRIDAY, May 31.—Increased buoyancy prevailed in the railway share market, and higher rates were obtained for most of the principal undertakings. Great Westerns advanced to 73. Lancashire and Yorkshire to 111⅛ 111½. North-Westerns to 94½ 94¾. South-Westerns to 95. Manchester, Sheffield, and Lincoln to 43½ 43¾. Midlands to 120¾ 121¼. North-Eastern, York, to 90⅝ 90⅞; and South-Easterns to 80⅜ 80½. In the foreign and colonial market the transactions were very limited. South Australian and Lombardo-Venetian, however, improved to 15⅞ 16; and Dutch-Rhenish to 13⅞ 14. Great Western of Canada were steady at 11; and Scindes at 99⅜. Joint-stock bank and miscellaneous shares were neglected. London Chartered of Australia realised 23 to 23¼. Bank of Turkey, 1¾. Crystal Palace stock, 32¾; and English and Australian Copper, 3⅜.

DEATH.—At New York, on the 15th May, Catherine T., wife of Mr William J. Bishop, in her 32nd year.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

FREDERICK DENT,
Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS'

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 28 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

Free for four stamps,

ELECTRICITY AND ITS WONDERS in conjunction with the newly-discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Dr WATSON, U.S., F.R.A.S., No. 27 Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8.

HOLLOWAY'S PILLS.—Strength Restored.—At this season many persons suffer from prostration of strength, arising in general from some disturbance of the digestion. In such cases the alterative properties of Holloway's Pills exert the happiest effects in renewing digestive vigour. It is wonderful to witness how the pale and emaciated gain colour and weight under a course of these purifying Pills. They stimulate the appetite, augment the secretion of gastric juice, regulate the liver, cleanse the kidneys, and act as gentle yet efficient aperients without griping, weakening, or inconveniencing the system. In a vast majority of cases of debility arising from no perceptible cause, Holloway's Pills, judiciously taken, slowly and certainly restore order, and the invalid soon becomes stout and strong.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

CURE OF ASTHMATIC COUGHS by DR LOCOCK'S PULMONIC WAFERS.—From Mr Ince Gamis, Medicine Warehouse, opposite Stukey's Bank, Yeovil.—"A lady purchased a 2s 9d box, and observed that she had suffered for years from an asthmatic cough, and spent many pounds on other medicines to no purpose. Weeks after the same lady called again, when 'she had been completely cured by them,' merely one 2s 9d box. Other instances are from time to time occurring, which prove the value of these Wafers above other medicines for pulmonary diseases, coughs, colds, &c.—INCE GAMIS." To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists. Beware of counterfeits.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

NEW THEATRE ROYAL ADELPHI.
Sole Proprietor and Manager, Mr B. Webster.

Her Majesty's Concert Room, attached to Her Majesty's Theatre.
THE ORIGINAL
CHRISTY'S MINSTRELS,
EVERY EVENING at Eight o'clock, and a GRAND MORNING PERFORMANCE every Saturday at Three. Stalls, 4s; Balcony and Boxes, 3s; Unreserved seats, 2s; Gallery, 1s. Private boxes (to hold six), £1 11s 6d and £1 1s. Entrance from the Grand Staircase of Her Majesty's Theatre. The new and successful Burlesque Opera, by William Brough, Esq every evening.

IMPORTANT NOTICE.
GLENFIELD PATENT STARCH
is the only STARCH used in
HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the
GLENFIELD STARCH,
we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL, perfectly pure, nearly tasteless, and free from adulteration of any kind, having been analysed, reported on, and recommended by Professors Taylor and Thomson, of Guy's and St Thomas's Hospitals, who, in the words of the late Dr Pereira, say, that "The finest oil is that most devoid of colour, odour, and flavour," characters this will be found to possess in a high degree. Half-pints 1s 6d, Pints 2s 6d, Quarts 4s 6d, and Five-pint Bottles 10s 6d, Imperial Measure.
79 St Paul's Churchyard, London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

KEATING'S COUGH LOZENGES.—Judged by the Immense Demand, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the world.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London. Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,
37 BEDFORD SQUARE, LONDON.
Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March at 56 Rosebank terrace, St George's road.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

TEA.—DR HASSALL'S ("The Chief Analyst of the Sanitary Commission of the LANCET on Food,") Report on the Teas and Coffees sold by Messrs STRACHAN and CO., 26 Cornhill, London, E.C.:—"Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs Strachan and Co., I have subjected the whole of them to Microscopical Examinations and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory."

A full report of the above analysis, also list of prices, can be had on application to Messrs Strachan and Co., 26 Cornhill, E.C., London.
Carts to all parts of London daily.

STEAM NAVIGATION OF the DANUBE.—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. From London to CONSTANTINOPLE (by railway from Czernaveda to Kustendje) in seven days. Excellent accommodation for passengers. Merchandise and personal effects forwarded at through rates by Charles Nugent and Co., Custom House and Forwarding Agents, 80 London wall, E.C.—For particulars apply to Messrs Pietroni and Draper, 81 London wall, E.C.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails:—
AFRICA, for NEW YORK, Saturday, June 8th.
EUROPA, for BOSTON, Saturday, June 15th.
*PERSIA, for NEW YORK, Saturday, June 22.
*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S. Karnak.

Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

STEAM SHIPS.—The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 1l 5s.

HARBURG—Sunday, at 8 morning.

ROTTERDAM—Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Rhine and Dolphin, every Tuesday and Thursday at 12 noon. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at 1 afternoon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. June 1 at 7; 5 at 11 a.m. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Sunday morning. June 2 at 7; 9 at 11 a.m. Chief cabin, 14s; fore, 10s. London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. June 1 at 7; 5 at 11 a.m. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.

BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. June 2 at 8; 4 at 10 a.m; 6 and 7 at 12 noon. Chief cabin, 14s; fore, 10s. London to Paris, 16s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday, at 10 morning. Fares: chief cabin, 20s; return, 30s; fore, 15s; return, 22s 6d; deck, 7s 6d; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday at 8 morning Chief cabin, 6s 6d; return, 10s; fore cabin, 4s; return, 6s

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday at Four afternoon. Saloon, 8s return, 12s: fore cabin, 5s: return, 7s 6d.

MARGATE and RAMSGATE—From London Bridge Wharf, every Tuesday, Thursday, and Saturday, at 10 morning, calling at Blackwall and Tilbury Piers.

HERNE BAY—Every Saturday, at 10 morning.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street and St Katharine Wharf.

THE SEEND IRON COMPANY (LIMITED).

Capital £100,000 in 20,000 of £5 each, deposit £1 per share. 10s payable on application, and 10s on allotment. Incorporated under the Joint Stock Companies' Acts, 1856 and 1857.

DIRECTORS.

Sir R. W. Carden, Alderman, Chairman of the City Bank, London.
Benjamin Gibbon, Esq., Millfields Iron Works, Bilston, Athol house, Edgbaston, Birmingham.
Colonel Hay, Porchester terrace, Hyde park.
James Oliver Mason, Esq., Birmingham.
William Nicol, Esq., M.P., Director of London and County Bank.
William Sarl, Esq., Iron Works, Seend, Gresham house, London.
Consulting Engineer and Manager of Works—S. H. Blackwell, Esq., Dudley.
Bankers—The City Bank, London; Birmingham Town and district Banking Company, Birmingham.
Solicitors—Messrs Wilkinson, Stevens, and Wilkinson, Nicholas lane, Lombard street, London.
Brokers—Messrs Field, Son, and Wood, 9 Warnford court, London; Mr W. I Scott, 11 Waterloo street, Birmingham; Mr J. Underhill, Wolverhampton; Messrs Ridsdale and Wailes, Leeds; Messrs George Edwards and Son, Bristol; Mr George Wilson, George street, Sheffield.
Professional Auditor—F. Maynard, Esq., 19 Bread street, E.C.

Secretary—W. P. Belliss, Esq.

Offices—114 Gresham house, Old Broad street.

In the year 1857 a remarkable bed of iron ore was discovered at Seend, Wiltshire.

This ore is within one foot of the surface, varying from 35 to 60 feet in thickness, easily worked in open cuttings, and yielding from 35 to 50 per cent. of iron. The quantity of the ore is computed, from actual workings and trial pits, to exceed 10 millions of tons.

The ore-ground, extending over 112 acres, is held on lease for 40 years, and the land on which the works and railway have been constructed, and which comprise about 42 acres, is held on lease for 99 years, at surface rent of £5 per acre. The greater part of the surface is underlet for grazing and agricultural purposes.

The ore is taken out and delivered at the furnace by contract, making the cost of the ore into the furnaces, including royalty, 2s 6d per ton. The benefit of this contract will be assigned to the Company.

Tenders have been received for the supply of coke, at 15s per ton, and for limestone, at 2s per ton, direct into the furnaces.

The Great Western Railway and the Kennet and Avon Canal bring coal, coke, and limestone direct into the furnace yard, and afford an unbroken line of conveyance to Staffordshire and Wales, by means of which the loaded trucks can be run direct from the furnaces into the yards of the customers.

The port of Bristol, both by railway and canal, is connected with the works, and affords every facility for shipment to France, and for securing the benefits resulting from the recent commercial treaty with that country.

In order thoroughly to test the commercial value of a property which presented such extraordinary natural advantages, two furnaces of the most approved construction have been erected by the present proprietors of the works.

The first furnace was put in blast in February, and the second in May, 1860. The two furnaces are yielding about 250 tons per week, and the result of their workings has proved successful in every respect.

The quality of the iron is such that it commands a ready market at a remunerative price; and so active is the demand that orders are in hand from Staffordshire houses for the whole produce of the furnaces for some months to come, at 60s per ton, and further orders, to the extent of another year's production, have been declined.

This Company is formed for the purchase of the Seend Ironworks and plant, the leases of the ore and other land, at the above royalties and rent, with the contract for taking out the ore, and the tenders for the supply of coke and limestone, and for the manufacture of pig iron.

The works and plant consist of two hot-blast furnaces, 50ft. by 14ft., engine house, large engine, and three boilers, with steam power equal to work three furnaces, hydraulic lift, smiths' and carpenters' shops, manager's house, railway on broad gauge running into the Great Western Line, the whole being of the most solid and approved construction, and in the highest working order.

An advantageous contract has been entered into by the proprietors to erect three new furnaces of a large size, with corresponding engine power, machinery, and apparatus, and to build coking ovens, and cottages for the workmen. The make of pigs can thus be brought up, within a few months, to more than 700 tons per week, for which a market is already assured, and even at the present unusually low price of pig iron a profit of 15 to 20 per cent. on the whole capital may be reckoned on as soon as the new furnaces are in operation.

The purchase money for the present works and plant, with the leasehold estates, &c., is £60,000. £20,000 will be required for the erection of three new furnaces, engines, coking ovens, and cottages, leaving £20,000 for working capital.

A Contract has been entered into to make the pig iron and put it into the Company's trucks at 40s per ton, including all royalties and all charges connected with the manufacture of the iron.

By this arrangement the Company would be insured a large profit on the pigs made, the cost of carriage, and the small charges not incidental to the manufacture of iron, being the only items to be added.

The cost for carriage into Staffordshire is 7s 6d per ton, exclusive of distribution from the railway to the various works. To other places it is less, but assuming 7s 6d as the average cost of carriage a net profit of from 10s to 12s 6d per ton may be calculated upon, even in the present depressed state of the trade, giving upon a make of 700 tons of iron per week an annual amount of £15,000 to £20,000 for dividend upon the subscribed capital.

And it is especially to be noted that this profit will be realised on the manufacture of pig iron only, a branch of the iron trade of the simplest character, requiring but a moderate working capital, and free from the risks and anxieties of the more advanced stages of the trade.

The peculiar feature of this undertaking is, that in consequence of the great natural advantages possessed by the Seend Iron Works, iron can be smelted there to any extent at a cost which places it above all ordinary competition, and which must secure to this Company a good profit so long as the manufacture of iron forms a branch of the industry of Great Britain.

Each application for shares must be accompanied with a deposit of 10s per share, upon the number of shares applied for. If no allotment be made to the applicant the deposit will be returned in full.

Application for shares in the form annexed may be made to the Directors, at the offices of the Company, or to the brokers of the Company.

To the Directors of the Seend Iron Company.

Gentlemen,—I have now carefully surveyed the tract of iron ore upon which your Seend Ironworks are situate, and I have no hesitation in saying that it is one of the finest deposits of iron ore of its class in the kingdom. I am well acquainted with the general character of the iron ores of the oolite and green sand formations, and I have seen nothing at all approaching in importance to this either in extent, in regularity of character, or in its capabilities for being raised and delivered to the furnaces at a low cost.

In quality it is superior to iron ore of the oolite formation, the green sand, to which formation it belongs, being much purer than that of the oolite, and this is a very important element which must not be overlooked in estimating the value of this remarkable deposit.

For all practical purposes its extent may be considered as unlimited, and its great thickness (in some instances from 40 to 50 feet) will enable your contractors to open single faces of work from which any quantity may be delivered to the furnaces for any possible extension of the works that may be found desirable.

Its cost will, for a long period, not exceed 2s 6d upon the furnace bank, so that you may consider your iron ore supplies as being obtainable at the very lowest possible minimum cost.

From the inspection which I have also made of the Ashton Vale, Timsbury, and Fobster Coal-fields, which are now being opened out very largely, I am enabled to state that coke, equal in quality for iron making purposes to the very best South Wales coke, both in purity and in the capability of carrying burden in the blast furnace, will be procurable in a very short time to any extent, at a cost not exceeding from 14s to 15s per ton, delivered at the furnaces.

Limestone of very good quality can be delivered at the works at 2s per ton.

The blast engine and two furnaces now erected are of the best modern construction and well arranged; and when the waste gases are applied, as your are now upon the point of doing, for raising steam for the blast engine, and for heating the blast, the Seend Iron Works will possess every element for the production of iron at the very lowest cost.

Every facility for transit, to and fro, is afforded by railway and canal, and the cost of wages upon the ton of iron will always be low, as from the character of the ore, the expense of calcining is unnecessary, and the cost of coking is included in the price at which cokes are delivered at the works.

When the various arrangements for coke supplies, the application of the gases, and for the further development of the capabilities of the works, which you are now contemplating, are fully completed, pig iron can certainly be produced at Seend at 40s per ton.

Quality and Sale of the Iron.—The Seend Iron has now been thoroughly tested in the South Staffordshire and other markets. In the South Staffordshire districts there are scarcely any of the respectable makers of iron by whom it has not been more or less used, and in every case with satisfactory results.

The superior estimation in which it is held over the iron produced from the oolites of the Midland district is very marked.

This establishes fully the powers of sale, and of the power of production at a minimum cost there can be no doubt. Under these circumstances the Seend Iron Works certainly possess every element of success, and under judicious and careful management cannot fail to pay good dividends upon any amount of capital which may be economically expended in their further development.
—I am yours truly,
April 17, 1861. S. H. BLACKWELL, Dudley.

Form of Application for Shares.

To the Directors of the Seend Iron Company (Limited).

Gentlemen,—Having paid to your bankers the sum of £ , I hereby request that you will allot to me : shares of £5 each in the above Company in the terms of the prospectus; and I hereby undertake to accept the said shares, or any smaller number that may be allotted to me, and to sign the articles of Association when required.—I am, gentlemen, yours obediently,

Name in full.....

TEETH.—

No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

THE COMMERCIAL COPPER

SMELTING COMPANY (Limited)—Capital, One Million in 100,000 shares of £10 each; deposit on application, £1 per share, and a further deposit on allotment of £1, making £2 per share; call, three months after allotment, £2 per share. No further call until after the expiration of six months.

PROSPECTUS.

The Commercial Copper Smelting Company is formed for the purpose of manufacturing copper on a scale proportioned to the augmenting produce of ores in Chili, Australia, California, and other places; and of meeting the demands of the mercantile interests, both at home and abroad, for a more enlarged and steady market for the supply of copper.

The smelting of silver ores and argentiferous regulus, the imports of which are largely increasing, will also be included in the Company's operations.

The present value of the imports, exports, and internal produce and consumption of coppor of all kinds may be estimated at about £10,000,000 per annum.

The profits obtained in this vast commerce and manufacture are very great. Witness the colossal fortunes which smelters have amassed from small beginnings.

Minute estimates of the requirements of all departments of the undertaking and of the proportionate returns, leave no reason to doubt that an ample dividend will be earned on the first as well as on succeeding years of the Company's operations.

A comparatively small works in this country, with a capital of £80,000, produced last year 2,000 tons of copper, and realised a profit of more than 30 per cent.

Applications for prospectuses, and for shares, addressed to the Directors, may be sent to Mr Stephen Leigh, at 2 Austinfriars, Old Broad street, London, E.C.; or to Messrs Philip Cazenove and Co., 52 Threadneedle street, London, E.C.; or to the other brokers of the Company.

AIR CIRCULATING AND ANTI-

GREASE HATS—Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. First quality, 21s; second ditto, 17s, cash. To be had wholesale at the manufactory, Union street, Southwark, S.E.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £600,140 19s., all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

LONDON LIFE ASSOCIATION,

81 King William street.—The Directors of this Association hereby inform the Members, that the Premiums falling due in the year commencing on the 1st of July next from those Members who have been assured for seven or more entire years, will be Reduced at the rate of 33⅓ per cent., leaving 16⅔ per cent. only to be paid.

EDWARD DOCKER, Sec.

Government Officials.—Reduction in Scale of Premiums

THE EUROPEAN ASSURANCE

SOCIETY ISSUES POLICIES of GUARANTEE, at reduced rates, for Officials in or under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for Bank and Railway Clerks, and persons in commercial employments.

Further reductions on the combination of Life Assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief Office, No. 2, Waterloo place, Pall Mall, London.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1864, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

CONTRACT FOR SHOES.—

Department of the Comptroller of Victualling and Transport Services,
Somerset House, 23rd May, 1861.

The Commissioners for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give Notice, that on Thursday, the 13th June next, at half-past One o'clock, they will be ready to treat with such persons as may be willing to Contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, Gosport, and Plymouth,

SHOES.

Sizes.	Deptford. Pairs.	Gosport. Pairs.	Plymouth. Pairs.
6	3,500	600	800
8	5,100	800	1,900
7	9,500	1,800	2,500
8	9,600	2,900	1,900
9	5,300	300	400
10	1,700	150	...

When to be delivered.—One-third of each quantity in 2 months, another third in 3 months, and the remainder in 4 months from the date of contract, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the shoes.

Their Lordships reserve to themselves the power, when the tenders are opened, of contracting either for the whole or for such part thereof only, as they may deem fit, or for a greater quantity, or of not contracting for any.

No tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office, at the victualling yards at Gosport and Plymouth, or to the officer conducting the packet service at Liverpool, or to the Collector of Customs at Bristol.

Separate tenders must be made for each place, and no attention will be paid to any offer not so made.

Patterns of the shoes may be seen at the said office, and also at the victualling yards at Gosport and Plymouth.

Particular attention is called to the recent modifications of the conditions of the contract, which may be seen at the said office, and at the victualling yards at Gosport and Plymouth, and also at Liverpool and Bristol.

No tender will be received after half-past One o'clock on the day of treaty, and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words, "Tender for Shoes," and must also be delivered at Somerset House.

TRADE 37/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

Translation.

I, RAMON CASTILLA, PRESIDENT

of the Republic of Peru, hereby decree—

Art. 1. The Government of Peru will be prepared to receive tenders for the consignment of huano to the United Kingdom of Great Britain and Ireland, and to the countries bordering upon the Baltic Sea; and separate tenders for the consignment to Barbadoes, Australia, and each of the other British colonies, excepting the Island of Mauritius, within 120 days from the present date, 28th of March, 1861, and attended with the same formalities that were adopted for the presentation, opening, and adjudication of the last tenders for the consignment of huano to France, Belgium, Holland, Germany, Italy, the United States, and England, and keeping in view the Legislative resolutions passed in Congress on the 10th November, 1849; 3rd September, 1860; and 18th February, of the current year; and the previous invitations to tender issued by the Government on the 12th May, 1860.

Art. 2. Any company and its partners who may form part of another distinct one are prohibited from tendering for more than one consignment; it not being understood, however, by this that the actual consignees are excluded from doing so.

Art. 3. To enable the Government to take into consideration the tenders that may be made, they will have to be formed in accordance with the following conditions:—

1. The Government will fix the number of tons of huano to be exported annually.

2. The Government will determine at the commencement of each year included in the contract, the price at which the huano is to be sold.

3. The Government reserve the right of ordering the suspension of charters as soon as they calculate that a sufficiency of huano has been provided to last till the expiration of the contracts.

4. The Government reserve the right of transferring the stock of huano remaining unsold on the expiration of the contracts, against repayment of the charges and one-half of the commission.

5. The Government will allow the consignees interest at the rate of four per cent. per annum on the advances the Government may receive, and will be entitled to the profit that may result from exchange operations on such reimbursement of the advances as may be made out of Peru.

6. The Government will allow two and a half per cent. for commission, guarantee, and brokerage, to be charged on the gross proceeds of the sales; and the consignees will not be allowed to charge any commission for chartering or brokerage either to the Government or to vessels under the Peruvian flag; nor must they charge more than two and a half per cent. to vessels under other flags.

7. The term of the contracts is to be four years, reckoning from the date of the conclusion of existing contracts.

8. Before ratifying the new contracts, as well as at any subsequent period when it may be deemed advisable, the Government shall be at liberty, in conjunction with the Fiscal of the Supreme Court or his substitute for the time being, to demand from the parties tendering; and also from those with whom the contracts may be made, to find better security, and if not satisfied with the guarantees offered, the Government shall be at liberty to break off the negotiations, and also to cancel contracts made.

9. The Government, in drawing up the contracts with the parties who will obtain the preference for the consignments, reserve the right of introducing into the said contracts all such clauses as they may deem expedient for better securing the upright management of the interests confided to the consignees.

10. Any question arising between the Government and the consignees is to be decided in the Tribunals of Peru, and in accordance with the laws of the country.

The Minister of Finance and Commerce is charged with the execution of this decree, and its publication and circulation.

Given in Government house, Lima, March 28, 1861.

Juan José Salcedo. RAMON CASTILLA.

Published by authority of His Excellency the Peruvian Minister, Don Juan Ygnacio de Osma.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

RIMMEL'S PATENT PERFUME

VAPORISER, an Elegant, Cheap, and Portable Apparatus, recommended by Dr LETHEBY and Dr HASSALL for diffusing the fragrance of flowers in apartments, ball-rooms, &c., and purifying the air in dwelling-houses and sick-rooms. Price from 6s. Sold by all Perfumery Dealers, and by the Inventor and Patentee, EUGÈNE RIMMEL, Perfumer, 96 Strand and 24 Cornhill, London; and 17 Boulevard des Italiens, Paris.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

diction. We would only observe, that the best and most experienced judges do not expect cheaper money, and that they acknowledge the possibility of dearer money, though they by no means expect immediately to see it.

THE UNCERTAINTY OF INDIAN FINANCE.

THE uncertainty of Indian finance, proverbial as it has become, and perplexing as from its grave consequences it must ever be, has just received a singular illustration. On the 6th of February this year, just before the last Indian loan, Sir Charles Wood observed in his place in Parliament:—"When Mr Wilson spoke about that time last year, "in proposing his Budget to the Indian Council, he estimated "the probable reduction in the military expenditure at "1,700,000*l*, a subsequent calculation has made it 2,500,000*l*, "and it had actually been about 800,000*l* more. There- "fore the reduction for the year had been 3,300,000*l*." But Mr Laing now tells us that the informants on whom Sir C. Wood then relied "mistook wishes for facts and "anticipations for realities." Mr Laing shows "that "there was *not* a reduction of 3,300,000*l*, as supposed by "Sir C. Wood, or even of 1,700,000*l* as estimated by Mr "Wilson, but a positive increase of 213,000*l* in the total "expenditure of 1860-1 over that of 1859-60."

It was not from sanguine miscalculation or from individual misjudgment that Sir C. Wood put forth this erroneous estimate. He had express statements and elaborate details sent to him from Calcutta. It was upon these that he spoke: he did not add to them nor take from them. But how, then, with this recent and glaring experience, can we rely on estimates and conjectures from Calcutta? If they fail by 3,000,000*l* in half a financial year (for that is about the interval between the date of the despatches on which Sir C. Wood relied and the close of the financial year in India), what security have we that they may not be wrong by twice that amount in the entire financial year for which their most recent calculation is now before us?

Owing to an unfortunate peculiarity, Mr Laing's estimate is peculiarly subject to this doubt. It is, in the language of Indian financiers, an "Anticipation Sketch Estimate"; it is entirely in the future tense. He depends in his present estimate, as Sir C. Wood depended in the estimate which he made in February last, upon anticipated reductions in military and other outlay. "In 1861," he says, "we *shall* reduce our military expenditure by "3,600,000*l*." We hope he may be successful. We hope he is not over sanguine. But how can we be sure? What reliance is to be placed on the Calcutta anticipations? We would not for a moment speak disrespectfully of Mr Laing himself; but he is necessarily in the hands of others. He admits that he is so. He tells us that certain gentlemen who have given efficient service upon certain economical commissions have reported "that so and so should be done, and that *if* so and so is done, such and such a sum will be saved." But whether within a single year any such reduction will, not in easy figures and upon theoretical paper, but in plain fact and hard reality, be ever effected, Mr Laing, with but a brief knowledge of India, can never certainly and surely know. "Persons on whom he can rely" may tell him so, but those same persons told Sir C. Wood exactly what we have seen, and placed him unknowingly and unwillingly in the most humiliating position in which a Finance Minister can be placed—that of having given utterance to over-sanguine anticipations just when he was asking for a loan. There are, certainly, some men of imperious will and all-sufficient energy who would require that these reductions should be carried out, cost what it might to individual claims, to class interests, or to local prejudices and antipathies. But the present Finance Minister of India is not one of these. His friends will agree with us in praising his discretion rather than his inflexibility, his pliability more than his decision. It is no extreme censure and no peculiar accusation against Mr Laing to say that he is not one of the men of intense and exceptional will of whom but a very few are ever to be found.

Mr Laing's Budget is in its details as follows. From the tables given below it will be seen that he anticipates that whereas

	£
The expenditure of 1860-1 was	45,154,449
The expenditure of 1861-2 will be	41,054,699
Showing a reduction of	4,099,750
	£
While the revenue of 1861-2 will be	41,294,595
Whereas the revenue of 1860-1 was	39,285,731
Being an increase of	2,008,864

If we add the increase of revenue to the diminution of expenditure, we shall see how much this year is *expected* to be better than the last. We have—

	£
Reduction of expenditure	4,099,750
Increase of revenue	2,008,864
	6,108,614
The deficit of last year was	5,868,718
Consequently there will this year be a surplus of	239,896

It will indeed be a marvel of finance if a deficit of six millions should be changed into a surplus in a single year, and the marvel will be still greater than at first sight it would seem to be, because the new taxes which are imposed are but trifling.

Mr Laing propcses to obtain 500,000*l* from taxation by the local Governments, on the character of which those Governments are themselves to decide. He expects upon various grounds, considerable aid from the increased yield of the ordinary sources of revenue, and he imposes an increase in the Excise and Customs duties upon salt, which, as it differs in the various Presidencies, and is not capable of a distinct explanation in English money, we give elsewhere in his own words. From it he expects a revenue of 598,370*l*, and apparently for sufficient reasons. Salt is a necessary of life in India to every person and to every family. So far, therefore, as it is desirable that the entire population—whether poor or rich—should contribute to the augmentation of the revenue, a duty on salt is a fair and a reasonable and satisfactory one, and we are glad to see that the additions recently made to it in India have been productive to the revenue without being oppressive to the consumer.

The real difficulty of Indian finance is a simple one:—How are we to tax the rich native who has grown wealthy under our rule, who would be plundered but for our rule, yet who would not of his own free will give us a rupee to save our Exchequer from bankruptcy and our Government from destruction? Indirect taxation in this case is not effectual. If you tax an article, the native, whose wants are few and whose parsimony is great, instantly refuses to consume it. The tax fails, because it diminishes the consumption instead of augmenting the revenue. Direct taxation, therefore, is requisite, and for this purpose Mr Wilson introduced a modified and adapted imitation of our English income tax.

All persons who are interested in Indian finance were startled at the telegraphic account of Mr Laing's Budget which was first received. It stated that the income tax was to be abandoned, and yet that a surplus would be obtained. The abandonment is, however, an error. The income tax yields (as will be seen by the account below) nearly *two millions* this year; and though this is said to include arrears from last year, and therefore to be greater than it rightfully should be, we must remember that the tax is new, that its machinery is as yet imperfect, that some of its collectors have not been over partial to it, that its probable yield will be greater in future years, when custom has habituated the people to it, and practice has taught the officials to collect it.

But although Mr Laing has not abandoned the income tax, he has censured it. He says:—"I have told you frankly "that, financially speaking, I think the income tax has been "a failure. It lays down a great and just principle that the "capital and trade of India, as well as her land, shall con- "tribute in a fair proportion towards the support of the "State. From that principle I believe no Government of "India will ever recede; and as regards *incomes*, which are "fixed and can be ascertained without prying into people's "private affairs, there is no fairer mode of applying it than "by a percentage on the amount of income. But when you "come to trading and professional incomes, or incomes which

"cannot be ascertained without calling for complicated "returns and instituting private inquiries, I believe that "some fixed scale of assessment under a graduated licence "tax is a better mode of applying the principle. I would "almost lay this down universally, for I think it is a fatal "objection to a tax that it conduces to extensive demoralisa- "tion by holding out a premium to fraud, and that its in- "evitable tendency is to embark the Government in a con- "stant warfare with a large section of its subjects—a "warfare carried on by vexatious petty interference and "inquisition on the one hand, and by evasion and chicanery "on the other. Certain I am, that India, at any rate, is no "place for such a tax on incomes going as low as 20*l* a year, "and that the Government would be wanting in their duty "if they did not address themselves to the task of endea- "vouring so to amend this portion of the income tax, as to "raise the necessary revenue in a manner less open to ob- "jection."

The answer to these remarks is a question. What is the new tax? Until we know what it is we cannot tell whether its evils will be greater than than those of the income tax. The "inquiries" to which Mr Laing objects are part of the machinery which is essential to the accomplishment of his object. We are preparing to tax the moneyed wealth—the trading, professional, and commercial industry of India. We cannot do so without finding out where that wealth is, in whose hands it lies, who is making money, and who is not making money. The difficulty of the inquiry is great, its details are tedious, its processes are harassing; but in some form or other it must be made. We are preparing to tax *invisible* property, and there is an inevitable difficulty, which must be faced and not ignored, in ascertaining who is rich, and who is not rich, who possesses the species of wealth of which it is the characteristic to have no outward tangible and obvious tokens.

As far as the public can know, the scheme which Mr Laing is endeavouring to work out is the same which the Calcutta financiers were endeavouring to elaborate before Mr Wilson arrived in India. A "licence" scheme had been for many months before the Council of Calcutta, and the debates upon it were endless, aimless, and without result. Every one felt the difficulty, and *no one* saw how it could be overcome. The most necessary feature of the plan was that the rich trader should pay much for his licence and the poor trader should pay but little. But upon what principle was the separation to be made? How was it to be discovered which trader was wealthy and which was poor? A *graduated* licence tax has the essential difficulties of the income tax: it necessitates private inquiries, it involves complicated returns, it tends to embroil the Government with every discontented trader who believes that he is placed in a higher class than he should be, who fancies that he pays more than he ought. And, after all, a licence tax is not effectual. The graduation of a good income tax is complete. By means of it you get the same due proportion—the same just percentage of each man's means. But a licence tax necessarily lumps men into a few large classes, and makes every man in each class pay exactly the same, to the obvious gain of the rich and the obvious loss of the poor.

Under these circumstances, Mr Wilson decided to introduce the income tax; but he was well aware that the mode of its collection in so large and so various a country as India might well need many modifications, which no English experience could anticipate, and which only local discretion could from time to time suggest. He, therefore, permitted discretionary modes of assessment according to the wants and necessities of particular districts, preserving only the principle of taxing trade and capital, and giving up more or less of the special machinery which he himself preferred.

It is with grave regret that we observe that Mr Laing has departed from this clear, definite, and yet pliable scheme, and has fallen back into the indefinite uncertainty of the old Calcutta financiers. He censures a tax which yields two millions this year, and would doubtless yield far more under effectual superintendence and earnest management. He has only a tax *in the future tense* to substitute for it, and this is the very tax which every one has been searching for *for years, but which no one* has ever yet been able to find.

We fear, therefore, that this Budget is not the end of the financial uncertainties of India. As we have shown, its anticipated reductions are anticipations only; "orders" have been given, but last year the results were inconsiderable. Doubtless "something" will be done this year after so long delay and so much confident promise; but will that "something" save us three millions and a half of annual charge? If it does not, there will be a deficit in India still, although Mr Laing obtains two millions from the income tax which he criticises and censures.

ESTIMATE of REVENUE and EXPENDITURE of INDIA for the YEAR 1861-62.

REVENUE.

	Regular Estimate, 1860-61. £		Budget Estimate, 1861-62. £
Land revenue (including Sayer, &c.)	18,762,447	.....	A18,985,522
Tributes and subsidies	857,321	.....	822,364
Public works (imperial receipts from rents, water rates, and exclusive of receipts credited to local funds	449,707	.....	B 336,796

Interest on debt	3,168,819	.....	3,316,180
Eastern settlement—Charges	131,411	.....	95,255
Expenditure in India	38,104,282	.....	35,248,939
In England:			
Home charges—Civil	1,495,561	.....	1,250,000
— Military	2,772,610	.....	2,500,000
Interest on debt	1,089,822	.....	1,255,760
Total expenditure excluding railways	43,462,275	.....	40,254,699
Guaranteed interest on railway capital, less net traffic receipts	1,218,850	.....	1,300,000
Loss by exchange on railway capital	473,324		...
Total expenditure including railways	45,154,449	.....	41,554 699
Transfer to local budgets	...	.....	500,000
			41,054,699
Surplus, excluding railways	deficit	.....	1,539,896
Surplus, including railways	deficit	.....	239,896

A.—This is obtained after deducting a loss of £370,000 from the famine in the North-West and Punjab.

B.—This is exclusive of receipts from local funds amounting to £223,900 in 1860-61, and £230,035 in 1861-62.

C.—This includes arrears of 1860-61. The net revenue per annum from the income tax is about £1,400,000.

D.—This is obtained after allowing £200,000 for loss on diminished imports of manufactures and £40,000 for reduction in twist and yarns.

E.—Bengal opium has been estimated at the same amount for 1861-62 as for 1860-61, viz., 1,748 rs per chest: but at the present market price the estimate would be £1,500,000 higher.

F.—The miscellaneous receipts in 1860-61 included £340,000 from the Rajah of Putteealah and other large sums which are not regular revenue, and do not recur in 1861-62.

G.—This includes £350,000 not in 1860-61 for increased cost of opium, salt, and income tax.

H.—This includes £150,000 for famine contingencies.

J.—The expenditure from local funds amounting to £223,900 in 1860-61, and £506,000 1861-62, is excluded in both cases. The total outlay on new works of improvement, imperial and local, will be £540,000 more in 1861-62 than in 1860-61.

K.—Army—This consists of £12,199,240, the estimated expenditure for a year of the force now established, and of £600,760 being the estimate for gratuities, bounty, pay, and other expenses, until the reductions ordered are fully carried out.

C. H. LUSHINGTON, Secretary to the Government of India.

Financial Department, 26th April, 1861.

THE DEATH OF COUNT CAVOUR.

THE foremost statesman in Europe,—the man whose life was of the highest political value to the world, and second only in *importance* to that of the Emperor of the French,—is no more. The death of Count Cavour is felt to be an event of the same unspeakable moment, though, as it seems to Englishmen, of exactly opposite tendency, with that which so suddenly snatched away the late Czar in the middle of the Crimean war. The death of Nicholas was the death-blow of the aggressive policy in Russia; and the enemies of Italy will no doubt dare to hope that the removal of the great leader of Italian regeneration will prove a catastrophe as fatal to the hopes which he inspired, and the far-sighted policy by which he advanced with sure and equal step to their realisation. But the parallel is utterly delusive. Count Cavour was the leader of an advancing age,

and did but represent a moral force which secured for his country the sympathy of all advancing nations, and the fear or respect of even the most retrogade. The power by which he worked was not his own, and does not die with him. Nicholas, on the other hand, represented a policy which belonged to the past rather than to the present; with strong unflinching determination he strove to stem the tide of European opinion, and he rallied for this purpose the forlorn hope of Russian barbarism. For his death, therefore, there was no remedy;—the power by which he had worked was dwindling fast even beneath his hands, and faded rapidly away when he was struck down. He restored and represented a dying tradition; Count Cavour created and represented a new spring of national pride and hope which will constitute the tradition of unborn generations.

The events of his short but crowded political career, which extended only over eleven years,—and the most important part of it during which he was Prime Minister only over nine,—have been too often recapituated within the last two days to need formal narration here. Those years of his life in which the political character is chiefly formed were passed in England: he did not return to Piedmont until he was 32 years old; and hence it has been the greatest pride of English statesmen to point to Count Cavour's wonderful success as in some sense a graft taken from a British stock. Nor is it mere national egotism to believe this. It was his clear-sighted financial creed, and a great financial speech in 1850, which first introduced him to power; and he had learned his political economy from Adam Smith. It was a speech on ecclesiastical jurisdiction, expressing his deep conviction that all Churches should be zealously restrained from interference with secular affairs, which first gained him extensive popularity in Italy;—and such a Church he had seen in England and England alone. It was his steady belief in a Constitution worked by the natural aristocracy of a country, but yet in close connection with the popular mind, which gave him an instrument at once sufficiently powerful and sufficiently under control to carry out his great designs; and such a Constitution he had seen only in England.

Yet, though England may have supplied him with political principles suited to his needs, it certainly could not have given him the consummate power with which he used them. Probably no English statesmen that ever lived would have exhibited, under such circumstances, so striking a combination of audacity and tact,—of courage to incur a great risk, and sagacity in measuring what risk would be too great,—of equal power to strike, and to hold back his own supporters from striking, according to the circumstances, as Count Cavour. No statesman known to history has ever counted the cost of such great dangers with so cool and strong a mind. He was as strong in defeat as in success. It was nearly the first act of his political career, after the great disaster of Novara, to urge the duty of cordially strengthening Charles Albert's Government instead of indulging in useless recriminations. And his first great venture as a Minister was so contrived as to be a cordial to the Italian spirit,—a stimulant to the exhausted hopes of a long oppressed nation. The master-stroke of forcing Sardinia into a favourable comparison with Austria by sending an army to the Crimea, while Austria remained sullen and passive in the Principalities, gained him even far more power at home than abroad, because it raised the hopes and animated the national pride of Italy. Nor was it Count Cavour's fault if he was subsequently obliged to wound that national spirit in the equivalent rendered for the aid of France. Had England been willing in 1856 to unite with France and Sardinia in resolutely curbing the influence of Austria in Italy, the same great result might possibly have been obtained without the same humiliating price. It is well known that Count Cavour applied, and applied in vain, to England for a counterweight to the influence of France,—and that the great debt of exclusive obligation afterwards incurred, was incurred in consequence of our refusal to interfere.

But neither in sending a Sardinian contingent to the Crimea, nor in the negotiation of the French alliance, did Count Cavour display so happy a combination of sagacity and daring, as in the occupation of the Umbrian Marches last year, and the summons to the Pope to dismiss his foreign auxiliaries. Had Garibaldi been permitted to push on into the Roman territory, the revolution would have passed beyond the control of Sardinia, and an anarchy risked which would have brought down either an Austrian or an extended French intervention. Had Sardinia prohibited Garibaldi's movement upon the Roman territory, as she did the further movement upon Venetia, the unpopularity incurred would have probably overthrown the Sardinian Ministry and seriously risked the Sardinian leadership. The reasons for the movement were urgent and weighty, but the danger confronted was enormous. The Pope was driven to extremities,—Austria had a new and almost unanswerable excuse for marching to his aid, since the moral logic of the step would certainly have justified quite as well the invasion of Venetia,—and the Ultramontane party in France was irritated into an opposition so vindictive, that it was far from certain whether the Emperor might not be obliged to withdraw his countenance. It cannot be doubted that in discriminating the true moment to defy the Pope and take the formal guidance of the Neapolitan revolution, Count Cavour gave proof of the rarest and highest statesmanlike genius. He had before him a problem in which all the alternatives seemed equally menacing. He instinctively chose for his country the solution which involved danger indeed, but no humiliation,—not the loss of that leadership which had been, during so many months of Garibaldi's enterprise, in partial abeyance; and the resolve raised him to a place in the nation's affections of which he can now never be deprived.

That such a statesman should be cut off while Rome is still in the hands of France, and Venetia still in the hands of Austria, is more than tragic,—for in tragedy the intertwining threads are all cut together,—but here the country's need continues, though the man who could best satisfy it is gone. In no one else can the same powers be found united;—the capacity for ruling rightly, and the capacity for convincing a free people that they are ruled rightly;—the power to win the confidence of an Italian Parliament as no one else could win it, and the power to use the authority so gained as no one else could use it. No English statesman except Pitt has ever gained a power so nearly equivalent to a dictatorship as Count Cavour has exercised for the past nine years over the growing State of Sardinia. Nor is such a combination of practical sagacity and intellectual sagacity,—of the passion that sways, the reasoning that guides, the strength that retains, and the humour that fascinates men,—often seen combined in the same person. Ricasoli, Minghetti, Ratazzi, all seem dwarfed beside the great intellect and will which have so recently been put forth in all their power, not only to grasp new conquests, but to restrain his countrymen from snatching at the inaccessible. But that firm faith in the destinies of his country expressed in his last hour by the dying statesman has been sown by him in so many Italian hearts that it will be impossible for them to despond. It was the last crowning triumph of his life to reconcile all the great men who had assisted him in the glorious work. And now, though in the bitterness of their loss, when they look at Rome and Venetia, many may feel inclined to echo the melancholy old words of patriotic despondency, "The harvest "is past, the summer is ended, and we are not saved,"—they will not allow themselves to doubt that the same Power which raised up Count Cavour for his work, and engraved its purposes on the marvellous triumphs of his short administration, will find instruments noble enough to complete what he has so nobly begun.

AMERICA.

PROBABILITIES OF THE STRUGGLE.

THE prospects opened by the American disruption grow wider, but do not grow clearer, day by day. We see new issues, new possibilities, new dilemmas, but passion and bombast combine to throw a sort of hazy fog over the whole scene. We can dimly perceive fresh secessions rising in the distance, unexpected complications of the social problem at home, unforeseen perplexities in relations abroad. Some results are already absolutely certain; others become hourly more probable; but in spite of all that is written for our enlightenment by Americans here, and all that comes to us across the water, we are as far as ever from understanding

what is really aimed at, or what can possibly be achieved, by either belligerent. The South speaks of "the worse than "Austrian despotism" of the Free States. The North speaks of the "insolent rebellion and presumptuous demands" of the Slave States. Both parties (as has been tersely said) explain very clearly why they are fighting, but not at all what they are fighting for. The South says it is arming to enforce the right of secession—which, whether "a right" or not, has already become a fact which can neither be refuted nor undone;—and the North says it is arming to subdue the rebellion of the South—though, till excitement grew into the blind passion it has now become, the notion of absolute conquest and subjugation was either not named or was explicitly abjured. Its orators merely insisted on "repossessing" Federal property, which must be resold or restored as soon as the severance, already actual, shall have been formally acknowledged.

Now, however, that the accredited Representatives of the United States have begun to declaim with confidence on the imminent conquest and coercion of the South, we must give a word or two to what certainly seems a wild hallucination. We in England, whatever be our wishes, cannot bring ourselves to believe in the *possibility* of such an issue. Much is said of the alleged existence, importance, and forcible suppression of a strong Unionist minority in the seceded States; and, considering inherent probability as well as the unquestionable fact of the violence habitually done to minorities in America, we have no doubt that it is said with perfect truth. As to the numbers, character, social influence, and probable action of these Unionists, we are, and must remain, wholly in the dark. It is pretty clear, however, that be they many or few, poor or rich, they have neither the courage to make their action felt at home, nor the power to make their protest heard abroad. No doubt they might raise their heads—though at infinite risk—in case of a disaster to the arms of the Southern Confederacy, or of long-continued suffering in consequence of the blockade. But in the meantime their repression is complete and their influence *nil*. Nor do we conceive that, even if all that is alleged as to their extent and importance as a party were true, it would render the conquest and reincorporation of the seceded States much more likely to be effected, or much better worth attempting. After all allowances, in spite of all calculations, as the net result of the most sanguine estimates on either side, the conclusive facts will still remain—insurmountable, undeniable, and not to be explained away;—that the seceding States are now ten in number, that their aggregate white population cannot be short of 8,000,000; and that, of these, no one believes that fewer than five or six millions are genuine and passionate Secessionists. Now, the politician who believes that five or six millions of resolute and virulent Anglo-Saxons *can* be forcibly retained as citizens of a Republic from which they are determined to separate, or that they would be desirable or comfortable fellow-citizens if so retained, must have some standard for estimating values and probabilities which is utterly unintelligible to us. Parties who quarrel as a matter of temper may be reconciled or cooled; parties who quarrel over a question of abstract right, or about a division of profit, of property, or of spoil, may submit their claims to arbitration; subjects or sections who rebel against a recognised and powerful Government may be coerced, punished, exterminated, or cowed into submission. But to subjugate, to conciliate, to terrify, or to re-embrace many millions of free men who believe themselves to constitute independent and sovereign States, who are trained to arms, who are inured to self-government, who from infancy and for generations have been accustomed to tyrannise and bully, but never taught to forbear, to submit, or to obey,—this is a feat which has never yet been achieved, and which no sober or sane man would attempt.

But the existence of a large Unionist minority in several of the States—a fact, which it is as impossible to doubt as to measure—points, we think, to a different conclusion, and must have very important influence on the ultimate issue. It may very probably complicate secession with *subdivision*. Already the United States have shown marvellous aptitude for multiplication by the process which naturalists term *fissiparous generation*. They propagate by splitting. Not only have newly-acquired territories divided and subdivided themselves into distinct States, but old States have followed or set the enticing example. Maine, if we are not mistaken, owes its separate existence to this operation. Now, in the four Border States, Missouri, Kentucky, Virginia, and Maryland, the Secessionist party and the Unionist party, if not equally divided, are both so powerful, that neither can carry the State into the camp it favours without exercising a degree of coercion over its rival, which so nearly equal a rival can scarcely be expected to tolerate. Thus, Missouri is not naturally, either by soil or climate, a Slave State—that is, there is nothing in either which specially or imperatively dictates the employment of Slave labour; and many of the residents are already beginning to admit that it was a mistake ever to have insisted on its introduction. Sooner or later it will, we doubt not, become free; and, considering that it has no natural or necessary boundaries—that its limits are merely an affair of maps and parchments—there seems little reason why the free-soil portion which adjoins Kansas should not annex itself to that State, leaving the Slaveholders to form a new province, or to join one of their Southern neighbours. Again, why should the Kentucky Unionists be overborne by the Kentucky Secessionists, or attempt to overbear them? Why need half the citizens drag over the other half to a decision in which they do not agree and a lot in which they are not willing to participate—simply because they happen to form portion of a district which has been accustomed to act as a political unit in the old Federation? Virginia, too, we know, is nearly equally divided in opinions and sympathies. East Virginia is Slaveholding and Secessionist. West Virginia is free-soil, is zealous for the Union, and is yearly becoming rich, populous, and therefore powerful at the expense of its Negro-breeding co-inhabitants. Virginia, *as a whole*, cannot embrace either the Northern or the Southern side in the quarrel, cannot join either the old Union or the new Confederation, without inflicting an oppression and a wrong upon one-half of its citizens,—without, in fact, placing itself exactly in the same position as the aggregate Republic has been ever since this unhappy controversy commenced. United Virginia will be a picture in miniature of what the "United States" are on a great scale—a nation divided against itself. *But why should Virginia remain united*, or continue to constitute one political integer? East Virginia has just the same right, and just the same motive, to separate from Western Virginia, as the South has to separate from the North. The original connection in each case was partly accidental, partly traditional, partly spontaneous;—in each case, as in every case in America, the will of the people was, and must always be, the supreme and inappellable tribunal—the *ultima ratio regum*. Nay, in the instance of the State, the matter is clearer than in the instance of the Federation;—since there is no natural division between the North and the South; but Eastern and Western Virginia are divided by the Alleghany range.

Ultimately, we have little doubt, matters will work themselves out pretty much as nature and common sense suggest. The Americans are not people to be *coerced* in any direction, either in their larger or their smaller subdivisions. Those whose interests or whose sympathies incline them to unite or to remain united, will do so:—those whose interests or whose sympathies incline them to severance, will sever;—and no man or Government will be able to say them nay. Virginia may choose to split; Missouri may hesitate for a while; Kentucky may elect to remain obstinately neutral. But gradually the problem will solve itself. The Slaves in these border districts will grow more and more restless and fugitive; the more energetic, and therefore the more valuable, Negroes will escape into the the Free States, whence no law of extradition will then deliver them up;—and their masters, finding their property growing daily more precarious, will be anxious to realise while they can, and will sell their Slaves South as speedily as possible. As soon as Slaves cease to be a desirable property to hold in Kentucky, Missouri, East Virginia, and Maryland, they will cease to be held there; and as soon as they are sold off and disappear, these States will fall into the Northern Confederacy as a matter of course. This will be the operation of natural influences, if events are left to work themselves out in peace. If once the passions of civil war be let loose, no man can foresee the issue. If Virginia, with its half million

of Slaves, be made the seat of hostilities, it will be almost impossible for the best efforts of both parties to prevent the strife being complicated by the horrors of a servile insurrection.

THE INTERFERENCE OF THE HOUSE OF LORDS WITH THE JUST CLAIMS OF CREDITORS IN BANKRUPTCY.

THE Lords have made several alterations in the Bankruptcy Bill which are of considerable importance. The point of real importance, from which no legal subtlety and no artificial complexity should ever be permitted to divert the attention of men of business, is the superintendence of the bankrupt's estate. The creditors should take care that they have the uncontrolled management of that estate; that they appoint good persons to manage it; that they watch over those persons efficiently and vigilantly. The single question which men of business should ask as to a Bankruptcy Act is, "Does it enable us to manage our own affairs or does it not?"

Sir Richard Bethell's Bill, as it went up from the House of Commons, did give to the creditors their rightful power. It enabled them to appoint a "creditor's assignee," who should be their agent—who should watch over their interests—who should be amenable to their control. It gave this assignee full power to act in the details of management, to wind up pending matters, to discharge just claims, to *liquidate* the entire estate easily and effectually.

The Lords have preserved to the creditors the right of appointing their own assignee, but have destroyed his powers. They have cut out all the clauses which gave him his peculiar efficiency, and have left the name standing as a sort of titular rank. It is well known that several Lords of influence and eminence object to the management of an estate by the creditors, and wish to vest it in a Court of Law. They fancy that they thus obtain an effectual security against deceit and fraud. Those conversant practically with the subject are aware that they do not obtain it; they are aware that the Court is frequently made an engine of fraud; that much that is important is concealed from it; that much which is laid before it is erroneous; that it often decides in ignorance of the most important facts; and that it is left in that ignorance by the misconduct of a few and the neglect of many.

All who know the subject practically know that it is a difficult one; they know that no mode of winding-up a bankrupt's estate will ever be satisfactory; they know that it will always yield less than was expected; that those who anticipated much will be angry at receiving little; that those who have managed the estate will be excessively blamed for failure, and will not be excessively praised for success; but they know at the same time that the only chance is that in this difficult matter, as in others, people should be permitted to manage their own affairs; that if their failure is probable, the failure of others is certain; that hoping to administer a perplexed estate by the official agency of a Court of Law is simply sowing the seed of failure, and then hoping to reap the harvest of success.

THE NEW TAX ON SALT IN INDIA.

THE following is Mr Laing's own account of his new tax on salt alluded to in a former article:—

"Salt will show a large increase, viz, from 3,391,630*l* in 1860-61 to 3,980,000*l* in 1861-62. In 1859, the rates of duty on salt were as follows:—

	Rs.	as.	p.	
Bengal	2	8	0	per maund.
Madras	0	14	0	—
Bombay	0	12	0	—
North-West	2	0	0	—
Punjab	2	0	0	—
Oude	2	0	0	—

The Government then proposed to raise the duty generally by 8 annas per maund, but after some correspondence with the local Governments the following rates were adopted:—

	Rate adopted. Rs.	as.	p.	Increase on old Rate. Rs.	as.	p.
Bengal	3	0	0	0	8	0
North-West and Oude	2	8	0	0	8	0
Madras	1	0	0	0	2	0
Bombay	1	0	0	0	4	0
Punjab	2	2	0	0	2	0

The expectation of increased revenue has been fully realised. The produce of the salt duties (exclusive of imported salt) rose from 2,602,000*l* in 1858-59, the last year of the old duties, to 3,391,000*l* in 1860-61, showing an increase of 789,000*l*, to which must be added about 100,000*l* for the increase of duty on imported salt levied through the Customs. The slight increase of duty, therefore, imposed in 1859, and which I believe no one has felt, has produced nearly 1,000,000*l*, or two-thirds as much as the income tax. The fact is, the increase of duty had no effect whatever in checking consumption. The amount per head, or for each family, paid for salt, is, as Mr Plowden conclusively showed in 1855, very slight, and the general rise of wages and increase of prosperity have made this slight amount comparatively still slighter; so that a large increase of consumption has gone on concurrently with an advance of duty. In Madras the returns show an average consumption of 480,000 maunds a month for the sixteen *months* since the duty was raised, as against 456,000 maunds per month for the corresponding period under the old duty. In fact a rise of duty of 12½ per cent. coincided with an increase of consumption of 5 per cent., and the revenue gained 15 per cent. In Bombay an increase of 33 per cent. on the duty raised the revenue 36 per cent., showing here also an increase of consumption. In Bengal the result was still more favourable, and in the North-West the result was extraordinary, showing an increase of no less than 30 per cent. in consumption coincident with a rise of 25 per cent. in duty. In the face of facts like these, there could be no reasonable doubt that a further slight increase may be borne, without oppressing the people or checking consumption, especially as the approaching opening of the railways will, in many cases, cheapen the price of salt in the interior. It would not, however, have been wise to hazard the results already obtained by too large an advance so soon after that lately made. Accordingly, after consultations with the local Governments, the following additions have been made, viz., in Bengal, Bombay, and Madras, 4 annas per maund, raising the duty to 3-4 rupees in Bengal, and 1-4 rupees in Madras and Bombay. In the North-West and Oude, 8 annas, raising the duty to 3 rupees and doing away with the preventive line at Allahabad. In the Punjab 1 rupee, assimilating the duty on this side of the Indus to that on the North-West. In Nagpore 1-8 rupees, and in Scinde 1 rupee per maund will be imposed where no duty now exists. A corresponding increase is made in the Customs duties on imported salt. The effect of these additions of duty, estimated on the actual rate of consumption, with some allowance for a possible falling off, though I see no reason to anticipate any, gives me an additional revenue of 598,370*l*."

THE COMMERCIAL TREATY WITH FRANCE.

A SUPPLEMENT to the *London Gazette*, published on Wednesday, states that the Lords of the Committee of Privy Council for Trade have received, through Her Majesty's Secretary of State for Foreign Affairs, copies of the French *Moniteur*, containing Imperial decrees of the 27th and 29th May last, promulgating a treaty of commerce, concluded on the 1st May last, between France and Belgium, and extending its provisions to the United Kingdom, in execution of the 5th Article of the Second Supplementary Convention to the treaty of commerce between this country and France of the 23rd January, 1860: also a decree of the 29th May, fixing, in conformity with the provisions of such treaty between France and Belgium, the rates at which the duties which it establishes are applicable to the several classes of articles comprised in the tariff annexed to it.

The following are the modifications of, and the additions to, the tariff annexed to the supplemental conventions to the treaty with the United Kingdom, contained in the present treaty between France and Belgium. This list, taken in conjunction with the tariff annexed to the above-mentioned supplemental conventions, will show the duties at which articles of British produce or manufacture will be henceforth admissible into France.

EXCISE DUTIES.—Modifications in Duties imposed by virtue of Article III., Second Supplementary Convention of 23rd November, 1860.—Chloride of lime. 100 kilos, 7f 50c. Glass-ware, window-glass, and other white glass, 100 kilos, 2f. Glass bottles, 100 kilos, 80c. Artificial ultramarine, 100 kilos, 6f 75c. Sal ammoniac, 100 kilos, 10f.

IMPORT DUTIES.—Modifications in Import Duties fixed by Treaty of Commerce.—In French or British vessels:—Iron for ships' ballast, to pay as pig iron. Steel; hoop-steel, to pay as steel in bars. Steel in sheets or bands, brown, hot-rolled, of

more than half a millimetre in thickness, 100 kilos, 1861, 22f; 1864, 18f. Steel in sheets or bands, brown, hot-rolled, of half a millimetre, or less, 100 kilos, 1861, 30f; 1864, 25f. Steel in sheets or bands, white, cold-rolled, of whatever thickness, 100 kilos, 1861, 30f; 1864, 25f. Zinc, in rough masses, pigs, bars, or plates, 1861, free; 1864, free. Cadmium, rough, 1861, free; 1864, free. Mercury, native, 1861, free; 1864, free. Etain de glace, 1861, free; 1864, free. Hollow columns, solid bars or railings, fire plates and bars, framework of machines, &c., without ornaments or adjustments, to pay as cast iron manufactures, second class. Steel fish-hooks, 100 kilos, 1861, 50f; 1864, 50f. Surgical, optical, physical, and chemical instruments for laboratories, 1861, free; 1864, free. Stereotype-type and engraved plates for printing on paper, to pay as new printing type. Machines for cleaning and dressing wool, cotton, flax, hemp, and other materials for textile manufactures, 100 kilos, 1861, 9f; 1864, 6f. Gold and silver leaf, 100 kilos, 1861, 50f; 1864, 50f. Sugar, candied, 100 kilos, 1861, 44f; 1864, 44f. Leather, varnished, dyed, or morocco leather, 100 kilos, 1861, 100f; 1864, 100f. Ditto, other kinds of prepared leather, 100 kilos, 1861, 15f; 1864, 15f. Old packing cases, 1861, free; 1864, free. River boats, to pay as hulls of ships.

Raw Materials and Textile Fabrics.—Linen—Flax or hemp, combed, free. Linen yarn—Twisted, unbleached, the same duty as on single unbleached yarn, with an increase of 30 per cent.; ditto, bleached or dyed, same duty as on single bleached yarn, with an increase of 30 cent. Tissues of flax or hemp, plain linens and diapers, having in the warp, in the space of 5 square millimetres, unbleached, 8 threads or less, 100 kilos, 28f; ditto, 12 threads, 100 kilos, 65f. (The other classes remain unaltered). Ditto, bleached, dyed, or printed, of 8 threads or less, 100 kilos, 38f; ditto, ditto, of 12 threads, 100 kilos, 95f. (The other classes remain unaltered). Drills, plain or figured, unbleached, bleached, dyed, or printed, 16 per cent. ad valorem. Jute, combed, 1861, free; 1864, free. Tissues of jute mixed with other materials, when the jute predominates in weight, 1861, 20 per cent. ad valorem; 1864, 15 per cent. ad valorem. Vegetable fibres, combed or twisted, 1861, free; 1864, free. Hair—Tissues of cow-hair, pure or mixed, 1861, 10 per cent. ad valorem; 1864, 10 per cent. ad valorem. Cotton yarn, twisted in two strands, unbleached, same as unbleached yarns, with an addition of 30 per cent. Cotton, warped, unbleached, same as single unbleached yarns, with an addition of 30 per cent. Tissues of cotton, mixed with o her materials, provided the cotton predominates in weight, 1861, 15 per cent. ad valorem; 1864, 15 per cent. ad valorem; woollen yarn, twisted, for weaving, bleached or not, same as single unbleached yarn, with an addition of 30 per cent.; apparel and other articles of silk to pay as the articles with which they agree according to the weight of silk; Cashmere shawls and scarfs of India, 1861, 5 per cent. ad valorem; 1864, 5 per cent. ad valorem: tissues of camel's hair to pay as alpaca; cordage and cables, 100 kilos, 1861, 15f; 1864, 15f: curcuma in powder, 100 kilos, 1861, free; 1864, free: Prussian blue, 100 kilos, 1861, free; 1864, free: carmine, all sorts, 100 kilos, 1861, free; 1864, free: blue or green ashes, 100 kilos, 1861, free; 1864, free: mountain green, 100 kilos, 1861, free; 1864, free: stil de grain (yellow lake), 100 kilos, 1861, free; 1864, free: oxide of zinc, 100 kilos, 1861, 5f; 1864, 2f: oxides and carbonates of lead, 100 kilos, 1861, 5f; 1864, 2f: eau de vie, to pay as alcohol; molasses, imported for distillation, 1861, free; 1864, free: colours not denominated, dry or liquid stearic acid, glue and gelatine, 1861, 5 per cent. ad valorem; 1864, 5 per cent. ad valorem.

Import Duties.—Modifications in Import Duties fixed by the General Tariff of France.—Straw plaiting, 100 kilos, 5f; straw hats, each 25c; cheese soft, 100 kilos, 3f; hair, not specially denominated, raw or spun, free; goat's hair, combed, 100 kilos, 10f; quills, dressed or not, free; bed feathers and down, 100 kilos, 50f; wax, raw, yellow, or white, 100 kilos, 1f; wax, raw manufactured, 100 kilos, free; milk, free; butter, fresh or melted, free; butter, salt, 100 kilos, 2f 50c; honey, free; parings of skins, free; lobsters, free; oysters, fresh, 1000, 1f 50c; oysters, prepared or pickled, 100 kilos, 6f; mussels and other shellfish, free; fish, blubber and grease, 100 kilos, 6f; spermaceti, 100 kilos, 2f; whalefins, free; dog-fish skins and dog-fox skins, free; coral, uncut and unmounted free: maurelle, free; lac, dye or in lumps, free; naphtha and like substances, 5 per cent. ad valorem: cantharides, dried; civet; musk; castoreum; ambergris; fruits for distilling; storax and styrax; saracolla; kino and other dry vegetable juices; medicinal roots; herbs, flowers, leaves, and medicinal barks; agaric; kermes, mineral; extract of quinine; camphor, raw and refined; praiss (tobacco juice); 100 kilos, 2f: sponge, 100 kilos, 50f; bones and hoofs of cattle, free; wolfs' teeth, free; horns, raw, free; horns, prepared in sheets, 100 kilos, 3f; resins, and distilled resins, free; liquorice juice, 100 kilos, 12f; cork, uncut, rasped, free; cork, manufactured, 10 per cent. ad valorem; dye-woods, free; canes and reeds, rough, free; barks for tanning, free; beetroot, free; potatoes, free; hops, 100 kilos, 20f; sowing seeds, free; fruits and seeds, oleaginous, free; vegetables, preserved, 100 kilos, 3f; chicory roots, green, 100 kilos, 25c; chicory roots, dry, 100 kilos, 1f; alkaline plants, free; marble and alabaster of all kinds, raw, squared, or sawn, to 16 centimetres and above in thickness, 100 kilos, 1f; marble otherwise sawn, sculptured, or polished, 100 kilos, 1f 50c; granite building stones, and slate stones, rough, cut, or sawn, free; granite, sculptured or polished, 100 kilos, 50c; precious stones of all sorts, free; agate and other similar stones, worked, 10 per cent. ad valorem; grinding stones of all sorts, free; lime and plaster, free; graphite and plombagine, free; pencils, slate, 100 kilos, 1f; pencils, lead, 10 per cent. ad valorem; perfumery, alcoholic, to pay as alcohol; perfumery, others, 100 kilos, 10f; mustard, 100 kilos, 5f; chicory, roasted or ground, 100 kilos, 5f; candles of all kinds, 10 per cent. ad valorem; isinglass, 100 kilos, 40f; extracts of meat, free; chocolate and cocoa, simply bruised, 100 kilos, 35f; mineral waters, including the bottles, free; paper, of all sorts, 100 kilos, 10f; 8f in 1864: cardboard, of all sorts, 100 kilos, 10f; 8f in 1864: cardboard, ground, cut, and mixed, 10 per cent. ad valorem; books, French, of dead or foreign languages, free; engravings, lithographs, photographs, and drawings, free; geographical maps, free; music, engraved, free; ticket labels, printed, engraved, or coloured, free; objects of collection, not commercial, free; statues, modern, in marble or stone, free; statues, in metal, of life size or less, free; toys, 10 per cent. ad valorem; basket work, 10 per cent. ad valorem; umbrellas and parasols, 10 per cent. ad valorem; hair, worked, free; common brooms, free; oak and walnut wood, free; bitumen, free; starch, 100 kilos, 1f 50c; sulphur, raw, purified, or sublimated, free; playing cards, 15 per cent. ad valorem.

Export Duties—General Tariff.—Raw skins, free; parings of skins, free; bones of all sorts and horns of cattle, free; oil cake, free; manure, free; silk in cocoons, free; silk, dyed of all kinds, free; silk, sewing, free; waste silk, spun, free; rags, woollen, pure, free; rags, others, of all kinds, 100 kilos, 12f; paper paste, for paper manufacture, 100 kilos, 12f; old cordage, pitched or not, 100 kilos, 4f; teasels for carding, free; animal black, free; millstones, free; walnut wood, free.

The French tariff thus established was brought into operation on the 1st instant with respect to all articles not comprised in one or other of the two following lists:—

1. List of Articles which will be Admitted on July 1, 1861.—Raw beetroot sugar, refined sugars, sugar candy.

2. List of Articles (now prohibited) which will be admitted on October 1, 1861.—Cutlery of all kinds; carriages; cabinet maker's and turner's small wares in ivory, except ivory billiard balls and combs in ivory or tortoiseshell; skins, varnished, dyed, or morocco; skins, prepared, of all other kinds, except the skins of lambs and of goats with the hair, made up or dressed, raw and dressed parchment and vellum, swan and goose skins, calves' skins, perfumed, known as Russian, used for binding, simply tanned or curried with tan, or prepared as Hungarian leather and dressed with alum; articles of skin and leather of all kinds, other than coarse saddlery and leathern bottles (outres); seagoing ships of wood or iron, constructed in Belgium; hulls of seagoing ships, of wood or iron; flax or hempen yarn, mixed with cotton, wool, or hair; linen net; tissues of flax or hemp, mixed with cotton, horsehair, wool, or hair; jute yarn, mixed with cotton, wool, or hair; tissues of jute, mixed with cotton, wool, horsehair, or hair; tissues and articles of horsehair, pure, except sievecloths, haberdashery, and hats, mixed; tissues and articles of cowhair, pure, except coverings, carpets, and hosiery, mixed with cotton or wool: cotton yarns single, unbleached, measuring less than 143,000 metres to the half kilogramme; single, bleached; single, dyed; twisted in two strands, unbleached, measuring less than 143,000 metres to the half kilogramme; twisted in two strands, bleached; twisted in two strands, dyed; warped, unbleached; warped, bleached; warped, dyed; in three or more strands, unbleached, single twist, measuring less than 143,000 metres to the half kilogramme; in three or more strands, double or cable twist, measuring less than 143,000 metres to the half kilogramme; in three or more strands, bleached; in three or more strands, dyed: tissues of cotton, unbleached, plain, twilled, and ticks of all kinds; bleached, dyed, printed; cotton velvets, velvets unbleached; ditto dyed or printed; other, cords, moleskins, &c., unbleached; ditto ditto, dyed or printed; tissues of cotton, unbleached, plain or twilled, measuring less than three kilogrammes the 100 squares metres; quilting, dimities, stripes and checks, damasks and brilliants; cotton counterpanes and blankets; ditto net or tulle, plain or embroidered; ditto gauzes or muslins, embroidered or figured in the loom, for furniture or hangings; ditto wearing apparel, or articles wholly or partly made up; ditto articles not denominated; embroideries by hand; cotton yarns, mixed; tissues of cotton, mixed; woollen yarns, single, bleached or not; double, for weaving, bleached or not, except the yarns of long combed wool, unbleached, twisted in one or two strands; scoured; double, for carpets, bleached or not; dyed, single or double; tissues of wool, except blankets, carpets, haberdashery, and trimmings, and mill cloth (toile à blutoir), without seam; felts of all kinds, except filtering felts, felt soles, varnished and painted felt for carpets and table covers, felt for shades and the pieces of carcasses of coarse felt for silk hats, &c.: felt in strips of 1 metre, 20 centimetres or less in length, by 60 centimetres wide, for covering, the hammers of pianofortes, and seamless

cylinders for the manufacture of paper; woollen hosiery; woollen lace; list shoes.

Articles not denominated.—Cloth list of all kinds in pieces; clothes and made-up articles of wearing apparel, new; tissues of alpaca, lama, and vicuna, pure or mixed, except carpets, haberdashery, and ribbons; alpaca, lama, and vicuna yarn, pure or mixed, except scoured unbleached yarns, twisted in two or more strands; camel hair yarns; tissues of camel hair, except blankets, carpets, and hosiery; yarns of wool and other materials above named, pure or mixed with cotton, or any other filaments; tissues of wool and of other materials above named, pure or mixed with cotton, or any other filaments; tissues of goats' hair, except blankets, carpets, and hosiery; silk net, plain, unbleached; ditto, dressed; ditto, figured, unbleached, or dressed; tissues of waste silk; tissues called cashmirs; ditto silk, with half fine or false gold or silver; ditto waste silk, with half fine gold or silver; ditto silk, or of waste silk, mixed with wool, cotton, or hair; ribbons of silk, or of waste silk, mixed with wool, cotton, or hair; clothes and made-up articles, mixed with wool, cotton, or hair; chloride of magnesium; garancine; curcuma powder; substances derived from the essence of coal, except azuline, or azelaine, fuchsine, and roseine (colours); white phosphorus; dye woods, extracts of; caustic soda; sulphate of soda; bicarbonate of soda; chloride of lime; chloride of potash; soaps, common; phosphorus, red; aluminium; aluminate of soda; chloride of aluminium; chemical productions not specified in the treaty, except hydrochloro-nitric acid (nitro muriatic acid or royal water), phosphoric acid; potash; natrons; ammoniacal salts, raw and refined; Kreutznach medicinal salts; sulphate of barytes; sulphate of iron; sulphate of copper; sulphate of zinc; double sulphate of iron and of copper, known as vitriol of Almonde and of Salzbourg; burnt alum, calcined and others; half refined; acetate of copper, raw and not crystallised, wet or dry; and acetate of copper crystallised; acetate of lead; acetate of potash; native carbonate of barytes and sulphides of mercury in lumps, natural or artificial (cinnabar), and powdered (vermilion); bottles of all kinds, unless filled; window glass; glass coloured, polished or engraved; glass ware or table glass, white and coloured; articles of glass, not specified; rock crystal, worked; earthenware with coloured glaze, majolica with varnish of several colours; earthenware, fine; stoneware, fine; caoutchouc, articles of, made-up clothes, except those in tissues, not prohibited; caoutchouc, articles of, tissues in the piece; molasses, other than for distillation; hair yarns, not specially mentioned; drugs, mineral kermes; drugs, extract of cinchona; chicory, burnt or ground; playing cards.

THE CIVIL WAR IN AMERICA.

THE following is a copy of the letter laid before the House of Commons by Lord John Russell last evening:—

Foreign Office, June 1, 1861.

My Lords,—Her Majesty's Government are, as you are aware, desirous of observing the strictest neutrality in the contest which appears to be imminent between the United States and the so-styled Confederate States of North America; and, with the view more effectually to carry out this principle, they propose to interdict the armed ships, and also the privateers of both parties, from carrying prizes made by them into the ports, harbours, roadsteads, or waters of the United Kingdom, or of any of Her Majesty's colonies or possessions abroad.

I have accordingly to acquaint your Lordships that the Queen has been pleased to direct that orders in conformity with the principles above stated should forthwith be addressed to all proper authorities in the United Kingdom, and to Her Majesty's naval and other authorities in all quarters beyond the United Kingdom, for their guidance in the circumstances.—I have, &c.,

The Lords Commissioners of the Admiralty. J. RUSSELL.

Similar letters have been addressed to the Secretaries of State for India, War, and the Colonies.

Agriculture.

STOCK FARMING OR CORN GROWING?

SEASONS recur from time to time in this country, which serve to remind us that grain—especially wheat—growing is not, cannot safely be made the basis of our agricultural system. Such was that of 1860. It was one of the great vices of the Corn Law that it operated as an encouragement to farmers to rely unduly upon grain growing for profitable farming. The ascertainment of this effect of restrictions on corn importation, which was accomplished by the Select Committee on Agricultural Distress of 1836, constituted the main argument with the more intelligent landowners and farmers in favour of free trade in corn. Indeed, from that period it has been an axiom with our leading agriculturists that the English farmers must not depend too much on corn growing. In the language of a witness examined before the committee, "they must not go to the barn's door for everything." Everything has since served to confirm that view, and year by year it has been more and more adopted by an increasing number of farmers. The events of last year have completed the general conversion of agricultural opinion from a reliance on corn growing to greater expectations of profit from breeding or grazing. Indeed we are not sure that there are not signs of a somewhat too violent change of opinion on these points. There are districts in this country where husbandry exclusively, or almost exclusively pastoral will be found most advantageous; while there are others where, from local circumstances and the character of the soil, grain growing must ever form the main object of the husbandman. But taking the far greater part of the country, a combination of stock and corn farming will year by year, in the average of seasons, be found the most safe and profitable method of cultivation. In corn growing, the English farmer has to compete with all the world in producing an article of the first necessity, for the production of which many of his competitors have important advantages over him in respect of soil and climate. This need not discourage him, but it involves the necessity of always growing the best crop the season will permit. In average seasons he will find his nearness to the home market, the aids he may derive from the appliances of an advanced system of agriculture, and his own skill and energy, will enable him to compete with all foreign corn growers. Though the price of corn in a good season may be moderate, the English farmer, growing good crops, will have no reason to be dissatisfied with the returns from his corn land if he do not rely exclusively on corn growing.

In stock farming, the British farmer has advantages over all competitors. He has the best breeds of stock to be found in the world wherewith to conduct his operations. He has, if not a practical monopoly of the market, so great an advantage over all importers of live stock as to secure him remunerative returns from his stock when stock imported from abroad cannot be sold at a profit. And, above all, stock farming is in this country far more independent of the casualties of season than grain cultivation.

The numerous discussions and lectures at farmers' clubs and agricultural societies treating of stock and stock farming, which have of late been reported, indicate the present direction of the agricultural mind on these subjects, and the result will assuredly be most favourable to agricultural progress.

What has of late years been called "high farming" has consisted of combinations of stock-feeding and corn growing, in which a large quantity of stock has been fed, affording thereby a great force of valuable manure, and, as the result, heavy crops of corn. Doubtless this may have been carried too far in particular instances, especially in cases of landowners farming their own property; but for the most part, in cases of tenant-farmers—men who get their living by farming—the men who have farmed the highest have proved the most successful men in business. The particular point at which stock feeding may be carried too far for profit, is a matter for each farmer's own consideration, and it is one in which every farmer who is a man of business will soon determine for himself.

It may perhaps be doubtful whether breeding stock may not have been too generally abandoned for feeding stock only. We believe that it has; and that a combination of breeding and feeding will be found on the greater number of English farms the most profitable plan of stock management. This must not, however, be confounded with any reaction to low farming, that is, to a system under which poorly-fed stock, and small crops, satisfied the farmer. Some such notion appears to have been suggested, in a paper on "The Comparative Economy of Grazing and Corn Growing," by Mr A. Burnett, in the recently published number of the "Journal of the Bath and West of England Agricultural Society," when he says: "Whether in the altered circumstances under which English arable husbandry is now practised, *low* farming conducted with skill and enterprise (for there is no incongruity in the association of terms) would not impart to the farmer's annual balance-sheet a better aspect than it derives from the present abnormal system of of *high* farming?" That is the question to which his paper—in some respects a useful one—is directed. He considers it to be a mistake to suppose that the demand for farm produce is capable of any such wide and indefinite increase as is the case with articles of commerce and manufactures; that the well-to-do classes do not consume more bread, meat, or dairy produce when such commodities are cheap than when they are dear, and that even the humbler classes will not greatly increase their consumption of agricultural produce because it is plentiful and cheap, but will rather spend their surplus incomes with the grocer and the draper, than with the butcher and the baker. This, however, is contradicted by experience. In the actual position of our working, aye, and our middle classes, a considerable difference is made in their consumption of the farmer's produce, the first necessaries of life, when the price of such produce is high and when it is moderate. Mr Burnett says:—"Zealots in agricultural reform often twit the English farmer with sluggish progress and want of enterprise. In their mistaken ardour for a system of highly abnormal cultivation, they forget that, while circumstances are ever opening up fresh commercial outlets, the disposal of the English farmer's commodities is not only confined to his own country, but limited even there to the actual wants of the people." He seems to overlook the fact that as the people become more prosperous through the opening up of fresh commercial and manufacturing outlets, they become greater consumers, and con-

sume better kinds of food. Thus the present demand for meat is due to the increased wages of the working classes, free trade in corn having kept the cost of bread at a moderate rate. Mr Burnett seems to apprehend that such an increase of the productions of husbandry may take place as to cause "a superbundance in the market," and asks whether "it would not be better to persuade the present generation of tillage farmers to pause a little in their struggle to outvie each other in efforts to extort from the soil an unwilling yield, and to bestow their thoughts on these questions: 1st, whether a more natural produce obtained by less expensive means of cultivation might not be more profitable; and 2nd, whether corn husbandry, in place of maintaining that supremacy which it has usurped in the last and present centuries, ought not in many instances to give place to pastoral management?"

Now there can be little difficulty in answering those questions in the negative. Farmers should do all they can to increase their produce both of corn and cattle, and this may doubtless be often best effected by reducing the area yearly under corn, in order that a greater breadth of green crop or pasture may be secured. Too great dependence should not be placed on corn growing, but that implies no diminution of effort on the part of each farmer to "extort" from his land actually under corn cropping the largest possible amount of produce. It is of no use then to refer back to the days of our ancestors when want of winter provender limited the extent to which stock could be kept, and the summer fallow supplied the principal means of renovating the tillage land.

Mr Burnett, however, says: "The modern agriculturist, accustomed to regard the magnitude of the home-made dung-heap as the truest criterion of good and remunerative farming, may inquire by what means the old husbandman, growing neither roots nor artificial hay on his farm, was enabled to keep his fields in a bearing condition?" The short answer is, that the old husbandman did not keep his fields in a bearing condition if his produce is compared with that of the modern farmer. Mr Burnett says that the old farmer ploughed in green crops as manure, and that he brought away from the towns nightsoil and other excreta which are now carried away by sewage. These are assumed as more than equivalent to the manure made on a modern farm by stock feeding. Surely this is ignoring all that the modern farmer has done and is still doing. From a comparison of Arthur Young's statistics with those of Mr Caird, the writer infers that the superiority of produce now, as compared with that of Arthur Young's day, does not exceed in wheat, seven bushels; in barley, one bushel; and in oats, four bushels per acre. And that, although produce has not increased more than those quantities, rents have increased from 10s to 16s per acre. He also professes to show that in the least improved counties, where the average increase of wheat per acre is less than two bushels, rents have risen 10s per acre, while in the most improved counties rents have not risen more than 3s 7d per acre. These propositions will not bear the test of examination. The drift of the paper is to recommend less reliance on corn growing and more on dairy produce and meat. It is contended that excessive cost is incurred in manuring the arable land for which the corn grown yields no profitable return. The following is the writer's own summary of the conclusions deducible from his previous statements:—"1st. That expansive to a certain extent as are the demands of the population for breadstuffs, butchers' meat, and dairy produce, in proportion to the gradual increase of numbers and wealth, they are, nevertheless, far from unlimited, and therefore the aim of the English farmer ought to be not to stimulate his fields by expensive means, and in an unavailing struggle with an unfavourable wheat-growing climate, into excessive productiveness, for *that* (the consumption being limited) would necessarily, if successful, tend to occasion glut and consequent depression of price, but to farm economically, even although less crops should be the result, for *that* would assuredly conduce to uphold prices. 2ndly. We have suggested the great importance of encouraging the habit of making the most of moderate means. 3rdly. We have shown cause why a large measure of reformed practice must he organised, that this must be in extending the basis of grazing husbandry, and that in devising new methods of managing his corn fields the farmer will do well to remember that there was a time when cereal fertility in England was kept in progressive advancement by tillage alone, unaccompanied by any alternation of green crops; or to speak more precisely, by tillage supplemented by manure from extraneous resources." Certainly this is not very definite. A little consideration of the business of farming will show that the retrograde views of the writer are erroneous. A farmer has a certain acreage, for which he pays rent, rates, and taxes; which (being arable) he ploughs, harrows, and seeds with grain or pulse of some sort. These are constant and large items of outlay. Without manure, or with but little manure, his wheat may vary from 16 to 20 bushels to the acre, that having been shown by Mr Lawes to be about the natural rate of produce on medium unmanured land. Other grains may be taken to bear a relative proportion.

Such is the position of what our writer calls the *low* farmer. Now the high farmer, incurring no more expense, may by means of manure about double his produce of corn. Can there be any doubt that his only care need be that he does not pay too much farmer for any length of time. He soon finds whether his outlays for the sake of manure prove profitable or not.

Literature.

COMMERCIAL LITERATURE.

BE JUST TO INDIA; Prevent Famine and Cherish Commerce. By A Member of the Cotton Supply Association. Manchester: B. Wheeler.

THIS pamphlet consists of little more than a recapitulation of our various shortcomings in the government of India, with numerous suggestions for improvement in the form of extracts from Indian newspapers, evidence given before Parliamentary committees, and other sources. Some of the statements are entitled to consideration, but many are evidently imbued with that factious spirit which seems inseparable from all discussions respecting Indian matters. The author does not shrink from attributing to our wilful misgovernment not merely the mutiny, but the present famine. He says, "a docile and industrious people we have driven to revolt, and millions of them are now being exposed to the perils of famine"; a remark which in the first part is not only unfair but untrue, and in the second leaves it to be inferred that the famine is the direct consequence of the sepoy mutiny. He also accuses the English Government of allowing "the great works of irrigation, that the native Governments of a previous age had established all over the country for increasing the fertility of the soil, to fall into decay," apparently without the slightest justice.

EMANCIPATION IN THE WEST INDIES. Two Addresses by E. B. UNDERHILL, Esq., and the Rev. J. T. BROWN. London: Published by the British and Foreign Anti-Slavery Society.

THIS pamphlet contains two addresses delivered on their return, at a public meeting, by a deputation from the Baptist Missionary Society sent to visit the West Indies. They give, as might be expected, very flattering accounts of the character and prospects of the Negro population, and profess to vindicate those classes from the charges of idleness, immorality, &c., which have been frequently brought against them. An attempt has also been made to prove that the West Indies have not generally deteriorated in prosperity, but with very little success. Occasionally also awkward passages appear respecting ruined estates, and the vice and dissipation of the chief towns, which will go far to modify the effect produced by the arguments in the addresses. In the second of the two, Mr Brown takes, among others, Mr Trollope roundly to task for alleged misrepresentations, in his work on the West Indies, respecting the religious progress of the Baptist denomination.

HANDBOOK TO QUEENSLAND. *New Zealand Gazette* Office.

THE above work completes the series of handbooks for the Australian colonies. It gives a brief but at the same time sufficiently succinct account of the province of Queensland, its history, political institutions, natural resources, &c. To persons about to visit the colony, intending settlers, and others, this handbook wil prove generally useful.

GENERAL LITERATURE.

HISTORY OF THE SIEGE OF DELHI. By AN OFFICER WHO SERVED THERE. Adam and Charles Black, Edinburgh.

THIS is, we believe, the only attempt at a complete history of the Siege of Delhi, from the hasty descent of General Anson and the three regiments from their summer retreat among the hills round Simla to the fall of the city, and the march of the victorious army to the second relief of Lucknow, that has yet appeared.

Vivid but incomplete pictures of this great struggle,—the turning point of the whole mutiny,—have been given in the letters and diaries of men whose names will be inseparably connected with the heoric deeds they describe; but these, written in the heat of action, are partially coloured by misconceptions, and by the passions and prejudices of the moment;—they lose in wholeness of view and in impartiality while gaining immensely in vividness and in keenness of interest. The time is certainly gone by when a book with Delhi upon its titlepage would be eagerly read and generally talked of, yet such tales as these of the siege of Delhi, or of Lucknow, can scarcely become stale with age, or lose their permanent place among the proudest, if the most sorrowful, remembrances of the nation.

It would be superfluous at this date and in the cursory fashion that would alone be possible in these columns to enter into any of the details of this history. It will suffice to say that it appears to be compiled with care and accuracy from notes taken on the spot, from personal experience and inquiries, and from various private and published sources. The style is clear and concise; the tone moderate and impartial. The writer, while giving all praise to the valour, endurance, and final moderation in victory of the [illegible]

many in the early stages of the mutiny, or to commend the fidelity of the native soldiers and servants who clung to our cause through the greatest trials and temptations—temptations from their own countrymen, and trials from the harshness and injustice with which they were too often treated by those whom they were so essentially serving. Once when a sudden assault upon the camp had been repelled, "The infantry, finding no one to fight with, turned their rage on a number of defenceless servants who had collected for refuge near the churchyard. Several wretches were butchered; some hiding behind the tombs. One woman was shot through the breast. It is idle to say that they mistook them for sepoys; so many sanguinary fights and executions had brutalised our men, who now regarded the life of a native as of less value than that of the meanest of animals. Nor had their officers endeavoured, either by precept or example, to correct them. Next day twenty-three syces, companions of those who had been killed, took the road to their homes. Men of humanity were shocked, and this made the most reckless reflect. There were ten natives to every European in camp. In every troop of artillery there were four times as many natives as Europeans; in the cavalry two men to every horse. Without them the work could not go on."

From this time the natives were treated with greater humanity, and their services more appreciated. No one can be surprised that the exasperation of men so cruelly injured should have shown itself in some acts of violence and unjustifiable retaliation; but it is well that such things should be acknowledged as, perhaps, inevitable evils, and not defended, as they once were, as deeds of necessary and just retribution. In determining "to paint people in their natural hues," our author deserves, and we hope will obtain, the public support he asks for.

THE CORNHILL MAGAZINE for June. Smith and Elder.
MACMILLAN'S MAGAZINE for June. Macmillan.
TEMPLE BAR MAGAZINE for June. Temple Bar Office.
THE DUBLIN UNIVERSITY MAGAZINE. June. No. 342. Hurst and Blackett.
THE ST JAMES'S MAGAZINE. June. No. 3. W. Kent and Co.
THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. June. No. 14. S. O. Beeton, 248 Strand.

MR THACKERAY'S story in the "Cornhill Magazine" is of more than usual interest and artistic power in the present number, and in other respects it seems more than usually interesting. The paper on the "English Convict System" is perhaps scarcely so able as that on the Irish system in a recent number. That on the Study of History is very good.

"Macmillan" is a very good number. There is, besides most graphic and able chapters of "Tom Brown," a valuable paper by Mr Ludlow on the American struggle.

"Temple Bar" still depends on Mr Sala for the support of his very great and unquestionable but extremely disagreeable ability, and sucks in an enormous amount of screaming trash from other quarters, as, for instance, the tale called "A Haunted Life."

There is nothing in the present number of the "Dublin University Magazine" that requires especial notice, though many articles in which the topics of the day are handled with good sense and ability. In one, the "Irish Poor Laws" are defended against the improvements of injudicious benevolence that would sap the independence of the poor by a more indiscriminate application of out-door relief. In another, the permanent nature of the Volunteer Movement is discussed, and some suggestions made as to its extension and support by both Government and people. Three are given to French affairs, political, social, and literary. The rest are various in subject and pleasant in style.

The "St James's Magazine" has some good names among its contributors. Professor Ansted's paper on "San Domingo" is well worth reading. It does not give a favourable impression of Negro industry, but it is confessedly slight and imperfect as a picture of the condition of the republic as a whole. The author of "Paul Ferroll" contributes the first number of a Polish tale of which we can only say that it is as yet too early to judge whether it will prove worthy of its writer's acquired reputation. The other writers at any rate do not seem to agree with one amongst themselves, who is of opinion that "space in the St James's is too precious to waste on what is scarcely worth telling."

If, as we suppose, fashions and needlework, or other light feminine industries and recreations, are the staple commodities of the "Englishwoman's Domestic Magazine," none of its contributors will, we think, have cause to complain of the care and liberality shown in this month's number. The patterns are numerous, new, and pretty. If the letterpress is not of the first order, it is probably as good as can be looked for in a periodical of this kind.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Legislative Body, yesterday, commenced the discussion of the Budget for 1862, and is continuing it to-day. As usual in this country, the Budget was referred to the examination of a Committee of the said Body, and that Committee has presented a report. This document, though drawn up in as favourable a spirit as possible to the Government, shows very clearly that in order to make the estimated receipts of the coming year approach the estimated expenses, the expedient of counting mere temporary resources as permanent branches of income has been employed, though it is neither excusable nor safe. The temporary resources referred to are the imposition of what is called the *double decime* (two-tenths) on all taxes, which though established in 1855 for two years only, has been maintained since; the increased tax on alcohol, the suspension of the sinking fund, &c. The report also complains that though the Government has none but temporary resources to deal with, it incurs expenses which are permanent, and which increase every year. It considers it a bounden duty to "call the solicitude of the Government to a situation which bears alike the burden of large military expenses and of great enterprises which are the work of peace," and prays it to "display great firmness in the administration of the finances, not to weaken the resources of old taxes, to check the increase of expenses, and by prudent economy to place them in harmony with the amount of ordinary receipts."

The Budget of 1862 as presented by the Government amounts to 1,929,448,725f, and is 89,326,867f more than in 1861. The augmentation is ascribed to the expenses occasioned by the different branches of the administration in the three new departments formed out of Nice and Savoy, to what is called the departmental service, to the planting of mountains and making roads through forests, to an increase in the debt occasioned by the consolidation of reserves of the sinking fund, and the employment of the surplus of the dotation of the army, &c., &c. But the Committee proposes to make sundry reductions and additions, and the result is that the expenses, ordinary and extraordinary, are set down by it at 1,350,497,875f. The receipts, ordinary and extraordinary, are estimated by the Government at 1,941,030,275f, which are 100,254,605f more than in 1861. This increase is ascribed partly to the revenues from Nice and Savoy, partly to the normal increase in the taxes. According, however, to the Committee's estimate the total receipts will be 1,354,798,872f, leaving a surplus of 4,300,997f. It must be observed that the figures of the Committee do not include sums of 619,271,156f which appear for the sake of regularity in the accounts, both in the receipts and expenses, and which are called by the French "receipts and expenses *d'ordre*." For all the ministerial departments larger sums are demanded for next year than are accorded for the present one; but the increase to the Marine department is only (including colonies) 1,435,126f; that to the War department is, however, 27,467,777f. The total sum set down for the Marine is 126,015,419f; that of war is 372,972,421f. It is not stated what naval force is to be maintained, but the effective of the army will be, it is announced, 400,000 men and 85,705 horses.

The discussion in the Chamber did not make much progress. M. Kœnigswarter, a deputy who possesses some authority in financial questions, recommended a reduction of expenses, particularly in the War department, and in the number of functionaries in all departments,—and an increase of receipts by the establishment of an income tax. The latter, he added, would tend to equalise the burden of taxation which at present is shared very unequally among the different classes of society. M. Magne, the ex-Minister of Finance, replied, and very energetically affirmed that the Government has no intention of establishing a tax on incomes. The debate has been continued to-day.

The Government has presented to the Legislative Body a bill authorising it to commence the works of as many as 22 new railways, most of them being embranchments of existing lines, or prolongations thereof; also to give subventions to certain lines previously decreed, and among them one not exceeding 1,500,000f to the Northern Railway Company, for modifications in the route to be taken by the Boulogne to Calais line. The 22 new railways form altogether a length of 1,325 kilometres (818 miles), and will cost, it is calculated, about 367,000,000f. Many persons are of opinion that before commencing new lines the Government would have done well to have completed those in course of execution, especially as the financial situation of the country is not satisfactory. To begin these lines the Government asks for a grant of 10,000,000f in the present year, to be raised by an issue of Treasury bonds.

The Bank of France has published an account of the results of

the subscription opened by it for the bonds of the railway companies. It is as follows:—

Names of Companies.	No. of bonds to be issued.	Number subscribed.
Ardennes	86,000	97,431
Eastern	80,000	238,519
Paris, Lyons, Mediterranean	268,000	1,160,918
Southern	75,000	192,323
Orleans	140,000	1,104,677
Western	137,000	177,836
Total	786,000	2,972,204

The number of persons who have subscribed the 2,972,204 bonds, is 53,369, of whom 17,610 reside at Paris, and 35,759 in the departments. The success of the subscription is greater than had been anticipated, and it undoubtedly proves that investments in the existing railways are considered safe and profitable by the French people, and also that there is a large amount of unemployed money in hand. But, of course, a great many of the subscribers asked for more bonds than they expected to get, or, indeed, than they wished to receive. The amount represented by the 786,000 bonds exceeds 9,000,000*l* sterling, and it is all required to be paid up in the course of the present year.

The charges to be preferred against M. Mires and his partner, M. Solar, have been published. They are that the two embezzled money, shares, bonds, and other securities confided to them in their capacity as bankers, or *gérants* of the Caisse Générale des Chemins de Fer; and that they swindled the shareholders of the Pampeluna to Saragossa Railway out of the huge sum of 9,150,750f. They are also charged with having distributed dividends out of capital,—an offence severely punished under the present law on companies *en commandite*. The members of their conseil de surveillance, Count Simeon, a Senator, Baron de Pontalba, and others are accused of complicity in the latter offence.

Inconvenience existing in consequence of the manner of fixing the tonnage of merchandise on board ship, varying in different ports in this country, the Minister of Commerce has charged a commission to devise some uniform plan, and has required the Chambers of Commerce of the great seaports to send delegates to it.

The Bourse to-day has naturally been much moved by the terrible news of the death of Count de Cavour, and a general decline compared with yesterday has taken place. The following is a comparison between the quotations of to-day and those of last Thursday:—

	Thursday, May 30,	Thursday, June 6.

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, yesterday, the quotation was 72f to 76f the sack of 159 kilogs, but business was not active. Four marks were rather lower than last week, the quotations being from 73f 50c to 74f for the current month, 74f 25c to 74f 50c for July, and 74f 75c to 75f for August.

WHEAT.—At *Paris*, yesterday, the quotations varied from 39f for ordinary to 42f, 42f 50c and 43f for choice, the sack of 120 kilogs. Of the provincial markets, 94 present a rise of from 20c to 1f 50c the hectolitre, 14 a decline of 34c to 1f 25c, and at Niort to as much as 5f and 7f 50c; 40 markets are reported firm, 20 without variation, 7 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 10,160 bales, and the importations 35,880. Closing prices were left unchanged, low New Orleans being 104f the 50 kilogs, and very ordinary ditto 110f. On the first two days of this week there was a fair demand, and prices did not change. Yesterday sales were active, and prices firm.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular, and prices remained unchanged. 200 sacks Hayti Port-au-Prince and Cayes went at 76f the 50 kilogs in bond; 70 Gonaives, 82f 50c; 1,220 Rio, not washed, disposable, 60f to 71f; 989 ditto, for delivery, 66f to 69f 50c; 200 Rio, washed, disposable, 86f to 88f; 197 Santos, 72f 50c to 75f; and 472 Java, 110f duty paid. Some damaged Hayti and Santos were also sold. The arrivals were about 15,500 sacks and a number of casks. This week, Hayti Cape has been at 81f 50c in bond; Costa Rica, 112f to 114f duty paid. Some lots of damaged Ceylon and Malabar have also been sold. At *Nantes*, last week, the sales were 1,926 sacks Singapore at, it was said, 100f the 50 kilogs; and 2,366 sacks Hayti, at prices not stated. This week, nothing has been done. At *Bordeaux*, last week, about 1,500 sacks Ceylon went at 110f 50c; 610 ditto plantation, at 118f; 877 sacks Guayra *grage*, at 89f to 90f; *non-grage*, 85f; 500 sacks Mysore, 108f; 30 bales Mocha, 208f to 211f; a small lot of Santiago, 95f. Some damaged Mysore and Macassar were also disposed of. This week, some lots of Guayra, Santiago, and Macassar have been sold at established prices; also some Guayra *grage* at 93f. At *Marseilles*, last week, 1,972 sacks Rio, inferior quality, but sound, went by auction at 52f 50c to 54f 25c; 500 sacks very ordinary, by private sale, at 55f; 800 sacks inferior, 63f to 75f.

SUGAR.—At *Havre*, in the week ending Friday, 250 casks French West India disposable went at 48f 50c, duty paid, and 385 ditto, 48f; 1,000 casks Havana, 35f in bond, and a small lot of Porto Rico, 52f duty

paid. The arrivals were nearly 11,000 casks French West India and Havana, 4,200 sacks Pernambuco, and some small quantities of Trinidad and St Domingo. This week, French West India has been at 47f 75c; ditto "usine," 59f; Havana, 34f 50c. At *Bordeaux*, last week, the demand was not active: 150 casks French West India at 48f 50c to 49f the 50 kilogs; 443 sacks Mayotte, 41f; Reunion was nominally 52f to 52f 50c. This week, there have been no sales of importance. At *Nantes*, last week, some small lots of Porto Rico were taken at 51f; some French West India, 48f to 48f 50c: and some ditto "usine," part at 54f, part at 60f. This week, a lot of Reunion "gros grain" has been sold at 56f 75c, some French West India at 48f. At *Marseilles*, last week, business was not important, and prices declined. This week, some damaged Reunion has been disposed of.

INDIGO.—At *Havre*, in the week ending Friday, business was calm, the sales having only been 34 cases new Bengal, at from 1f to 1f 40c above the estimates, and 4 ditto old, at prices kept secret. The arrivals were only 4 cases from England. This week, some lots of Bengal have been sold, part at prices kept secret, part at 1f to 1f 22½c premium. At *Bordeaux*, last week, the demand was active: 17 cases Kurpah, 12 Madras, 230 Bengal, but prices are not given. This week, there have been some sales of the same sorts, but prices are not stated.

WOOL.—The demand at *Havre*, in the week ending Friday, was rather active: 220 bales La Plata, unwashed, at 1f 5c to 3f 10c the kilog; 59 Chili, unwashed, 2f 80c; also some lots of damaged La Plata. The arrivals were nearly 2,000 bales. This week, Buenos Ayres, unwashed, has been at 212f to 295f the 100 kilogs; Peru, 165f; sheepskins, La Plata, unwashed, 210f; Russia Donskoi, 202f 50c.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs Volkart Brothers, of Bombay, writing on the 11th ult, thus refer to the position of the import and export trade:—Imports.—The business during the fortnight had only been very moderate, and the little done was negotiated at prices from 1 to 4 annas below previous quotations. Perhaps grey madapollams were the only exceptions; 3¼ to 3½ lb were even inquired for at a slight advance. Mule and water twist were brisker, and ⅛ to ¼ anna higher. Exports.—The business had not been large, and the markets closed rather weakly. Cotton had not received the impulse which the latest news from this side might have been expected to give it, and the quotations below will look profitable to those who speculate upon the continuance of the American struggle—say quotations of cost and freight, at 2s 1½d and 3*l* 7s 6d. Broach, 149 rs, or 5⅞; Dhollera, 140 rs, or 5 7-16; Oomrawattee, 137 rs, or 5⅝; Compta, 124 rs, or 4 15-16; ditto, sawginned, 149 rs, or 5¾ cost and freight. Linseed was firm, owing to the limited supply. In rapeseed there has been no sales; the article very scarce, and the finer qualities were held for a slight advance. Sales were 7,000 cwts linseed at rs 4.12 to 4.13, or free on board with freight, 52s 6d to 53s per quarter. Freights to Liverpool have gone up 10s per ton. The market was steady, notwithstanding the quantity of tonnage offering. Cotton to Liverpool was quoted 67s 6d to 70s; seeds, 35s. Money was becoming more abundant, and the Bank rate had gone down 3 per cent. Exchange on London—Bank bills, 2s 0 15-16d; credits, 2s 1⅛d; documents, 2s 1⅜d. The increase in cotton exports to Europe, since 1st January, is nearly one quarter of a million of bales.

A mercantile letter from Quebec, dated the 24th ult, says:—A few rafts of small inferor wood have arrived, one of which realised as high as 7d per foot. No sales of old timber reported. Red pine is offered freely, but there is no change in the value. Elm—14½d is asked for 45 to 50 feet in shipping order. Oak—The high rates of freight on the lakes have given buoyancy to this article, and it is held for higher prices. Staves from the same cause have again advanced. Merchantable pipe have been sold at 45*l*; all thick at 47*l* 10s, whilst 13*l* 10s has been refused for W. I. pun. Deals—Bright are in demand, and seasoned are worth 15*l* 10s. Some floated, of very inferior specification, for later delivery, were sold at 13*l*, ⅛ and ⅜; but fair specifications are worth 14*l*.

The following returns shows the state of the note circulation of the United Kingdom during the four weeks ending May 4, 1861, compared with the previous month:—

	April 6, 1861.	May 4, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	19279893	20199961	920068	...
Private Banks	3256601	3358126	101525	...
Joint Stock Banks	2987604	3067043	79439	...
Total in England	25524098	26625130	1101032	...
Scotland	3852354	3987945	135591	...
Ireland	6553872	6524185	...	29687
United Kingdom	35930324	37137260	1206936	...

And, as compared with the month ending the 5th of May, 1860, the above returns show a decrease of 2,348,066*l* in the circulation of notes in England, and a decrease of 2,850,325*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,025,976*l*, the English joint stock banks are below their fixed issue 235,314*l*,—total below fixed issue in England 1,261,290*l*; the Scotch banks are above their fixed issue 1,238,674*l*, the Irish banks are above their fixed issue 169,691*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 1st of May was 13,052,558*l*, being an increase of 331,020*l* as compared with the previous month, and a decrease of 1,655,497*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 4th May:—Gold and silver held by the Scotch banks, 2,616,886*l*; gold and silver held by the Irish banks, 2,252,789*l*; total, 4,869,675*l*; being a decrease of 106,565*l* as compared with the previous return, and a decrease of 227,253*l* when compared with the corresponding period last year.

The market continues dull and unsettled, and everybody is awaiting further European intelligence with much anxiety. We reinsert our previous quotations, but remark that they may be considered nominal, as lower rates would have to be accepted to ensure large sales. The transactions comprise 4,000 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	11¼	11¾	11¼	11¼

The trade have this week taken sufficient for their consumption, and speculators and exporters have bought rather freely. The stock suffers a slight reduction, the import being nearly equal to the outgoings. Prices of American are almost without change, the only alteration in our quotations being a rise of ⅛d in fair Orleans. Egyptian have been in fair demand at firm rates. Brazil are also without change. East India are freely offered, and the lower qualities are rather cheaper. To-day the sales are 10,000 bales. The market is quiet, but firm. The reported export amounts to 12,750 bales, consisting of 8,210 American, 240 Brazil, and 4,300 East India.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 5th day of June, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,545,435	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,657,923
		Silver Bullion	412,512
	25,545,435		25,545,435

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,916,605
Rest	3,222,592	Other Securities	19,862,603
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,219,540	Notes	5,679,740
Other Deposits	10,714,028	Gold and Silver Coin	870,382
Seven Day and other Bills	620,170		
	36,329,330		36,329,330

Dated the 6th June, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,485,865	Securities	29,701,208
Public Deposits	7,219,540	Coin and Bullion	11,940,817
Private Deposits	10,714,028		
	38,419,433		41,642,025

The balance of Assets above Liabilities being 3,222,592*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£580,595
An INCREASE of Public Deposits of	345,717
A DECREASE of Other Deposits of	929,537
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	225,695
A DECREASE of Bullion of	227,451
An INCREASE of Rest of	1,469
A DECREASE of Reserve of	723,476

The above return is rather unfavourable. A decrease has taken place both in the reserve and the bullion, in the latter case partly from a withdrawal of silver by the Indian Government for exportation. A considerable augmentation is shown in the other securities, while in the other deposits there is a very large diminution. The public deposits continue to be augmented by revenue payments.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,081,624	20,586,373	21,882,859	21,948,780	20,485,865
Public deposits	7,488,615	5,648,550	7,219,397	7,752,799	7,219,540
Other deposits	8,726,683	15,754,354	15,942,762	12,180,599	10,714,028
Government securities	13,544,329	10,578,644	11,281,376	9,759,003	9,916,605
Other securities	12,558,110	14,626,191	19,049,912	19,463,341	19,862,603
Reserve of notes & coin	8,828,242	12,705,329	11,298,442	9,170,472	6,550,122
Coin and bullion	13,836,557	18,020,944	17,957,887	15,963,102	11,940,817
Bank rate of discount	3 p. c.	3 p. c.	3 p. c.	4 p. c.	5 p. c.
Price of Consols	98	96	94	95¼	90⅜ xd
Average price of wheat	39s 6d	44s 9d	53s 5d	53s 4d	55s 5d
Exchange on Paris (shrt)	25 0 5	25 2¼ 7½	25 5 10	25 12½ 17½	25 35 45
— Amsterdam ditto	11 16 16⅛	11 15 15½	11 13 13½	11 14⅛ 15	11 18 19
— Hamburg (3months)	13 7¼ 7¾	13 7	13 4	13 5¼ 5⅜	13 9 9¼

In the corresponding week of 1851 the money market was easy, and the bullion at the Bank was steadily increasing. Large quantities of gold were being exported from California. The advices from the Cape reported a continuance of the Caffre war, but no important operations had taken place on either side.

In 1858, the rate of discount of the Bank of France was from 4 to 3½ per cent., the bullion having augmented two millions and three quarters sterling within a month.

In 1859, the Bank of England had just reduced their rate of discount from 3½ to 3 per cent. The French and Sardinian armies in Italy fully maintained their advantage over the Austrians. The disruption of the Derby Ministry was considered imminent, and the general appearance of politics was disturbed.

In 1860, the Italian question was absorbing attention, and in most quarters was regarded with much uneasiness. In the discount market money was easy and obtainable at a fraction below the Bank minimum of 4 per cent. The Committee of the Stock Exchange had just published their report upon the transactions of Pullinger, the fraudulent cashier of the Union Bank.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,831,427*l*; in 1858, a deficiency of 871,837*l*; in 1859, a deficiency of 3,107,150*l*; and in 1860, a deficiency of 7,282,742*l*. In 1861, the deficiency is 9,148,575*l*.

DISCOUNT AND MONEY MARKET.—The principal feature in the money market this week has been an active demand on the Stock Exchange, owing to the Consol settlement, loans on Government securities yesterday morning having been obtained with extreme difficulty. Later in the day some considerable sums were borrowed from the Bank at 6 per cent., and the pressure was gradually mitigated. To-day there was more ease, and the rate declined to 5½ per cent. This temporary pressure has reacted upon the general market, and few transactions now take place below the Bank minimum, although early in the week the usual terms were 5½ to ¾ per cent. There does not, however, appear any want of capital, the moneyed houses being well supplied with funds, but the same tendency exists as for some time past, to exercise the greatest caution in doing business, and to contract operations as much as possible whenever the general market is at all disturbed. To-day rather more confidence was shown, but only the best short dated could still be negotiated below 6 per cent.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	1½
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2½
St Petersburg	6	...

ENGLISH FUNDS.—The monthly settlement in the funds took place yesterday, and a large amount of stock being brought forward the market showed extreme heaviness, which was increased by the lamentable news of the death of Count Cavour. Consols at one period receded as low as 89⅝, but afterwards rallied to 89⅞ to 90. The increased supply of stock at the present settling is due to the sales by the public for reinvestment in Indian and other securities yielding a higher rate of interest. The announcement of the new loan for India has also exercised a prejudicial effect. The comparative disfavour with which the British public are beginning to regard Consols as a permanent investment affords a great contrast to the feeling a few years ago. To-day the tendency has again been flat, and the final prices this evening were 89⅞ to ⅞ for money, and 90¼ to ⅜ for the account, or a half per cent. lower than last Friday.

Exchequer bills were rather dull in the earlier part of the week, but the June descriptions have since been in slightly better demand, and closed to-day at par to 4s premium, showing a slight rise. The March bills are without change at 6s to 2s discount. The increase in the rate of interest on India bonds has caused only a partial recovery, the last quotation being 30s to 20s discount.

The Indian Five per Cent. stock left off at 97½ to 98 ex div. for the new account, being a decline of more than 1 per cent.

In the Stock Exchange, yesterday, owing to the scarcity of money, as much as 7 to 7½ per cent. was paid to carry over purchases in Consols to the next account. As regards Indian Five per Cents., transactions are reported to have taken place as high as 9 per cent.

FOREIGN STOCKS.—The transactions in foreign stocks continue on a very moderate scale, and the general tendency has again been flat. Sardinian has declined owing to the death of Count Cavour, but not to the extent that might have been anticipated. Turkish Six per Cents. of 1858 have also fallen, on the fear that further complications may arise not only in the settlement of the Italian question, but also as regards Eastern affairs. The Russian Four-and-a-half per Cent. loan of last year reached to-day 89 ex div. the price at which it was issued having been nominally 92, or deducting the allowance of interest, 90⅝. Mexican shows a fresh reduction of nearly ½ per cent., and the late improvement in Portuguese and Spanish has not been maintained.

The closing price from Paris this evening was 67f 60c ex coupon, showing a decline of about three eighths per cent. compared with last week, but a recovery of nearly a quarter from yesterday's quotation.

The annexed reply of the Committee of Spanish American Bondholders with regard to the debt of New Granada to the Government recently established in that republic has just been published. Senor Martin has expressed his concurrence in the view taken by the Committee:—

Committee of Spanish American Bondholders,
11 Austinfriars, London, May 31.

Sir,—I have the honour to acknowledge the receipt of your letter of the 1st inst., with the two enclosures contained therein, which I have laid before the Committee of Spanish American Bondholders.

This Committee, while always abstaining from taking any part in the political differences of New Granada, is at all times prepared to receive with respect any communication which may be addressed to it in relation to the foreign debt of that State.

But with regard to the notification contained in your letter, the Committee are under the necessity of stating to you that the agreement entered into with his Excellency Senor I. de Fransisco Martin for the arrangement of the foreign debt of New Granada, being concluded under every sanction and formality which can give force to any agreement whatever, being founded on an Act of the national Congress carried into effect by the Executive Government, cannot be effected by any change which may be contemplated or impending in the Government or Constitution of New Grenada.

This agreement has been framed in a spirit of most liberal concession towards New Granada, in the hope that, being brought within the limit of the financial capability of the Republic, it might be found to constitute a permanent settlement of the debt. The Committee can well believe that, as you are pleased to intimate, even more acceptable conditions might be presented to the bondholders. But, the agreement being once definitively concluded, the Committee feel that it would be contrary to every principle of business to open out any fresh discussion of the question.

The Committee cannot but take this occasion of respectfully offering the expression of their fervent hope that the political dissensions now existing in New Granada may speedily be brought to an end, so that measures may be taken for developing the vast resources of that country, which the bondholders will cheerfully aid in doing whenever there shall be tranquillity restored on a permanent basis.—I have the honour to be, Sir, your obedient servant, J. D. Powles, Chairman of the Committee of Spanish American Bondholders.

Senor Don Juan M. de la Espriella, the first appointed Chargé of the Executive Power of the State.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

Railways and other Shares.—The railway market shows a reaction from the better prices of last week, owing partly to the publication of low traffic returns and partly to the news from Turin. To-day there has been a rather better feeling, but only a fractional recovery has taken place. A disposition still exists to press speculative sales, especially in the country, not merely on the American crisis, but also on the increased chances of a disturbance to the peace of Europe arising from the lamentable event of yesterday.

In the colonial market, Indian guaranteed descriptions have generally maintained their late value, although the original East Indian stock is rather flatter. Canadian shares are dull, especially Great Western.

The principal movement in foreign shares has been in Lombardo-Venetian, which, after falling yesterday to 1 to ⅞ dis., subsequently rallied, and closed this evening at ¾ to ⅝ dis. The recent improvement in Great Luxembourg has been partly lost. Brazilian railway shares are flatter, while American show no material change.

In miscellaneous descriptions, the late inquiry for joint stock bank shares has diminished. Great Ship declined in the course of the week, but left off this evening the same as last Friday, at 5s 9d to 6s 3d. The new China and Japan Steam are quoted par to ¼ premium, and Natal Land ⅜ to ⅝ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Foreign Exchanges.—The rates continue firm, and are generally quoted higher. The news of yesterday has been followed by a movement in the rates on Vienna and Trieste unfavourable to the Austrian currency, indicating a significant want of confidence.

Bullion.—The following is the weekly report of Messrs Pixley, Abell, and Langley upon the bullion movements during the week, and the transactions in Indian rupee paper:

Gold.—The Owen Glendower has arrived from Australia with 57,000*l*, about half of which has been purchased for abroad, and the remainder will probably be sent to the Bank. The Prince of Wales is now hourly expected, having been spoken with off Corunna some days since. The Magdalena has brought 35,687*l* from the Brazils, and some considerable amounts of gold coin have been received from the Continent. The demand for export not having been very brisk during the week, about 150,000*l* has been bought by the Bank. Sovereigns continue to be sent to America, the Arabia having taken 82,861*l*, and the City of Baltimore 161,438*l*, and the steamer leaving on the 8th will also take a large sum. The other exports comprise 58,000*l* per Seine to the West Indies; 17,636*l* per Indus to the East; and 50,000*l* per Dane to the Cape.

Silver.—The silver, ex Tasmania, has been sold at 5s 0⅝d per oz standard, being a slight decline in price; there is but little demand for the East, and the market for the present is quiet at the above quotation. The Seine has taken 7,600*l* to the West Indies, and the Indus 190,041*l* to India and China.

Mexican Dollars.—The dollars ex Tasmanian have been sold at 59d per oz, being a decline of ¼d per oz; the market is very quiet, nor do we look for much improvement, unless the China letters should contain orders.

Exchange on India for drafts on Bombay and Calcutta is unchanged; for 60 days' sight drafts the rate is 1s 11¾d to 2s. Bills with documents, 1s 11¼d to 1s 11⅜d. Madras 60 days' sight bank drafts, 1s 11⅝d to 2s.

India Government loan notes have been rather stronger, owing to the favourable news from India, and the rise that had taken place there on the announcement of Mr Laing's budget. We quote 5½ per Cents., 99¾ to 100¼, and 5 per Cents. 93¾ to 94¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold refinable, 77s 11d per oz std; United States gold coin, scarce. Silver—Bar silver, 5s 0⅝d per oz std; bar silver, containing 5 grs gold, 5s 0¾d per oz std; fine cake silver, 5s 5¼d per oz; Mexican dollars, 4s 11d per oz; Spanish dollars (Carolus) in demand, scarce.

About half of the 57,000*l* in gold by the Owen Glendower has been taken for Spain.

The bar gold sent into the Bank to-day was 45,000*l*,

making a total of 70,000*l* since making up the returns in this evening's *Gazette*.

About 344,000*l* in Australian gold is now overdue.

FAILURES AND MERCANTILE EMBARRASSMENTS. — The suspension has been announced of another old-established country bank, that of Messrs T. and R. Raikes and Co., of Hull. The liabilities are about 66,000*l*, while the assets are expected to realise 17s in the pound. The cause of the failure has not transpired.

The stoppage has also been announced of Messrs Mackay and Read, East India agents, of London, for about 30,000*l*.

The creditors of Mr Joseph Sutcliffe, at a meeting at Manchester, have agreed to accept a composition of 7s 6d in the pound without security, the insolvent to execute a deed of assignment. The committee of investigation reported that the bookkeeping has been very defective, and that apparently Mr Sutcliffe was without capital at a time when he represented himself to be worth 17,000*l*.

At a meeting of the creditors of Messrs George Moorhouse and Co., it was agreed to accept 5s in the pound. The realisable assets represent 7,500*l* only, against 30,000*l* liabilities, and the firm appear to have been long insolvent.

The suspension is announced of Messrs D. and J. Thompson, merchants, of Dundee, with liabilities to the amount of about 40,000*l*, and assets showing a surplus. An offer has already been made to pay 20s in the pound. The disaster is stated to have arisen from the position of houses connected with Messrs Thompson in America.

PUBLIC COMPANIES.—The annual meeting of the Bank of British North America was held on Tuesday, when the report announcing a dividend at the rate of 6 per cent. per annum free of income tax was adopted unanimously. It was stated that the business during the past year has not improved to the extent previously anticipated by the Directors, the North American colonies not having fully recovered from their late depression. A large portion also of the abundant harvest of 1860 has not yet been got to market. In the first few months of the present year, however, a material improvement has taken place, while no bad debts have been incurred. The crisis in America is not expected to affect injuriously the business of the bank, notwithstanding the extensive commerce carried on between Canada and the United States. It may in fact tend to increase the operations of this establishment by bringing a large quantity of Western produce through the colony. A considerable profit has been realised by exchange operations. A larger provision than usual has been made for contingencies, including a suit for about 8,000*l*, now before the Supreme Court of the United States, but which the Directors have every reason to believe will be decided in their favour. The new branch at Vancouver's Island has not realised previous expectation. A short discussion took place, in the course of which it was mentioned, in reply to an inquiry, that the cause of the profits during the last four years having been one-third less than in the previous four, is the great depression in the colonies during the former period, together with the heavy losses of the bank in 1857 and 1858.

A meeting of the London Chartered Bank of Australia was held to-day, when the report, recommending a dividend of 3½ per cent. for the past half-year free of income tax, the appropriation of 10,000*l* to the reserve, and of 1,500*l* to the colonial building fund, leaving a balance to be carried forward of 7,848*l*, was carried unanimously. The position of the bank was stated to be steadily and satisfactorily improving, and the Directors confidently look forward to the period when the dividend may be increased. The present report is the best yet issued. The bad debts in the past half-year have been extraordinarily small, notwithstanding the occurrence of some serious failures in the colony, a result mainly due to the great care and caution exercised by the inspector and other officers of the staff. The bank premises at Sydney have been revalued, and 3,000*l* written off on this account, owing to the depreciation of property in that city. The other branches stand in the books at their real value. The practice of allowing interest on deposits, which had been agreed to be abandoned by the managers of the various banks in Australia has not been ratified by the Directors of one of the leading establishments; but it is hoped that some stand may yet be made against its reintroduction. A discussion took place with reference to the proposed addition to the reserve, and a proprietor moved that, instead of this appropriation, the dividend be increased 1 per cent. On a division, however, the motion was lost, only two hands being held up in its favour. In explanation of the apparently large sum in bullion held by the bank, it was mentioned that about 364,000*l* of the total represents gold, either sent or about to be sent to this country.

At the half-yearly meeting of the Peninsular and Oriental Steam Company, the report recommending a dividend at the rate of 3½ per cent. for the half-year free of income tax was agreed to. The various services were stated to have been carried on with remarkable punctuality during the last six months, and no casualty of any importance has occurred to the fleet. The last addition to the active list is the Mooltan, which has recently been fitted with the superheating apparatus to save coal, and has been tried satisfactorily, but has not yet made a sea voyage. It has been decided to lengthen the Ripon, an iron steamer built eighteen years ago, at the bow, and to supply her with new boilers, &c. The proposal of the Company to consolidate the various services under one contract has been agreed to by the Government, but under a different form to the one first suggested. One of the provisions was that a certain sum should be paid for some small services hitherto performed gratuitously, of which the most important was the alternative fortnightly mail to China. Since then, the Government have determined to discontinue this service, although it costs no more than about 12,000*l*. Some discussion took place upon various points connected with the half-year's working, in the course of which the injury to trade by the discontinuance of the fortnightly China mail was pointed out by several speakers. The fleet of the Company now consists of 52 steamers of 17,111 horse-power, and eight transport store and coal ships, of a total tonnage of 80,756 tons.

At a meeting of the African Steam Company on Wednesday, the report recommending a dividend of 7s per share, or at the rate of 7 per cent. per annum free of income tax, was adopted after a short discussion. It was also determined to appropriate 1,000*l* out of the profits of the past half-year to the credit of the boiler fund account, which will now stand at 3,000*l*, and to write off 1,201*l* of the loss by the sale of the Gambia, which will thereby be reduced to 1,000*l*. During the past six months the service has been conducted satisfactorily, and the contract time has been kept. The ascertained loss on the sale of the Hope is 13,706*l*, which it is intended to provide for by instalments. No further information has been received as to the intentions of the Government with regard to the navigation of the Niger.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.32½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.7⅛ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 4-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for charges of transport and loss of interest, the present rate leaves little, if any, profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was only a limited supply of English wheat on offer at Mark lane to-day; nevertheless, all kinds met a dull inquiry, at prices barely equal to Monday. Foreign wheat was dull, and rather lower to sell. Spring corn sold heavily, and American flour was 6d per barrel cheaper. The imports from abroad this week are 20,460 quarters of wheat, 980 barley, 19,510 oats, 1,230 sacks and 21,970 barrels of flour.

At Liverpool, this morning, nearly all kinds of produce were heavy, and drooping in price.

The receipts of old wheat at Alexandria on the 25th ult. had almost ceased; but some parcels of new had come to hand, which had been disposed of at very high prices. Barley, beans, and Indian corn were in limited request, at about previous currencies. Wheat, Saide, Pacha's produce, 34s to 35s; Saide beans, 27s 6d to 28s; Beheireh ditto, 25s 3d to 26s; and barley, 17s 6d to 18s 6d per quarter, free on board. Freights very firm, at 7s per quarter for beans.

During the present week there has been a good though not brisk demand for cotton at Liverpool, the news from America relating to the crop being unfavourable, and inducing holders to remain firm in their demands. The sales of the week amount to 79,000 bales, of which 49,000 are to spinners, 17,000 on speculation, and 13,000 for export; quotations are the same as last week. To-day the market closes steady; sales 10,000 bales.

Messrs Briggs and Co. write as follows on the 25th ult., at Alexandria, in reference to the cotton trade:—"An active business has prevailed during the week past, although somewhat checked by the increased pretensions of holders, and also by the smallness of the stock, which is believed to be between 2,000 to 3,000 bales. The sales have been as follows:—36 bales low ordinary at 6 1-15d to 7d; 825 ordinary to middling, 7d to 8d; 1,187 good middling to fair, 8d to 8⅛d; 332 good fair to good, 8⅛d to 9d; 530 good to fine, 9d to 11d per lb, free on board. Freights by steamers are well supported, owing to the great desire of holders both of cotton and grain to get their stuff to market as quickly as possible. Cotton is at 9-16d and 5 per cent. per lb, by ships ⅝ths to 7-16ths of a penny per lb.

The public sales of tea held this week have been somewhat heavy; nevertheless, prices have ruled tolerably firm. In the private market, very little is doing.

The transactions in most descriptions of raw sugar have continued limited, and, in some instances, prices have further declined 6d per cwt. Refined goods are the turn cheaper.

The annexed statistics, in reference to sugar and coffee, are furnished by Messrs Trueman and Rouse:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Four Months ending 30th April, 1860 and 1861.

	SUGAR.			
	Imports.		Stock, 30th April.

Scarcely any change has taken place in the value of coffee. The transactions, however, have been chiefly confined to immediate wants. The cocoa market is heavy, at barely last week's quotations.

Messrs Witherby and Son remark as follows in reference to the fruit trade:—

Currants.—The market business has been on a very limited scale since the end of the March, but as the deliveries to the trade alone since that date have been 2,600 tons, it is inferred that dealers will soon be coming forward to replenish their stocks. There has scarcely been any variation in the value of good currants since last November; low fruit then quoted at 25s to 26s, is now becoming scarce at 27s, and on that description has the consumption mainly fallen. The stock of old fruit is very small. Raisins.—The clearances here for consumption in May were 432 tons, against 560 in May, 1860, and about 115 tons for export. There has been a decline of 2s in red raisins, bringing prices to those which prevailed in March, and which led to considerable trade. This article is difficult to realise, even at the reduction. Middling sultanas have been sold at 41s; fine held at 44s; no buyers. Valentias quite neglected. No old fruit here of any kind.

Owing to the fall in the value of wheat, the rice market has been in a depressed state, and, in some instances, the currencies have had a drooping tendency.

Saltpetre has met a dull sale; nevertheless, we have no change to notice in the quotations. Both hemp and flax have ruled heavy, on former terms.

Comparative Statement of Hemp and Flax on hand in London, on the 1st of June, 1860 and 1861, Dealers' Stocks included.

The following remarks are furnished by Messrs Powell and Co., and they refer to the state of the leather trade for the past month:—"Nothing has occurred during the past month to improve or materially alter the position of the leather market. The supplies have not been particularly large, and a steady, although a limited, demand has existed. The shipments of boots and shoes to the Australian markets have increased, and some considerable orders both for the army and navy have been issued; prices, however, in general have shown rather a downward tendency, and the indisposition to purchase, except for immediate wants, has still prevailed. This comparative inactivity we cannot attribute to the position of the leather trade itself so much as to the causes of depression external to it, which are influencing all branches of business; more particularly the deficiency of the last year's harvest, the general disruption of trade occasioned by the American difficulties, and the consequent unsettlement of the money market. These circumstances are no doubt checking the demand, but we hope their adverse influence on leather may be fully counterbalanced by lowering the prices of the raw material. Raw goods show very little change in value. The import has been considerable, and an average amount of business has been done, excepting in South American hides, of which the high prices sufficiently account for the diminished consumption. The most remarkable feature in connection with the hide trade is the great reduction in the value of hides in the North American markets. This fact will doubtless occasion a considerable exportation thence to Europe, and will also divert many shipments usually made to America to the European markets."

The second series of colonial wool sales terminated on Thursday. The catalogues comprised 13,672 bales Sydney, 20,950 Port Philip, 4,686 Van Diemen's Land, 13,792 Adelaide, 1,222 New Zealand, 1,014 Swan River, 8,450 Cape, and 2,379 bales foreign. With the usual attendance of home buyers, a large number of foreign ones presented themselves, who continued their operations from day to day with such vigour that the opening rates soon became permanently established, and the little change that took place throughout the series was against the buyer. This was particularly the case upon the finer descriptions, both clothing and combing, and upon Western Province or full-bodied Capes, which, throughout, have been 1d to 1½d per lb dearer than during last sales. The short and heavy Algoa Bay and Natal wools, on the contrary, were difficult of sale, and barely supported the closing rates of March. The only other exception to the general firmness was in medium and ordinary Port Philip scoured skin wools. The private contract market for both home-grown and colonial wool is very inactive, yet prices rule about stationary.

Messrs Churchill and Son have issued the annexed statement of the

Comparative Stock of Timber at the Public Docks on June 1.

	June 1, 1861.	June 1, 1860.	June 1, 1859.
Foreign deals pieces	1,025,000	858,000	845,000
Battens, boards, and ends	532,000	537,000	551,000
Fir timber loads	43,500	30,100	30,900
Colonial pine deals & battens pieces	709,000	313,000	468,000
Spruce ditto	530,000	438,000	449,000
Pine timber loads	8,300	8,800	6,100
United States pitch pine timber	1,900	3,800	3,400
East Indian teake	2,900	6,000	15,000

The following observations are from Messrs Grant and Hodgson's monthly report of the tobacco trade:—"Considerable business was transacted last month in all descriptions. Nearly all the desirable lots of home descriptions brought forward were freely taken, at an advance on previous quotations, and buyers in some instances would have increased their purchases, but for the unwillingness of importers to progress with sales, excepting for very limited lots, and for parts of parcels only. Sales may be estimated at fully 3,048 hhds, viz., 462 hhds Virginia leaf, 703 hhds and tierces of strips, 517 hhds of Kentucky leaf, 960 hhds of strips, and 442 hhds of Maryland, part of which has been taken on speculation. The market closes with a very firm appearance. Imports, 252 hhds. Deliveries, 1,038 hhds, against 814 hhds in the corresponding month of last year. Stock, 18,163 hhds, against 16,549 hhds in 1860, 10,123 hhds in 1859, 8,222 hhds in 1858, 9,759 hhds in 1857, and 7,054 hhds in 1856.

Scotch pig iron has been in moderate request, at 48s 3d cash mixed numbers. A few parcels of spelter have changed hands at 16*l* 10s per ton. Other metals have moved off slowly.

Particulars of Banca Tin.

General stock of Banca tin on the day of the auction in Holland	152378	169038	181214

There has been less activity in the demand for rum, at about previous rates. Brandy is held at very full prices; but grain spirit, both English and foreign, is somewhat heavy.

Linseed oil has ruled firm, at 30*l* per ton. Most other oils have supported previous rates. American turpentine, 46s 6d; English, 46s per cwt.

Tallow has continued heavy, and drooping. P. Y. C. on the spot, 54s 6d, and for the last three months, 53s per cwt.

"The actual condition of financial and commercial affairs," says the New York *Shipping List* of the 22nd inst., "does not authorise the announcement of any improvement, but, so far as we can discover, it is at least no worse; while some even go so far as to express the opinion that there are such symptoms of convalescence in some of the chief commercial centres as to encourage the hope of an early advent of better times. There is no noticeable abatement to the money pressure—indeed, the market at the close, yesterday, was, if anything, a trifle harder than at the date of our previous writing. For call loans, the market has been quite

easy, however, and where the securities have come up to the standard, parties have had little trouble in finding accommodation at from 6 to 7 per cent. Dry goods paper is looked upon with much suspicion. Grocery paper meets with more favour, and strictly first-class goes at 8 to 9 per cent. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to 7
Do. other good securities	7 ...
Prime endorsed bills, 60 to 90 days	7 ...
Do. 4 to 6 months	8 ...
First-class single signatures	7 ...
Other good bills	... ...

The imports at this port continue very light, and the aggregate for the past week is less than half of the corresponding week last year, as may be seen by reference to the following figures:—

IMPORTS.

For the week.	1860. dols		1861. dols
Dry goods	859,087	.....	412,768
General merchandise	4,658,500	.....	1,915,711
Total for the week	5,517,587	.....	2,328,479
Previously reported	85,697,556	.....	64,095,659
Since January 1st	91,215,143	.....	66,424,138

In general trade circles, trade continues light, except in produce, which is active for consumption and shipment. There is nothing new or interesting to note in the dry goods trade, the demand being still very light, and prices generally nominal. In military goods, the movement continues moderate."

The annexed return shows the foreign imports at New York for ten months of the fiscal year, ending April 30:—

	1859. dols		1860. dols		1861. dols
Six months ending Jan. 1	93,245,490	...	113,733,340	...	111,504,368

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from the manufacturing districts, this week, are otherwise than favourable. A fair amount of business appears to have been transacted in goods for home consumption; but for export both to India and America, the inquiry has continued limited. The iron trade has ruled steady; but the demand for coals has been much restricted.

MANCHESTER, June 6.—The market has continued extremely dull and spiritless. Buyers of yarn for the Continent had been operating in the early portion of the week, as they had been doing for the few weeks before, but Count Cavour's decease would, it is thought to-day, prove somewhat of a check on further business. The accounts from India this week have been most discouraging, showing heavy losses, especially from Bombay, on nearly all our products. Accordingly, India staple, which were almost the only saleable articles last week, have become more difficult of sale. The declension in India having proceeded step by step with the enhancement of cotton here, our manufacturers feel themselves in a most dangerous position, from which they can discern no present outlet. Other markets afford no hopes of making up the loss.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There is again a very stagnant wool market. The amount sold here is very small, and the profit made is often questionable. Prices are considerably lower for most sorts, and have a drooping tendency. Business continues almost at a standstill in yarns, and prices are depressed. The little that is done is chiefly for the home trade. The orders offered for abroad are at exceedingly low rates. The piece branch of our market shows the most signs of life, though its condition is still unsatisfactory. Our home merchants are making inquiries for the home trade, though the orders given out are hitherto very few.

LEEDS.—The cloth markets have been flat. The sales have been to a very limited extent. Merchants, those in the home as well as those in the foreign trade, are holding off buying, as they find their stocks accumulating instead of diminishing. Those who wish to realise have to concede in price, but there is no disposition to force sales, and hence prices upon the whole are steady. English wools in the local markets are rather easier to buy.

ROCHDALE.—There has been a small attendance of buyers in both the wool and the flannel markets, and the business done has been below an average. The local staplers have scarcely any short wools, for which there is a fair demand at late prices. Long wools are slightly easier. Though the sales of flannel are slow, manufacturers will abate nothing in price, nor are they curtailing much in their rate of production. The demand for Yorkshire goods continues flat, and to effect sales some concession in price has to be made.

LEICESTER.—Nearly every department of the hosiery trade is dull, and there are no immediate prospects of a revival. Manufacturers confine their production to what is actually required, and indeed have done so for some time past. The yarn market continues dull, there being not much demand for material. There is not much inquiry for wools.

NOTTINGHAM.—The lace trade is still inactive; black lace shawls, mantles, &c., however, continue in active demand, and there are many machines now engaged in making these goods. The cotton trade continues exceedingly dull. There are appearances of a little more being done shortly with the Continent. In consequence of goods being now chiefly finished to order, employment is scarce, and many lacemakers are out of work. The hosiery trade in most branches is dull. No change in the price of yarns.

BELFAST.—At length the market for white linen goods begins to feel some impetus from the influence of the French tariff. Other continental States exhibit greater disposition to purchase largely. The West India trade has been pretty active, and considerable parcels of the lighter qualities of linen have been sent off to Cuba. The week's transactions for export to the United States have been exceedingly small, nor are the advices from thence such as to lead to the slightest extension of business there. In the home trade, the improvement noted last week continues to act on the market, but the gross amount of out-go for that market is much below the average of any season since 1858. There is no falling off in the turn-out of goods from the larger bleachfields.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10*s*, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10*s*; nail sheets, 8*l* 10*s*; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10*s*; hoops, 8*l* 10*s*; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 7*s* 6d to 3*l* 10*s*; best native hydrate pigs, 3*l* 7*s* 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Barrow hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Workington hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites from 3*l* 2*s* 6d to 3*l* 7*s* 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 22.—With the continued plentiful receipts, the market for State and Western flour has become somewhat depressed, and dealers generally quote a depreciation in values of about 5c per barrel for common grades. Canada flour is steady, with a fair demand at previous prices. The demand for Southern flour continues fair, and prices are firmer.

EXPORT from 1st to 21st May.

	1861. barrels	1860. barrels
Wheat Flour	142,449	65.702

There has prevailed a fair demand for prime grades of wheat, both for local milling and for export, and the transactions since our last are tolerably heavy. The receipts by the North River boats have been fair, though not heavy, and a considerable propor-

tion of the sales have been to arrive. The common and inferior grades have been dull. Corn is in request, but prices are lower for Western and firmer for Southern.

EXPORT from 1st to 21st May.

	1861. bushels	1860. bushels
Wheat	834,171	234,789
Corn	501,832	191,432

NEW YORK, May 25.—A full average business has been passing in flour since the above report, and prices have been well maintained. Good and fine wheat is in fair request, at an advance of 1c to 2c per bushel; but inferior kinds are a dull sale. Corn, of useful and fine quality, is rather dearer. Inferior samples, however, command very little attention.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that the supplies of English wheat on offer, this week, have been very moderate, the demand for both red and white parcels has ruled heavy, and prices have given way 2s per quarter. In foreign wheat—the imports of which have continued liberal—the transactions have been on a moderate scale, at a fall in value of 1s per quarter. Both English and foreign barley has commanded very little attention, at late currencies. Fine malt has sold steadily, other kinds slowly, on former terms. Oats, owing to the abundance of green food, have ruled the turn lower. Both beans and peas have been stationary in price; but the value of flour has had a drooping tendency.

The accounts at hand respecting the appearance of the wheat crop, are, on the whole, favourable. Some of them, however, state that the plant is very deficient in some quarters.

The Continental markets have continued somewhat heavy for wheat, on rather easier terms. Most kinds of spring corn, however, have maintained late currencies. Advices from New York and Montreal state that large quantities of wheat and flour were in progress of shipment to England.

In Scotland, wheat has moved off slowly, and prices have had a drooping tendency. All other kinds of produce have commanded very little attention, and the shipments to the South have fallen off.

The Irish markets have been fairly supplied with wheat, which has met a dull inquiry, at depressed rates. Other articles have been offering at lower terms.

The supply of English wheat at Mark lane, to-day, was very limited. Nevertheless, there was no activity in the demand for either red or white qualities, yet no further change took place in prices, compared with Monday. Foreign wheat was mostly taken in retail, at late rates; but where sales were pressed, less money, —say quite 1s per quarter,—was accepted. Barley, oats, beans, and peas passed off slowly, at about previous currencies. The flour trade was dull, and American barrels ruled the turn in favour of buyers.

Mr E. Rainford thus reports the trade in floating cargoes:—Only 16 arrivals off coast for orders are reported up to last night since this day week, comprising 3 cargoes of wheat, 1 flour, 8 maize, 3 barley, and 1 beans, viz.:—Wheat, 1 cargo from Requejada, 1 Santander, 1 Odessa; flour, 1 Santander; maize, 2 Leghorn, 1 Fatza, 1 Marseilles, 1 Philadelphia, 2 New York, 1 Ibraila; barley, 1 Sulina, 1 Ibraila, 1 Constantinople; beans, 1 Saffi. The business this week in cargoes afloat is exceedingly inert, at drooping prices for wheat and maize, the latter having experienced an unusually rapid decline. For wheat the demand for France has tended to keep up prices, or we should have seen them still lower. The following are the rates paid since the 31st ult.:—Wheat, arrived, per 496 lbs, Californian (for Havre), 62s; per 492 lbs, Hungarian (for the Continent), 53s; Taganrog (for the United Kingdom), a portion damaged, 50s; Odessa Ghirka, 59s 6d; per 480 lbs, Ibraila (for the Continent), 46s. Rye, arrived, per 480 lbs, Crimean (for Bordeaux), equal to 35s. Maize, arrived, per 492 lbs, Moldavian (lay days few), 34s 3d; Galatz and Tuscan (1 cargo), 33s; per 480 lbs, yellow American, equal to 33s 10d; Salonica, 32s 3d; Fatza, 32s 1½d. Barley, arrived, per 400 lbs, Turkish, 25s 6d.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The public sales have been heavy, and in many cases prices showed a decline of 6d to 1s up to yesterday, when numerous parcels of foreign muscovado were offered. These, however, chiefly sold. The transactions otherwise have been moderate, excepting in floating cargoes, which still sell freely for the outports at present low rates. Total sales in West India for the three days reached 1,625 casks, including many parcels offered by auction: Barbadoes, 36s to 44s; St Lucie, 32s to 39s; grainy Berbice, 40s to 43s per cwt. There were 10,300 tons landed last week, and 4,750 tons delivered, consequently the stock has increased to 54,800 tons, against 64,900 tons in 1860 at the same date.

Mauritius.—14,900 bags, by auction, were about half sold: grey and yellow, 35s to 40s; brown, 30s to 34s 6d; grainy, 36s 6d to 45s; crystallised, 39s to 45s; 16s duty, 46s 6d per cwt.

Bengal.—665 bags white Benares were taken in at 45s 6d to 48s per cwt.

Natal.—204 bags sold at 32s 6d to 35s 6d for brown, and 37s 6d to 39s 6d for yellow muscovado kind.

Foreign.—A large proportion of the muscovado sorts in the sales has found buyers at rather lower rates. 808 casks 280 barrels Porto Rico; brown and low soft grey, 34s 6d to 37s; greyish to fine yellow, 37s 6d to 46s 6d. 1,323 casks 176 barrels Cuba: brown, 31s 6d to 34s 6d; soft low grey to fine yellow, 35s to 41s. 2,371 bags Bahia were taken in at 31s 6d to 37s. 333 bags from Singapore found buyers: bright yellow, 38s to 40s; black and brown, 28s 6d to 33s 6d. 974 boxes grainy white Havana in bond were taken in at 32s to 33s 6d. Five floating cargoes of Havana have sold for the United Kingdom: No. 13, 26s 6d; 12, 25s 6d; 9½ to 10½, 23s 9d to 24s per cwt.

Refined.—Some transactions were reported during the week at rather lower rates, but there is now more inquiry. Considerable contracts have been made in Dutch crushed for forward delivery last week.

MOLASSES.—100 puns West India have sold at 18s to 19s per cwt.

MELADO.—Of 570 casks in public sale, a few lots dry realised 29s 6d to 34s; the remainder, of fair quality, taken in at 26s to 27s per cwt.

COCOA.—1,082 bags Bahia, offered by auction, were bought in at 53s to 54s. 623 bags Trinidad partly sold at irregular prices: grey, 57s to 58s; ordinary mixed to fine, 59s to 95s per cwt. 103 bags Grenada were withdrawn.

COFFEE.—The arrivals of Ceylon have again been large, but 915 casks 546 barrels and bags plantation chiefly met with buyers, and generally at about the former value: fine ordinary to good middling, 67s 6d to 76s. 767 bags ordinary native partly met with purchasers at easier rates: good ordinary, 61s to 61s 6d. 134 packages Jamaica brought 64s to 72s 6d. 1,690 bags St Domingo realised 60s to 61s for good ordinary quality, being rather cheaper. Of 2,016 bags Bahia, the sound portion was taken in at 52s 6d to 53s. 772 bags Singapore withdrawn. 145 bags Madras: good ordinary Malabar kind, 63s per cwt. A floating cargo of Brazil has sold, of which no particulars transpired.

TEA.—Several public sales commenced yesterday, the catalogues containing 33,625 packages. 16,340 passed, and 6,300 sold with fair spirit, common scented capers being ½d per lb dearer than at the last series. No change has occurred by private contract.

RICE.—Transactions privately have been limited: fine white Bengal at 13s 1½d; soft grain, 10s 3d to 10s 6d. 8,300 bags Rangoon, in public sale, comprised a large proportion of damaged, which sold at full rates. Some of the sound was of old import, and sold at 9s 6d short prompt. 500 bags common Madras were taken in at 10s, also short prompt; but 1,452 bags Bengal found buyers; small and broken Dacca kind, 10s to 10s 6d; Ballam, 9s 7½d per cwt.

IMPORTS and DELIVERIES of RICE to June 1, with STOCKS on hand.

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO FLOUR.—202 bags were taken in at 16s per cwt.

SPICES—890 bags pimento went off without spirit at about previous rates: common to good, 2⅞d to 3d. 1,724 bags Singapore pepper found buyers: greyish to good, 3⅞d to 4d. Business has been done in Penang privately at 3⅜d. 630 bags heavy shot Malabar also sold at 5d. 47 cases mace and 242 cases nutmegs went off at about late rates; the former at 10d to 1s 2d, the latter 1s to 3s 6d for small to good bold brown. 12 casks Amboyna cloves were taken in at 5d to 5¼d, and 70 bags good Penang white pepper at 6¼d per lb. 283 barrels Jamaica ginger sold at 2l 3s to 4l 19s; 54 bags African at 33s to 33s 6d. 101 cases cassia lignea, from Bombay, partly sold; pile 1 at 88s, pile 2 bought in at 85s per cwt.

RUM.—A good deal of business has been done, at previous rates. The total stock is 25,060 puns 4,200 hhds, against 26,750 puns 6,150 hhds at the same date last year.

SALTPETRE.—1,000 bags Bengal, by auction, were taken in above the value. Privately, there has been more inquiry, a few parcels Bengal selling at 3d to 6d decline, viz., from 36s to 37s 6d per cwt for 8 to 3 per cent. refraction.

IMPORTS and DELIVERIES of SALTPETRE to June 1, with STOCKS on hand.

Deliveries last week 1,120 tons.

COCHINEAL.—The first of the monthly series of sales was held on Wednesday, when of 2,311 serons nearly half that quantity sold at 1d to 2d, and in some cases 3d per lb decline on low blacks. Honduras blacks, low to fine, 2s 5d to 4s 4d; silvers, 2s 1d to 2s 10d; Teneriffe silver, 2s 5d to 2s 7d; blacks, 2s 6d to 2s 9d; Mexican silver, 2s 3d to 2s 4d; black, 2s 5d to 2s 9d per lb.

IMPORTS and DELIVERIES of COCHINEAL to June 1, with STOCKS on hand.

LAC DYE.—A few small parcels in public sale found buyers: native, low to fine, 3½d to 7½d; middling marks, 1s to 1s 1d per lb.

OTHER DYESTUFFS.—Further business has been done in good Gambier at 16s 6d. Cutch dull at 22s to 22s 6d. 67 bales Bengal safflower were sold at barely previous rates, from 3l to 4l 12s 6d for ordinary and common quality. Bengal turmeric is less in demand at 16s to 16s 6d per cwt.

DYEWOODS.—At public sale, Jamaica logwood realised 4l 17s 6d; Jamaica fustic, 5l 17s 6d to 6l per ton.

RUBBER is dull. 1s 3d cash has been accepted for sound, and 1d per lb less for sea-damaged. 315 bales Guayaquil sold at 1s to 1s 0½d per lb.

METALS generally are slow of sale. The last contracts made in spelter were at 16l 10s per ton the spot. Stock on the 1st instant 4,900 tons, against 3,500 tons at the same date last year. Scotch pig iron is quiet, at 48s 3d per ton. Tin nominally unaltered. All kinds of copper are inactive.

HEMP.—1,950 bales Manilla were bought in above the value. Russian is dull at the quotations. The stock of Petersburg clean, on the 1st instant, was 2,200 tons, or nearly the same as in the two preceding years at the same date.

JUTE.—The public sales, on Wednesday, contained 8,315 bales, which went off flatly, and at rather lower rates: from 13l to 20l 5s per ton for ordinary to fine. The stock is no 10,300 tons, against 13,400 tons last year at the same date.

LINSEED.—On the spot there are sellers of Bombay at 55s per qr, and Calcutta at 52s to 52s 6d for ordinary to average qualities, up to 53s to 53s 6d for Patna; about 600 tons average quality arrived, sold at 51s 3d cost, freight and insurance, including bags, and there are now buyers at 51s 6d; Black Sea or Azoff for shipment up to September 53s to 53s 6d delivered U.K.

OILS.—Olive remains dull: Gallipoli on the spot has sold at 58l to 58l 10s, and a floating cargo at 54l per tun for Cronstadt. Fish oils quiet. Sperm, 99l per tun sellers. Linseed oil firmer, at 30l. Rape dull. Foreign refined can be obtained at 42l per ton. Cocoa-nut has been rather pressed for sale; by speculators Ceylon, 44s 6d to 45s; Cochin, 45s 6d to 46s. Palm quiet at 45s per cwt for fine.

TURPENTINE.—Another cargo of rough and spirits has arrived from Wilmington, which is going into store for better prices; the only sale of rough this week is 200 barrels taken for export at 16s per cwt. Some forced sales of spirits have been made by speculators at 42s 6d for American in barrels.

TALLOW.—A further reduction of 1s 6d to 2s has been established upon foreign, and the market remains dull. Y.C., 54s; for delivery in the last three months, 53s per cwt.

PARTICULARS OF TALLOW.—Monday, June 3.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—There is no change in the market to-day. 778 hhds West India sold, including a portion of 654 casks Barbadoes by auction at 34s to 42s, and 56 casks grainy Demerara at 37s 6d to 41s 6d. 4,113 bags Mauritius were chiefly bought in above the value. 307 bags white Benares sold at 42s 6d to 44s for low to middling. 4,100 bags grocery Madras found buyers: middling to fine, 41s to 44s; one lot white (16s duty) 47s 6d; low to middling soft yellow, 35s to 37s. 1,500 bags native were withdrawn. 585 casks Cuba melado and sugar were taken in at 27s to 34s per cwt.

COFFEE.—557 casks 134 barrels 252 bags plantation Ceylon sold steadily at 68s to 79s for fine fine ordinary to good. 250 bags good ordinary native brought 62s to 62s 6d. 25 casks 30 bags Jamaica sold at previous rates. 130 bags East India from Singapore were withdrawn.

COCOA.—221 bags Trinidad were withdrawn.

RICE.—10,046 bags new Rangoon were bought in at 10s 6d to 11s, and 2,413 bags old with short prompt at 9s 6d. 1,320 bags Bengal were withdrawn above the market value. A floating cargo of Rangoon sold at 10s 1½d per cwt.

SPICE.—1,214 bags pimento sold at 2⅜d to 2⅞d. 47 bags white pepper and 8 casks Amboyna cloves were withdrawn. 51 barrels Jamaica ginger went at about previous quotations.

SALTPETRE.—920 bags Bengal, refracting 4¾ to 3, were taken in at 37s 6d to 38s. 227 bags Bombay, refraction 50¼ to 42¼, sold at 31s per wet.

TEA.—4,637 packages sold without any further change in prices.

CUTCH.—1,520 bags part sold at 21s to 21s 6d per cwt for slightly stained.

TALLOW.—Y. C., 54s; last three months, 52s to 52s 6d; town, 52s 9d per cwt.

IRON.—Scotch pig, 48s 6d to 48s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains very very quiet; no particular alteration to note with respect to prices. Treacle rather easier. Dutch crushed continues firm; the demand very languid.

GREEN FRUIT.—Demand continues good. Oranges of all kinds improved in value. Some parcels Terceira and Valencia, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. No improvement in the price of lemons, in consequence of some parcels out of condition pressing on the market. Para nuts lower; Barcelona without alteration.

DRY FRUIT.—The only inquiry for currants is for low stuff under 27s, and very little if any is now to be had. A small parcel of fine is reported to be sold at 32s. These two quotations are the extreme range of our market prices. The accounts from Greece state that the crop will be probably 15 days later than last year. Raisins, with the exception of ordinary red Smyrnas at easier rates, are neglected. Sultanas are inquired after at 41s to 42s.

COLONIAL WOOL.—The colonial wool sales closed yesterday at former rates. The East Indian low wool sold to-day at prices about the same as at the last Liverpool sales.

FLAX.—Market without alteration.

HEMP steady; a fair business done this week.

COTTON.—Sales of cotton from Friday, 31st May, to Thursday, 6th June, inclusive:—1,300 bales Surat at 5¼d for middling fair Broach, 5⅞d for good fair new Oomrawatty, 5¼d to 5⅛d for ordinary to middling old Oomrawatty, 5⅛d to 5⅜d for ordinary to middling fair Dhollera, 5⅜d for good fair Compta; 150 bales Tinnevelly 6d to 6⅛d for fair to good; 300 bales Western Madras 5 3-16d to 5⅜d for fair to fully good fair. The transactions this week are again but of moderate extent, and the market is quiet. Price of Surat is partially ⅛d per lb lower. Tinnevelly Madras is in limited demand, but as holders evince great firmness, prices are only a shade easier, whilst Western Madras commands previous rates. About 2,000 bales Tinnevelly have been sold for arrival at 6¼d, guaranteed good fair.

SILK.—Silk market without change.

TOBACCO.—The market has shown less activity, but prices remain very firm, and holders decline making sales unless at extreme quotations.

METALS.—No changes have occurred during the week, but we have a continuance of that uniform stagnation which has now prevailed for a fortnight.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8½
Yellow Russian	55	6
Melted stuff	36	6
Rough ditto	21	0
Greaves	18	0
Good dregs	7	9

PROVISIONS.

Bacon market steady at former prices; delivery very large. A great advance in Friesland, price 100s, and brisk market. Fine Jersey making 92s to 94s. Very little doing in other provisions.

METROPOLITAN CATTLE MARKET.

MONDAY, June 3.—The total imports of foreign stock into London, last week, amounted to 5,814 head. In the corresponding period in 1860, we received 6,722; in 1859, 4,452; in 1858, 2,962; in 1857, 2,531; in 1856, 2,305; and in 1855, 2,880 head.

There was a full average supply of foreign stock on offer in to-day's market, in fair average condition. Sales progressed slowly at late quotations. With English and Scotch beasts we were tolerably well supplied, and nearly all breeds were of very good quality. Owing to several large buyers being in attendance from the provinces, the beef trade ruled steady, though not to say active, and in some instances prices were a shade higher than on Monday last. The general top figure for Scots was 4s 10d, but in some instances the quotation reached 5s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received about 2,200 Scots, &c; from other parts of England, 300 various breeds; and from Scotland, 600 Scots and crosses. No beasts reached us from Ireland. Notwithstanding that the supply of sheep was on the increase, all good and prime breeds moved off steadily at full quotations, the best Downs having sold at quite 5s 4d per 8 lbs; other kinds of sheep, however, were a dull inquiry, and 2d per 8 lbs lower than on this day se'nnight. Prime lambs sold readily at full quotations; but inferior breeds were dull at barely late rates. The top price was 7s per 8 lbs. We have to report a slow sale for calves at last week's prices. The supply of foreign calves was good.

SUPPLIES.

	June 4, 1860.	June 3, 1861
Beasts	3880	3740
Sheep and lambs	29280	27320
Calves	224	256
Pigs	300	450

THURSDAY, June 6.—The supply of beasts on offer in to-day's market being very limited, the demand for all breeds ruled somewhat active at an advance in the quotations, compared with Monday, of fully 2d per 8 lbs. The general top price was 5s 2d; but, in most instances, very prime Scots realised 5s 4d per 8 lbs. The show of sheep was only moderate. Prime Downs and half-breds were in good request at full currencies; otherwise, the mutton trade was in a sluggish state, on former terms. Lambs, generally, were very dull, and prices gave way 4d per 8 lbs. A few choice pens sold at 7s, but the general quotations ranged from 5s 8d to 6s 8d per 8 lbs. We had a dull inquiry for calves, at 2d per 8 lbs less money. Pigs were very dull; but milch cows were in fair request at late rates.

Per 8 lbs to sink the offal.

	s d	s d		s d	s d
Coarse and inferior beasts	3 8	3 10	Prime Southdown sheep	5 0	5 4
Second quality ditto	4 0	4 4	Large coarse calves	3 10	4 4

Coarse and inferior sheep	3 4	3 8	Small porkers	4 6	5 0
Second quality ditto	3 10	4 0	Suckling calves.....each	21 0	30 0
Prime coarse-woolled do.	4 4	4 10	Quarter old store pigs	22 0	30 0

Lambs, 5s 8d to 6s 8d.

Total supply—Beasts, 760; sheep and lambs, 8,660; calves, 380; pigs, 300.
Foreign supply—Beasts, 220; sheep, 1,300; calves, 220.

NEWGATE AND LEADENHALL.

FRIDAY, June 7.—Very moderate supplies of meat are on sale here. Beef has changed hands at an advance of 2d per 8 lbs, and the value of mutton, prime lamb, and veal is well supported.

Per 8 lbs by the carcase.

	s d	s d		s d	s d
Inferior beef	3 2	3 6	Middling mutton	4 2	4 6
Middling ditto	3 8	4 2	Prime ditto	4 8	5 0

Large Pork	4 0	4 4	Lamb	5 4	6 6
Inferior mutton	3 8	4 0			

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, June 3.—During the past week the arrivals both coastwise and by rail have been moderate, but owing to the warm weather, and it being a holiday week, the demand has been very limited, at a further reduction in prices. The following are this day's quotations:—Yorkshire Flukes, 110s to 140s; Lincolnshire Regents, 80s to 90s; North Berwick ditto, 100s to 110s; Perth, Forfar, and Fife ditto, 65s to 85s; ditto, ditto, ditto Rocks, 60s to 70s; ditto, ditto, ditto Reds, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, Friday, June 7.—The supply of new potatoes continues steadily to increase, the demand for them rules steady, but by on means active, at from 6s to 14s per cwt. Old qualities are very dull, at from 60s to 130s per ton.

HOP MARKET.

BOROUGH, Monday, June 3.—The weather of the past week has been most favourable to the development of blight. In every district the plant is smothered with vermin to an extent which has not been known for years, and which threatens one of the severest blights. The duty has receded to 90,000*l*. Our market has been much excited, and prices have advanced 10s per cwt. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 60s, 130s, 180s; Sussex, 60s, 80s, 135s; Yearlings, 120s, 150s, 200s.

FRIDAY, June 7.—The plantation accounts come very unfavourable, and the duty is estimated at only 70,000*l*. The market is excited, and prices have advanced 10s to 20 per cwt.

HAY MARKETS—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 15s to 2*l* 0s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 16s to 2*l* 2s per load. Both hay and straw moved off slowly, at our quotations.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 15s to 2*l* 0s per load. A heavy demand.

COAL MARKET.

FRIDAY, June 7.—Wall's-end Hetton, 18s—Haswell, 19s—Stuarts, 19s—South Hetton, 19s—Tees, 18s 9d—Hartlepool, 18s 9d—Braddyl's Hetton, 18s—Russell's Hetton, 18s—Heugh Hall, 17s—Kepier Grange, 17s 9d—Kelloe, 18s—Eden, 17s—Woodhouse Close, 16s—Harton, 16s 9d—Acorn Close, 17s—Durham, 15s 6d—Shincliffe, 16s 9d—Hedley, 16s 6d—Halbeath, 15s—Tanfield Moor Butes, 13s—West Hartley, 15s 6d—Davidson's Hartley, 15s 6d—Hastings Hartley, 15s 6d. Ships at market, 55.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 7.—The demand has been rather languid this week; prices, however, show no material change, as importers continue to be very firm and stocks light.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 7.—Market very dull. Wheat declined 1d to 2d, and flour fully 6d. Indian corn in moderate demand, at a decline of 6d. Beans difficult to sell, at a decline of 1s. All other articles unaltered.

METALS.

FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 7.—There is no change to report this week in manufactured iron; there is a continuance of great dulness, but prices for good iron cannot be quoted lower. For Scotch pig iron there has been a quiet market, with little or no change to note in prices. The copper market is very dull, there being little or no export demand. Lead is also little inquired for. In other metals only a moderate business doing.

The Gazette.

TUESDAY, June 4.

BANKRUPTCIES ANNULLED.

E. R. Gilbert, Cripplegate buildings, mantle manufacturer.
W. Parsons, Brill, Buckinghamshire, draper.
J. Fielding, Macclesfield, cotton spinner.

BANKRUPTS.

J. J. Carryer, Victoria park square, Cambridge road, Mile end, manufacturing chemist.
W. Adams, Red hill, Surrey, grocer.

J. Holroyd, Winterton, Lincolnshire, chemist.
J. Daniells, Manchester, iron merchant.

SCOTCH SEQUESTRATIONS.

J. Smith, East Dykebar, Renfrewshire, farmer.
W. Brown, Glasgow, tailor.
J. M'Innes, Falkirk, printer.
D. Maclellan, Rutherglen, near Glasgow, bone manure manufacturer.
D. Gibson, Ayr, pastrycook.
J. Fullarton, Glasgow, general provision dealer.
H. M. Draper, Falkirk, plumber.
J. Mackenzie, St Fergus, Aberdeenshire, farmer.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

T. Clapham, Piccadilly, silversmith and jeweller.
I. A. Chomel, Saint James street, St James, Westminster, jeweller, watch and clock maker.
E. Price, Warminster, Wiltshire grocer and provision factor.
J. B. Behrens, Coventry street, Haymarket, dealer in pictures.
J. French, late of King street, Clerkenwell, now of Arlington street, New North road, gold chain and bracelet manufacturer.
W. Dugard, jun., Lapworth, Warwickshire, coach and harness plater.
F. Atkin Manchester, yarn agent.
J. Rothwell, Ramsbottom, Lancashire, manufacturer.
W. Mellon, Alderley, Chester, butcher and cattle dealer.
H. Parkin, Plymouth, tea dealer and grocer.
A. Sayle, Liverpool, dealer in boots and shoes.

ROYAL HORTICULTURAL SOCIETY'S GARDENS.—These beautiful gardens, which were formally thrown open on Thursday for their first fruit and flower show, are situated upon the Kensington road, on a site nearly opposite that of the Crystal Palace of 1851. Twenty-two acres of the land purchased out of the surplus funds of the Great Exhibition have been leased to the Horticultural Society, and upon it the gardens are now rapidly approaching to maturity.

COMMERCIAL TIMES
Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 25th of May amounted to 578,8C2*l*, and for the corresponding week of last year to 554,562*l*; showing an increase of 24,240*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 252,036*l*, and for the corresponding week of 1860 to 258,132*l*, showing an increase of 6,096*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 3.—The railway market opened this morning with increased buoyancy, Midland especially experiencing a further rise; but a reaction subsequently took place, partly in sympathy with Consols, and partly on some realisations. Colonial descriptions generally remained unaltered. Grand Trunk of Canada stock closed at 19½ to 20, and Great Western shares 10⅞ to 11. In the foreign market a reduction occurred in Lombardo-Venetian. American securities showed increased steadiness, Illinois Central shares leaving off at 40 to 39½ dis., and New York and Erie, 21¼ to ⅜. Mines were in little demand, and occasionally receded. West Seton, however, advanced. Joint stock banks were about the same as on Saturday. In miscellaneous descriptions, St Katharine Docks stock and Peninsular and Oriental Steam shares were higher.

TUESDAY, June 4.—The railway market showed further heaviness today, and another general decline took place, Midland and Lancashire and Yorkshire being especially depressed. South-Eastern and Sheffield also receded about 1 per cent. The final quotations were the lowest of the day, and the market closed with a very dull appearance. In the colonial market, Indian guaranteed descriptions were fairly supported, notwithstanding the announcement of the new loan. Canadian were flatter, Grand Trunk stock leaving off at 19¼ to ⅜, and Great Western shares 10⅝ to ⅞. Foreign descriptions were dull. South Austrian and Lombardo-Venetian rallied to ⅜ to ½ dis. Cape debentures were ½ per cent. higher. In American securities, Virginia Six per Cents. and New York and Erie shares were lower. Illinois Central were last quoted 40 to 39½ dis. The transactions in mines were unimportant, and in two or three cases a slight decline took place. Joint stock banks closed about the same as yesterday. In miscellaneous descriptions, there was an advance in Royal Mail Steam, and a reduction in Crystal Palace. Great Ship recovered to 5s 9d to 6s 3d.

WEDNESDAY, June 5.—The railway market was again depressed in the early part of the day, but partially rallied towards the close. In several cases, however, a fractional decline was shown compared with yesterday, especially in London and North-Western, Midland, Lancashire and Yorkshire, and Berwick. North British, Sheffield, and Eastern Counties improved. The general transactions were unimportant. In the colonial market there was a better demand for Canadian descriptions, the final price of Grand Trunk stock being 19½ to 20, and of Great Western shares 10⅞ to 11. The principal change in foreign railways was a decline in Pernambuco and Lombardo-Venetian. American securities were rather firmer, New York and Erie shares especially showing an advance. There were few transactions in mines, joint stock banks, and miscellaneous descriptions, and no material change occurred.

THURSDAY, June 6.—The railway market opened at a decline on the lower traffic returns, and was subsequently further depressed by the fall in Consols. Later in the day a partial rally took place, but the tendency at the close was again unfavourable. Midland left off ⅝ per cent. lower, and most of the other leading stocks ½ to ⅝. North-Eastern descriptions exceptionally improved. No change of importance occurred in the colonial market. Grand Trunk closed at 19½ to 20, and Great Western of Canada 10¾ to 11. In foreign descriptions, Lombardo-Venetian receded on the announcement of the death of Count Cavour to 1 to ⅞ dis., but closed slightly firmer, at ⅞ to ¾ dis. Dutch-Rhenish shares and Victor Emanuel obligations were also lower. American securities were quoted the same as yesterday. Mines were dull, and in one or two cases showed a decline.

FRIDAY, June 7.—In the railway share market the dealings were extremely limited, and prices show little variation of importance. Bristol and Exeter have receded to 98. Brightons to 119¼. Midlands to 120½. North-Eastern Berwick to 103⅛ 108½; and ditto York to 91¼ 91½. Lancashire and Yorkshire have improved to 110⅞; and Manchester, Sheffield, and Lincoln to 43. The foreign and colonial lines were very inactive, and show no change in prices. South Austrian and Lombardo-Venetian realise 15⅛. Great Luxembourg, 7½. Great Western of Canada, 10¾ 10⅞. Grand Trunk of Canada, 19½. East Indian, 100½ 101: and Great Indian Peninsula, 98¼.

CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" writ'en across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 58 Great Queen street, London, W.C.

MEDICAL ADVICE.

DR WATSON, U.S., F.R.A.S., &c. (specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

HOLLOWAY'S PILLS.—Health always obtained.—With some necessary precautions health may generally be regained by taking a course of these purifying Pills in the spring. They thoroughly depurate the blood, search out all noxious matters, and carry off all morbid humours from the body. Their alterative properties place them in the foremost rank as correctors and improvers of the secretions. They discipline disordered functions, remove the cause of the irregularity, and restore its regular and natural action to every organ, without inconvenience, pain, or any other drawback. When the blood is impoverished, the constitution broken down, or the nervous system shattered, every invalid should make trial of Holloway's Pills; their benign action will speedily reassure the most despondent.

SURPRISING CURE OF ASTHMA, OF TEN YEARS' STANDING, BY DR LOCOCK'S PULMONIC WAFERS.—"SIR,—I had for the last ten years been afflicted with an asthma, during which time I have spent from £40 to £50 on medical advice alone, and all of no avail; and I gave up all hopes until I tried Dr Locock's Wafers. I purchased two small boxes and one large one, three months' since, by which I am now perfectly cured, &c.—HENRY BISHTON." Princes end, Tipton. Witness, Mr J. Williams, surgeon, &c., Tipton. To singers and public speakers they are invaluable for strengthening and clearing the voice. They have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine venders.

NOTE.—Full directions are given with every box in the English, German, and French languages. Beware of counterfeits.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE OF PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White *Zinc* Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

THE NEW SOCIETY OF PAINTERS in WATER COLOURS.—The Twenty-seventh Annual Exhibition of this Society is now open, at their Gallery, 53 Pall Mall, near St James's Palace. Admission, 1s. Catalogue, 6d. Season tickets, 5s.
JAMES FAHEY, Sec.

GERMAN ACADEMY OF ART, Egyptian Hall, Piccadilly.—The First Annual Exhibition of Paintings and Works of Art, by the most eminent living German masters (selected from the Royal Academies at Berlin, Dusseldorf, and Konigsberg), is now open, from ten till dusk. Admission, 1s.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

NEW THEATRE ROYAL ADELPHI. Sole Proprietor and Manager, Mr B. Webster.
Re-appearance of Mr and Mrs Dion Bourcicault, in the great sensation drama of THE COLLEEN BAWN.
On Monday, and during the week, A TURKISH BATH. Messrs J. Toole, and Mr P. Bedford. THE COLLEEN BAWN. Messrs Dion Bourcicault, D. Fisher, Billington, Stephenson; Mrs Dion Bourcicault, Miss Woolgar, Mrs Billington, and Mrs Chatterley. And THE CENSUS. Messrs J. L. Toole, Eburne, Miss K. Kelly, and E. Thorne. Commence at 7.

WOODIN'S NEW ENTERTAINMENT, the CABINET of CURIOSITIES, at the Polygraphic Hall, King William street, Charing cross, every evening (except Saturday) at 8.; Private boxes, £1 1s; stalls and box stalls 3s; area, 2s; amphitheatre, 1s. A plan of the stalls may be seen and seats secured (without extra charge), at the box office, from 10 till 4.

Her Majesty's Concert Room, attached to Her Majesty's Theatre.
THE ORIGINAL
CHRISTY'S MINSTRELS, EVERY EVENING at Eight o'clock, and a GRAND MORNING PERFORMANCE every Saturday at Three. Stalls, 4s; Balcony and Boxes, 3s; Unreserved seats, 2s; Gallery, 1s. Private boxes (to hold six), £1 11s 6d and £1 1s. Entrance from the Grand Staircase of Her Majesty's Theatre. The new and successful Burlesque Opera, by William Brough, Esq every evening.

IMPORTANT NOTICE.
GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the
GLENFIELD STARCH,
we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,
37 BEDFORD SQUARE, LONDON.
Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.
These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.
Dr L. La'Mert may be consulted in Glasgow until the 31st March at 56 Rosebank terrace, St George's road.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.
The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.
Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.
CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

TEA.—DR HASSALL'S ("The Chief Analyst of the Sanitary Commission of the LANCET on Food,") Report on the Teas and Coffees sold by Messrs STRACHAN and CO., 26 Cornhill, London, E.C.:—"Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs Strachan and Co., I have subjected the whole of them to Microscopic Examinations and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory."
A full report of the above analysis, also list of prices, can be had on application to Messrs Strachan and Co., 26 Cornhill, E.C., London.
Carts to all parts of London daily.

ICE, AND REFRIGERATORS FOR preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY (now removed to 140 Strand, W.C.), of the best make, and at the lowest cash prices. No agents are appointed for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s 6d, 5s, 9s, and upwards, forwarded any distance into the country by "Goods" train, without perceptible waste. Wine-coolers, machines for making Ice Creams, either with or without Ice Freezing Powders. Ice Moulds, &c. Carbonators for making soda water. Detailed printed particulars may be had, by post, on application to the Wenham Lake Ice Company, 140 Strand, London, W.C.

66 Queen street, London, 23rd August, 1860.
MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,
DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine article, which are equally useless to the purchaser, and disgraceful to the vendor. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

INDIA OFFICE, May 30, 1861.

THE SECRETARY OF STATE FOR India in Council hereby gives notice, that the Rate of Interest payable upon EAST INDIA BONDS, not notified for discharge, will be raised from £4 per cent. per annum to £4 10s per cent. per annum, from and after the 31st instant.

INDIA OFFICE, May, 1861.

THE SECRETARY OF STATE IN Council of India will be prepared at noon, on Thursday, the 20th day of June next, at the India Office, Victoria street, Westminister, to open sealed Tenders from persons desirous of PURCHASING the PREMISES generally known as the East India House, Leadenhall street. Each tender must be accompanied with the sum of £5,000, and no cognisance will be taken of the tender of any person who shall not have delivered his tender and paid that sum into the hands of the Account-ant-General to the Council of India at the India Office, Victoria street, Westminister, either on Wednesday, the 19th day of June next, between the hours of 10 a.m. and 4 p.m., or upon the morning of Thursday, the 20th day of June next, between the hours of 10 a.m. and noon; after which last-named date and hour no tenders and no money will be received.

The highest tender will be accepted, provided that the amount shall exceed a reserve price determined upon by the Secretary of State, and placed under seal prior to the opening of any of the tenders. A form of agreement has been prepared, which will have to be executed by the person whose tender shall be declared accepted immediately upon any such declaration being made by the Secretary of State in Council of India, on pain of the absolute forfeiture of the sum the person whose tender shall be so declared to be accepted shall have previously deposited.

Copies of the said agreement, with a plan for attachment thereto, together with copies of this advertisment, conditions of tender, plans of each floor of the premises, and forms of tender, have been printed, and may be had, price 2s 6d, on application to M. Digby Wyatt, Esq., India Office, or at his offiecs, 37 Tavisteck place, W.C.; at the offices of the Solicitor to the India Office, 28 Austinfriars, E.C.; or of Mr Thomas Fox, 93 Bishopsgate street within.

The moneys deposited by all parties whose tenders may not be accepted will be returned to them on application to the Accountant-General to the Secretary of State in Council of India, at the India Office, on the 20th day of June next, between the hour at which a final declaration may be made with respect to the tenders received and 4 p.m., or on the ensuing day between the hours of 10 a.m. and 4 p.m.

The premises may be viewed between the 3rd and 20th days of June next, by all persons provided with tickets, o be obtained as above.

"ASCOT."

Special preparations have been made by E. MOSES and SON for Ascot races, the most noticeable being a light elegant Coat, to be worn with or without another, and will not show or be injured by the dust.

E. MOSES and SON,
Ready-made and Bespoke Tailors, Hatters, Hosiers, Drapers, Bootmakers, and General Outfitters.
London Houses:—
Corner of MINORIES and ALDGATE.
NEW OXFORD STREET, corner of HART STREET.
Corner of TOTTENHAM COURT ROAD and EUSTON ROAD.
Country Establishments:—
SHEFFIELD and BRADFORD, YORKSHIRE.

LAWRENCE HYAM'S Ordered Department contains the most beautiful fabrics; is under the superintendence of First-rate Cutters, whereby Graceful Garments are insured, at moderate prices.

LAWRENCE HYAM'S TROUSERS made to measure, at 15s and 17s. They are manufactured from Patterns and Materials for the present Season, supplied to him alone, and, unlike cheap Trousers constantly advertised, are warranted to be cut in the best manner, and will be found to be very durable and pleasant to wear. VESTS from the same material, 8s and 9s 6d.

FOR THE YOUNG.

LAWRENCE HYAM is universally celebrated for the becoming Style and Finished Beauty of his YOUTHS' and CHILDREN'S CLOTHING.

An unlimited Stock of New Patterns to select from is now on view, at the most moderate prices.

LAWRENCE HYAM, the Cheapest and most Fashionable Tailor and Clothier in the World.

City:—36 Gracechurch street. West end:—189 and 190 Tottenham Court road.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

TO MERCHANTS, SHIPOWNERS, and FORWARDERS.—For Rates of Freight per Grand Trunk Railway, the most direct and only safe route, to all parts of Canada and the Western States, apply at the Grand Trunk Railway Offices, 21 Old Broad street, London, E.C.

STEAM NAVIGATION OF the DANUBE.—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. From London to CONSTANTINOPLE (by railway from Czernavoda to Kustendje) in seven days. Excellent accommodation for passengers. Merchandise and personal effects forwarded at through rates by Charles Nugent and Co., Custom House and Forwarding Agents, 80 London wall, E.C.—For particulars apply to Messrs Pictroni and Draper, 81 London wall, E.C.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS.
LONDON to SYDNEY.

RACHEL, A 1, 1,100 tons, to sail June 10. This beautiful English-built clipper presents a rare opportunity for shippers and passengers. Loading in the London Docks, and will sail to the day.

LONDON to MELBOURNE.

HANNAH MORE, A 1, 2,000 tons, June 25. This splendid ship is well known, and affords an unusual opportunity for shippers and passengers. Will receive goods in the East India Docks to the above date, unless previously full.

LONDON to ADELAIDE.

EMPRESS EUGENIE, A 1, 1,200 tons This magnificent ship is now loading at the jetty, London Docks. Shippers and passengers are desired to inspect this beautiful vessel before making any engagements. Last shipping day, June 21.

LONDON to QUEENSLAND.

Under arrangement with Government. Free grants of land. Passage money, £18 and upwards.

WANSFELL, A 1, 1,500 tons. This noble ship has been selected, on account of her speed and accommodation, as the pioneer to this colony, and will sail for Moreton Bay in June; now loading in the London Docks. Free land grants, under the Government regulations, to the amount of £30 given to all persons paying their own passage by this ship; all further information given by applying to H. JORDAN, Esq., representative of the Queensland Government; to JAMES BAINES and CO, Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 1 Leadenhall street, E.C.

STEAM SHIPS.—The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 1l 5s.

HARBURG—Sunday, at 8 morning.

ROTTERDAM—Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Rhine and Dolphin, every Tuesday and Thursday at 12 noon. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at 1 afternoon.

OSTEND, BRUSSELS, and the RHINE.—Every Wednesday and Saturday morning. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Sunday morning. June 9 at 11; 16 at 5 a.m. Chief cabin, 14s; fore, 10s. London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. June 12 at 3; 15 at 5. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.

BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. June 12 at 3; 15 at 5. Chief cabin, 14s; fore, 10s. London to Paris, 16s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday, at 10 morning. Fares: chief cabin, 20s; return, 30s; fore, 15s; return, 22s 6d; deck, 7s 6d; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday at 8 morning Chief cabin, 6s 6d; return, 10s: fore cabin, 4s; return, 6s

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday at Four afternoon. Saloon, 8s return, 12s: fore cabin, 5s; return, 7s 6d.

MARGATE and RAMSGATE—From London Bridge Wharf, every Tuesday, Thursday, and Saturday, at 10 morning, calling at Blackwall and Tilbury Piers.

HERNE BAY—Every Saturday, at 10 morning.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street and St Katharine Wharf.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails:—

PERSIA, for NEW YORK, Saturday, June 22.
CANADA, for BOSTON, Saturday, June 29.

Passage money, including steward's fee and provisions, but without wines or liquors:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage.—Apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY,
Incorporated by Act of the Parliament of Canada.
PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.
DIRECTORS.
The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. M. Cameron, M.L.C.
R. L. Denison, Esq., Treasurer Board of Agriculture.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews),
Samuel Sproull, Esq.
Mr Sheriff Smith, Collingwood.
Charles Donaldson, Esq.
E. W. Thomsen, Esq., President Board of Agriculture.
BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, and the debentures, may be had at Messrs Brunton and Son, stock-brokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the Half-Yearly Interest on the Company's Debentures will be paid on and after the 1st of July, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, E.C.

J. SYMONS, Secretary,

The Political Economist.

THE UNAPPROPRIATED SEAT.

THE House of Commons decided on Monday evening by a large majority not to augment at present the number of the members for the metropolitan constituencies; and unquestionably they decided wisely. The metropolitan district constituencies are perhaps the most disappointing political experiments of late years. When we look at the wealth, the intelligence, the practical good sense, the enlarged business in those boroughs, we should be inclined to think them among the best constituencies in the civilised world. There are probably better materials for a good electoral body within the limits of the borough of Marylebone than anywhere else in the civilised world, and yet can it be said that the members for Marylebone are better than any other members in the civilised world?

The truth as every one after all that has passed but too well knows is, that although the electoral body of Marylebone comprises some of the most intelligent and sensible people in the civilised world, those intelligent people have nothing to do with the elections. Owing to the high rate of house-rent, the 10*l* householder is a peculiarly low sort of person, and the lower sort of 10*l* householders monopolise the electoral power of the great constituency in which they are a majority. The House of Commons have justly and wisely felt that this evil is not an evil to be augmented; they have perceived that it is absurd to give electoral rights to a borough because it contains rich and wise people, and yet to give those rich and wise people no practical share in the choice of the members who represent them. A very little experience of the House of Commons would be enough to convince every one that another metropolitan member is one of the last additions to their number who would be acceptable to them.

What, then, is to be done with the unappropriated seat? There are, of course, "*three* ways" of dealing with it; it may be given to a county, to a borough, or to a constituency which is neither a county nor a borough. The great objection to every augmentation of the county representation is, that the county members all belong so much to one single class and one single type of mind and understanding, and that there are already in the House of Commons so many of that class and type. The "Quarter Sessions" element, to use a descriptive if not an exact phrase, in our Legislature, is quite large enough; it is good enough in its way; if it is tedious, it is likewise sensible; if it is narrow, it is likewise consistent. But most people will agree that its influence is already sufficiently potent and substantial. It is a good, but it is a good which we have, not a good which we need seek for and acquire.

If the vacant seat were given to a borough, it would be to a large northern borough, and if there were not already so many members for such great towns in the House, and if the endeavour to select any one of the great towns now unrepresented for peculiar honour and special representation would not cause unlimited heartburnings and unnumbered jealousies, such an appropriation of the disposable seat would be a most excellent mode of dealing with it. But we know that there are already a considerable number of members for large towns; we know that they give to their special constituencies a very effective voice in the State; we know that any such selection would, among a great number of possible claimants, be unpopular and very difficult to justify on any grounds that would seem conclusive in searching discussion.

We are left, therefore, with the third class of constituencies, which are neither boroughs nor counties,—which are selected for some peculiar merits of their own, real or supposed,—which we may fairly call the *exceptional* constituencies. Two of these are in the field. The Scotch University and the London University.

It will not be saying anything disrespectful of the Scotch Universities to say that, for the present purpose, they are objectionable because they are Scotch. There is a very grave objection in the minds of many to altering the proportions of the three representations for the three kingdoms. A settlement of this serious question has been practically arrived at, and there is a very natural indisposition to impair or change it at the risk of raising very difficult questions of abstract principle, and very critical topics of national jealousy. Mr Stirling replies to this that we ought to take the best constituency in the three kingdoms, in whichever of the three it may be—that we ought not to listen to refined apprehensions, or expose ourselves to the accusation of national partiality. And this might be very convincing reasoning if we were offered an impartial constituency. But we all know that a Scotch University will be Scotch to the backbone—that no Englishman would offer himself there, or would ever have a chance there—that the best attainable Scotchman is the best possible member that we could ever hope to obtain from so wary and national a constituency. It seems, therefore, rather hard to expect us to give up all national prejudices in order to select a constituency which would be specially prejudiced and peculiarly national.

Of the claims of the London University we have on a former occasion spoken at length. In his recent book on Education, Mr Arnold has spoken of it "as in the silence and "the shade doing a work of great utility," and doubtless so competent and on this subject very unprejudiced judge is likely to be correct. The London University is the *middle-class* University. It does its characteristic work not among the very noble or the very rich, not among the possessors of ancient fortunes or the most opulent possessors of recent fortunes, but among the large, intelligent, comprehensive class who pos-

ss fair means, fair antecedents, fair opportunities in life, and who wish to have sensible and useful cultivation. This class is but little represented in Parliament. Aristocratic cultivation, such as it is, is not uncommon. Middle-class wealth and middle-class energy are common too; but both of these are different from the sort of persons to whom we now refer. The highest cultivation of the middle class cannot be naturally expected from an energetic man who has made his way in life, and who has obtained a seat in the House of Commons as an appendage to his fortune; and still less can it be expected from one who has been bred in the aristocratic associations and exclusive traditions of the older Universities.

THE LAST CENSUS AND OUR COMMERCIAL POLICY.

THERE are some people who always wish to be set right. They are continually on the look-out for new principles of action, new fundamental ideas, new notions of revolutionary importance in morals and in politics. To persons of this class the facts which have been just communicated as to the late Census will afford no practical aid and will provide no intellectual *data*. We do not say that subsidiary suggestions and incidental anomalies may not be discovered; but we are convinced that the main conclusion from these authentic details beyond dispute is, that our present national policy is the right policy, and that no other can even for a moment bear argumentative competition or practical contrast with it.

What is the present *home* policy of England, stated in a single sentence and disencumbered of any unnecessary and subordinate details? It is the policy of free trade. It requires that the prosperity of the great seats of industry should be fostered—that the growth of the great pursuits of industry should be developed—whatever may be the consequences and the cost. There is, indeed, no reason to suppose that the agricultural interest has suffered from the legislation of late years. Putting the exceptional harvest of last year out of the question, the farmers—the real agriculturists, as Mr Cobden long ago defined them — have never, perhaps, within living memory been so prosperous as they have been since the full adoption of a consistent free-trade policy. But be this as it may, the free-trade policy, which the national opinion of England, after years of argument and a perhaps unnecessary accumulation of conclusive discussion, selected as the true policy, assumes that our manufacturing industry must increase,—that our large towns must enlarge,—that in them, and not elsewhere, must be found adequate employment and an increasing fund of support for the augmenting numbers of the English people. Has this been so or no? The facts are in our hands: what answer do they make to us?

The first item in the account to be rendered in answer to this distinct inquiry is the actual augmentation in our numbers. It has been very considerable, and, if adequate development had not been given to some sort of industry, either manufacturing or commercial, it would have been impossible to employ it either profitably to itself or advantageously to the nation.

The real augmentation has been as follows:—

ENGLAND AND WALES.—POPULATION at each of the Censuses 1801-61, including the Army, Navy, and Merchant Seamen, abroad as well as at home, belonging to England and Wales, ACTUAL INCREASE, and RATES of INCREASE, in the Decennial Periods.

Census Year.	Population.	Actual Increase in the Decennial Periods.	Decennial Rates of Increase p. cent.
1801	9,156,171	...	...
1811	10,454,529	1,298,358	14
1821	12,172,664	1,718,135	16
1831	14,051,986	1,879,322	15
1841	16,035,198	1,983,212	14
1851	18,054,170	2,018,972	13
1861	20,223,746	2,169,576	12

But, if looked at by itself, this table would give an erroneous idea of the real prolificness of the English people. As the percentage is only 12 per cent. in the last decennial period, and 13 and 14 per cent. in the two preceding, it might be imagined that our fecundity was diminishing. But to estimate it aright we must have before us the number of emigrants between the periods in question; and this must be taken into the account as well as the numerical increase in the number of people between the four seas at the time of the respective enumerations. Now, it appears that, from the official returns, if not with mathematical and theoretic completeness, at any rate with sufficient and substantial accuracy, that

The number of emigrants between	1831 and 1841 was ...	717,913
—	1841 and 1851 was ...	1,616,063
—	1851 and 1861 was ...	2,249,355

If we include this great augmentation of emigration in our reckoning, we shall see that the true multiplying power of the English people has not diminished, and that the inference which would be at first sight drawn from the single table above given is entirely erroneous and unfounded.

How, then, has this great increase of population actually *remaining* and seeking a livelihood in England and Wales been, according to the new facts, remunerated and employed? It certainly is not true that every locality has provided for its own augmenting poor. Some counties, when the list is examined, show that, instead of employing more people, they employ fewer people. These counties are:—

	Decrease.
Cambridge	9,455
Norfolk	7,292
Rutland	1,124
Suffolk	964
Wilts	4,778
Anglesey	2,781
Montgomery	268

And several other counties show but a very slight increase of numbers, as—

	Increase.
Somersetshire	809
Huntingdon	114
Oxford	1,827
Brecon	153
Cardigan	1,459
Carmarthen	1,125
Merioneth	45
Radnor	687

But these are all purely agricultural and, as it may be said without offence and without the least objectionable meaning, stationary counties. Let us now look at the counties which contain the great cities where large incomes are spent, and the great seats of industry in which the productive powers of England have been developed, and in which, as time moves on, they are becoming more and more concentrated. The list is remarkable:—

	Increase since 1851.
Durham	118,021
Kent	117,909
Lancashire	397,508
Middlesex	319,195
Stafford	137,868
Surrey	147,603
West Riding of Yorkshire	182,016

These simple figures of themselves irresistibly suggest that the true policy of England is to develop her great centres of productive industry and miscellaneous wealth; that these are her primary sources of substantial wealth; and that the other outlets of her pecuniary efficiency are only subordinate and supplemental, not principal and necessary.

We shall see this conclusion, however, not only suggested but proved, as far as figures can prove anything, by the following table:—

ENGLAND AND WALES.—POPULATION in 1851 and 1861, ASCERTAINED INCREASE or DECREASE in the interval, and NATURAL INCREASE or EXCESS of REGISTERED BIRTHS over DEATHS in the Ten Years 1851-60.

	Ascertained Increase in the interval between 1851 and 1861.	Natural Increase or Excess of registered births over registered deaths in the ten years 1851-60.
England and Wales	2,134,116	2,260,576
DIVISIONS.		
I. London (within the limits of the Metropolis Local Government Act)	440,798	253,989
II. South Eastern (Registration districts chiefly in the counties of Surrey and Kent [extra-metropolitan], Sussex, Hants, Berks)	218,460	196,992
III. South Midland (Registration districts chiefly in the counties of Middlesex [extra-metropolitan], Herts, Bucks, Oxford, Northampton, Hunts, Beds, Cambridge)	61,043	155,742
IV. Eastern (Registration districts chiefly in the counties of Essex, Suffolk, Norfolk)	28,220	129,726
V. South Western (Registration districts chiefly in the counties of Wilts, Dorset, Devon, Cornwall, Somerset)	32,290	200,673
VI. West Midland (Registration districts chiefly in the counties of Gloucester, Hereford, Salop, Stafford, Worcester, Warwick)	*299,564*	*298,980*

	Ascertained Increase in the interval between 1851 and 1861.		Natural Increase or Excess of registered births over registered deaths in the ten years 1851-60.
VII. North Midland (Registration d'stricts chiefly in the counties of Leicester, Rutland, Lincoln, Nottingham, Derby)	73,217	.....	161,763
VIII. North Western (Registration districts chiefly in Cheshire and Lancashire)...	446,284	.....	308,022
IX. York (Registration districts chiefly in Yorkshire).....	226,282	.....	256,117
X. Northern (Registration districts chiefly in the counties of Durham, Northumberland, Cumberland, Westmoreland)	182,155	.....	152,694
XI. Welsh (Registration districts chiefly in Monmouthshire and Wales).....	125,803	.....	145,878

It appears hence, that speaking broadly, generally, and in those plain words which alone can be remembered that the great seats of industry—the metropolis included, which is a far greater seat of manufacturing industry than most people are aware of—together with their immediate neighbourhoods, carry off the superfluous augmentations of increasing population which would else accumulate in out-of-the-way parishes—which would else become an accumulating burden on the local poor rates—for which agricultural employment, in ordinary circumstances at least and in most counties, affords no sufficient and appropriate outlet.

Many conclusions may be drawn from these *data*, some warranted and some not so. No one will venture to say that the increasing accumulation of population at certain fixed centres is an unmixed good; no one will say it has not its peculiar risks and dangers; no one will say it does not bring with it accompanying responsibilities and appropriate duties. But, at all events, the fact must be clearly seen and plainly acknowledged. We must clearly understand why it is that our augmenting population is well employed—how it is so—and where it is so. We must confess that the commercial policy of recent years has been (as far as human sagacity can judge) essential to the national salvation, and that an opposite policy would have been accompanied by, and would have been mainly responsible for, a national destruction.

MR LAING'S FIGURES.

THE observations which we last week addressed to our readers on the uncertain nature of even the most recent accounts of Indian finance receives ample confirmation from what fell from Sir C. Wood on Thursday evening. "He "admitted," these are his own words, "that there were dis-"crepancies in Mr Laing's estimates, which, without expla-"nations not yet received, it was impossible to reconcile. "It was true that Mr Laing stated that, so far from there "being a diminution of expenditure in 1860-61, as compared "with 1859-60, there was a positive increase of upwards of "200,000*l*. There was, however, on the table of the House "an official statement, which showed that there was an "actual reduction of expenditure to the extent of 5,635,000*l*, "instead of an increase of 200,000*l* in the expenditure." Of course there must be *some* explanation, but it is certainly startling that there should be a difference of 5,700,000*l* in the reckoning of Mr Laing in India and Sir C. Wood in London.

Mr Laing's speech shows an anxious desire to tell the whole truth, but it does not achieve any very special success in so doing. *We* at least cannot understand whether the military expenditure has been materially reduced during the year 1860-61 or not. Great reductions have been ordered, but how much has been effected in reality—*how* much has been saved in money, is not clear. We give Mr Laing's own words to our readers, and they must form a judgment. First, we have the following passage, from which it would seem that the military reductions had not been realised:—"Perhaps some members of Council may "have seen a much more favourable statement, which was "recently made by the Secretary of State to the British "House of Commons. It was stated that, whereas Mr "Wilson had estimated the reductions of expenditure in "1860-61 at 1,700,000*l*, and subsequently at 2,500,000*l*, "they had turned out in reality to be 3,300,000*l*; so that "after saving 3,500,000*l* in 1859, we had again saved "3,300,000*l* in 1860, which, with 3,500,000*l* of new taxes, "extinguished our deficit and made us independent of loans, "except to complete our railways. This statement was "made in perfect good faith by the Secretary of State, on "information which he had a right to rely upon, but "unfortunately that information mistook wishes for facts "and anticipations for realities. There was *not* a reduction "of 3,300,000*l* as supposed by Sir C. Wood, or even of "1,700,000*l* as estimated by Mr Wilson, but a positive "increase of 213,000*l* in the total expenditure of 1860-61 "over that of 1859-60. The figures which I read from "the regular estimate, corrected up to last February, "show that the total expenditure was 46,417,000*l* "in 1859-60, and 46,630,000*l* in 1860-61. Even "if we allow 700,000*l* for the mutiny compensation, "the actual reduction of 1860-61, compared with 1859-60, "will be less than 500,000*l*. The difference arose "thus: the reduction of expenditure in India was overesti-"mated by 1,500,000*l*, *owing to a too sanguine expectation that* "*the recommendations of the Military Finance Commission would* "*be carried out in* 1860-61. The increase of home expen-"diture for debt, railways, and army was overlooked. The "produce of the new taxes was taken 1,500,000*l* too high, "and it was forgotten that 800,000*l* of the amount had been "already received in 1860-61, and was included in the "statement showing the deficit of 6,000,000*l*. No allow-"ance was made for the temporary nature of some of the "receipts of 1860-61, such as the Punjaub trade tax and "sale of stores. These errors together amount to upwards "of 5,000,000*l*, and just make the difference between the "equilibrium announced in England and the deficit of "5,500,000*l*, which is the real result of last year's Budget, "after crediting it with a full year's proceeds of all the new "taxes, including the licence tax, which is not yet sanctioned."

Yet we have afterwards this passage, stating that the military expenditure has been reduced:—"In 1858-59, "owing to the mutiny, this cost rose to 21,000,000*l* in "India, and 3,750,000*l* in England, showing a total increase "of 11,000,000*l* on the expenditure of 1856-57, to which "should be added an increase of 1,000,000*l* for military "police. This was the *maximum* point at which reductions "began. In 1859-60 the military expenditure in India "was reduced to 17,750,000*l*, and in England to 2,750,000*l*, "making a total reduction of 4,250,000*l*. In 1860-61 the "expenditure in India was 15,279,000*l*, in England "2,750,000*l*, showing a further saving of 2,500,000*l*, which, "as I explained just now, has been swallowed up by the "increase of interest on the debt and other charges, and "which still left the cost of the army of India 5,250,000*l* "more in 1860-61 than it was in the year before the "mutiny."

Doubtless there is some explanation—some accurate mode of reconciling these apparent discrepancies. Yet it is, after all, very disheartening to have them to reconcile. A Finance Minister should be able to make all business matters perfectly clear. If he is deficient in a capacity of exposition, he is deficient in one of the most important requisites for the full discharge of his great duties.

It is further to be regretted that we have only as yet an "Estimate" of the expenditure up to February last. What may have been spent afterwards is not *known*, and we place no reliance on the anticipatory foresight of the Calcutta financiers.

THE OPENING OF THE INDIAN CIVIL SERVICE.

A MEASURE of great importance is embodied in the very short Bill which Sir Charles Wood has introduced to amend the constitution of the Indian Civil Service. It in fact opens, under some stringent regulations which are now likely to be embodied in the Act, the Civil Service of India not only to members of the uncovenanted or outside service, but to general residents in India who may prove themselves fit for their work. No doubt the practice is not entirely new. The thing has already been done as an exceptional act of irregular power. But now, under special guarantees against abuse, it is to become a recognised and legal mode of procedure,—and the monopoly may therefore be said to be broken down.

That this change,—slight as it is at present intended to be,—may prove one of the greatest ultimate importance, it

is scarcely necessary to point out. At present there is but one possible approach to the ranks of Indian statesmen,—and that is the dedication of the candidate at the termination of his college course at latest, to the Indian Civil Service. Now, of course this condition has many undesirable sides. It burdens the service with a considerable number of men who, though they may pass the examination creditably and are pretty well fitted for the lower posts, are by no means really competent for the higher offices,—and it prevents the selection of the few really able men on the spot, whose qualifications have not been acquired in this special way. The argument in favour of this monopoly is, that to attract well-qualified gentlemen into the Indian service is not a very easy matter, and that the promotion must be certain and rapid as well as the pay good from the beginning. This is, no doubt, true; but we do not believe that the proposed infringement of the monopoly will weaken this motive in any one respect. The regular Civil Servants will still have a great advantage over all others; their merits will be necessarily beneath the very eye of Government; their powers will have been fairly tested; their moral claims will be incontestably the strongest. If with all these advantages they sometimes see themselves postponed to the uncovenanted servant or to the non-official resident in India, we may feel pretty sure that it will in general be their own fault.

This would not, however, necessarily be the case, if there were any danger of this Bill's opening an *easier* path to Indian official life than that of the regular service. Suppose it once became known that if a man with parliamentary influence went out to India, studied the language, and then applied for a post, he could obtain it without showing any special merit and without passing over the beaten path,—no doubt the Civil Service would have great and heavy reason to complain. But the guarantees now sanctioned against such a risk are ample. The test of seven years' residence in India is to be absolutely required and embodied in the Bill,—so that no candidate, whatever his influence, would go out and wait seven years for a possibility which he might turn into a moral certainty by competing for a writership in the first instance. Besides this, any such appointment is to be provisional only, to be reported to the Secretary of State in Council, together with the special reasons for making it, and unless the Secretary of State shall approve it, "together with "a majority of members of Council present at the meeting" at which it is discussed, and shall notify the same within a year to the authority by whom it was made, the appointment shall be null and void. This is ample guarantee against the jobbing of any such appointments,—the principal danger which affects the new principle.

The only real danger to be apprehended is the appointment of men under this power in any way connected with trade or local interests in India. It is possible that resident planters or even planters' sons might by this indirect passage into the Civil Service get a very undesirable influence over local feuds, or exercise authority for private reasons which it would be exceedingly difficult, if not impossible, to bring home to them. The greatest care ought to be taken to exclude all persons directly connected with trade from gaining a power which they might use for their own or their relations' benefit. It is the only great advantage of the monopoly now retained by the Civil Service, that a man enters it so early and is subjected so exclusively to the traditions of the just and humane Government he serves, that there is no risk whatever in general of his falling under the attraction of mere powerful interests. But this would not continue to be so if many men of maturer age and of long-established extra-official connections in India are to be introduced into the service. Can it be doubted, for instance, that if an indigo planter in the disturbed districts were made a magistrate, his mind would be unconsciously or consciously warped by the nature of his interests and social relations in dealing with unruly ryots? This is a danger which will require the most vigilant care. We do not know whether, among the regulations to be issued by Sir Charles Wood, a prohibition of any such appointments of men identified with trade-interests is contained. If not, it should be at once added.

But, these qualifications apart, we are convinced that the opening of the Civil Service will be productive of great benefit to all parties. It will stimulate the energies of the service itself, which will now be roused to an effort to keep in its own hands as many of the higher prizes of the Indian Government as it can. It will, we trust, vastly improve the uncovenanted service, as soon as it is shown that a few, though it may be very few, of their rank will have a chance of gaining the highest objects of political ambition. It will, we trust, accomplish a still greater object,—tend to multiply the possibilities of a distinguished career for the native gentlemen themselves. It is a sad make-weight against the advantages which England has conferred upon India that it has dissipated all the dreams of social and political ambition in the breasts of the natives. It has given them social order and security, with a dead level of political prospect in which there is not the slightest chance of any Hindoo or Mahometan taking a distinguished place. Every step which tends to open the higher posts in the service to native gentlemen is a step of the greatest consequence. For even if the actual promotions be but few, every one such enlarges indefinitely the horizon of each man's hopes. And lastly, it will confer an inestimable benefit, if, as Lord Stanley hopes, it does something to smooth away the jealousy, and almost hatred, subsisting between the non-official classes of Europeans in India and the Civil Service. So soon as men are at times chosen from among the non-official Europeans, there will be every reason for those who look forward to such an appointment or even hope to gain it for their children, to view the Civil Service with less hostile eye. And on the other hand, the Civil Service cannot but consult more frankly the opinion of a class from which it is liable to be recruited, than it does now.

In fine, we have reason to hope that very great ultimate benefit will result from this Bill. There is always an evil in monopoly, and especially in monopoly limited by stringent regulations as to age and examination. The very men who are perhaps more likely than any others to do us good service in India are those of more hardy nature, who would go out in the spirit of adventure, rather than in the character of a regular civil servant. These may gain an experience of India, and a facility in coping with Indian difficulties, far superior to that of the regularly-educated class. And if there be such, it is madness to refuse on technical grounds to avail ourselves of their aid in extending our rather insufficient hold over Indian loyalty and affection.

TRADERS AND NON-TRADERS IN BANKRUPTCY.

CERTAIN persons who say they represent the non-trading public have a curious horror of the law of Bankruptcy. Last year the discussions upon Sir R. Bethell's proposal to extend that law to the non-commercial classes were wearisome and useless. This year they have been resumed; and now at the last moment Lord Chelmsford has interpolated a clause into the forthcoming Bill which mars its symmetry and tends to impair its efficiency.

From these facts it might be inferred that the law of Bankruptcy was a severe section of our criminal jurisprudence. It might be thought that it gave those specially subject to it but few advantages, and exposed them to heavy penalties. But persons practically acquainted with the subject know that the penalties of Bankruptcy are not very many or very formidable; and that the privileges it confers are almost too great.

The law of Bankruptcy gives the insolvent debtor *a new start in life*. It wipes out all his past debts, and secures to him the full fruit of all his subsequent exertions, the uninterrupted enjoyment of all after-acquired property, and the full rights and privileges of an uniformly solvent man. Some slight penalties may, it is true, be occasionally inflicted by the Court of Bankruptcy. But who fears them? What part of the commercial community knows anything of them? What part is restrained by any terror of them? We might wish it to be otherwise; but we must see what is real. There can be no doubt but that the jurisdiction of the Court of Bankruptcy is a source of comfort and not a source of terror to the commercial classes.

In part it was intended to be so. It was thought that unavoidable misfortune was one of the inevitable incidents of all commerce, and that where it occurred it was hard that the debtor should bear about him for life the burden of debts which he

contracted innocently, but which untoward events have prevented him from discharging. The law of Bankruptcy is and was intended to be an aid and an assistance to the insolvent debtor, not a new burden upon or an additional punishment to him.

Of late years it may be said that the distinction between traders and non-traders has melted away; at least there is a very large debateable land which seems to belong in part to both classes. Much capital is employed in trade which belongs to what would formerly have been called the non-trading classes. A shareholder in a joint stock bank is a trader; the sleeping partner in a brewery is a trader; the participant in any mercantile profits is a trader. Yet all such persons may, and many do, pursue the same sort of life as the fundholder and the country gentleman. With the growth of capital and the extension of the partnership system, the distinction between the non-commercial and the commercial man is rapidly fading away.

Accordingly, it has been proposed to give non-traders the same privilege as traders, and one would have thought they would have been glad of them. We should have expected rigid moralists to have made some objection to a system of legislation which *may* be so used as to countenance and foster future dishonesty, but we should not have expected that the professed advocates of the persons to be benefited would be the principal objectors. We can only account for it on the assumption that a vague terror still lingers round the term "Bankrupt," and that many of our legislators do not remember that although the present Insolvent Court gives protection to the person of an insolvent, it leaves all his property, whenever acquired, at the mercy of his creditors. Lawyers know that a bankrupt is a *favoured* insolvent; but we suspect that many of our legislators are not aware of it.

THE NEW EXCHEQUER BILLS.

The new Exchequer Bill is as follows:—

"£100.

"This Exchequer Bill entitles ——— or order to claim "payment of One hundred pounds, at the Bank of England, "out of the Consolidated Fund, at the expiration of any "period of twelve months, not later than five years from "the date hereof.

"Interest on this bill will be paid half-yearly, at the "Bank of England, at such rate per centum per annum as "shall be notified from time to time in the *London Gazette* "by the Commissioners of Her Majesty's Treasury.

"This bill may be paid for the sum of One hundred "pounds, and interest accrued thereon, to the receivers and "collectors, in the United Kingdom, of any of the public "revenues, aids, taxes, or supplies, or to the account of Her "Majesty's Exchequer at the Bank of England, at any time "in the last six months of every year, commencing from the "day of the date hereof, in which it shall have currency by "law."

Coupons are added in the following form:—"This coupon "entitles the bearer to interest on the above sum for the "half-year to ——."

It will be seen that the bills will be current for five years, and that the interest may be changed at any time by notice in the *Gazette*.

The coupon does not specify the *rate* of interest.

From the operation of the last clause the whole amount of the March and June Exchequer Bills may be paid into the Exchequer for duties in the latter part of the financial year, but this will doubtless be rectified.

The 7th section of the new Act confirms the limit on Exchequer Bills fixed by a former Act, confining the amount of Exchequer Bills to be issued to 13,230,000*l*.

By the 20th section the Bank of England are empowered to advance 13,230,000*l* on the security of Exchequer Bills.

WHAT IS "MONEY"?

THE CASE OF THE EMPEROR OF AUSTRIA v. KOSSUTH.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The ECONOMIST has more than once called attention to the interest attaching to the attempt of the Austrian Government, to make use of the English Court of Chancery as a political engine. But, though the bill filed by the Emperor of Austria against M. Kossuth and the Messrs Day is a political manœuvre, and has a direct political object only, and for this reason ought never to have been entertained by our Courts of Chancery, there are points involved in the matter which are of great importance to those who care less for politics than for commerce, and who are too apt to lose sight of the necessary connection that there must always exist between a sound political system and the free course of commerce.

As, though my name has often appeared in connection with this case, I have, throughout, declined to accept the position of retained counsel in the cause, for the express reason that the opportunity of taking such an independent course as seemed to me desirable would be thus shackled, you will perhaps allow me to invite attention to one branch of the subject which is of general interest, and which was really the point on which the argument in the case turned.

I must premise that a court of law is placed in a somewhat anomalous position, when the very subject-matter presented to it involves the demand for it to extend the sphere of its own jurisdiction;—still more, when it is asked to extend this jurisdiction to oblige an Emperor. The anomaly is increased when the matter on which the court is asked to extend its jurisdiction, is an entirely political one, while the chief judge of the court is himself a political officer, and a member of the English Cabinet as such. These facts show the great need there is for jealous caution in the consideration of the whole case, and for well weighing all the points that arise in the discussion of it.

The case has been argued with great ability by the eminent counsel engaged on behalf of the plaintiff. It is a pleasure, as well as a duty, to acknowledge this. But the main, indeed the only substantial, ground on which, both in the Vice-Chancellor's court and on Appeal, they rested their case, was, the prerogative right of a Sovereign to regulate money;—which was many times referred to as the "*jus monetæ*." In the Vice-Chancellor's court, the alleged right was affirmed to be a *property*, which the court would protect, inasmuch as it is a "monopoly." This was rather an odd argument to submit to an English court of law, in the face of the principle so distinctly enunciated by Lord Coke, that "all monopolies are against the ancient and fundamental laws of this kingdom"; a principle which the same authority enforces in many places and in the most emphatic manner. In the Court of Appeal, the "monopoly" argument, which asked an English court of law to help a foreign Emperor to enforce what is directly contrary to the fundamental laws of England, was less insisted on. and the prerogative of the Sovereign as to money was made the strong ground of reliance. It was indeed attempted to be set up, that the Sovereign sues as a sort of "public officer" (like the clerk of a bank), on behalf of the whole State, and so can sue, in an English court, touching anything that the whole State of which he is Sovereign can regulate. But such an assumption is so palpably weak and unsustainable, that it need not be now dwelt on, more than to say, *first*, that, as the State may regulate all internal matters whatever, there would, if this were admitted, be no possible subject on which a foreign Sovereign could not call upon an English court of law to interfere, under the pretext that the State of which he is Sovereign has power to regulate something arising out of it; *secondly*, that the assumption of such a character by the plaintiff comes rather grotesquely at a time when he has asked to be accepted as head of the State in question, and has not yet been so accepted.

The court did, indeed, lay it down that the plaintiff must be assumed to be King of Hungary, and that it could not inquire into the legitimacy of his title. It may be very agreeable to an Emperor plantiff to find himself so politely treated by an English court of law. He may be pleased to be able to parade before Europe that, though the Diet of Hungary will not acknowledge him as King, unless he first fulfil the requisitions which the law has imposed as the conditions of Kingship, an English court of law has declared that it will take his own word alone for it that he is King of Hungary, and will give its judgment, in a trial at law, in conformity with this recognition.

But there happen to be two awkward circumstances that make the Court of Chancery stand in a very ridiculous position, when thus so willing to do the polite thing to an Emperor plaintiff. *First*, it was explicitly admitted, by the present Foreign Secretary, on 25th April last, in his place in the House of Commons, that no notification of the accession of Francis Joseph to the throne of Hungary has ever been received by the Queen of England. He stated, that the only notification received was one that any reader may find on pp. 103, 104, of the "Correspondence relative to the Affairs of Hungary," presented to Parliament in 1850. This notification extends only to the *Imperial* throne of Austria, and alludes to the family compact of 1713, regulating the succession to that throne. It does not even allude to the *Royal* throne of Hungary, or to the Act of Settlement of 1723, by which alone the succession to the latter throne is regulated.

But, *secondly*, I find, on the face of the Letters Patent that stand on the front of the *Corpus Juris Hungarici*, now before me, that the Emperor of Austria calls himself King of Jerusalem. It follows, as a necessary and unevadible consequence, that, if the plaintiff is to be admitted as King, without inquiry into his title, because he calls himself King of Hungary, then, in case it should happen that the Sultan enter into a contract with Messrs Boulton

and Watt to make a quantity of copper coin for circulation in Jerusalem, the Court of Chancery will be obliged to grant an injunction against the fulfilment of that contract, should the Emperor of Austria, who calls himself King of Jerusalem, choose to file a bill for the purpose. Illustrations showing, even still more strongly, the absurd consequences of such an extraordinary (however polite) ruling of the Court, might be given: but this is enough for the present.

Had the Emperor of Austria filed his bill simply as Emperor of Austria, and as now holding Hungary by the grace of Russian arms and by main force, though in defiance of lawful right, the question of a *de facto* sovereignty would, of course, have arisen, and must have stood for what it is worth. But the plaintiff does not venture to go so far as this. He only ventures to rest his claim on rights alleged to belong to him "as King of Hungary." He binds himself, by this, to make out that the law of Hungary gives him certain rights, which are infringed by the defendants in this case.

The whole matter comes back, therefore, (passing over the point as to the validity of the plaintiff's actual title, as King of Hungary), to the question, what is that prerogative of the Crown, as to money, which an English court ought to recognise and sustain?

In order to sustain the plaintiff's case, it was necessary to contend that the *jus monetæ* includes paper currency as well as coin. And this was accordingly asserted to be so. If this proposition can be shown to be unfounded, it is self-evident that the whole of the plaintiff's case breaks down.

So far from "money" including paper currency, and so far from the prerogative of the Crown extending to the control of paper currency, it can be shown conclusively, that the former is strictly confined to metal pieces, and that the latter is limited to gold and silver. Out of the vast multitude of illustrations of this subject which I have collected,—all uniformly and without exception pointing in the same direction,—I will now refer to a few, which will be most likely to recall names familiar to the intelligent reader.

In Lord Coke's first Institute (Coke upon Littleton), he defines "Money, moneta, legalis moneta Angliæ," as coin, "either in gold or silver."—(P. 207.) In his second Institute, he speaks, expressly, upon "what prerogative the King hath in silver and gold; and first and principally in making of money current within the realm." Again: "No subject can be enforced to take, in buying or selling, or other payment, any money made, *but only of lawful metal, that is, of silver or gold*"; "the money of England must either be of gold or silver"; "the King's prerogative in the mines or veins of gold and silver,—for *he hath no prerogative in any other metal*"; and again, he expressly defines the words "English money" thus:—"This is intended of all money of *gold or silver* current within the realm of England."—(Pp. 576-578, 742.)

The unanswerable and reiterated force of this language was attempted to be evaded by the plaintiff's counsel, under the allegation that, in Coke's time, copper coin was unknown. A more unlucky suggestion could not have been made. It assumes as a fact that which can be shown, by overwhelming evidence, to have been quite the contrary to fact.

Lord Coke himself, on the very page where he declares that the "King hath no prerogative in any other metal than gold and silver," happens to mention, that there was *copper* money in the beginning of the reign of Elizabeth. So that he was himself familiar with the existence of copper money, when he wrote that gold and silver money is that to which alone the royal prerogative extends.

But copper and brass money had been then long in use, and in great quantities. The State Paper Office contains patents, professing to grant the monopoly of making copper money to Lord Harrington, and many other documents proving the extensive use of copper money tokens in England and throughout Europe, before the time when Coke wrote. These patents were not granted under pretence of any prerogative as to the money, but as part of that attempt to erect monopolies which was declared, by the Act of 1623, to be contrary to the fundamental law of England. A similar patent was granted, in 1614, for a new way of working copper ore. One, indeed, of the best known cases in the old Law Reports, is the "Case of Mines," reported by Plowden, in which the royal prerogative as to gold and silver is affirmed, and is rested upon the ground of the necessity for regulating the coinage thereof, while the prerogative is as explicitly declared not to extend to mines of copper, tin, &c.

So common was copper coin at the begining of the seventeenth century, that, in Mr Boyne's valuable book on the "Tokens of the Seventeenth Century," published in 1858, he gives a list of no less than 9,466 different sorts of this coin;—that is, copper coin issued with different devices and by different people. And this 9,466 is but a part of those that were actually issued. It would be difficult to have a stronger proof, both of the commonness of copper coin, and that the regulation of its issue was not within the King's prerogative. It is a well-known fact, that the private issue of copper tokens was only stopped by the Act of 57 Geo. III., c. 46; and then stopped, not because of any pretence of royal prerogative, but because of the obvious inconvenience to the public of so many kinds of copper money being in circulation.

Sir Matthew Hale agrees with Lord Coke, that the material of lawful money in England "is either pure silver or pure gold, or else silver or gold mixed with an alloy"; and again, in describing "what shall be said to be the King's money," he declares that "it must be of money of gold or silver."—(Pleas of the Crown, vol. I., pp. 188, 210.)

The same thing could be illustrated by a great number of quotations from the rolls of Parliament and other authorities. But I must pass to the characteristics elsewhere stated to be necessary to all money. Sir M. Hale states these as being, "(1) the material whereof it is made. (2) The denomination or extrinsic value. (3) The impression or stamp." All these are characteristics of metal pieces only; and it has been seen that gold and silver were alone held to fulfil the first of them. In a remarkable case, called "the Case of Mixed Moneys," which is found in Sir John Davis' Reports,—but which, for reasons very obvious to those familiar with the subject, the plaintiff's counsel in this case did not find it convenient to quote,—occurs the following:—"Six things or circumstances must concur, to make lawful and current money: (1) weight; (2) fineness; (3) impression; (4) denomination; (5) the authority of the Prince; (6) proclamation. For every piece of money ought to have a certain proportion of weight and a certain proportion of purity or fineness; &c."

The laws of Hungary on this subject are identical, in principle, with those of England. In the second affidavit filed by M. Kossuth, some of these laws are quoted. Many others might have been so. None of these is pretended to be controverted in the only affidavit filed, in answer, on the plaintiff's behalf; nor is any law of Hungary able to be quoted, by the three makers of that affidavit, which sustains the plaintiff's claim. On the contrary, all they can do is, to make a vague allusion to an alleged "unwritten law"; which allusion, as well as some other parts of their affidavit, demonstrate (as I shall probably take another opportunity of showing) either their own ignorance of Hungarian law, or their deliberate intention to mislead the court.

The laws of England and of Hungary agree therefore, entirely, that there can be no such thing as lawful "money," except metal pieces; those pieces, so far as the King's prerogative is concerned, being of the material of gold and silver. It gives an interesting illustration of this, that the Parliament of England, when anxious, after the execution of Charles I., to arrogate to itself all the royal prerogatives, issued a decree for ordering the "moneys and coins of England"; in which it recites this prerogative as appertaining only to gold and silver, and makes order for new coins accordingly (17th July, 1649).

It is self-evident, that an English court of law, when asked to deal with a matter in which Hungary is concerned, must be guided either by the law of England or by the law of Hungary. These two happen to be identical upon the matter in question; and both, equally, put the plaintiff at once out of court. By both, the prerogative as to money is expressly limited to metal pieces, —and that metal, gold and silver. It has nothing whatever to do with paper notes.

The plaintiff's counsel have attempted to override the express law of England and of Hungary, and Sir John Stuart has allowed himself to be entangled in the sophistry, under pretence of some vague and indefinite superior law, which they call the "law of nations"; a law that is without any binding *sanction*, and therefore can be, in no true sense, a *law*; and which, however prettily it may be laid down in the digested theories of suggestive writers, can never override the express law of any State; and can, indeed, only be of use in so far as it gives a true summary of those laws which different States have actually agreed to recognise as binding between one another.

Now it does happen that, instead of any of the great authorities on international law confirming the theory which is necessary to the plaintiff's case, every one of them is against it; every one of them confirms the principle recognised by the law of England and the law of Hungary. Puffendorf alone was able to be *alluded to*, as mentioning "Paper." But care was taken not to *quote* Puffendorf,—for the quotation would have upset the object of the allusion. Puffendorf is strong upon the duty of the magistrate to maintain money at its true value and intrinsic worth, as the medium of exchange; and says that, whatever may be done "in cases of exigency" and "in times of necessity," the resource of the moment ought to be "exchanged for the common specie" as soon as the emergency is passed. Grotius and Vattel are equally clear as to the duty of the State in regard to money, and as to the grounds upon which alone the State has any function in the matter.

What then are Paper Notes? To "money," an intrinsic value is essential. Paper Notes are nothing more than the record of a certain amount of *credit to be given*. Money carries its own value in itself: paper notes depend wholly on something that is beyond themselves. "When," says Adam Smith, "the people of any particular country have such confidence in the fortune, probity, and prudence of a particular banker, as to believe that he is always ready to pay, upon demand, such of his promissory notes as are likely to be at any time presented to him, those notes come to have the same currency as gold and silver money, *from the con-*

fidence that such money can at any time be had for them." Your readers will be well aware that I could cite passage after passage in which "metal pieces" are the only things allowed, by Adam Smith, to be really "money," and in which he points out the necessary dependency of the use of paper notes upon that metal money which is their only basis. Mr Mill, in his chapters on "Money," and on "Credit as a Substitute for Money," is equally precise.

The history of our Bank of England illustrates the same thing. In Godfrey's account (Somers' Tracts, vol. XI.,) it is well said:—"There are others who are for forcing a currency of bills, or tallies, and think they may pass as well as bank-bills. But they do not consider, that 'tis nothing makes bank-bills current but only because that all those who desire it can go, when they will, and fetch their money for them; and to force anything to pass in payment but money, would soon end in confusion." I need hardly add, that Bank of England notes are not themselves money, and can only be issued in certain proportions to the actual money in store, and are obliged to be paid, on demand, in money, over the counter of the Bank and its branches, though they are made a legal tender, by Act of Parliament, in other places (3 and 4 W. IV., c. 98, sec. 6.)

Paper notes are therefore a matter solely of *credit*, not of *money*. The laws of political economy regulate the uses of credit. And credit can never, without the greatest danger to commerce, be let be dealt with by our courts of law, as a matter that rests in the breast of prerogative. The Emperor of Austria, by now applying for an injunction, does indeed admit that Kossuth's credit is greater than his own in Hungary, inasmuch as he is afraid of notes which (to use your own words in the ECONOMIST of May 11) "bear expressly on the face of them the political assumption under which alone they could be available." He avows, by filing this bill, that he is afraid of Kossuth's *credit*. But the regulation of credit can never be matter of prerogative. It behoves the commercial world to consider well what will be the principle admitted, if the Court of Chancery should extend its politeness to the Emperor of Austria so far as, not only to do what the Hungarian Diet has not done, and acknowledge him to be King of Hungary, but grant him this injunction to stop the making of certain paper notes that only bespeak a credit without which they are simply worthless. If this be done in the present case, the Emperor of Austria, or any other foreign Sovereign, can, at any time hereafter, come to the Court of Chancery, and demand, with an unanswerable precedent to back the demand, that the House of Barings, or any other in London or Liverpool or elsewhere in England, shall be restrained from accepting bills of exchange, or that any banker shall be restrained from issuing letters of credit, any of which may, by any future possibility, reach the country of the plaintiff Sovereign; or that either of these shall be restrained from using "*credit*" in any way, or adopting any of the usual forms of recording an admission of credit given, as the means of carrying on any of their ordinary transactions with any foreign country.—I am, Sir, your obedient servant, TOULMIN SMITH.

Highgate, Middlesex, June 6, 1861.

P.S. The foregoing letter was written and in type before the judgment of the Court of Appeal was given. That judgment does not make it necessary to alter a single word. It was a political judgment. The fundamental principles which have always been understood to fix and guide the jurisdiction of Courts of Equity were overlooked; and, at the same time, so much only of the evidence before the court as helped the political aims of the judgment, was noticed; while the uncontradicted and abundant evidence before the court, which is inconsistent with that judgment, was wholly disregarded.

The judgment makes the commercial importance of the case even more striking than it was before. The only ground attempted to be rested on, for the judgment given, may be properly called *Protectionism run mad*. A King may, in spite of the direct letter of the law, interfere to say who the people shall give credit to, lest those people may possibly suffer damage through the depreciation of *other* credit. An English court will help a foreign King to do this. It follows, that, in spite of commercial treaties and free trade, an English court will interfere to prevent the exportation of goods from England, which any foreigner may fear will come into competition with his own. It cannot be necessary to say more upon a judgment which is made to rest upon economical and commercial fallacies than which none more unsound or more mischievous were ever propounded. T. S.

Agriculture.

MANURE MAKING.

WE last week presented the somewhat singular views of a writer in the "Journal of the Bath and West of England Agricultural Society" who advocated low farming, and entered into elaborate statements to show that farmers are not repaid for outlays on manure, or for feeding stock for the sake of manure so made. These opinions certainly do not accord with modern experience, nor with that of past ages, for the saying that "muck makes money" is an agricultural maxim so ancient as to be beyond all record of its origin. Of course too much expense may be incurred in the manufacture of manure as in other farming operations, but it is the business of the farmer so to adapt his means to his end—to grow his good crops by such manurial as well as other appliances—as will yield him an ultimate profit.

The practical men who constitute the London Farmers' Club do not regard the question of a preference for high or low farming to be an open one. They assume manure, and in large quantities, to be an agricultural necessity. Accordingly they seek only to elicit the views of their members as to the best mode of manuring the land, and for that purpose gave out as a thesis:—"How far sheep can be advantageously substituted for bullocks in the manufacture of manure upon farms where the natural food is not fattening, and where no roots but mangolds can be successfully grown?" This puts an extreme, if not an impossible case, for though the pasture land may not be what is usually called "feeding," there is none on which turnips cannot be grown, though it may not be possible to feed them off with sheep on the arable land. What was probably aimed at was, whether sheep might not be used in the place of bullocks on strong land farms where the land is of third or fourth-rate quality?

Mr Ruston, of Lincolnshire, read the introductory paper, and recognised advancement as a necessary condition of English husbandry, saying "onward is yet our motto." The lecturer's farming life has been passed in the Great Level of the fens, which, having now been effectually drained, presents "a large stretching flat of fertile and productive land." The produce in straw and grass is bulky, but not of the best quality. The grain is only of secondary character. Mangolds grow freely, and clover but indifferently. Straw, rye-grass hay, and mangolds are the three varieties of stock food produced on the farms of that district for winter provender. Nearly similar conditions exist in various other parts of the country. Now none of these articles of provender together or separately given will fatten a bullock. On a few farms of average quality, artificial food, *i.e.*, cake or corn, must be given to fit a bullock for the butcher; stall feeding, therefore, is not generally adopted. "The more common custom is to buy lean cattle in the autumn, giving them the produce of the farm, with a small quantity of cake or corn during the winter, and selling them in somewhat improved condition in the spring. In North Lincolnshire, from four to six pounds of cake a day will fatten a bullock, because the provender of the farms there is so much more nutritious, but much more would be necessary to produce the same result on the fen farms. Turnips may be grown, but with long necks and woody fibrous bulbs, and are of no use in improving the condition of the stock. A crop of mangold taken off is found not to impoverish the fen land, and heavy crops of wheat are grown in succession to the mangold. The whole crop can thus be drawn off the land and consumed in the yards. Under such circumstances, and in that district, Mr Ruston has found that by feeding sheep in the place of cattle in his yards, he can make his manure more advantageously. The profit on the winter's keep of each bullock is usually from 20s to 30s per head, though sometimes they only just pay for the artificial food they have consumed, leaving the mangold and hay to be charged to the manure account. Losses of cattle, too, are occasionally caused by disease, especially since the appearance of pleuro-pneumonia. When sheep were proposed to be substituted for cattle, it was said they would tread down only a comparatively small quantity of straw, and would suffer from foot-rot and lose condition by treading and lying on wet straw. It was further objected that the manure made by sheep was inferior to that made by bullocks, from which the crops would suffer.

The fen farmers found that the sheep which they bought in the spring to be fed on grass during summer, and sold out in the autumn, yielded fair profits, and it occurred to them that they might consume their food and make their manure with sheep. Mr Ruston has fed sheep in yards for five years. During the first three years he had only a few, but last year the lung disease appearing amongst his cattle he sold such of them as were not affected, and purchased 400 lambs for feeding his hay, straw, and mangold in his yards. He carefully noted and recorded the quantities of food of all sorts consumed by the sheep. This year he has had 700 sheep in yards, and he found that six lambs will tread down as much straw as a full-sized ox; some of his men say five will do it, but he always calculates six sheep in the yards to do the work of one bullock, so that where he had formerly ten bullocks he now puts up 60 sheep. The lame sheep are not many. They are kept well littered with fresh straw, in wet weather twice a day. They are fed with cut hay and straw, with mangold twice a day, taking care that sufficient to make them scour be not given. As the days lengthen the mangold is increased, and the dry food somewhat lessened. He finds an acre of mangold will carry 25 lambs from the beginning of December to the beginning of April, and the same quantity would carry 20 old sheep. After stating the details, he gave as the result of keeping 377 lambs a profit on the whole of 244*l* 19s, which he thus disposes of:—"Hay, straw, attendance at 3s per head, 56*l* 11s; 15 acres of mangolds, allowing 25 sheep to the acre, at 12*l* 11s 2½d per acre, 188*l* 8d 1½d." The bullocks fed the same year were attacked with lung disease, and were sold at a loss, irrespective of the cost of provender, home-grown and artificial, and attendance. In better years he has

seldom made more than from 20s to 30s a head beyond the cost of artificial food for wintering bullocks. Therefore, says Mr Ruston, taking the profit on one bullock at 30s, and the profit on six sheep at 3*l* 18s—the consumption of home-grown food being about equal in each case—there is a clear excess of 2*l* 8s on the six sheep. This will give a difference on his present year's stock of 600 sheep, which have taken the place of 100 bullocks, in favour of sheep, amounting to 240*l*.

He has not found any defect in his crops grown with sheep-made manure, and having applied to Mr Lawes on the subject, he received this answer:—"I have no reason to suppose that the manure from sheep or bullocks eating equal quantities and quality of food would differ in value, and you will be quite justified in assuming that the quality of the manure depends upon the food consumed irrespective of the animal."

The white-faced sheep are best adapted to the confinement of yards, the black-faced breeds not thriving under such constraint. Turning them out in a meadow several hours daily has been found to prevent lameness.

Mr F. Hobbs testified to the good results from keeping sheep in yards, the great point being to have them thinly littered twice a day.

Mr Bradshaw maintained that bullocks, if bred, or judiciously bought and fattened, would pay well. He used from 3 lbs to 5 lbs of cake per day.

Mr James Thomas thought it best to combine sheep and cattle in the system of a heavy land farm; and Mr Saberton stated that on the fen lands farmers were adopting the system recommended by Mr Ruston, by yearly increasing the number of sheep and diminishing the bullocks. Ewes wintered in yards had been found to thrive.

Mr Coussmaker (Surrey) had found sheep fed in yards greatly affected with foot-rot, and had discontinued the system.

EUROPEAN INTERESTS IN THE EUPHRATES VALLEY ROUTE. A Compilation. Wm. H. Allen and Co., Leadenhall street. 1861.

THIS pamphlet presents in one view the various articles and letters that have been published respecting the important project of a railway from the Syrian coast through the Valley of the Euphrates to Bussorah on the Persian Gulf, prefaced by an account of the deputation that waited on Lord Palmerston in June, 1857, on the subject. It is impossible to overrate the value of the proposed railway, but it is equally clear that political jealousies will effectually interfere with its being carried out. Unluckily, the military advantages of the plan have been insisted upon by its promoters with too great force and truth not to awaken the susceptibilities of our neighbours, even if they had not already been quite prepared to take alarm at any project in the East, however innocent, proceeding from England. A French view of the project, while dwelling upon the commercial importance of the line, seems to consider that if it remained exclusively in our hands, England would become practically omnipotent in Europe and Asia,—a sufficiently extravagant view,—and proposes an international company, which is to incorporate the Suez Canal scheme!

RESULTS OF A SCIENTIFIC MISSION TO INDIA AND HIGH ASIA, by H., A., and R. DE SCHLAGINTWEIT. F. A. Brockhaus, Leipzig. London: Trübner and Co.

THE prospectus of the above important work has lately been published. The two surviving brothers, Hermann and Robert Schlangintweit, have now been for two years engaged in its preparation, which, comprehending as it will the results of three years' laborious and successful travels, will doubtless prove of the greatest interest to the scientific world. The work will be in 9 volumes, with an atlas in 3, and the completion of the issue is expected to take three years.

RAILWAY COMMUNICATION IN LONDON AND THE THAMES EMBANKMENT. By C. B. LANE, LL.D., F.G.S., and M. Inst. of C.E. J. Ridgway, Piccadilly. 1860.

THIS pamphlet contains some valuable remarks and suggestions on the Thames embankment scheme, which is now the subject of inquiry before a Parliamentary Committee.

BOOKKEEPING ADAPTED TO COMMERCIAL AND JUDICIAL ACCOUNTING. By FREDERICK H. CARTER, Member of the Society of Chartered Accountants, Edinburgh. Edinburgh: Edmonston and Douglas.

THE above is a clear and useful guide to the art of bookkeeping, in which various styles are introduced, showing how the system can be adapted not merely to ordinary commercial trading, but also to judicial, assurance, and other business. The general work appears comprehensive, and the directions are full and practical. It also contains a short treatise on banking and on bills of exchange.

THE NEWSPAPER GAZETTEER AND GUIDE TO ADVERTISERS. By R. D'A. NEWTON. Newton and Co., Advertising office, Warwick square.

THE annual issue of this useful work of reference has just taken place. It contains, as usual, a full account of the newspaper press of the United Kingdom, descriptions of each county and important town, and a mass of other statistical information.

THE DRAPER AND CLOTHIER. June, 1861. Houlston and Wright, Paternoster row.

THE number for the present month of the "Draper and Clothier," an organ of intercommunication between the various interests connected with textile fabrics, has just been issued, and contains, as usual, a mass of information for the use of the classes it represents, as well as intelligence suited for the general reader. Among the original articles is a forcible comment upon the late extraordinary decision of the Court of Bankruptcy with regard to Davies and Troughton, the Shoreditch bankers, which, although couched in strong terms, is fully warranted by the merits of the case.

GENERAL LITERATURE.

ENGLAND AND EUROPE. A Discussion of National Policy. By ALFRED H. LOUIS, of Lincoln's Inn, Esq., Barrister-at-Law. London: Richard Bentley, New Burlington street. 1861.

THERE is a warmth of feeling and directness of purpose in this essay, which are refreshing in an age of political languor. The author's views do not by any means command our unqualified assent, and some parts of his book are very inferior in discrimination to others; but the tone of the whole is essentially noble, and even the most eccentric of his speculations are not put forth in the offensively dogmatic spirit which too often characterises political enthusiasts. His main purpose is to contrast the foreign policy which England has pursued since the revival of the French Empire, with that which he thinks she ought to have adopted,—and to point out the absolute necessity of her regaining a different path before it is too late. Of the rule of the Buonapartes he entertains the most deadly distrust, and holds "that the England of 1800 to 1815 was in the right upon this point of a French Buonapartist Empire; and the England of 1851 to 1861, so far as it has departed from the opinion of the earlier period, in the wrong."—(P. 71.) The resurrection of the second Empire was, he thinks, "in point of fact partly due to the European arrangements made upon the fall of the first; but above all was the consequence of the political sins of Governments during those thirty-five years.....Europe came out of the hands of the diplomatists and monarchs who met at Vienna, not a group of well-constituted nations, satisfying the judgments, commanding the allegiance, quenching the discontents of peoples; but a chaos of tyrannies, and, therefore, of revolutionary passions"; a dereliction of duty upon which the writer deems Providence gave judgment "in the mode that was of all the most striking and decisive, by bringing a Buonaparte once again to the throne of France."—(Pp. 62-3.)

Mr Louis goes on to sketch the history of the French alliance, by the gradual process of which, he says, the international action of England has been "neutralised,"—and that by the deliberate intention of the Emperor, whose policy was

> To preserve the name and sentiments of the alliance; to inflict upon England, from time to time, slights, which should not be carried so far as to provoke abiding resentment, with its consequences; but which should be carried far enough to diminish the respect for England throughout Europe; to foster a general growth of the feeling among its powers, that England could no longer, as in the past, be depended upon, in a general alliance against an encroaching State; and, in the mean time, to push forward with untiring energy, and with lavish sacrifices, such an increase of the army, and above all of the navy, of France, as should make this astute policy safe against the most extreme hazards that it might incur.—(P. 133.)

By a series of blunders and pusillanimities, Mr Louis conceives all the successive Cabinets of England to have played into the Emperor's hands, so that neither of our political parties is in a position to check or criticise either of the others on this point. One fact to which he draws attention is of special importance. He says:—

> It ought to be known more generally than it is that the Sardinian Government, after the close of the war in 1856, repeatedly pointed out to the British Government, which, by its leading statesmen, had expressed sympathy for it, that the affairs of Italy, and the interests of Piedmont, as representing her future welfare, were so threatened by Austria, as to render it absolutely certain that war must arise, unless justice were done for Italy by the disinterested intervention of England.....In the interests of humanity at large, of Italy primarily, and of England herself not less than any country, the British Government was called upon to provide some solution, or peremptorily to demand of all the Powers of Europe that they would devise some solution, of this great question. Nor was it concealed from us that, if we were unwilling or unable to do so, Piedmont would find herself compelled to commit her destinies to the perilous chances of an intimate alliance with France, by whose help she might, at all events, free herself from the total destruction impending over her and the Italian cause, though at some sacrifice of dignity, perhaps of territory.—(Pp. 105-6.)

To press this appeal on our Government, Mr Louis tells us, "it is one of the open secrets of contemporary European history, was the object of the journey of the Sardinian King and his Minister to England in 1855" (p. 23); and the consequence of our refusal was the Franco-Italian alliance. That alliance Mr Louis regards as not only very dangerous to the security of Italian independence, but as likely to entail the most terrible complications in the stages that have yet to be travelled towards Italian unity. For Italy must sooner or later proceed to the final struggle with Austria, and in all probability with the assistance of Louis Napoleon. But the latter's hankering after the Rhine Provinces necessarily arouses the fears and animosity of all Germany, which will, therefore, most likely cast in its lot with Austria, its weakest and rottenest member. Thus a war of the saddest sort will arise, in which the good and evil will be so strangely mixed on each side, that Italy's victory would be only less disastrous to European civilisation than her defeat, and the chief gainer in the strife would be the French Emperor, who "has known how to mix up the ingredients of good and evil in his foreign policy, with a skill that renders it difficult to oppose or sympathise with his ambition. It is our fault, a great and deplorable fault, to have left the Italian cause to be a leverage to this ambition."—(P. 35.)

In contrast to this picture, Mr Louis traces what he believes to be the true foreign policy for England to pursue, preceding it by an elaborate discussion of the principle of non-intervention. Reversing the order of his argument, we will take the affirmative portion of his argument before the negative. He thus sketches what he regards as the true relations of European States to each other:—

> The European system.....is a group of independent States, which aims at uniting national independence with a common international life. It is a system that has been perpetually engaged in its history, and is still earnestly at work in finding some middle and reconciling term between the extreme ideas of Imperialist conquest and anti-human tribal or local independence. The most important distinction between the history of the world, before and after Christianity, lies in the fact that no conception of any reconciliation of these opposites ever really entered into the international polities of heathen antiquity. In the ancient world these principles were always in a conflict, that none ever fancied could be otherwise than eternal. I am far, indeed, from saying that that conflict has ceased in the modern world. On the contrary, I hold that so long as forms of polity, strictly heathen and ancient in their character, are still in existence, that conflict will never cease to be waged. But it is still true that Christendom presents a group of politics, in such actual relations, and animated by such a general opinion and purpose, as I have described. And there is nothing more curious, in the study of contemporary history, than to observe the struggles of the Imperialisms, which represent that older heathen political principle, to reconcile the law of their own existence with those deeper moral exigencies of modern Christian international life. But, on our part, it would be unpardonable not to recognise them and work them out to the *full*.
>
> The true mode of working them out is, by qualifying the principle of *national independence* so far as to admit of an Areopagitic action of States upon States; when the common needs of all require that sick and *comparatively useless members* of the European system should be assisted to health and strength.....The historical and moral aims of Christian Europe; *the attempt* made in common, partly by *international jurists*, partly by statesmen, promoted by some Governments, submitted to by others, overruling ambition, forming, as it were, part of that indefinable new gift of grace, which the modern world has undoubtedly enjoyed—to establish, by common efforts, an international order, satisfying the needs of community and independence alike, will not disappear in presence of the doctrine of non-intervention.—(Pp. 279-81.)

With this view of the mutual relations of modern States we substantially coincide; and we admit the applicability of some of the historical facts by which the author illustrates it,—for instance, the assistance rendered by England to Holland in the 16th century, which Holland repaid to us in 1688. But in Mr Louis' abhorrence of the selfishness which may, and often does, dictate a policy of non-intervention, he goes to the opposite extreme, and denies the possibility of laying down any rule or principle in such matters, beyond the mere instinct of conscience. "There is," he says, "no more definite ground to be alleged in connection with it [intervention] than the general practical moral ground of helping the right. To demand definite and unerring external tests of what this is, or to require that success is certain before you do so, is really to deny the inward power and supremacy of conscience as a guide to action, if, indeed, it is not rather to seal up the springs of action altogether."—(Pp. 273-4.)

An "unerring external test" of right is doubtless beyond our reach; but to approximate as nearly and as definitely thereunto as we can, is so far from being a course that *denies* the supremacy of conscience, that it may rather be called the truest way of *recognising* that supremacy, and of unsealing the springs of such action as can alone be of permanent benefit to the nations whom we desire to help. Mr Louis does, indeed, attempt to distinguish his doctrine of wholesale intervention from "a mere policy of political propagandism" (p. 265), but he points out no landmarks by which mere conscientious instinct could save itself from drifting into such a policy. The argument of his 5th chapter, against Mr Mill and Professor Bernard, we cannot but regard as a total failure, and one of the weakest parts of his book. He professes himself unable to see that the cases of intervention between State and State, and of intervention between a Government and its subjects, are capable of being distinguished from each other by any intelligible principle at all, and treats the distinction as a merely technical one that has no corresponding moral reality. Now there is one fact which has doubtless done much to confuse this distinction in the popular mind, viz., the forced union of different nationalities under one Government. To class, for instance, the citizens of the Hungarian Kingdom among the lawful subjects of the present Emperor of Austria is to make (consciously or unconsciously) a political blunder. Had our Government accepted the alliance which that brave and constitutional nation proffered us in 1849, and had we supported with our arms their struggle against the illegal usurpation of Francis Joseph, to whom they owed no more allegiance than to the Russian ally whom he called in to crush them, we should have intervened as a State between States, and should in no sense have been amenable to the charge of interfering between a Sovereign and his subjects. Again, in the case of Italy, no one doubts that it was the *foreign* power of Austria which upheld every Italian Government, except that of Sardinia, against the universal desire of the Italian populations. They were eager to be one under the sceptre of a national Prince, and in stepping forward to take the separate jewels of his crown, Victor Emanuel claimed only what the nation had given him, and he dispossessed none but the nominees of the stranger, whose "*rights*" were based upon every possible violation of national law as well as of private morality.

Neither of these cases can justly be regarded as instances of merely domestic dissension in a State. But that such cases do exist, and that abundantly, is but too evident. Has Mr Louis never observed that there are conflicts relating to the purely internal arrangements of a State, in which the only power that can produce a permanent effect is one that can *go on* producing that effect in the endless modifications which changing circumstances require,—and that this can only be done by those who are practically acquainted with the details of the past and present development of the question at issue, and who are thus qualified to judge as to the wisdom of different modes of adjusting the difficulties? Such a comprehension of the problem is absolutely impossible to foreigners, even to those who may have rightly seized the moral, and even the political, bearing of the main points at issue. Many such conflicts there have been in every civilised State, which do not reach the point of civil war, but which produce that wide and deep disunion of classes from which civil war usually springs. Such, for instance, were the Chartist agitations in England, the religious dissensions in Ireland, the slavery conflicts in America. Where, however, such conflicts do reach the point of civil war, it is far best that the contending parties should test their respective strength, physical and moral, without foreign interference, and for this reason: that even if a foreign nation could sufficiently comprehend the relative merits of both sides to be quite sure that it was interfering on behalf of the right, still, if, by such interference, one party be enabled to gain a victory which it could not otherwise win, that party is really the weaker of the two rivals, and will therefore not be able to retain its victory without continued foreign aid: and such foreign aid is but the first step to the absorption of the contending State in its foreign neighbour. When we recall the myriad instances of this disastrous sort of intervention with which history teems, we cannot but wonder at the singular blindness with which Mr Louis appears to ignore its dangers, which he does not even allude to as possibilities. Moreover, in his enthusiasm for wholesale intervention, he hazards the bold assertion that "every successful insurrection has owed its success, and every free State its independence, where a revolt preceded it, either to intervention, or to alliances not to be distinguished from intervention."—(P. 263.) What does he say to the English "rebellion" of 1649, and the French Revolution of 1789, in both of which, the revolutionists not only conquered without foreign help, but conquered those who brought foreign help against them? It is true that in both cases the nation proved unequal to the permanent establishment of a better rule, but the victory of force was in both cases against the old tyranny, and (at least in England) it was not even without future good result. That the victory may not always be on the side of freedom, is undeniable, but where we have a choice of evils, it is best to risk encountering the lesser. And in national as in individual life, to use Mr Louis' favourite parallelism, it is better to work out some painful problems alone, at the risk of missing the true solution on the first attempt, than to call in the help of strangers who will only complicate what they are unable to comprehend.

While, therefore, we deprecate any armed interference between a Government and its lawful subjects, we agree with Mr Louis that armed intervention between State and State may often be a sacred duty, and that *when* it is a duty, to flinch therefrom is a base selfishness. Moreover, we agree with our author that the pernicious characteristics of despotism "make it a necessary consequence that free States should help free States, unless they choose to be cut in pieces in detail by the centralising Imperialisms of the world."—(P. 344.) But we decidedly and strongly dissent from the opinion which pervades this book as to the overwhelming preponderance in all these "Areopagitic" councils which Mr Louis desires that England should claim for herself. To him, the lordship of the British Lion over all rivals is something so fixed in the

eternal fitness of things, that it requires no argument, and needs but to be stated to command the reverent acquiescence of every European nation except the French, whose hostility, Mr Louis seems inclined to believe, cannot be other than eternal. This one-sided partisanship considerably disfigures the otherwise generous tone of the book.

Another crotchet which detracts from the author's good sense is the temporary veto which he would put upon all domestic reforms for the sake of concentrating the whole attention of England upon continental affairs. Because Mr Bright's judgment and patriotism are not of the most reliable, Mr Louis dreads *all* stirring of the subject of parliamentary reform as tending to "revolution;" and as for the thousand-and-one questions of industrial, educational, or social reform, in which so many interests are concerned, he regards them as a kind of "star-dust" or milky way, not worthy of England's attention while the great French comet is in view, that

"with fear of change
Perplexes nations."

All this shows a want of balance and harmony in our author's judgment which must inevitably weaken the force of his arguments in general estimation, even when they are substantially just. Nevertheless, his book may be of use to those who will take the trouble to sift it. It is easy reading, though rather too long and diffuse; and the candour which tempers its bigotries, and the fundamental nobleness of aim which underlies its extravagances, convey the impression that it is the production of a very genuine mind, and, we hope, one that is capable of future expansion.

NEW ZEALAND SETTLERS AND SOLDIERS; or, the War in Taranaki: being Incidents in the Life of a Settler. By the Rev. THOMAS GILBERT, formerly Pastor of the General Baptist Church, Ditchling, Sussex. London: A. W. Bennett, 5 Bishopsgate without; Houlston and Wright, Paternoster row. 1861.

MR GILBERT states in his Preface that the object of this narrative is "to show the impolicy as well as the unchristian character of all war"; and he adds, "if my reflections seem somewhat complaining, I must throw myself on the candour and kindness of my readers." These preliminary remarks do not incline the reader to expect any great amount of sense or manliness in the volume which follows; and it is certainly a most deplorable Jeremiad which Mr Gilbert has thought fit to publish. He was one of those settlers in the outlying districts near New Plymouth, to rescue whom, the battle of Waireka was fought,—the first battle in the Taranaki war. His personal narrative of the incidents which preceded the battle is worth reading for the light which it throws on the dispositions and conduct of the Maories by whom he and his neighbours were surrounded; but it is a painful story, and it is interspersed with a running commentary of unmanly lamentation and maundering piety which do not, we trust, represent the general temper of English colonists. Mr Gilbert is an ultra "peace" man, who refused to serve in the militia, and actually, the day before hostilities commenced (by the Maories shooting down five unarmed Europeans), buried his gun underneath his house! He is disposed to think that the natives have been wronged by Governor Browne in the matter of the Waitara block, and expresses his grief at seeing "the happy relation which once existed between settler and Maori *for ever* extinguished. Had it not been for the dragging of the settlers into the quarrel, to this day I believe they might have remained on their farms and in their quiet homes."—(P. 22.) Mr Gilbert seems not to be aware that this "happy relation between the settler and the Maori" of New Plymouth was disturbed at a much earlier date, some seven years ago, when the natives took forcible possession of the Waitara, which then belonged to the English, having been already bought and paid for twice over, viz., in January, 1842, from the Waikatos, and about a year previously from the Ngatiawas, on whose deed of sale the first name is that of William King himself. We yield to none in the desire that the most scrupulous justice should be rendered to every aboriginal tribe and man with whom we have to deal; but when we see the manner in which this Taranaki question is perpetually argued, with such strange obliviousness of the early history of the colony, and of the repeated and notorious slipperiness of so many leading Maori chiefs, we cannot but remember that English colonists have their rights also, and that it is neither justice nor kindness to an uncivilised race to allow them to break their bargains with us over and over again. We still cherish the hope that this spirited people may be brought into permanent harmony with our own; but assuredly no such feeble "peace principles" as Mr Gilbert's will bring about that desirable result.

MOOKERJEE'S MAGAZINE. No. 1. February, 1861. Calcutta: Printed and Published by Jogomohun Chuckerbutty, at the Mookerjee's Magazine Press, 92 Baranosey Ghose's street. Price one rupee, eight annas.

THIS magazine comprises 74 pages octavo, large type, and is "to be published on the 15th of every month." It is creditably got up, and contains four articles,—Raja Radhakanta and his ancestors (being a review of a work of contemporary Hindoo biography): My first railway to Rajmehal: Gudadhur, or a moiety of Young Bengal (the first instalment of an original tale): and the Reconciliation, a brief political paper, apparently editorial. The proprietor of the magazine is named as Somboo C. Mookerjee; the writers are anonymous. They appear to be native Hindoos who have received a good English education, and they rattle off their quotations from European literature, ancient and modern, with all the ease of the initiated. The underlying mind, however, is not attractive to us, being decidedly "fast" in its tone, and deficient in that moral earnestness which is the best feature in the contemporary sceptical literature of our own country. The second article, "My first railway to Rajmehal," in its combination of entire scepticism with external conformity to Hindoo observances, presents, we fear, a picture that is only too representative of the class of "Young Bengal" from which this magazine appears to issue. In the third article there is more power of appreciating higher phases of life, but the tale is hard and even coarse in its exposure of Hindoo superstitions. In the concluding article, the writer recapitulates the indignation of the loyal Bengalees at having been confounded with the mutineers,—an indignation which perhaps may have led the former to say some "things which in a cooler moment we would have been the last to utter," and which they now desire to bury in oblivion. The writer goes on to say that on the "united energies" of "the educated Englishman and the educated Hindoo," depend "the weal or woe of the finest empire under the sun," "and the firmest ministry shall quail before the moral fire of their remonstrances." We shall look with interest for the succeeding numbers of this unique magazine.

THE TEMPERANCE SPECTATOR. No. 5. Vol. III. May, 1861. London: Job Caudwell, 335 Strand.

A CHEAP monthly journal, devoted to the advocacy of thorough-going teetotalism. The most prominent topics of the present number are the employment of alcoholic liquors for medicinal purposes, and the relation of the alcoholic controversy to the Bible,—two correspondents desiring to have "an edition of the Holy Bible with the authorised text unaltered, but with marginal readings and notes in harmony with the teaching of Teetotalism." This is a point we do not feel called upon to discuss here, but with respect to the use of alcohol as medicine, it may be worth mentioning that the "Temperance Spectator" asserts that the practice "has been a fatal one to hundreds, if not thousands, of teetotallers. They may not have become inebriates; but they 'are not with us,' and are therefore now against us." The writer goes on to warn "prohibitionists" against resorting, "even for medical purpose, to the traffickers whom they daily condemn," whose frequent adulterations of alcohol are so pernicious in effect. If the teetotaler *must* take alcoholic physic, "let the bottles be labelled as carefully" as with other physic, and let the physician and not the publican be the responsible chemist. The writer, however, considers that it is "safest" to eschew alcohol entirely in all forms. A letter of the Secretary of the Alliance to Mr Baines gives an "approximate estimate" of the total abstainers in England and Wales (above the age of 15) at 900,000, associated with the various temperance societies, not including the juvenile "Bands of Hope," or the abstainers who may be unenrolled. But the writer also says that "the frequent pledge-breakings, removals, deaths, &c., are so difficult to obtain and register, that it would require a vast and complicated machinery" to procure complete and accurate statistics on the subject. There is also an article on "Nephalism," reprinted from the *Medical Times*, with "corrective notes," which are extremely weak and flippant; and a letter from a Mr Mudge, who laments that when he has tried to argue from the Essays of Dr Carpenter and Professor Miller, "if my opponent has been read up in their works, I have as often been defeated, because he has been too well fortified by their exceptions.....We long to see our Temperance Medical Literature *purged of these blemishes.*" These passages will sufficiently illustrate the line taken by the "Temperance Spectator."

THE ART-JOURNAL. June. Arthur Hall, Virtue, and Co.

WILKIE'S picture of "The Guerilla's Departure," a *pendant* to that of "The Wounded Guerilla," which was given in the April number, and "The Beacon Tower," both from the Royal collection, are the subjects of two of the engravings of the June "Art-Journal." The third engraving is from a beautiful work of Turner's in the collection of Mr Munro. The name of the picture is "Ancient Italy," and, by way of giving an historical interest to the scene, the artist has introduced, in a subordinate manner, the banishment of the poet Ovid from the imperial city. A large part of the number is taken up with a criticism on the Royal Academy Exhibition, but we have nevertheless three illustrated chapters,—one on the Crystal Palace Art-Union, another continuing "The Examination into the Antiquity of the Likeness of our Blessed Lord," and the third on "The Hudson, from the Wilderness to the Sea."

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The discussion on the Budget of 1862 in the Legislative Body has run to extraordinary length, and is not yet concluded. But it has not thrown any new light on the financial situation, and has not led to the cutting down of the demands of the Government by a single sixpence. The best speech delivered was undoubtedly that of M. Gouin. He showed very clearly that the situation is really not without gravity, and that the Government does not seriously attempt to alleviate it, inasmuch as it adds constantly to the expenses. Thus he showed that "for the present year, though the Budget was fixed at 1,840,121,858f, it will really amount to 2,079,000,000f, the Government having already taken 42,466,000f for supplementary and extraordinary credits, having made the effective of the army 467,000 men instead of 392,400 voted, and thereby incurred an outlay which will not be less than 72,000,000f, and requiring 1,000,000f for a new opera house, 4,000,000f for the annexation of Menton and Royubrune, 4,800,000f for the Campana Museum, 300,000f for the exhibition of Fine Arts, 35,000,000f for railways, 45,000,000f for extraordinary public works, and some smaller sums for other purposes. He also showed that to meet that total the Government will only have resources amounting to 1,736,263,555f, even including the new taxes on tobacco and alcohol; so that there will be a deficit of about 342,000,000f, which he said can only be made up by a loan. He also noticed the enormous augmentation which has taken place in the National Debt;—the sum now required to pay interest on it being 317,000,000f, and being about to be increased by 2,500,000f for loans which will have to be made for railways; whereas in 1847 the total sum required was only 173,000,000f.

As to the budget of 1862, the totals of it were given in my last. The Chamber has already sanctioned the greater part of the expenditure proposed: 18,042,600f for the Ministry of State, 31,584,016f for that of Justice, 983,819,901f for that of Finance, 372,972,421f (or including Algeria, 392,568,533f) for the War Department, 126,051,419f (or including colonies, 149,337,819f) for the Marine, &c. In the discussion on the marine budget, it was admitted that in the course of the present year there will be afloat six iron-plated ships, and that the building of eight others was commenced in January, and that two others are to be hereafter constructed.

In the course of the debate on Algeria, something was said of the cultivation of cotton in that colony. One hon. member stated that though in 1854 and 1855 the cultivation had assumed a certain degree of importance, it has since declined, and that if it were not for the hope of obtaining a prize of 20,000f offered by the Government, it would be probably altogether abandoned. According to this gentleman the cultivation cannot be expected to thrive until it shall be undertaken by persons who possess a practical knowledge of it, have sufficient capital, can obtain the manual labour which is now scarce, and can procure at a cheap rate lands well situated and well watered. A Government Commissioner admitted that in some parts of Algeria the attempts to produce cotton had failed, because the lands had not been well chosen; but he said that in the province of Oran, where both the soil and elements are favourable success has been obtained. He added that the production of the present season will be 124 tons*—not a large quantity, he admitted, but still a satisfactory one, considering that Algerian colonists had only been employed a few years in trying to grow cotton and possessed no experience. Another hon. member cited the opinion of an Alsacian manufacturer, who, knowing the supply of cotton from America would run short, took the trouble to go to Algeria in order to ascertain personally what chances there are of obtaining supplies from that colony. This manufacturer declared that he considered both the character and the soil of Algeria preferable or at least equal to those of the Southern States of America for the cultivation of cotton. This opinion was however regarded as exaggerated by the Chamber. In the course of the debate the suggestion was thrown out that the best thing that can be done to make Algeria a cotton-producing country, would be to introduce a number of coolies from China or Cochin China.

Apropos of Algeria, it was stated that the attempt to produce indigo must be considered a failure, but that the production of grain, tobacco, wool, wine, and horses is increasing in the most satisfactory manner.

The Director of the Custom House at Havre has addressed the following communication to the President of the Chamber of Commerce of that town:—

Sir,—It appears from instructions given to me that, according to the decree of the 29th May last, alcohols of English origin imported from England by French or English vessels are now admitted at the duty fixed in the convention of the 16th November, 1860—that is to say, at 15f per hectolitre (about 12s 4the 22½ gallons) of pure alcohol.

The Government has presented a bill to the Legislative Body for doing away with the commercial fetters on the colonies, but it is doubtful that it will be passed this year. It declares that all merchandise of which the importation into France is authorised may be introduced into the colonies of Martinique, Guadeloupe, and Reunion, on the same terms as into France, subject to the condition of paying from 10f to 30f the ton extra when imported by foreign vessels. It also declares that the colonies may freely export their productions either in foreign or French vessels.

An official return just published gives some interesting statistics respecting French railways in the first three months of the present year compared with the corresponding period of last year. The railways are divided into what is called the "old network" and the "new network"; the former comprising the lines originally conceded, and for which the Government gives no guarantee; the latter consisting of prolongations or embranchments of the said lines, or of original lines, to which the Government, under certain conditions, guarantees interest on the capital invested. The following are the principal features in the return:—

* The kilometre is $\frac{6}{10}$ths of a mile.

* The figure given in the "Moniteur" is 124,000 kilogrammes, which make 124 tons; but some of the journals, evidently by error, set down the quantity at 124,000,000 kilogrammes, which would be 124,000 tons.

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, yesterday, the sack of 159 kilogrammes was offered at 72f to 76f, and for very inferior qualities at 76f 50c to 77f, but there were not many purchasers. Four marks were for the current month 73f 50c; July, 74f 50c; July and August, 74f 75c and 75f. After the closing of the market prices were somewhat lower.

WHEAT.—The offers yesterday exceeded the demand, and prices fell, the quotations being from 38f 50c and 39f for ordinary sorts, to 41f and 41f 50c for superior; for some Auvergne and Bresse, 42f and 42f 50c. As to the provincial markets 50 present a rise of from 15c to 2f 10c the hectolitre, 54 a fall of from 25c to 2f 50c, 27 are reported firm, 26 without variation, 29 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 16,115 bales, and closing prices remained unchanged, low New Orleans being 104f the 50 kilogrammes, and very ordinary ditto 110f. The arrivals were 16,116 bales. On the first two days of this week there was a fair demand and prices were firm. Yesterday the market was flat, but prices did not change.

COFFEE.—At *Havre*, in the week ending Friday, the market was calm: 50 sacks Hayti Port-au-Prince went at 75f the 50 kilogs in bond; 50 ditto Cape, 81f 50c; 100 Gonaives, 83f; 30 Rio not washed, 66f 50c; 348 Java, 110f duty paid; 30 Costa Rica, 112f to 114f duty paid. In addition, some lots of Ceylon native and plantation, also of Malabar, all damaged, were sold. The arrivals were between 4,500 and 5,000 sacks, and some casks. The stock in bond on the 31st of May was 7,348 tons. This week, there have been no sales. At *Bordeaux*, last week, a fair amount of business was done, 1,903 sacks Guayra gragé and non-gragé having gone at 78f to 93f; a lot of Rio, 81f; a lot of Macassar at 100f 5Cc; 265 casks Java, 112f and 113f; 500 sacks Mysore, 108f. This week, some lots of Guayra have been sold at different prices. At *Nantes*, last week, no transactions are recorded. This week, nothing has been done. At *Marseilles*, last week, some small lots of Rio were taken at prices varying from 62f to 72f.

SUGAR.—Business at *Havre*, in the week ending Friday, was not active: 360 casks French West India disposable went at 47f 75c duty paid, the 50 kilogs; 115 ditto for delivery, 48f; 866 ditto "usine," disposable, at prices kept secret; and two small lots of ditto, one at 52f the other at 59f; 626 casks Havana disposable, 34f 50c; 4,900 ditto for delivery, 34f; about 750 tons ditto, 34f; 2,800 casks for delivery, 35f 25c. The arrivals of the week exceeded 10,000 casks. The stock of French West India on the 31st was 6,500 casks. This week, French West India has been at 57f 50c, "usine," duty paid; Havana, 34f in bond; ditto by auction, sound, 30f to 35f 25c in bond; ordinary French West India, 48f and 48f 25c. At *Nantes*, last week, business was not important, the sole sales having been 150 sacks Reunion gros grain at 56f 75c; 101 French West India, 48f; Reunion was nominally 51f, and Mauritius nominally 51f 50c. This week, there have been no sales. At *Bordeaux*, last week, nothing was done: the nominal quotations were, French West India, 48f to 48f 50c; Reunion, 51f 50c to 52f; Mauritius, 52f to 52f 50c. This week, some Reunion has been sold at 50f, and some French West India at 47f. At *Marseilles*, last week, 4,800 casks Havana went at 35f 25c; some lots of French West India, also of damaged Reunion, were sold.

INDIGO.—Business at *Havre*, in the week ending Friday, was somewhat animated, 250 cases Bengal new having been sold at 1f to 1f 40c above the estimates, and 19 ditto old at prices not stated. The stock on the 31st ult., was 1,970 cases. This week, various lots of Bengal have been disposed of, part at prices kept secret, part at a premium of from 1f 10c to 1f 25c. At *Bordeaux*, last week, the sales were only 18 cases Kurpah, 24 Bengal, 27 Madras, and prices are not stated. This week, some cases Bengal and Kurpah have been sold; prices not mentioned.

HIDES.—At *Havre*, in the week ending Friday, business was not active: 950 Buenos dry went at 125f to 135f the 50 kilogs; 1,400 ditto salted cow, 65f 50c; 2,000 Monte Video salted, 71f 50c to 72f 50c: and 500 Odessa, 52f 25c. The arrivals exceeded 25,000. This week, some horse salted Buenos Ayres have been sold at 88f.

WOOL.—At *Havre*, in the week ending Friday, 280 bales La Plata unwashed went at 1f 45c to 2f 95c the kilog; 13 bales Peru unwashed, 1f 65c; 15 Donskoi, 2f 2½c; 62 sheepskins, Monte Video unwashed, 1f 25c to 2f 10c. The arrivals were nearly 3,000 bales. This week, sales have been rather active: Buenos Ayres unwashed, at 117f 50c to 160f the 100 kilogs; Russia washed, 670f to 780f; La Plata sheepskins, 120f; also some Russia washed, 7f 20c the kilog; and Buenos Ayres unwashed, 1f 30c to 1f 80c.

TALLOW.—At *Havre*, in the week ending Friday, about 20 casks expected from New York went at 67f the 50 kilogs. The arrivals were 25 casks. This week there have been no sales. At *Paris*, yesterday, the 100 kilogs were 132f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality, disposable was 95f the hectolitre; Montpelier, 89 deg, 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 125f; ditto, beetroot, first quality, 103f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following intelligence is dated Calcutta, May 7:—Produce Market.—Notwithstanding the improved condition of the English market, no settled improvement is noticeable here, mainly attributable to holders refusing to consent to any reduction in rates. Import Market.—We have no improvement to notice in Manchester goods. Orders from up-country are suspended, and it is difficult to make sales to any extent even when importers are willing to make concessions in prices.

The following is dated Rangoon, April 30:—Imports.—There have been no arrivals with goods from Europe since last mail. The markets have been very dull. British staple goods have changed hands to a very small extent. Bazaar almost deserted by up-country traders. Our quotations remain essentially the same. Exports.—Rice—Values have held firmly at 85r to 90r for best Natsain up to 28th instant, and although supplies during the whole of this fortnight have been shorter than the one preceding, buyers have succeeded in preventing any advance until 28th, when the demand became a little pressing, and prices rose to 88r to 93r, which are to-day's quotations. The approach of rain, made manifest by the very sultry weather we have had lately, has been a check upon a continuous traffic, as both traders resident in the town, as well as those in the villages, have been equally engaged in the repair of the huts, preparatory to the wet weather.

The latest advices from Barbadoes state that the weather had been more favourable for planters. Sugar making had proceeded vigorously during the fortnight. The crop, although costly, is expected to be a large one—about 50,000 hhds. The sugar is very superior to the make of the last few years. Several estates have finished, and about two-thirds of the entire crop had been reaped. At Trinidad bad weather had retarded the transport of sugar to the shipping places, and the scarcity of vessels delayed the produce at the seaboard.

We understand that the Queen has approved of the appointment of Caleb-David Watson, Esq., of Liverpool, as Persian Vice-Consul.

The Emigration Commissioners state, in their annual report just issued, that 128,469 persons emigrated from the United Kingdom in the year 1860, a number larger by 8,037 than in 1859, but 31,659 less than the average of the preceding five years. Emigration reached its extreme height in 1852, when upwards of 1,000 a day left our shores; it has ever since been declining, and in the first three months of the present year the number (16,537) was 4,247 less than in the first quarter of 1860, and 6,285 below the average of the preceding five years, the emigration to the United States falling from 15,117 in the first quarter of 1860 to 12,156 in 1861. Of the 128,469 emigrants of 1860, 26,421 were English, 8,733 Scotch, 60,835 Irish, and 4,536 foreigners, the native countries of the other 27,944 not being stated. The English and Scotch were considerably fewer than in the previous year, the Irish 8,000 more, but the undistinguished residue was very large; 71,507 were males, 5,929 females, and of 1,033 the sex is not stated. There were more single men and women than in 1859, fewer married couples, and fewer children, but above 3,000 were infants under a year old. The table of the ports of embarkation shows that 21,596 embarked at Irish ports; in 1859 only 9,828, the increase being chiefly at Cork. The list of the occupations of the emigrants comprises 28,022 labourers (of whom 1,699 are specified as of the agricultural class), 4,788 farmers, 1,530 miners, 710 clerks, 878 gentlemen and merchants, 49 gentlewomen and governesses, 8,201 female servants. 87,500 of these emigrants (a larger number than for three years past) went to the United States, 8,848 to Canada, 938 to other North American colonies, 24,302 to the Australian colonies (the smallest emigration thither for these ten years), and 6,881 to other parts. The number of emigrants who returned to the United Kingdom in 1860, so far as is known, was 24,434, of whom 17,798 were from the United States, 1,098 from British North America, 5,360 from Australia. No less than 576,932*l* was remitted by settlers in North America to their friends in the United Kingdom, and 66,713*l* from Australia. The total emigration from the United Kingdom in the 46 years, from 1815 to 1860, reached 5,046,067—a population for a kingdom. 3,048,206 of them (three out of every five) went to the United States, 1,196,521 to our North American colonies, 708,225 to our Australian colonies and New Zealand, 93,115 to other parts.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 1st day of June, 1861:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 12th day of June, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,585,230	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,747,688
		Silver Bullion	362,542
	25,585,230		25,585,230

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9 888,607
Rest	3,236,606	Other Securities	19,866,813
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7 567,503	Notes	6,241,140
		Gold and Silver Coin	901,674
Other Deposits	10,952,235		
Seven Day and other Bills	588,890		
	36,898,234		36,898,234

Dated the 13th June, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19.932,980	Securities	29,677,420
Public Deposits	7,567,503	Coin and Bullion	12,011,904
Private Deposits	10,952,235		
	38,452,718		41,689,324

The balance of Assets above Liabilities being 3,236,606*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£552,885
An INCREASE of Public Deposits of	347,963
An INCREASE of Other Deposits of	238,207
A DECREASE of Government Securities of	27,998
An INCREASE of Other Securities of	4,210
An INCREASE of Bullion of	71,087
An INCREASE of Rest of	14,014
An INCREASE of Reserve of	592,692

The above is the first Bank return published under the new system, by which it appears a day earlier than hitherto. The changes are chiefly attributable to the payments to the Government on account of revenue. There is a large increase in the reserve, and, notwithstanding the withdrawals of sovereigns for America, the bullion has also augmented. The increase in the Government deposits is satisfactory, considering the large amount of Exchequer bills (700,000*l*) that have been recently paid off.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860	1861.
Circulation, including bank post bills	£ 15,940,349	£ 20,241,535	£ 21 323,439	£ 21,626,678	£ 19 932,980
Public deposits	7,809,278	6,062,680	8,577,343	8,429 226	7,567,503
Other deposits	8,907,866	15,654,427	14,797,501	12,411,115	10,952,235
Government securities	13,544,281	10,630,123	11,281,376	9,764,106	9,888,607
Other securities	12,837,529	14,648 140	18,712,469	19,819,863	19,866,813
Reserve of notes & coin	9,044,424	12,937,045	11,901,826	9,702,134	7,142,814
Coin and bullion	13,925,874	17,919,450	17,951,041	16,194,560	12,011,904
Bank rate of discount	3 p. c.	3 p. c.	3 p. c.	4 p. c.	6 p. c.
Price of Consols	96¼ xd	95¼ xd	92⅞ xd	93⅜ xd	90¼ xd
Average price of wheat	39s 11d	44s 7d	51s 1d	54s 2d	54s 5d
Exchange on Paris (shrt)	25 0 5	25 5	25 5 10	25 12½ 20	25 32½ 40
— Amsterdam ditto	11 15⅝ 16	11 14¼ 15	11 12 13	11 14⅛ 15	11 18 18¼
— Hamburg (3months)	13 7 7½	13 6⅝ 7	13 3¾ 4½	13 5¼ 5⅜	13 9 9¼

In the corresponding week of 1851, the Great Exhibition continued its even course of prosperity. Great preparations were taking place for the approaching peace congress. In Germany a conflict had occurred between the Austrian garrison of Altona and the inhabitants of St Pauli and others, who had resorted to that place for amusement during the Whitsun holidays. Arrests were being made in all directions in the Papal States, frequently on the most frivolous pretexts.

In 1858, considerable anxiety was felt on account of the state of affairs on the Continent, and the threatening aspect of our relations with the United States involving the question of right search. The Bank of France, with 20,000,000*l* in its coffers, had reduced its rate of discount a half per cent.

In 1859, the Derby Ministry resigned, and Lord Palmerston was appointed Premier. This event produced an upward tendency in the Stock Exchange, which was partially checked by the announcement that Russia was mobilising a large portion of her army.

In 1860, Garibaldi had just taken Palermo, and the authority of the King of Naples in Sicily had virtually come to a close over the entire island. Intelligence had been received of the outbreak of the insurrection in New Zealand, which by the last advices has now been terminated. In Parliament the principal event was the final withdrawal of the Reform Bill, after many nights of useless discussion. A new Sardinian loan of 6,000,000*l* had been announced, and a Russian 4½ per cent. loan of 8,000,000*l* was generally awaited. It was also thought that the English Government contemplated the raising in terminable annuities of a portion of the 11,850,000*l* required for fortifications.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,929,663*l*; in 1858, a deficiency of 993,713*l*; in 1859, a deficiency of 3,914,968*l*; and in 1860, a deficiency of 418,748*l*. In 1861, the deficiency is 8,914,578*l*.

DISCOUNT AND MONEY MARKET.—There has been little commercial demand for money this week, although on the Stock Exchange the pressure has again been considerable. This, again, has affected the general market, the discount houses refusing almost invariably to do business under the Bank rate of 6 per cent., and letting out a portion of their available capital in loans on Government securities. For the latter the charge continues at 5½ to 6 per cent. The withdrawals of sovereigns for America, although on a considerable scale, exercise little or no effect, owing to the continued arrivals of gold from Australia and the Continent. It is believed that a large amount of foreign capital is at present employed in the London market, the rate of interest being so much higher here than at most places abroad.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	1½
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	6	...

It has now been decided to publish the Bank return on Thursday evening, and it will consequently appear in the morning papers of Friday instead of Saturday, as heretofore. This alteration will serve to make Saturday still more of a holiday than hitherto. The following is the official communication:—

Inland Revenue, Somerset House, London, June 8.

Sir,—The Governor and Company of the Bank of England transmit to this office, weekly, an account of their notes, bullion, &c., for the purpose of being published in the *London Gazette*, pursuant to the Act 7th and 8th Vict, cap. 32. Hitherto this account has been sent on Friday morning, and published in the *Gazette* of that day, but it has now been arranged that the Bank shall transmit such account in the afternoon of Thursday in each week, not later than five o'clock. The Board direct me to acquaint you that they will permit the publishers of the several London newspapers to take a copy of this account if they desire it, for the purpose of publishing the same in their papers of the following day. If, therefore, you will authorise any person from your office to attend here for the purpose, he will be allowed to take such copy.—I am, &c., T. SARGENT.

ENGLISH FUNDS.—Consols have again been prejudiced during the greater part of the week by sales to reinvest in other securities yielding a higher rate of interest, especially the new Indian Five per Cent. loan, but have latterly become rather firmer. The news from America has exercised little influence on the market, and nothing of importance is reported from abroad. Up to to-day scarcely any fluctuation had taken place, the prices being 89⅞ to 90 for money, and 90¼ to ⅜ for the account; but the continued fineness of the weather caused this afternoon a slight improvement, and the final quotations were 90 for money, and 90⅜ for July. The general transactions during the week have been very moderate.

There has been no alteration in the value of Exchequer bills, the price for the June issue being still par to 4s premium, and for the March 6s to 2s discount. India bonds have again improved, closing at 15s to 10s discount.

The India Five per Cent. stock continues to be steadily purchased by the public, and although some large sales have been made by the original subscribers in anticipation of the new loan of 4,000,000*l*, a fresh rise has taken place. To-day there was additional buoyancy, especially after official hours, and the last quotation for money was 98½ to ⅝, and for the 10th of July 98⅞ to 99⅛.

FOREIGN STOCKS.—The foreign stock market has shown increased firmness this week, although the general transactions have been on a more limited scale than usual. The principal business has been in connection with the settlement. To-day a rise of at least 2 per cent. took place in Turkish stocks, the new arrangement for the periodical transmission of the duties assigned to the 1858 loan having been punctually fulfilled by the receipt of a large sum to-day from Constantinople. Sardinian has also recovered from the decline of last week, and Mexican has improved fully ½ per cent. Russian stocks have been rather dull.

The final quotation from Paris this evening was 67f 95c, showing an advance of about three-eighths per cent.

The Bank of France return published in the *Moniteur* of to-day shows an increase in the cash in hand of 780,000*l*, in the treasury balance of 150,000*l*, and in the accounts current of 1,250,000*l*. The bank notes in circulation have decreased by 1,240,000*l*, the bills discounted not yet due by 20,000*l*, and the advances by 220,000*l*. The position of the Bank thus shows a considerable improvement.

It is understood that the death of Count Cavour will not prevent the issue of the proposed loan of 20,000,000*l* by the Italian Government, and the proposals will be brought out without much serious delay. The measures to encourage railway and steam enterprises promoted by that statesman are also expected to be steadily carried out.

The following is from the Committee of Mexican Bondholders. The commercial letters from Mexico by the present mail contain little of importance beyond a rumour that General Ortega contemplates a forcible assumption of the Presidency, although he has publicly disclaimed any such intention:—

The Committee of Mexican Bondholders have received a letter from Mr Whitehead, dated Mexico, May 4, *via* the United States. Sir Charles Wyke had not arrived in the capital yet, and everything about the 600,000 dollars, as far as the repayment of them is concerned, is at a standstill until his arrival. M. Mata had resigned the Ministry of Finance. A *quorum* of members of the Congress had arrived, and it remained to be seen what that assembly will do on going into session.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	CONSOLS, Money		Account.		
	Lowest.	Highest.	Lowest.	Highest	Exchequer Bills.

RAILWAY AND OTHER SHARES.—The railway market continues entirely influenced by speculative operations, especially in the provinces. The public transact scarcely any business, investments being generally stopped owing to the crisis in America, while the approach of the half-yearly dividends creates an indisposition to sell. Throughout the week the tendency has been rather unfavourable owing to lower traffic returns, but the settlement brought no increase in the floating supply of stock, except as regards Great Western. To-day, however, the beautiful weather has caused a better feeling, and a general advance has taken place. Manchester, Sheffield, and Lincolnshire has risen to 46½ to 47, nearly 4 per cent. higher, on a report of an amalgamation having been arranged with some of the large neighbouring companies. North Staffordshire shares have fallen on sales from Manchester.

In the colonial market, Canadian descriptions are weaker, and India guaranteed have also shown a further tendency to relapse.

Foreign railways have been rather dull, especially Brazilian shares. A further recovery has taken place in South Austrian and Lombardo-Venetian to ⅜ discount. Illinois Central shares are also higher.

In the miscellaneous market there has been some demand for joint stock bank shares, especially London and Westminster. Great Ship improved on the announcement of the charter of the Great Eastern to the Government for the conveyance of troops to Quebec, and closed this evening at 7s to 7s 6d. China and Japan Steam are quoted par to ¼ premium, and Natal Land ⅜ to ⅝ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—In the foreign exchanges this week there has been no alteration of importance from the previous rates.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The following vessels have arrived from Melbourne:—The Peru, with 58,000*l*; the Prince of Wales, with 89,000*l*; and the Yorkshire, with 154,500*l*. As there is still but little demand for bar gold for export, the greater part of these amounts will be sent into the Bank. The last mail from Australia reports the sailing of the Norfolk, with 235,000*l*; the Agincourt, with 79,500*l*; and the Donald McKay, with 200,000*l*; for England: making a total of 712,500*l* now at sea, and of which about 212,000*l* may be considered as due. Some large sums of gold coin have been received from the Continent, and the importation is likely to continue on a considerable scale, the exchange being favourable. Since our last circular, 153,000*l* has been purchased by the Bank; and a considerable amount of sovereigns has been withdrawn for America, the Africa having taken 65,115*l*, the Kangaroo 225,982*l*, and the Bremen 6,500*l*, for New York; making a total of 6,925,482*l* since November last year. The Cleopatra brings 11,000*l* from Africa, and the Atrato 32,000*l* from the West Indies; and the Tyne has taken 3,500*l* to the Brazils, and the Delta 16,879*l* to Bombay and 8,586*l* to Alexandria.

Silver.—The Atrato has brought 91,000*l* from the West Indies. The market is, however, very quiet, at our last quotations of 5s 0⅝d per oz standard, and unless the Calcutta and China letters, deliverable on the 14th instant, should bring rather large orders, we do not think this price can be maintained. The Tyne has

taken 14,000*l* to the Brazils, and the Delta 96,970*l* to Bombay.

Mexican Dollars.—Dollars are quiet at the last price mentioned by us, 4s 11d per oz; nor do we look for any recovery from this price, the China exchanges showing a fall of about 1 per cent.

Exchange on India remains at 1s 11¾d to 2s for bank drafts at 60 days' sight on Bombay and Calcutta; Madras, 1s 11⅝d to 2s. Bills with documents, Bombay and Calcutta, 1s 11½d to 1s 11⅝d.

India Government Loan Notes remain without change since our last circular the 6th instant, 5½ per Cents. being 99¾ to 100¼, and 5 per Cents. 93¾ to 94¼. The market is very quiet, but should the last rise in India prove permanent, it is not unlikely these securities may be taken as a means of remittance.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; United States gold coin, scarce. Silver—Bar silver, 5s 0⅝d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅞d per oz std, last price; fine cake silver, 5s 5½d per oz, last price; Mexican dollars, 4s 11d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

Messrs Haggard and Co. report:—

Shipments of sovereigns to America still continue on a large scale, sterling exchange at New York being still very unfavourable. On the other hand, all the Australian and continental gold is likely to be sent to the Bank after being refined. The amount of gold bought by the Bank is 154,000*l*, and as the rate of discount here is very high compared with continental rates, we may expect considerable amounts of specie from the Continent, which, with the Australian arrivals, will be more than sufficient to meet the demand for gold to America. To the surprise of many, the Bank of England return just published shows an increase in the bullion of 71,000*l*.

Another Australian gold ship has arrived to-day, the Kleber, with 35,000*l*.

About 150,000*l* in bar gold and foreign coin has been bought by the Bank since making up the last account, while 30,000 sovereigns were withdrawn yesterday for America, besides any additional sum that may have been taken from the Liverpool branch.

Failures and Mercantile Embarrassments.—In the case of Messrs Raikes and Co., of the Hull Bank, a petition is stated to have been filed in the local Court of Bankruptcy under the private arrangement clauses. The liabilities are still believed to be under 70,000*l*, but, according to some accounts, the estate may turn out less favourable than has been expected, many of the assets it is alleged being of questionable value.

At a meeting at Dundee, on Wednesday, of creditors of Messrs D. and J. Thomson and Co., jute spinners and manufacturers, who failed early in the month with liabilities of about 50,000*l*, it was resolved unanimously to accept bills for 20s in the pound in instalments extending over three years, viz., 2s 6d in six months, 2s 6d in nine months, 5s in a year, 5s in eighteen months, 2s 6d in two years, and 2s 6d in three years.

A meeting of creditors was held on Tuesday of Mr George Thompson, of Crookham, who recently suspended in the iron trade. The balance-sheet showed liabilities about 26,000*l*, of which 3,000*l* are secured. The assets are estimated to realise about 5,600*l*. After some discussion, in the course of which a complaint was made that Mr Thompson did not stop payment at the time of his dissolution with his former partners, an offer of 4s 6d in the pound was refused, but a resolution was carried agreeing to accept 5s, payable within fourteen days.

At the Court of Bankruptcy to-day, an immediate certificate of the second class was granted by Mr Commissioner Fane to Mr J. Herbert Smith, who failed last year in the leather trade. The extraordinary character of this judgment is chiefly to be remarked from the fact that the greater part of the liabilities of between 100,000*l* and 200,000*l* represented bills accepted for the virtual accommodation of the notorious firm of Streatfeild, Laurence, and Mortimore.

Public Companies.—At the first annual meeting of the Labuan Coal Company, the report detailed at length the proceedings that have been taken for the immediate development of the undertaking. The preliminary operations have now been nearly all completed, and early advices are expected that the raising of coal has been commenced. The treaties recently concluded between this country and China and Japan are expected to give an immense impetus to the already rapidly increasing steam navigation in the Eastern Seas, which will be materially assisted by the successful working of the Labuan mines. Mr D. Smith, of Ettingshall Colliery, Bilston, who inspected the Company's property in 1859, was present at the meeting, and confirmed his former favourable statements with regard to value and extent of the estate, and the low cost at which the mines may be worked.

The United Mexican Mining Company announce that they have received a letter, viâ the United States, from Messrs Stewart L. Jolly and Co., dated Tampico, 20th April, enclosing a bill of lading for the 45,000 dols which had been shipped by H.M. ship Valorous, to be transferred at Vera Cruz to the Royal Mail Company's steamer for transmission to England.

The Crystal Palace Company have held their half-yearly meeting this week, but nothing of importance transpired, the discussion being mainly confined to the question of admission to the grounds on Sundays. The Directors were authorised to raise 27,500*l* in 6 per cent. debentures, in addition to the 250,000*l* already issued.

The report of the South Australian Company has just been published, preparatory to their meeting on Wednesday next. It states that, notwithstanding heavy losses by drought in the early part of the year, the affairs of the Company are in a satisfactory position. Their property was valued on the 31st of December last at 453,154*l*, and the quantity of land under cultivation was 27,485 acres. The gross rental has increased by 271*l*, and now stands at 27,037*l*. The land sales have produced 5,014*l*, of which 2,722*l* was profit. The available income is 26,060*l*, out of which the usual dividend at the rate of 7 per cent. per annum is proposed free of income tax, which, with the interest on the debentures, will absorb 25,817*l*.

A meeting of the Commercial Dock Company was held to-day, when the following report was unanimously agreed to:—

The Directors of the Commercial Dock Company have the pleasure to submit the accounts to the 31st of December, 1860, as prepared by Messrs Quilter, Ball, Jay, and Co., the accountants, and certified by the auditors of the Company, and they recommend that a dividend be declared for the half-year of 2*l* 10s per cent. (free of income tax). The Directors have considered it desirable to make a further accession to the strength of the Board, and they have much pleasure in stating that, at their request, Philip Oliphant Kington, Esq., of the firm of Rew, Kington, and Co., has offered himself as a candidate for a seat at the Board, and the Directors beg to recommend him to the proprietors for election. The Directors have the pleasure to state that, since their last report, the warehouses of the Company have continued well filled with grain and flour. The addition to No. 4 warehouse has been completed, at a cost of under 10,000*l*, increasing the accommodation by about 20,000 quarters, and the new building is now being brought into occupation. The works of the new exit to the river are proceeding very satisfactorily, and the Directors trust that, before the end of the present summer they will be so far advanced as to enable it to be made available for the purposes of business. The winter has been very protracted in the Baltic ports, notwithstanding which the tonnage which has entered the docks since the commencement of the present year has been in excess of that for the same period last year. The stock of wood goods is, however, rather below that of last year.

The Committee appointed at the meeting of bond and shareholders of the Grand Trunk of Canada Railway last January are understood to be considering a second report, which will probably be of great importance in the present condition of the Company.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427⅛ per mark, and the short exchange on London is 13.6⅞ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105⅛ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after deducting charges of transport and loss of interest, the present rate leaves little, if any, profit on the transmission of gold to the United States.

The Commercial Times.

LETTERS FOR THE SOUTHERN STATES OF AMERICA.—A notice, of which the following is a copy, has been received from the Postmaster-General of the United States:—"Post Office Department, Washington, May 25, 1861.—All postal service in the States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Arkansas, and Texas will be suspended from and after the 31st instant. Letters for offices temporarily closed by this order will be forwarded to the Dead Letter Office, except those for Western Virginia, which will be sent to Wheeling.—(Signed) M. Blair, Postmaster-General." In due course all letters from the United Kingdom forwarded to the Dead Letter Office at Washington will be returned to the Dead Letter Office in London, and in such case they will be opened and sent back to the writers. Nevertheless, as this suspension of the postal service is stated to be only temporary, the Postmaster-General will continue to forward in the general mail for the United States any letters addressed to the States referred to which may be posted in the United Kingdom, assuming that such a course is desired by the writers.

Imports of the week ..... 247,732 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was limited; nevertheless, all kinds moved off heavily, and, to force sales, 1s per quarter less money must have been submitted to. Foreign wheat was heavy, and nominally 1s to 2s per quarter cheaper. Barley and malt were very dull, but not cheaper. Oats gave way 6d per quarter, and the value of both beans and peas had a drooping tendency. In flour very little was passing. The imports from abroad, this week, are 11,020 quarters of wheat, 4,010 barley, 14,160 oats, 1,430 sacks and 9,080 barrels of flour.

At Liverpool, this morning, produce generally moved off heavily, at barely stationary prices.

There has been a regular though not active demand during the present week in the Liverpool cotton market, and the total sales of the week sum up to 59,000 bales, and include 43,000 bales to spinners, 8,000 bales on speculation, and 8,000 bales for export. Quotations are unchanged since last week. Notwithstanding this week's accounts from America have been of a nature to enhance the value of the article, the present Liverpool stock and arrivals are sufficient to check any effect these advices might otherwise have had on the market. To-day's sales are 10,000 bales, the market closing very firm.

The demand for all kinds of tea has ruled very inactive; nevertheless, no change has taken place in the quotations.

The following intelligence in reference to tea and silk is dated Hong-Kong, April *30*:—

Tea—Owing to the limited quantity on offer, and full rates demanded by the teamen, a small business only has been done, settlements being 7 chops of Congou at about previous rates; stock on the market 10 chops. In scented kinds little has been done, a portion of the purchases being for the colonies. Green Teas—Arrival amount to 8,000 packages, but the rates asked are so excessive that very little has been done in them. Some small musters of the new Tayshan teas, now in course of preparation, have been shown, but no correct opinion can be formed from them of the incoming crop. The crop is said to be a large one, and can be sold at from 15 to 20 per cent. below that of last year. A small contract for 600 boxes scented orange Pekoe, at 27 taels, is the only transaction reported in the new teas. Sales during the fortnight are as follows:—Congou, 7 chops; Ohname, 21½ taels to 25 taels; Oopacks, 25½ taels to 32 taels. Souchong, no sales; stock, 1½ chop; Canton-packed Congou, 3,000 half-chests, at 18 to 21 taels; stock, about 4,000 half-chests; scented orange Pekoe, 2,000 boxes, at 17 taels to 25 taels; scented Capers, 1,700 boxes, at 16 taels to 17 taels. Canton Green Teas.—Gunpowder, 100 boxes, 22 taels Young Hyson, 700 half-chests and 1,500 boxes, at 17 taels to 22 taels. Country Green Teas—Sales, 170 packages; stock, 11,830 packages. Freights to London, 2*l* 10s to 3*l*. Vessels on the berth for London—the Strathallan and the Golden Eagle, both engaged full. Amoy advices are to the 26th inst. Transactions in imports have been very trifling. Foochow advices to the 22nd inst. report a limited inquiry for all descriptions of imports. Sales are as follows:—Grey shirtings, 2,350 pieces, 6½ catties, 2 dols 40c; T-cloths, 4,000 pieces, 7 lb to 7 lb 2 oz., 1 dol 85c to 1 dol 90c; chintz, 880 pieces, 1 dol 40c; lead, 250 piculs, 8 dols 80c to 9 dols. Tea—Settlements during the fortnight amount to only 2,710 chests Congou, at 11 to 19½ taels, short, a portion of which is for Australia. Prices must be quoted rather easier, and there is more disposition to sell, but the stock generally consists of low and common qualities. Stocks—Congou, 8,500 chests; Oolong, 1,100 half-chests; Pekoe, 630 chests. The Excelsior had sailed for London. The Japan, with a cargo of tea on board, was wrecked before getting to sea. No vessel on the berth. Shanghai advices are to the 23rd inst. Silk—A large business has been done, settlements amounting to 3,500 bales, making total the settlements for the season 79,500 bales. Prices remain much as before. The total export of silk from China to Europe is 77,737 bales, against to same time last year 61,079 bales, showing an increase for this season of 16,658 bales. Tea—There is little alteration to notice in this market, owing to the almost total absence of supplies. Black Teas—Only 617 chests Ningchow had been settled at 22 taels, and 1,768 chests pekoe at 22 taels to 32 taels. Stock estimated at 2,500 chests. Green Teas—At *Ningpo* some small settlements had taken place at a slight advance. Settlements are reported at 4,325 packages China growth, and 4,159 packages Japan. Stocks—1,000 packages China, and 2,000 packages Japan. Freights unchanged. Total export of tea from China to Great Britain is 78,343,600 lbs, against the same time last year 75,043,200 lbs, or an increase for this season of 3,300,400 lbs. To the United States the export is 24,361,900 lbs, against last year 30,087,000 lbs, showing a decrease for this season of 5,725,100 lbs.

Exchanges—At Shangnai—Closing rates on London are: Bank bills, 6s 2d; credits, 6s 2½d. On Calcutta, 296r to 297r; on Bombay, 294r. At Hong Kong—Little doing. Bank bills, 4s 5½d, nominal; first-class private bills, 4s 5¾d, six months' sight. On Bombay, 215r; on Calcutta, 216r to 217r.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to May 31, 1860 and 1861, with STOCK on hand on June 1, 1860 and 1861.

All raw sugars have met a heavy inquiry, and prices—although the supplies on offer are by no means extensive—have given way 6d to 1s per cwt.

Coffee has changed hands slowly, and, in some instances, the quotations have had a drooping tendency.

The annexed intelligence is dated Colombo, May 16, and is forwarded by Messrs Freyer, Sonnedy, and Co.:—"Plantation Coffee.—Coffee curers have been enabled to push on their shipments, owing to the favourable state of the weather. We have only heard of two sales during the last few days for immediate delivery, viz., 5,000 bushels Kotmalie in parchment at 11s 3d per bushel, equal to 71s 9½d per cwt f.o.b., including exchange, commission, and freight, and 6,000 bushels Ouda Pusilava at 11s 6d per bushel. The total exports from 1st Oct. to 10th May are 315,063 cwts, against 317,727 in 1860, 283,272 in 1859, and 297,355 in 1858. Native coffee, which finds its way at present into our market, is of very inferior quality. The shipments up to date show a great falling off if compared with those despatched during the previous years, viz., 88,854 cwts, against 135,694 in 1860, 160,984 in 1859, and 123,086 in 1858.

Messrs Arles Dufour and Co., of Lyons, have furnished us with the following remarks on the present state of the silk crop and trade:—"According to our last advices of the 27th ult., prospects of the crop were far better than at the same period last year. Unfortunately, the last stages have again proved fatal to the worms, and without being able yet to form a decided opinion upon the general result, we may anticipate that it will scarcely exceed last year's as regards quantity, and will be inferior as regards quality. If, nevertheless, cocoons open at prices which will establish the new silk about 10 per cent. below our present rates, we must ascribe it to the complete want of orders from the United States, which weighs heavily on our transactions."

The transactions in rice have been much restricted, and prices have ruled in favour of buyers.

Messrs Moran and Co., writing from Calcutta on the 8th ult., remark as follows on the prospects of the indigo crop:—"In our last circular, we reported the prospects for the next crop as being unfavourable, and have now, we regret to say, to give a still more gloomy report, not only on account of the disturbances in the indigo districts, but to the long-continued drought. We are still without a general sowing rain in Bengal and Tirhoot; the rain which has fallen has been light and remarkably partial. The total fall of rain in Calcutta, and which we think may be taken

as an average for Lower Bengal since the 1st of October last, only amounts to inch 3-84, and unless we are soon favoured with opious showers, we fear crops of all descriptions will be much affected."

A fair average business has been doing in rum, at full quotations; but brandy and grain spirits have met a dull inquiry.

No actual change has taken place in the value of saltpetre; but the demand is wholly confined to small parcels.

Linseed oil is in fair request, at 30s per cwt. Most other oils move off slowly, at late rates.

The tallow market is heavy, at 53s 6d per cwt on the spot, and 52s 6d for the last three months.

"The week closes," says the New York *Shipping List* of the 1st inst., "upon a very quiet state of affairs in the business world, and we cannot learn that any improvement is anticipated for some time to come. The exciting telegrams which have rapidly succeeded each other during the week from the seat of war had kept up the excitement to a high pitch, and all seem to arrive at about the same conclusion—that we are on the eve of momentous events. We continue to hear of suspensions and failures in various parts of the country; the direct result of the commercial crash, which is, in turn, the direct result of the political derangement of the country. New York city is not exempt from these disasters, but, on the contrary, failures and suspensions of old and well-tried houses are not unfrequent, and it will occasion little surprise should they become the order of the day. The money market remains without essential change. The resumption of specie shipment from the other side has imparted a feeling of greater ease, and money is freely offered on call at 5 per cent. The inquiries for accommodation are exceedingly limited, however, and the result is that there are large balances on hand, for which it is next to impossible to find satisfactory employment, as the customary investments of other days which were considered good are now thought to be altogether too hazardous. In the discount market we can discern little or no variation. First-class paper sells readily at 7 to 9 per cent., according to the time it has to run. In other grades there is perhaps rather more doing, but rates are very irregular, and vary at the option of the lender. Nearly everything not well known is still regarded with much suspicion, and rates of discount in such cases are almost ruinous. We insert our previous quotations, which may be consisidered merely nominal:—

	Per cent. per annum.
Loans on call, stock securities	6 to 7
Do. other good securities	7 ...
Prime endorsed bills, 60 to 90 days	7 ...
Do. 4 to 6 months	8 ...
First-class single signatures	7 ...
Other good bills	... ...

The stock market has not been characterised by any unusual excitement since our last, and may be said to have been almost without animation. The demand for stocks of all descriptions has been very moderate."

The latest advices from Europe have exerted little or no influence on the market for cotton, which remains substantially the same. There was a little better general demand yesterday, but it did not result in any considerable sales. Transactions are confined to about 3,000 bales, at previous rates. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	11¼	11¼	11¼	11¼

The market has been uniformly quiet during the week. Some of the lower grades of American have been abundantly offered, and prices of these are slightly in favour of the buyer; but the higher qualities, especially when of full staple, maintain an extreme value. The stock is again somewhat reduced. Egyptians continue in fair request, but are difficult of sale, owing to the large quantity offered. Brazils are unchanged in value. East India do not move readily, but our quotations of last week are continued. To-day the sales are 12,000 bales. The market is firm, but quiet. The reported export amounts to 7,490 bales, consisting of 3,000 American, 210 Brazil, and 4,280 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The letters at hand, this week, from the manufacturing districts are decidedly unfavourable. For home use and export to the Continent, a moderate business appears to have been transacted; but the operations for India and America have been very restricted. The iron trade has ruled tolerably firm; but the demand for coals has continued limited.

MANCHESTER, June 12.—Transactions in this market have, this week, been almost a minimum. Prices of yarn remain tolerably steady, but where business has been done the buyer has generally had an advantage of ⅛d. In shirtings and similar goods, some low sales seem to have been made to relieve stocks, which accordingly have depreciated the market, and a few buyers are endeavouring to secure purchases where reductions will be made. Accounts from Calcutta being still drooping, and from China unimportant, have added to the general discouragement. No branch of our trade can be named which is not suffering from continued prostration.

BRADFORD.—Great stagnation continues to characterise our wool market. Prices are still drooping, and to effect sales staplers must take almost whatever price is offered, as in a falling market buyers are never anxious to operate. During the past week many country dealers and farmers have visited Bradford intending to sell out their stocks previous to buying new wools. We cannot report any improvement in the demand for yarns, either for export or for home consumption. In pieces there is less to complain of. Our home merchants have given out some substantial orders for plain and fancy goods (although chiefly for the latter) for the autumn trade. Stocks in the warehouses are not large, and in manufacturers' hands they have become considerably reduced.

LEEDS.—The cloth markets have been of the same quiet character as for some weeks past. Prices continue tolerably firm, except it be for summer goods. Wools, too, keep firm, except for the new home clip, which is not so high as last week.

ROCHDALE.—The wool and flannel markets have been very quiet. Wools are a shade lower in price, consequent chiefly on the good reports about the home clip. Manufacturers are purchasing very sparingly. Flannels are accumulating in the hands of producers, and, though the demand is dull, late prices are firmly held. The Yorkshire goods trade is flat, and prices are a trifle lower.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 7s 6d to 3*l* 10s; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 1.—The intelligence from Europe was less favourable than expected, and the market for State and Western flour became less buoyant, while transactions have been materially restricted. The transactions have been tolerably heavy, nevertheless. The receipts have been moderate. We note a decline for the three days of 5c to 10c per barrel on most kinds Canada flour is dull and heavy for common grades, at a reduction of 10c per barrel. Southern flour continues in limited request, and the market is dull and heavy, though prices are substantially the same. The sales comprise 2,700 bbls, including 750 yesterday.

EXPORT from 1st to 31st May.

	1861. barrels	1860. barrels
Wheat Flour	200,087	103,805

The demand for wheat has materially abated since our last, and the aggregate sales are accordingly much lighter. The European advices were less favourable, and exerted a depressing influence on exchange. The better grades have wet with most favour, and have been taken to a fair extent for local milling and export. Holders have been compelled to submit to a slight reduction in prices, however, and we note a decline of 1 to 2 cents per bushel for nearly all kinds. The total sales for the three days are 435,000 bushels. The demand for corn has continued tolerably active both for consumption and shipment, and transactions for the three days aggregate 280,000 bushels, including 98,000 yesterday, at our previous quotations.

EXPORT from 1st to 31st May.

	1861. bushels	1860. bushels
Wheat	1,728 511	356,030
Corn	799,372	522,830

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the various markets have been scantily supplied with home-grown wheat, chiefly in poor condition, the demand for both red and white qualities has continued in a most depressed state, and prices have further given way 1s to 2s per quarter. In foreign wheats—the imports of which have been extensive—very little has been doing, at drooping currencies. The barley trade has ruled heavy, at the late decline in the quotations. In malt, very little has been passing, at late rates. We have to report a dull inquiry for oats, on somewhat easier terms. Beans and peas have commanded very little attention. The flour trade may be considered heavy, at slightly depressed rates.

Throughout the Continent, wheat has changed hands slowly, and the quotations have had a downward tendency. All kinds of spring corn have met a dull inquiry. Advices from New York state that the demand for wheat and flour for export was only moderate. In prices, however, very little change had taken place.

The wheat crop in most parts of England has undergone a great improvement within the last few days, and most of the growers appear to be of opinion that the yield on heavy lands will be a large one.

In Scotland, wheats have given way in value from 1s to 2s per quarter, and all other produce has met a dull inquiry.

There has been very little passing in wheat or other articles in the Irish markets, and the quotations have not been supported.

Owing to the favourable change in the weather, there was no disposition on the part of buyers to effect sales in English wheat, at Mark-lane to-day. Fine qualities fairly maintained previous rates, but all other kinds were quite 1s per quarter lower than on Monday. Foreign wheat was very dull, and it was impossible to transact business in it without submitting to a reduction of 1s, and in some instances of 2s per quarter. Barley moved off slowly, at barely late rates. Malt was firm in price, but the demand for it was limited to actual wants. Oats declined 1s per quarter; and beans and peas, although without quotable change in value, were drooping. All kiuds of flour were much neglected, and, in some instances, a further decline took place in the quotations.

Mr Rainford reports as follows on the trade in floating cargoes:—Since the 6th inst. 26 arrivals off coast for orders are reported, consisting of 15 cargoes of wheat, 7 maize, and 4 miscellaneous, viz.:—Wheat, 6 cargoes from Odessa, 5 Santander, 1 Oporto, 1 New York, 1 Alexandria, 1 Trieste; maize, 1 New Orleans, 3 New York, 2 Baltimore, 1 Odessa; flour, 1 Santander; rye, 1 Galatz; barley, 2 Odessa. In cargoes afloat the business since this day week has been very limited, with prices looking downward. The following transactions are reported:—Wheat, arrived, per 480 lbs, Sandomirka, at 56s 6d, slight dry warmth not to be objected to. Rye, arrived, per 480 lbs, Galatz, 32s (for the Continent). Maize, for shipment in June and July, over 16,000 quarters, Ibraila at 30s 6d per 480 lbs, and Galatz at 32s per 492 lbs; arrived, per 492 lbs, Galatz, not perfect, about 31s 3d; per 480 lbs, Salonica, nearly perfect, 30s 6d; and Tuscan, nearly perfect, 30s; for shipment up to the 14th of July, per 492 lbs, Galatz, over 3,000 quarters, at 30s 9d. Barley, arrived, per 400 lbs, Wallachian, 25s (2 cargoes); on passage, Egyptian, 25s.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—A quiet tone still pervades the market, and several kinds have further declined 6d to 1s per cwt, with liberal supplies offering. Up to yesterday there was not any general improvement in the demand, and 1,843 casks West India changed hands, including a portion of the numerous parcels submitted by auction: Barbadoes, 33s to 42s 6d; Jamaica, 34s to 38s 6d for brown to yellow; and St Lucia, 30s 6d to 37s 6d per cwt. Some floating cargoes of foreign have also been taken for export at moderate rates. The deliveries last week amounted to 3,560 tons, making the net increase for home use 1,100 tons and for export 930 tons since the beginning of the year. There were 10,225 tons landed during the week, consequently the stock has been augmented to 60,500 tons. At the same date in 1860 it was 68,250 tons; in 1859, 50,000 tons; and in 1858, 55,100 tons.

Mauritius.—7,769 bags in the sales were partly disposed of as follows, at which quotations some parcels are also reported by private contract: soft brown, 30s to 34s 6d; low to middling grey, 35s to 36s 6d; low to good yellow, 37s 6d to 40s; grainy and crystallised, 37s 6d to 40s per cwt.

Madras.—4,028 bags grocery were about one-fourth part sold, including the washed: sound, at 40s to 44s per cwt for low to very fine yellow.

Manilla.—2,705 bags good clayed sold at 33s 6d, and 500 bags of low by private contract at 32s per cwt.

Foreign.—Five floating cargoes of Havana have sold for export: Nos. 11¼ to 12, 24s to 25s; 12¾, 26s; 16½, 28s. By auction, 1,821 boxes Havana partly found buyers: brown 33s to 36s; yellow, 37s to 41s. 804 casks Cuba: brown, 32s to 35s; low to middling yellow, 35s 6d to 37s. 700 casks 355 barrels Porto Rico: brown, 34s 6d to 36s; yellow, low heavy to fine, 36s 6d to 45s 6d per cwt.

Refined.—Dry goods have not quite maintained their late value, but the prices are still disproportionately higher than raw sugar. The market remains quiet, and common descriptions are worth 50s to 50s 6d; crushed, 47s to 49s per cwt.

Molasses.—A parcel of Antigua has sold at 18s 6d to 19s, and several parcels of melado at 25s 6d. By auction, 782 casks were chiefly bought in at 23s to 31s per cwt for melado and sugar, a few lots of the latter at 12s 8d per cwt duty.

Coffee.—The public sales of Ceylon have again been large. Native sorts went rather cheaper, but plantation sold steadily. 1,800 bags of the former were offered, when about 1,400 bags sold at 60s to 62s for ordinary small, broken, &c., to very good ordinary quality. 1,188 casks 1,800 barrels and bags plantation all sold at 67s 6d to 77s 6d for fine ordinary palish to good coloury. 50 bales and half-bales ungarbled Alexandria Mocha were bought in at 83s to 90s. 100 packages pale Malabar kind realised 68s. 56 casks 485 barrels and bags Jamaica chiefly sold: fine ordinary to middling, 64s 6d to 71s 6d per cwt.

Cocoa.—Of 879 bags Trinidad in public sale, the bulk was withdrawn, a few lots only finding buyers at 65s to 71s for mixed to good red. 581 bags Grenada were either taken in or withdrawn, as the market keeps very flat. 258 bags Dominica part sold at 50s, and 104 bags Guayaquil were bought in at 58s per cwt.

Rum.—More inquiry prevails for common kinds, and there are few others at present quotations. Demerara has sold at 1s 10d to 1s 11d; Leeward Island proof at 1s 9d to 1s 10d per gallon.

Tea.—The market is inactive, but the importers do not seem desirous to press sales, and prices generally remain about the same as before.

Rice.—10,240 bags Rangoon, offered by auction, were taken in above the value, but since sold at 9s 6d for the sound portion of low to fair quality. 5,570 bags Java were mostly bought in at 13s to 15s, and since partly sold at 13s to 14s 6d. 683 bags broken yellowish white Bengal realised 10s, with a few lots 10s 6d. The sound portion of 2,034 bags pinky Madras was bought in at 10s 3d, the sea-damaged selling at prices in proportion.

Imports and Deliveries of Rice to June 8, with Stocks on hand.

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago.—390 boxes small grain were bought in at high prices: middling to good small grain, 18s to 19s. 721 bags sago flour sold at 16s per cwt.

Spices.—Increased supplies of pepper have been offered, which, however, chiefly sold at previous rates. 4,200 bags went as follows: Singapore, 3⅞d to 4d; Penang, 3⅞d to 3½d; Batavia, dusty to good, the same prices. 144 bags Singapore white realised 5⅜d, or the same rate as 600 bags disposed of by private contract last week. 14 cases fine bold Tellicherry brought 1s 1½d. 422 bags pimento sold at the previous value, viz., 2¾d to 3d, and 2⅝d for very low. 515 cases Cochin ginger partly sold: mixed and wormy at 44s to 46s; the remainder bought in at 53s to 58s, and 80s per cwt for superior bold.

Saltpetre.—This article is almost neglected, owing to the absence of foreign orders, the continental requirements being supplied by the French, &c., manufactured.

Imports and Deliveries of Saltpetre to June 8, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons

Deliveries last week 250 tons.

Cochineal.—Further parcels have been taken out of the quantity offered last week, making the total sold about 1,300 bags.

Other Dyestuffs.—Cutch is quiet at 22s. Small orders continue to be executed in Gambier at previous rates. 1,600 bags Bengal turmeric, by auction, were taken in at 16s per cwt.

Shellac.—The market has been nearly cleared, and the last sales made establish higher rates: fine orange, 9*l* 10s to 9*l* 15s; other kinds of orange, native, 8*l*; livery, 8*l* 7s 6d to 8*l* 17s 6d; low to middling button, 7*l* 12s 6d to 8*l*; good garnet, 8*l* 12s 6d to 8*l* 15s; common to good button, 7*l* 12s 6d to 8*l* per cwt.

Linseed is rather quiet, but not much lower, although arrivals have been liberal of late: Bombay, 55s; Calcutta, 52s to 53s 6d. A cargo of Marianople, July and August shipment, has sold at 53s per quarter for the United Kingdom.

Oils.—There is a good demand for linseed at 30s in all positions. Rape quiet, and rather easier; foreign refined, 41s to 42s; brown, 38s 6d to 39s. Cocoa-nut offers on lower terms: Ceylon, 43s 6d to 44s; Cochin, 44s 6d to 45s. Palm remains dull at 45s per cwt. Pale seal in second hands cannot be had under 40*l*. Sperm offers at 98*l* per tun. Small sales of olive have been made, Gallipoli commanding 58*l* for Russia. Other descriptions nominal at 48*l* to 55*l* per tun.

Turpentine.—8,550 barrels rough have arrived. 16s is demanded for a large portion. Spirits sell slowly at 44s per cwt for American.

Dyewoods.—Red Sanders has sold at 6*l* to 6*l* 2s 6d; Jamaica logwood at 4*l* 17s 6d to 5*l*; Jamaica fustic at 6*l* per ton.

Metals.—A quiet tone pervades the market. Foreign tin is very dull, and Banca in Holland nominally unaltered, pending the approaching sale by the Netherland Trading Company. Good Straits may be quoted 120s to 120s 6d per cwt. Scotch pig iron advanced about 1s during the week. The last sale of mixed iron was at 49s 6d per ton. Some contracts have been made in spelter at 16*l* 10s, and two or three parcels of favourite brands at 16*l* 15s to 17*l* per ton. The market is now inactive. Other metals remain without improvement to notice.

Jute is very dull.

Hemp.—Moderate transactions have taken place in Baltic. Manilla remains quiet.

Tallow.—Even at a further decline foreign has sold slowly on the spot or for early delivery. The price of first sort Y.C. this morning is 53s 6d, and to be delivered in the last three months 52s to 52s 6d per cwt. For the latter, some contracts have been made.

Particulars of Tallow.—Monday, June 10.

POSTSCRIPT. Friday Evening.

Sugar.—The market is flat to-day, and a portion of the supplie brought forward only have been sold, occasionally at easier rates, the quantity offered including 685 casks 661 barrels West India, 11,815 Mauritius, and 486 casks melado and sugar. There have been 2,186 casks sold during the week. A floating cargo of Java, equal to No. 11½, sold for the United Kingdom at 38s 6d per cwt.

Coffee.—552 casks 421 barrels and bags plantation Ceylon nearly all sold at about the former value. 171 bags Cochin: yellowish, 66s 6d to 67s. 515 bags Singapore were taken in at 60s: triage, partly sold at 20s to 25s. 644 bags native Ceylon realised 60s to 60s 6d per cwt for common good ordinary.

Rice.—11,405 bags Arracan were bought in at 10s 3d; 3,000 bags Bassein at 10s. 2,726 bags Bengal partly sold: good middling white, rather broken, 11s; Ballam bought in at 9s 6d to 9s 9d.

Saltpetre.—600 bags Bengal, refraction 7¾, are reported privately at 35s, and one lot fine at 36s 6d. 840 bags Bombay, refraction 53 to 24½, sold by auction at 31s to 32s per cwt.

Oil.—160 tuns sperm offered by auction were withdrawn at 98*l* per tun. 490 casks cocoanut part sold at 44s for Ceylon; other kinds being taken in. 444 casks palm were bought in at 40s to 44s 9d per cwt.

Tallow.—Town unaltered. By auction, 305 casks Australian went at lower rates: beef, 49s to 50s; mutton, 51s to 53s. 256 casks Taganrog partly sold at 51s to 52s 6d. 163 casks 252 boxes South American part sold 46s 6d to 48s. Y.C. as before.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues neglected; prices rather lower. Treacle in moderate demand. Some few sales have been made in Dutch crushed, f.o.b. in Holland, in S T superfine, and in B H No. 1.

Green Fruit.—A good demand for all kinds. Oranges improved in value. A parcel of Valencia, per Chester s.s., sold by Keeling and Hunt at public sale, went at an advance of 5s per case. No improvement in the price of lemons. The change of weather the past week has checked consumption. Nuts in request, owing to the backward state of vegetation, which prevents the ripening of summer fruit.

Dry Fruit.—The currant market maintains its position with remarkable firmness. In reviewing prices for the past eight months there has hardly been 1s variation in the range in all that period, 25s to 34s having at

one time been our extreme rates, and now 27s to 33s. The quantity of currants offering on the market is very limited: the larger part of the stock being in the hands of dealers, country grocers, and speculators. Importers hold very little. The clearances continue on a large scale, which will doubtless be kept up if our home fruit continue backward and scarce.

ENGLISH WOOL.—The trade continues very unsatisfactory, with daily lower prices, and though the fall has been already several pence per lb, yet there appears a probability of a further decline.

FLAX unaltered.

HEMP.—Market steady and rather more business doing. By the last advices from St Petersburg the market there was very firm, and but little offering there for sale. The price of 28½ s. ro. would be equal to 32*l* laid down here.

COTTON.—Sales of cotton from Friday, 7th June, to Thursday, 13th June, inclusive:—1,300 bales Surat at 6¼d to 6⅝d for good fair to good sawginned, at 5⅞d for good fair new Oomrawatty, at 5⅛d to 5½d for very middling to middling old Oomrawatty, at 5⅛d to 5½d for middling to middling fair Dhollera; 500 bales Tinhevelly at 5⅜d to 6⅛d for middling to good. The market opened very quietly, and there were scarcely any transactions up to Wednesday, when an improved demand was experienced, which was freely met by sellers, and about 1,000 bales changed hands. Yesterday the demand continued, and altogether the market closes steadily, prices being about the same as last week. P.S.—Market unchanged. Sales to-day 500 bales very middling to fair Oomrawatty at 5 3-16d to 5⅜d per lb.

LEATHER AND HIDES.—At Leadenhall, on Tuesday, the supply of fresh leather was small, but there was also a small attendance of buyers. The transactions of the week show little or no increase compared with last month, and there is no alteration from the quotations of last week. Good crop hides, 45 lbs to 50 lbs, were scarce and in request.

METALS.—No alteration has taken place in the metal market.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8½
Yellow Russian	55	0
Melted stuff	36	6
Rough ditto	21	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market steady at former prices; good business doing. Best Friesland, 96s, dull market; Jersey, 92s to 94s, all cleared off. In all other descriptions of provisions very little doing.

METROPOLITAN CATTLE MARKET.

MONDAY, June 10.—The total imports of foreign stock into London, last week, amounted to 7,849 head. In the corresponding period in 1860, we received 10,231; in 1859, 3,111; in 1858, 3,605; in 1857, 4,359; in 1856, 2,500; and in 1855, 3,239 head.

There was rather an extensive supply of foreign stock on offer in our market to-day, and sales progressed slowly, at about stationary prices. The arrivals of beasts from our own grazing districts, as well as from Scotland, were seasonably large as to number, and for the most part in excellent condition. Notwithstanding that the beef trade was less active than on Thursday, that day's advance in the quotations was fairly supported, the best Scots and crosses having realised 5s 2d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire, we received 2,700 Scots, &c.; from other parts of England, 300 of various breeds; and from Scotland, 700 Scots and crosses. With most breeds of sheep we were well supplied, but their general quality was by no means prime. On the whole the mutton trade was in a sluggish state, at last week's prices. The best old Downs were selling at 5s 4d per 8 lbs. There was only a limited sale for lambs, the show of which was good, at Thursday's decline in value. The general currencies ranged from 5s 6d to 6s, but really choice lambs were worth 7s per 8 lbs. The arrival from Ireland was confined to 50 head. Calves, the supply of which was only moderate, changed hands slowly, at late rates, viz., from 4s to 5s 2d per 8 lbs.

SUPPLIES.

	June 11, 1860.	June 10, 1861
Beasts	3760	3940
Sheep and lambs	29570	26460
Calves	335	279
Pigs	410	440

THURSDAY, June 13.—The supply of beasts on offer in to-day's market being on the increase, the demand for all breeds ruled heavy, at a decline in the quotations, compared with Monday, of 2d per 8 lbs. We were fairly supplied with sheep, for which the inquiry was very inactive, at 2d per 8 lbs less money. The extreme value of the best old Downs was 5s 4d per 8 lbs. Lambs were very dull, and 4d to 8d per 8 lbs lower in price. In calves only a limited business was passing, at a decline of quite 2d per 8 lbs. Pigs and milch cows were offering on lower terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	10	Prime Southdown sheep	4	10	5	2

Inferior mutton	3	6	4	0					

HOP MARKET.

BOROUGH, Monday, June 10.—The blight during the past week has made rapid progress in every district of the plantations, and the prospect of recovery is much lessened. The duty has fallen to 70,000*l*. Our market is exceedingly active, and prices have advanced 10s to 20s per cwt. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, June 14.—The plantation accounts are still unfavourable, and the duty is estimated at barely 70,000*l*. All good and fine samples of hops are in request, and prices are on the advance. Other kinds command extreme rates.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, June 10.—During the past week the arrivals both coastwise and by rail have been good for the season, and, with what was left from former arrivals, more than equal to the demand. Trade is still very heavy. The following are this day's quotations:—Yorkshire Flukes, 110s to 140s; Lincolnshire Regents, 80s to 90s; North Berwick ditto, 100s to 110s; Perth, Forfar, and Fife ditto, 60s to 85s; ditto, ditto, ditto Rocks, 60s to 70s; ditto, ditto, ditto Reds, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, Friday, June 14.—The supply of new potatoes is moderate, and sales progress steadily at from 6s to 16s per cwt. Old qualities are a slow inquiry, at previous quotations, viz., 60s to 130s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 10s to 2*l* 0s per load. A heavy trade.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 14s to 2*l* 0s per load. A dull trade.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A dull sale.

COAL MARKET.

Ships at market, 39.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 14.—The report of a considerable fall in the price of English wool has had a tendency to check the trade here, consequently at present there is little doing.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 14.—Corn market very dull, and buyers only supplying immediate wants. Prices nominally unaltered, but sales can only be effected at a further decline. Attendance limited.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 14.—During the past week there has been only a very languid demand for manufactured iron, but prices for good iron are fairly supported. In Scotch pig iron there has been a considerable speculative movement, the consequence of which is that the market has advanced, but it closes with symptoms of weakness. Nothing doing in copper, and only a very limited inquiry for other metals.

The Gazette.

TUESDAY, June 11.

BANKRUPTS.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 1st of June amounted to 545,453*l*, and for the corresponding week of last year to 567,477*l*; showing a decrease of 22,024*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 250,634*l*, and for the corresponding week of 1860 to 252,577*l*, showing an decrease of 1,943*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 10.—In the railway market to-day the principal movement was a rise in Lancashire and Yorkshire, which in the morning advanced to 112, buyers. A partial relapse took place, and the final price was 111¾ to 112, or ⅜ per cent. higher than on Saturday. Caledonian also improved ½ per cent., and Sheffield ¼. Other stocks closed about the same as before; Midland, however, was rather dull. Foreign descriptions were dealt in, and a decline took place in Bahia and Paris and Orleans. Lombardo-Venetian shares and Victor Emanuel obligations, on the other hand, improved. New Brunswick debentures were flatter. American securities were firmer, especially United States and Virginia stock and Illinois Central shares. Mines were inactive at about former quotations. Joint stock banks were rather less steady. No material alteration occurred in miscellaneous descriptions.

TUESDAY, June 11.—The railway market to-day improved, but was almost entirely influenced by speculative operations, especially as regards Midland and Lancashire and Yorkshire. The transactions of the public continued generally unimportant. Compared with yesterday, Midland and Sheffield were ⅜ per cent. higher, and most of the other leading stocks ⅛ to ⅜. London and North-Western was rather dull, having latterly been more supplied. Colonial descriptions showed an unfavourable tendency. East Indian left off at 100 to ¼, being rather flat, and Grand Trunk of Canada, 19½ to 20. In the foreign market, Lombardo-Venetian shares were steady at ⅜ to ½ dis. Illinois Central and New York and Erie advanced. There were few transactions in mines, and prices generally showed no change. In joint stock banks, London and Westminster improved. In miscellaneous descriptions, Great Ship shares were firm at 6s 9d to 7s 3d.

WEDNESDAY, June 12.—The railway market opened dull on the unfavourable traffic returns, and closed rather heavily, although slightly above the lowest point of the day. The decline, however, was chiefly confined to the more speculative stocks, and especially to Lancashire and Yorkshire and Midland. The preparations for the fortnightly settlement showed only a limited increase in the supply of floating stock, except as regards Great Western. In the colonial market, Great Western of Canada shares receded to 10⅝ to ⅞, while Grand Trunk stock was comparatively steady at 19½ to 20. Foreign shares were little dealt in, and the only movement was a further rise in Lombardo-Venetian to ⅝ dis. In American securities, United States Five per Cents. were quoted higher and Illinois Central shares lower. Mines were heavy, and in several cases showed a decline. Bon Accord Copper, however, improved. Joint stock banks left off about the same as yesterday. In miscellaneous descriptions, Canada Land and National Discount shares exhibited a nominal reduction.

THURSDAY, June 13.—In the railway market, to-day, business was chiefly confined to the settlement now in progress. In some of the principal stocks a decline took place, especially in London and North-Western and Lancashire and Yorkshire. Sheffield, however, improved, and other descriptions closed without material alteration, the present quotations being for the new account. Colonial descriptions generally left off the same as yesterday. One or two Indian stocks, however, slightly declined, and Great Western of Canada shares were dull at 10⅜ to ½. In the foreign market, Paris and Lyons were quoted higher, and San Paulo lower. American securities showed increased firmness. There was also a better feeling in the mining market. Devon Great Consols, Bon Accord Copper, and United Mexican especially advancing.

FRIDAY, June 14.—The dealings in the railway share market were of a rather limited character, but prices showed increased firmness. Foreign and colonial lines remained dull, at about former prices. Great Luxembourg realised 7½, 7⅝; East Indian, 100½; Great Indian Peninsula, 97¾; and Scindes, 99¼. Joint-Stock Bank shares were at slightly higher prices. London and Westminster improved to 67; London Chartered of Australia to 23; and London Joint Stock to 31⅛. In the miscellaneous market scarcely any business was transacted. Crystal Palace stock realised 32; and the Perpetual Debentures, 106½.

The Economist's Railway and Mining Share List.

HARVESTING MACHINERY;

for the Colonies, Russia, Spain, Algeria, &c., &c.

SAMUELSON'S specially constructed Reaping Machines, requiring no skilled labour, £15; Combined Reaping and Mowing Machines, £24; Self-Raking Reapers, £36; Horse Rakes, £7 10s. Subject to the usual export terms.

B. SAMUELSON, Britannia Works, Banbury: at Mr Samuelson's depots, Blackhall place, near the Cattle Market, Dublin; and 76 Cannon street west, City, London.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

NORTON'S PATENTED PERCUSSION CARTRIDGE,

FOR SPLITTING THE STUMPS OF LARGE TREES,

In clearing Forest Land; also for preparing Fire Wood. This Cartridge requires no percussion appliance to explode it, the Iron Bar being of the same diameter as the Wooden Head of the Cartridge, or the auger that bores the hole in the Stump. A heavy blow on the projecting head of the Bar will explode the Cartridge with the fullest effect.

Manufactured by Mr Coker, of Grays, Essex. Price Sixpence each. J. NORTON.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

AT HAMBLY HOUSE ACADEMY,

Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S, &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

COLLARD AND COLLARD'S NEW

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

Free for four stamps,

ELECTRICITY AND ITS WONDERS

in conjunction with the newly-discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Dr WATSON, U.S., F.R.A.S., No. 27 Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value"

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,

ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

HOLLOWAY'S PILLS AND OINTMENT.

—Disordered Stomach.—Whenever the stomach fails faithfully to perform its functions, indigestion is produced, the issue of which is uncertain. The food, after passing undigested through the sluggish stomach, irritates the bowels, and sets up diarrhœa, which probably relieves the sufferer for a time. To rectify the disordered digestion, and check the first morbid symptoms, nothing previously prescribed equals Holloway's Digestive *Pills*; which in severe cases should be assisted by his *Ointment*, rubbed over the stomach and right side perseveringly for ten minutes twice a day. The united action of these remedies over stomach, liver, and bowels is immediate, beneficial, and lasting; they restore order and ease, and simultaneously remove the cause and consequences of the disease.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD.

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

THEATRE ROYAL, SADLER'S WELLS.
Sole Lessee, Mr Phelps.

Mr BARRETT respectfully announces that his Benefit, postponed from April 22nd, will take place on MONDAY, June 24th, 1861, on which occasion he solicits the favour of your patronage and support. A COMEDY, with a powerful cast. The Interlude of THE TURKISH BATH. To conclude with an Original Farce, first produced at Sadler's Wells, August 28th, 1852, entitled MARRIED DAUGHTERS, or, YOUNG HUSBANDS; with nearly the original cast. Tickets to be had of Mr Barrett, 17 Bedford street, Strand, W.C., and at the Box office.

NEW THEATRE ROYAL ADELPHI.
Sole Proprietor and Manager, Mr B. Webster.

Re-appearance of Mr and Mrs Dion Boucicault, in the great sensation drama of THE COLLEEN BAWN.

On Monday, and during the week, A TURKISH BATH. Messrs J. Toole, and Mr P. Bedford. THE COLLEEN BAWN. Messrs Dion Boucicault, D. DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

PERFECT FREEDOM FROM COUGHS, IN TEN MINUTES AFTER USE, IS ENSURED BY DR LOCOCK'S PULMONIC WAFERS.—From J. D. Marshall, M. D., Lecturer to the Royal Institution, and Chemist in Ireland to Her Majesty the Queen. "8 High street, Belfast.—I have the gratification of stating that, from all I have been enabled to observe of Dr Locock's Pulmonic Wafers, they have been of eminent service in the alleviation of severe Asthmatic Coughs, Pains in the Chest, &c. J. D. MARSHALL, M. D." Dr Locock's Wafers give instant relief, and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To singers and public speakers these Wafers are invaluable for clearing and strengthening the voice. They have a pleasant taste. Sold by all medicine venders at 1s 1½d, 2s 9d and 11s per box.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March at 56 Rosebank terrace, St George's road.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane, or from the author's address, 17 Harley street, Cavendish square, London.

FREDERICK DENT,
Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

RIMMEL'S PATENT PERFUME VAPORISER, an Elegant, Cheap, and Portable Apparatus, recommended by Dr LETHEBY and Dr HASSALL for diffusing the fragrance of flowers in apartments, ball-rooms, &c, and purifying the air in dwelling-houses and sick-rooms. Price from 6s. Sold by all Perfumery Dealers, and by the Inventor and Patentee, EUGENE RIMMEL, Perfumer, 96 Strand and 24 Cornhill, London; and 17 Boulevard des Italiens, Paris.

TEA.—DR HASSALL'S ("The Chief Analyst of the Sanitary Commission of the LANCET on Food,") Report on the Teas and Coffees sold by Messrs STRACHAN and CO., 26 Cornhill, London, E.C.:—"Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs Strachan and Co., I have subjected the whole of them to Microscopical Examinations and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory."

A full report of the above analysis, also list of prices, can be had on application to Messrs Strachan and Co., 26 Cornhill, E.C., London.

Carts to all parts of London daily.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ICE, AND REFRIGERATORS FOR preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY (now removed to 140 Strand, W.C.), of the best make, and at the lowest cash prices. No agents are appointed for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s 6d, 5s, 9s, and upwards, forwarded any distance into the country by "Goods" train, without perceptible waste. Wine-coolers, machines for making Ice Creams, either with or without Ice Freezing Powders, Ice Moulds, &c. Carbonators for making soda water. Detailed printed particulars may be had, by post, on application to the Wenham Lake Ice Company, 140 Strand, London, W.C.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

LONDON CHATHAM AND DOVER RAILWAY.—(METROPOLITAN EXTENSIONS).

The Directors of this Company are prepared to receive Tenders for Loans of £100 and upwards, for 3 or 5 years, at 6 per cent. per annum, secured upon the Metropolitan Extension Lines of the Company.—By order,

G. F. HOLROYD, Secretary.

Offices, 3 Victoria street, Westminster, June 10, 1861.

EASTERN BENGAL RAILWAY COMPANY.

The Directors are prepared to receive applications at par for Debentures, which will bear interest at the rate of £5 per cent. per annum, payable half-yearly by coupons attached to the deeds.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council.

The principal will be repayable at the end of five years from the 12th of April, 1861, but the holder of a debenture will have the option of renewing it for a further term of five years, on giving notice 12 months previously to the expiration of the first term.

Assignments of these securities, if endorsed thereon, are exempt from stamp duty by the 16th and 17th Victoria, cap. 59.

No debenture will be issued for less than £50.

The form of application can be obtained at the office.—By order of the Board, J. T. WOOD, Secretary.

No. 24A Gresham street, E.C., London,
11th April, 1861.

OTTOMAN RAILWAY COMPANY,

SMYRNA to AIDIN, of His Imperial Majesty the Sultan.—Forfeited Shares of £20 each (to be endorsed £11 paid).

The Directors are ready to receive Tenders for the re-issue of 5,000 Shares, bearing interest at Six per cent. per annum, from 1st January, 1861.

The Tenders will be received at the offices of the Company, in London, Constantinople, and Smyrna, until the 17th June inclusive.

The Tenders must be signed, sealed, and marked outside the envelope "Tender for Ottoman Railway Shares," and a deposit of £1 per Share paid at the same time as the Tenders are delivered.

The sealed Tenders received direct at the Company's offices in London will be opened at the same time as those from Constantinople and Smyrna (expected on the 30th June), and the shares will then be allotted to the highest bidders provided the Tenders are within the minimum fixed by the Directors.

The payment of the balance must be made within fourteen days after the allotment is made known in London, Constantinople, and Smyrna respectively, or the deposit will be absolutely forfeited.

If no allotment be made, the deposit will be returned on application without deduction.—By order of the Board, MACDONALD STEPHENSON, Chairman.

S. J. COOKE, Secretary.

2 St Michael's house, London, E.C., June 12, 1861.

N.B.—Copies of the last Half-yearly and Supplementary Reports, with the latest Traffic Returns, and all other information, may be obtained on application at the Company's office.

FORM OF TENDER FOR FORFEITED SHARES.

To the Directors of the Ottoman Railway Company, Smyrna to Aidin, of His Imperial Majesty the Sultan.

Gentlemen,—Having paid £1 per share on shares to the credit of the Company, at the Banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, E.C., I beg to request that you will allot me shares, at £ per share (endorsed £11 paid), and I engage to accept all or any portion thereof which may be allotted, and to pay the balance of £ per share within fourteen days after the allotment is made known to me.

THE OTTOMAN RAILWAY

from SMYRNA to AIDIN, of His Imperial Majesty the Sultan.—Payment of Interest.

Notice is hereby given, that the interest, at the rate of £6 per cent. per annum, which the Directors, in pursuance of the power vested in them by virtue of the statutes constituting this Company, are authorised to pay to the Shareholders during the construction of the works on all sums paid up in respect of their shares, will be calculated from the date of the payment thereof to the 30th instant, and paid from and after the 1st proximo. All Shareholders are hereby requested to lodge with the Secretary the Share Certificates held by them for examination, which will be returned to them as soon after as practicable, accompanied by a warrant for the interest due, with the amount of the same endorsed on the Certificate.

The Interest Warrants will, however, be withheld from those Shareholders who have not paid all calls made upon their shares previous to the 30th instant until such calls shall have been paid.

MACDONALD STEPHENSON, Chairman.
S. J. COOKE, Secretary.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from Monday, the 17th day of June, 1861, to Friday, the 12th day of July, 1861, both days inclusive, for the purpose of making up the interest account to the 30th day of June, 1861.

The interest warrants will be forwarded on the 12th July to the proprietors who are registered in the Company's books on the 15th day of June instant.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk,
New Broad street, London, June 4, 1861.

N.B.—Transfers will not be received at the office while the books remain closed.

MADRAS RAILWAY COMPANY.—

Notice is hereby given, that the Transfer Books will be closed from the 19th inst. to the 11th day of July next, both days inclusive, for the purpose of making up the interest accounts to the 30th instant.

The interest warrants will be forwarded to the proprietors whose names are registered on the 19th inst. in the books of the Company.

Deeds of transfer are not received at the offices of the Company while the books are closed.—By order of the Board, JAMES WALKER, Managing Director.

No. 33 New Broad street, E.C., June 10th, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two followings descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.
Company's offices, No. 33 New Broad street,
London E.C., April 30, 1861.

ROYAL DANISH RAILWAY.—

FLENSBURG HUSUM TONNING RAILWAY COMPANY.

Notice is hereby given, that the Seventh Ordinary General Meeting of this Company will be held at the Company's offices in Flensburg, on Wednesday, the 26th June proximo, at 12 o'clock, for the purpose of receiving the report of the Directors and the Financial Statement of the Company, for the Election of two English and two Danish Directors in place of those retiring, and for the appointment of three Auditors. The retiring members of the Board and Auditors are re-eligible, and offer themselves for reelection.

GEORGE GRENFELL GLYNN, Chairman.
FREDERICK H GEACH, Secretary.

60 Old Broad street, London, May 23, 1861.

Proprietors holding five shares and upwards are entitled to vote at the General Meeting, either in person or in proxy. The shareholders and proxy holders who may desire to attend the meeting are required to exhibit their shares, and to hand in a specification thereof, at least one day prior to the meeting, to the Resident Director in Flensburg, or on or before the 18th June to the Secretary in London.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W,

ATLANTIC AND GREAT WESTERN RAILWAY (New York Division).

—Coupons due 1st July next will be paid in London at the Bank of London, or in New York at the Banking house of Messrs Duncan, Sherman, and Co.

10 Cannon street, June 14, 1861.

CEYLON RAILWAY COMPANY.—

Notice is hereby given, that the transfer books of this Company will be closed on Saturday, the 29th day of June, to Friday, the 15th day of July, 1861, both days inclusive, for the purpose of making up the interest account to the 30th day of June, 1861. The interest warrants will be forwarded on the 11th July to the Proprietors who are registered in the Company's books on the 28th day of June instant—By order of the Board,

G. E. COOPER, Secretary.

9 Broad street buildings, London, June 13th, 1861.

RIVER SALADO STEAM NAVIGATION COMPANY, "En Commandite" (Limited).

ARGENTINE CONFEDERATION.

Capital, £240,000; in 24,000 shares of £10 each,

Deposit, £5 on allotment, and £5 on the 15th December, 1861.

The first dividend will be paid on the 1st January, 1862.

Interest at the rate of nine per cent. per annum, as a minimum profit, guaranteed by the Argentine Confederation on £100,000; the guarantee, at the same rate, on the balance of the capital, is expected to pass the Chambers which are now sitting, and may be received here from the Government of the Argentine Confederation in July next; the second call will not be made prior to the receipt of this decree.

The Argentine Confederation have also granted:

Exclusive privilege to navigate the River Salado;

Exemption from tonnage and licence dues;

Reduction of fifty per cent. on all duties on the importation of merchandise introduced by the Company's boats;

Transfer to the Company of 2,700 square miles of land.

Gérant Responsable—Mr ESTERAN RAMS.

COMMITTEE OF SUPERINTENDENCE AND INSPECTION.

His Excellency Norberto de la Riestra, Minister of Finance of the Argentine Confederation.
M. Constant Santa Maria, merchant, Buenos Ayres.
His Excellency Nicanor Molina, Minister of Foreign Affairs of the Argentine Confederation.
M. Ramon Puig, Parana.
M. Domingo Créspo, Santa Fé.
M. José Cullen, Santa Fé.
The Representative of M. Pedro Gil, of Paris, and Delegate of the European Shareholders.

REPRESENTATIVE AND AGENT OF THE COMPANY.

M. Pedro Gil, banker, Paris.

This Company is formed for the purpose of supplying what has long been urgently required, and which, from the increased and constantly increasing growth of British commerce with the Argentine Confederation, is daily becoming more and more necessary, namely, regular, speedy, and safe transit on the River Salado, and thus bring the whole of that country, including the south of Bolivia, in direct communication by steam with Europe. This is already effected as far as Santa Fé (the mouth of the Salado), two steamers leaving Europe monthly for Buenos Ayres (the Royal Mail Company's steamer from Southampton, and the Messageries Imperiales steamer from Bordeaux); on arrival at Buenos Ayres, passengers, merchandise, mails, &c., are conveyed by steamers to Santa Fé, for which service two run regularly every week. On arrival at Santa Fé steam communication is at an end, and the only means of reaching the towns on the Atlantic side are by long and difficult journeys by land, and towns on the Pacific, by traversing the Cordilleras of the Andes; but as soon as the navigation of the Salado is completed, the present route from Santa Fé by land will be abandoned, and the transit by steam on the Salado universally adopted. The extent of the trade already existing, its certain expansion, the liberal grants of the Government, and the manifest necessity of the use of steam communication, warrant the conclusion that the Company may rely on being able to realise large annual profits beyond the guaranteed interest; and the great desire of the Government of the Argentine Confederation for the success of the undertaking, and its evident wish to assist the Company, is clearly shown by the liberal grants of land and the high rate of interest guaranteed; the value of this can be understood when the Bonds of Buenos Ayres (Argentine Confederation) only bear an annual interest of 6 per cent., and are now quoted at 91½ per cent.

For prospectus, and paper showing nature of guarantee, of grants of land, and further particulars, apply to Messrs J. Hart and Co., 7 Broad street buildings, E.C.

Prospectuses may also be obtained from, and applications for shares made to, Messrs G. Harris and Sons, brokers, 22 Change alley, Cornhill, London, E.C.

The allotment will be made by the following:—

France—M. Pedro Gil, Paris.

Great Britain—Messrs J. Hart and Co., London.

Spain—M. José Gil, Barcelona.

Argentine Confederation—Head-quarters of the Company, Santa Fé; Messrs Maria and Co., Buenos Ayres.

FORM OF APPLICATION FOR SHARES.

N.B. This must be presented at the offices of Messrs J. Hart and Co., 7 Broad street buildings, E.C., or Messrs G. Harris and Sons, brokers, 22 Change alley Cornhill, E.C.

To the Agents of the River Salado Steam Navigation Company, "en Commandite" (Limited).

Gentlemen,—I request that you will allot me shares of £10 each, in the capital of the "River Salado Steam Navigation Company, en Commandite (Limited)," and I hereby agree to accept the said shares, or any smaller number that may be allotted to me, and undertake to pay the first deposit of £5 per share on allotment, and the remaining £5 per share, as stated in the prospectus, on the number allotted to me; and in default thereof I agree to forfeit the said deposit, and authorise you to cancel the allotment.

THREE EFFECTS OF AMERICAN CONFUSION UPON ENGLAND.

WE long since told our readers that whether there should be civil *war* in America or not, there would indisputably be civil *confusion*; we told them that they must expect to hear of the usual consequences of such confusion beyond the Atlantic, and in some degree to feel their rebound here; we suggested to them that they would hear of deranged credit, of disorganised trade, of deeply disturbed social relations, in what were once the United States; we warned them that we could not ourselves escape altogether unharmed in England, when a country so closely connected with us by common descent and common language, constant social intercourse and perpetual commerce, was experiencing such calamities. The events which our anxiety foreboded have happened. If civil war has not yet begun upon any great scale, civil confusion has on the greatest. What, then, is the nature of that confusion, and what will be its consequences?

The first effect is the entire stoppage of the ordinary commercial relations between the South and the North of the United States; and the entire stoppage of the trade means in this instance, as most others, the entire ruin of very many of the traders. The Southern States of America are the great exporting States of America: the Northern are the great importing States. The constant course of trade is to create a debt *from* all the world to the South, and to create an opposite debt *to* the whole world from the North. We need only look at the figures of the last Board of Trade report to be sure how true the first part of this is.

	In the three months ending 31st March, 1861 £
Our imports from the South have been	9,136,186
Our exports to — —	174,566

This year our imports from the North have also been large, in consequence of our deficient harvest and the natural anxiety of the Americans to send us all they could.

	£
Our exports to the North have been	3,922,133
Imports from — —	4,697,868

in the same period. But in most years, and as a rule, the South is the creditor, and the North the debtor of England and of the rest of the world.

How, then, are the two "indebtednesses" cancelled, and how are the books closed? In the most natural way possible. By the North selling to the South, and the South buying of the North. The South grows raw material, which it cannot manufacture, which it cannot enjoy, which it cannot eat. It buys of the North all its luxuries, almost all its clothing, and a very considerable part of its provisions. It obtains through the brokerage and agency of the North the goods of the rest of the earth. Such, at least, was the ordinary course of trade before the late disturbances. As might be expected from two communities so closely related by birth and politics, and so opposite in economical conditions and industrial habits, their commercial intercourse was one of the most unimpeded, beneficial, and important in the civilised world.

A less happy circumstance cemented the Union still more closely. "The planters" of the South, says Her Majesty's Secretary of Legation at Washington truly, as all acquainted with them will allow, "like the planters of "the West India Islands in the times of slavery, are very "improvident. They live in a style of reckless extra-"vagance, and frequently spend the whole value of their "crop before it has been brought to the market. The luxu-"ries they require are most easily procured in the North, "where the merchants give them credit on the security of a "bill upon the factors in the South who will sell their pro-"duce." The extravagance of the South has knit still closer the commercial relations suggested by their political union, their industrial dissimilarity, and their geographical proximity.

What is the result now? In proportion to the value of a trade is the calamity of its cessation,—in proportion to the intimacy of a commercial union is the magnitude of the peril from its sudden *dis*union. At the present moment the burden of the mercantile letters from the North is that the South does not pay. Portions are in some cases paid; remittances are sent on account, but still a large part is not paid. Numbers of houses in New York—those most closely connected with the South especially—cannot pay either. They may not have actually stopped; their bills may be held over, or renewed by bill discounters and bankers, but they cannot effectually meet their engagements; they cannot pay, because they are not paid.

The effect of this upon this country cannot be otherwise than serious. It is true that the American trade of this country is in very good hands; that the parties most prominent have great means and high standing; that at least since 1857 their business has been a cautious one; that in the present case they have had months of warning which *we know* that they have used to the utmost. Still, after all these great deductions, the *unpayingness* (if we may so say in writing on America) of New York cannot but be the cause of much delay, much perplexity, and some loss to a part of the trading community in this country.

A second consequence of the civil confusion in America has been a complete disturbance of the *currency* in some parts of the country. In the ruder States the bank-note circulation bears a very large proportion to the deposits, which is one of the most certain indications of a half-developed community and of an imperfect banking system. These bank notes are, it is true, largely secured by the stocks of the different States and *promise* to pay in coin. But the banks have ceased to pay in coin, and the State stocks at the time of a war between the States are of reduced, fluctuating, and uncertain value. The natural effect has been peculiarly extreme in the State

of Illinois. The currency there is of a somewhat miscellaneous character: the notes of many States have been admitted to the "exchange" for obvious reasons which formerly seemed to be incontrovertible, but which the untoward events of this year have shown to be unsound. Any doubt as to one State stock and one State currency excited a suspicion as to all. The public took alarm. As the banks no longer paid in specie, a run was out of the question; but the notes were extravagantly depreciated, and everybody was anxious to be rid of them. As an eye-witness observes:—

"The Chicago public have been greatly occupied with the "overthrow of their circulating medium; the distrust first "exhibited itself in the interior. Every man who had pay-"ments to make in Chicago has exerted himself to the "utmost to pay it. Farmers and country merchants have "hurried into this market flour and grain, which met with a "ready sale at extravagant prices, to parties who, like "themselves, wished to get rid of their bank notes. These "notes have, in turn, been paid into the banks and bankers, "until three-fourths of the active circulation was deposited "in Chicago. We began to receive inquiries as to how long "we should receive this currency. When the nominal prices "at Chicago exceeded the quotation from New York, it was "obvious that the currency bubble must soon burst. The "railroad companies adopted the measure of establishing an "approximate cash value to the notes of sixty banks in "circulation, ranging from fifty cents to par. For several "days everything was in confusion, until the Board of Trade "established specie as the standard for transactions in "produce. Corn dropped from 45 to 24 per bushel. Wheat "from 115 to 80 cents. These prices afford a handsome "margin for shipment to any of the Eastern cities, "and the effect we hoped for is already produced."

Of course, such a state of things is only possible where specie payments have been suspended, and the currency has fallen into consequent disrepute. In New York the banks stand firm, and their reserve in specie is more ample than it ever was. But in the rude West and perhaps in what we must now call the *unknown* South, there has been and is a great depreciation of the old paper currency.

The effect of this upon England must depend upon the extent to which it is carried. It is, as the writer from whom we have quoted expresses it, a golden opportunity to "intro-"duce gold." Prices measured in the precious metals which every one is in search of, are forced down to very small figures. These low money prices give a great stimulus to exportation: they tempt gold from other countries to buy corn, and gold in consequence may flow thither with rapidity.

Those who know the difficulty of arriving at the truth as to complicated economical facts which are occurring at a very great distance, will not expect from us either a precise statement of the extent to which the present depreciation of the paper currency in the remoter States of the Union is at present carried, or of the extent to which the appetite for gold so unexpectedly created may affect the English market. We can only lay down the familiar doctrines, that a sudden destruction of a subsidiary paper currency must cause a demand for the primary currency of the precious metals; that when the precious metals are very scarce, money prices—prices that are measured in those metals—must be very low; that such low prices act as a stimulus to exportation and as a discouragement to importation, and tend in both ways to attract the desired metallic money from several places and in unusual quantities.

We are not sure that this derangement of the currency of the Western States will attract any gold from hence, but we are sure that it will contribute its quota to the aggregate of causes; that it will have its tendency to attract some.

We have left ourselves no space to dwell on the third and last difficulty which England may experience from the civil confusion in America:—we mean the cotton difficulty. And this is of the less importance, because as the cotton crop of the year is for the most part fairly housed out of reach of danger, the inconvenience which we have to discuss is a future and not a present one. Still, it is our duty to chronicle the varying aspects of so great a possible difficulty as they from time to time present themselves. At the present moment the aspect is perhaps more unfavourable than it has ever before been. The South says cotton shall only leave the South by one exit, and the North says cotton shall not leave the South by that exit. The one says there shall be a single and exclusive road, and the other says nothing shall pass along that road. The South, by an enactment which we elsewhere print, declares that it shall not be lawful to "export cotton or cotton "yarn from the Confederate States except through the sea-"ports of these States;" and confiscates all the cotton which any merchant may be attempting to export in defiance of that legislation. The North has declared that she will establish an effectual blockade, and will prevent the issue of any cotton from those ports. So far, therefore, as the political acts of either party in the struggle can affect the exportation of cotton, these acts will do so. They are the most efficacious which could be passed for the purpose.

One motive of the South in passing this apparently suicidal enactment is the desire of preventing the cotton manufacturers of the North from obtaining the raw material which is necessary to them. Another is the wish to prevent the transit of cotton to Europe through the North, and the consequent profits of the North as produce broker and exchange agent, of which the South, who always believe that they are cheated by Yankees, have for years formed a very exaggerated idea. But there is in many minds undoubtedly a further and most strange motive. It sounds like a bitter jest, but it is capable of documentary proof, that a somewhat numerous and an influential section at the South do not *wish us to have their cotton.* They have contracted by a long and strange history, and from a peculiar and lamentable state of society, an exaggerated idea of their own importance. Writers in the most respectable Southern journals advisedly say, that if England and France cannot obtain their cotton in consequence of the blockade imposed by the North, both England and France will interpose and remove the blockade. The South fancy that we shall go to war in its aid, in conjunction with the French Emperor, if only our supply of raw material is straitened and obstructed. With this strange fancy in their minds, they are not inclined to send us their cotton by occult and recondite means; they are not inclined to invent ingenious expedients for breaking the blockade. On the contrary, they say, 'Let the blockade 'be effectual; the stricter the better; the sooner will it be 'over; the sooner will rescue from Europe reach us; the sooner 'will the strong hand of the "Old Country" remove all our 'difficulties.'

Such an idea is neither reasonable nor satisfactory. We know it to be raving, but those who use it are in their senses and believe it. It is certainly calamitous that one combatant should be very anxious to prevent our having their cotton, and that the other combatant should not be very anxious that we should have it. We have the strongest faith in the economical doctrine that raw material, if grown, will be sold. We believe it will be so in this instance more than in others; but still the position is exceedingly remarkable, and is not exceedingly comfortable. Both parties in the struggle—one by warlike efforts and the other by legislation—are providing that we shall not have that which we most want.

These three causes, added to the general dulness of our export trade, which is consequent on the present cessation of the American demand, are but instances of the general truth, that the loss of one great commercial country is the loss of all,—that if one suffer, all others suffer with it in some degree and to some extent,—that we must not expect to be exempt from the calamities of those who are in a mercantile sense our neighbours.

THE RECOGNITION OF THE KINGDOM OF ITALY.

Though, at the moment we write, the formal recognition of the newly-created Kingdom of Italy has not been announced in the *Moniteur*, there can, we are assured, be no doubt that it is a determined, if not already an accomplished fact. It is not easy to overestimate the significance of such a proceeding at such a moment. It is something far beyond an ordinary diplomatic compliment, and is indeed the only occurrence which could give the slightest consolation to the hearts that are mourning for the untimely and irreparable loss of Count Cavour. It is most welcome and most season-

able in two points of view. It is a distinct assurance to the Italians that the death of that patriotic statesman shall make no difference as to the attainment of the great object to which his public life was devoted, and to which, indeed, it was in a measure sacrificed. It was known that, for some reason or other, Cavour had more influence with the Emperor of the French than any other person at home or abroad; that either by natural ascendancy or secret pledges he felt confident of being able to secure his continued adhesion to the cause for which they had jointly done so much; and it was feared that the removal of such a coadjutor might liberate Louis Napoleon from some salutary restraints, and leave him free, if not to change his course, at least to indulge in capricious and mischievous vagaries. This uneasy mistrust we may now consider to be set at rest. The Emperor has done for Cavour's memory what he deferred doing during his life: and a fitter and more graceful offering to his tomb could not have been devised. Coupled with the recognition of Great Britain, it at once raises Italy from a Country into a State, gives her entry into the European comity of nations, and makes that an *official* which has hitherto been only an actual and informal reality. The Kingdom of Italy is now one of the Great Powers of Europe.

But this is something more than a mere act of formal courtesy and friendship. It is an avowed acceptance of what is past, and an implied consent to what must inevitably follow. Hitherto the world has never felt quite satisfied as to how much of the startling and magnificent reconstruction of the fragmentary Peninsula was welcome to Louis Napoleon or designed by him. We knew that it was not in accordance with the programme he put forth as his own scheme for the settlement of Italy. We knew that it was directly in the teeth of the arrangements of Villafranca. We knew that it must be entirely discomfiting to the selfish designs on the throne of Naples for a Muratist Prince which many people supposed him to entertain. We knew that it was not done by him, nor at his instigation, and that he is not famous for a frank adoption of, or a willing acquiescence in, the plans of others. Therefore, in spite of his inaction when interference might probably have marred the whole enterprise, we could never feel certain whether a United Italy was a fact which he would cordially and openly accept, or against which he would interfere in some indirect and subterranean fashion. If he had continued to withhold diplomatic recognition, we should have felt a constant insecurity, and have always fancied that he was lying in wait for some opportunity of throwing everything back into confusion, and of playing some new and unexpected card. By this public act he announces to the world that he now sees his way and has definitely resolved upon his course of policy; and that (unlike nearly every other French politician of whatever party) he is neither mean enough to envy, nor selfish enough to hate, nor timid enough to dread, Italian Unity and Independence.

But the recognition seems to imply something more even than this. It appears to us to involve the future as well as to explain and seal the past. Louis Napoleon has accepted and sanctioned a Sovereign who has annexed the dominions of the Dukes of Tuscany, Modena, and Parma, and those of Francis II. of Naples:—henceforth those Princes are to French officials merely exiles and pretenders. For the sake of the creation of a United Italy, he has permitted and recognised the absorption of four or five independent States, and of a large portion of the territories of another Potentate. He can scarcely have done this without admitting to himself the obvious conclusion that the union of Italy is not complete, so long as two other Potentates yet hold by force a portion of the country. Naples, Sicily, Tuscany, and the Æmilian Provinces, as well as Lombardy, joined Piedmont and chose Victor Emanuel as their King by the free voice of the people. That voice speaks just as clearly and even more unanimously in Venice and in Rome; and is only prevented from resulting in the same action by foreign force—by Austrian troops in the one case, by French troops in the other. There is no one assignable reason why the earnest popular demand which was held decisive in the other cases should not be listened to in these also, except Imperial will in the one case, and the comparative weakness of Italy in the other. We are satisfied, from what we learn from reliable sources, that the Emperor is fully prepared to accept the logical consequences of past proceedings, and to withdraw his troops from Rome as soon as Victor Emanuel is prepared to take his place in maintaining order, if the Papal question cannot be formally settled by previous negotiations. And as regards Venice, we cannot but consider the official recognition of Victor Emanuel as a plain intimation that he considers the completion of the great work of Italian amalgamation, by the annexation of Venetia, as only an affair of time. Since the entry of Garibaldi into Naples there has been no event nearly so significant or so auspicious.

Of course our remarks are all made on the assumption that the meditated recognition is *unpurchased and unconditional*. If accompanied by any unworthy bargain or dishonouring terms, it will lose all its grace and more than half its significance and value. This is a point on which the European public will be anxious for reassurance. The Savoy business, with the protestations which preceded it, has generated a very natural mistrust.

THE PRUSSIAN QUARREL.

The Prussians have published the debate in the House of Representatives concerning Lord Palmerston's comments on the Macdonald affair. Naturally enough the Prussians are very angry. They accept the version of the matter current among their countrymen, as we acccept the version current among our countrymen. That the evidence is somewhat conflicting as to the conduct of Captain Macdonald, that the offensive expressions used by Herr Möller were exaggerated in translating them into English, and that the language used in the protest of the Bonn residents was excited somewhat beyond the mark, no one who has looked calmly into the evidence will deny. For our own parts, we believe that the Macdonald version is truer than the Parow version of the transaction; but we have no intention of going back to a question now almost *passé*, and return to the subject only to comment upon the recriminations to which it has given rise between the two nations. We assert, then, that there is quite enough conflict of evidence to render it very natural, and even excusable, that the Prussian deputies should decline to accept our view of the affair,—and that were the position reversed, it is decidedly probable, if not certain, that we should take exactly the same view of the matter which the Prussian deputies express in their speeches. No nation is more apt to fancy, and to resent what it conceives to be, foreign impertinence than the English,—and had it been generally rumoured that a German traveller had behaved as it was generally assumed in Prussia that Captain Macdonald had behaved, his connection with the throne would only have increased instead of diminishing the national wish to see him subjected to the legal penalty. Lord Palmerston laid, we think, quite undue stress on Captain Macdonald's rank as belonging to the "body-guard of the Sovereign." That, had the circumstances been reversed, would have been just the point to excite English indignation, and effectually to prevent any interference of the administration in the affair.

The truth certainly is that there are two beliefs on this matter,—both beliefs supported by a certain plausible amount of evidence, and that each nation has naturally enough accepted that which justified its own Government and appeared to condemn the conduct of the other. We sincerely believe that Herr von Vincke had quite convinced himself that the English traveller had offered an insult to a German lady, though to our minds the evidence is quite satisfactory that no such insult was really offered. At all events it is well to recollect that two views of such complicated circumstances as these are quite possible,—that it is not necessarily mutual ill-will, but at worst justifiable prejudice, which inclines the two nations to adopt different views, and that the conduct of Englishmen abroad is not always such as to render us very popular as a nation.

The English are not remarkable for national candour, and though we heartily believe that Captain Macdonald was harshly and unjustly treated, we are as fully convinced that this is not the general Prussian opinion, and that their view is honestly held, if not very strongly supported. Under these circumstances, we hope that the discussion in the Chamber at Berlin will be regarded as a fair set-off against Lord Palmerston's somewhat strong statement of the English case, and that we shall hear no more of this ground of quarrel between two nations who have so much need of each other's friendship.

BELLIGERENT PERPLEXITIES.

THOUGH till this week's accounts no blood yet appears to have been shed, except by riot, accident, or individual assassination, the war may be considered to have actually begun between the two halves of the severed Republic. At sea, hostilities have actually commenced, not indeed, by *bonâ fide* fighting, but by reciprocal seizures. The blockade of the Southern ports has been extended, in a more or less effective and more or less continuous fashion, and has now reached the busy city of New Orleans. Many vessels have been captured by the blockading cruisers, rightfully or wrongfully; some have been released, and others have been retained as lawful prize. Several more have been warned off, and obliged to return home or carry their cargo to other markets; and even, it is said, when there was no actual blockade to justify such a proceeding. Some of these ships were British. On the other hand, we learn that several prizes have been taken into New Orleans by the privateers of the seceding States. We read also of British subjects in the South having been impressed and *forced* to serve in the volunteer ranks; and of British subjects in the North having spontaneously proffered their services to the Federal army. It is impossible at present to guess how much of truth and how much exaggeration there may be in these various accounts; but there is enough to raise the gravest uneasiness as to the difficulties which lie in wait for neutrals when two exasperated foes like the present belligerents take international law into their own hands. In every capture and in every stoppage of a merchant ship on the coast of America lie the almost certain seeds of a misunderstanding and a dispute, and the possible seeds of a bitter quarrel. Few seizures are so clearly rightful and legal as to leave no case for litigation or complaint; and where litigation begins between the wrong-doer and the victim with no tribunal of supreme and unquestioned authority to appeal to, war is seldom far off. In questions of prizes, too, and in those of compensation for wrongful detention, the assailant and the plunderer chooses his own Court of Adjudication, and is heard before judges certainly prejudiced in his favour and often nearly as passionate as himself. It is not very likely, therefore, that the sufferer should acquiesce in the decision of such a tribunal. If he feels that he has even a plausible case, he is pretty sure to appeal to his Government for redress, and diplomatic disputes between the two countries are the first consequence, and peremptory words and action too probably the second. Let us specify two cases, which may any day occur, and both of which we are assured have already occurred.

Charleston is blockaded by the Niagara steamer. She announces to all comers the existence and efficiency of the blockade, stops and warns off several ships, which respect her warning and sheer away. But, wanting coal, or having some other errand on hand, she sails away for two or three days, and the blockade, though nominally continuing, is virtually raised, and according to the law of nations ceasing to be effectual, cannot claim respect. During this interval of unquestionable freedom, a British ship comes out. The Niagara, which has returned to her station during the night, catches sight of her at early dawn as she sails away and captures her. Is the capture good or not? Clearly "Yes," say the Americans, for the blockade had been announced, and the Niagara came back in the nick of time. Clearly "No," say the English, for the blockade had been raised, the blockading force having been withdrawn.

Again, a British barque with a valuable cargo bound for Savannah is intercepted by the United States steamer. She is told by the Captain: "Savannah is blockaded: you must go elsewhere." She believes the statement and obeys the order, loses her market and at great expense prolongs her voyage. It then appears that the statement was false; Savannah was not blockaded at all except in the wish and fancy of the Yankee Captain, and there was nothing to prevent the barque from going to her original destination and disposing of her cargo according to the merchants' orders. On learning this deception she demands compensation for her loss. We are just *in* demanding this,—will the Americans be just enough to concede it? and who is to assess the damage?

But another and even graver difficulty may not improbably arise. The irritation against England both at Washington and New York, and, indeed, throughout the North, is extreme, and as irrational as it is blind. Private letters intimate that, on the arrival of any untoward news, or the occurrence of any casual cause for suspicion or exasperation, this fearful passion may break out into acts of violence against individual Englishmen, or even into insult to our flag or our Ambassador, for which we may be compelled to demand apology and redress—neither of which will the Government or the people be over-prompt to grant.

Their home perplexities are scarcely less serious. They have already taken some prisoners on both sides, and will, as soon as fighting is begun in earnest, take many more. What will the North do with *its* captives? If it hangs them as rebels, according to the official view which it takes of the conflict, all the world will cry out against the savagery of the act, and the South will be speedy in making bloody reprisals. To hang the officers and let the privates go free, as has been proposed by some, would add illogicality to barbarism, would exasperate without intimidating, and would of course be repaid in kind. If, on the contrary, as will obviously be the case, the captives are treated as prisoners of war, and either exchanged or liberated on parole according to the usages of civilised warfare, then the Federalists will have virtually ceded the main point at issue by treating the Secessionists as ordinary belligerents;—and in that case what becomes of their indignation against England for merely anticipating their difficulty and their solution of it, and for doing in May what they themselves are forced to do in June?

The Slavery question has already come across their path. They are campaigning in a Slave country, and are warring against the masters of Slaves. Are those Slaves the "goods and chattels" of belligerent and rebel masters, and as such liable to seizure? But as soon as taken possession of by Free Unionists, their condition as "property" is at an end, and they become an embarrassment and not a gain. Are they to be regarded as victims and therefore enemies of their masters? If so, they are allies of the Federal troops, and insurrections afford a most valuable diversion in their favour. But the North is yet far from being prepared either to end Negro Slavery or to encourage a servile war. Again: fugitive Slaves are beginning to arrive in considerable numbers at the Federal camp:—how are they to be received? As deserters from the enemy? As natural allies, to be welcomed and employed? Or as embarrassing auxiliaries, to be deterred as much as possible from showing themselves? The several proclamations that have been issued, and the correspondence between General Butler and the Secretary at War, show rather curiously how puzzled and uncertain on these subjects the public mind at the North still is. At first they were disposed to announce a resolute determination not to interfere with private property, and to have nothing to do with self-emancipated Negroes. Now the number who have sought refuge with them are forcing upon them some decision—at least the adoption of some plan or principle of action. If they receive them cordially, they virtually declare against Slavery; and cannot without double infamy surrender them after the conflict is over. If, on the other hand, they either repel them or intimate that they will not protect them, they are giving a vast indirect assistance to their foes, declaring their adhesion to the "domestic "institution," and incurring the condemnation and alienation of the Anti-Slavery party in every State and country. The provisional decision they have come to is amusingly illustrative of their perplexity:—they have declared the Slaves "contraband of war," and receive and employ fugitives as *labourers* but not as *soldiers*. Is it too much to hope that the rapid multiplication of all these perplexities may deter the belligerents from fighting at all, or force them to an early accommodation of their differences?

THE FRENCH TREATY AND THE WINE TRADE.

THE great reduction of the wine duties which Mr Gladstone effected last year was at the time much canvassed. It was said that wine was an article of pure luxury,—that its use was confined to but a few classes,—that no other classes could be tempted to use it,—that the taste of the English nation was determinately fixed on a very few kinds of wine, and that it was useless to attempt to popularise a partiality for any other sorts. We ventured at the moment to impugn

these theoretical and conjectural assumptions. We expressed an opinion that in this case, as in other cases, a diminution of duty would be accompanied by an augmentation of trade, and that an increase of cheapness would be accompanied by an increase of consumption. The time has now arrived, and only perhaps just arrived, when we can really test the arguments on both sides by the indisputable criterion of experience.

First, there can be no doubt that the import of wine into this country has very largely increased. The quantities imported during the last six years have been as follows:—

Years.	gallons.
1855	8,946,766
1856	9,481,880
1857	10,336,845
1858	5,791,636
1859	8,195,513
1860	12,433,362

showing, as the Commissioners of Customs remark in a recent report, an increase in 1860 of "100 per cent. over 1858, "and 20 per cent. over the highest previous year, 1857."

But it is objected that these figures are not conclusive; that an increase in importation is no criterion of our increase of actual consumption; that we must refer to the accounts of the quantities which were taken out of bond in each year for actual use, and that this will warrant a very different conclusion. It cannot be denied that in appearance it does so. The quantity of wine taken for actual consumption in 1860 presented only the most trifling increase over that so taken in 1859, notwithstanding the great increase in the importation which we have stated. The figures are:—

	gallons.
Wine taken for home consumption in 1859	7,263,046
— — — 1860	7,358,192

But this singular anomaly is explained by referring to the provisions of the French treaty, and by considering the facts of the last few months. There was by the treaty to be a prospective deduction of the duty on wines, which only came into operation on the 1st of January, 1861. Until this time "the trade" only lived from "hand to mouth": they paid duty on what was absolutely necessary; and left the rest in bond until the whole of the expected diminution in the duty should have come into effect. The change has now been some months in operation, and the result has been as follows:—

	gallons.
Quantities of wine taken for home consumption in the four months ending 30th April, 1861	4,406,806
— — — 1860	2,581,566
— — — 1859	2,430,764

showing that there has been a very large increase in the quantity of wine really used by the population, and that the taste for wine has, therefore, been very materially stimulated.

In direct defiance of what may be called the old English theory, French wine partakes of this increase. Even in 1860, when the entire quantity consumed did not augment, the quantity of French wine consumed did augment. We find that

	gallons.
In 1859	695,913
And in 1860	1,125,599

of French wine were consumed in England, which is a large augmentation; and in the last four months, during which the consumption of all wine has been increasing, French wine fully partakes in that increase, as will be seen from the following table:—

QUANTITIES entered for HOME CONSUMPTION.—Four Months ended 30th April.

	1859. gallons.	1860. gallons.	1861. gallons.
Of British Possessions in South Africa	262,172	169,226	141,766
Of other British Possessions	974	796	3,681
Foreign—From Holland	30,488	61,539	113,860
France	199,163	372,906	903,228
Portugal	676,309	607,426	1,129,393
Madeira	10,137	8,209	12,551
Spain	990,736	1,067,736	1,661,461
Canaries	1,033	1,110	1,650
Naples and Sicily	79,749	86,183	96,871
Other countries	78,812	109,833	168,594
Various countries mixed in bond for consumption (without intermixture)	101,191	96,602	173,751
Total—Of wine	2,430,764	2,581,566	4,406,806
Red	974,965	1,010,336	2,116,991
White	1,455,799	1,571,230	2,289,815

Nothing can show more conclusively the wisdom of the alterations which were made last year than these facts. It is shown that cheapness has produced its effect in the case of wine just as in other cases; that there is no immoveable rigidity in the taste for wine in England; that a change of price will cause a change in the demand; that kinds of wine formerly little favoured will, after a pecuniary alteration, be extensively consumed. It is also shown that one of the most characteristic productions of France is well adapted to an augmented use in this country, and that the trade in it may be increased to an extent very beneficial to both countries.

It may be added, however, as a mitigating comfort to those who hold the old faith in old English wines, that the larger part of the importations since the alcoholic test has been introduced on 1st January, 1861, has been of strong wines. The facts are these:—

QUANTITIES entered for HOME CONSUMPTION at each Rate of Duty.—Four Months ended 30th April, 1861.

		Red. gallons.	White. gallons.	Total. gallons.
Under 18 degrees	1s	444,511	28,831	473,342
— 26 —	1s 9d	105,610	46,735	152,345
— 40 —	2s 5d	1,335,777	1,943,790	3,339,567
— 45 —	2s 11d	48,353	40,989	89,342
— 40 — (in bottles)	2s 5d	121,636	228,060	349,696
Arrears unclassed at old duty		1,104	1,410	2,514
Total		2,116,991	2,289,815	4,406,806

It is evident, therefore, that the conscientious votaries of port and sherry need not, as yet, take frantic alarm.

	£
The wine duty was in 1859	1,842,137
— — 1860	1,033,631
Being a diminution of	808,506

which is the cost of this part of the French treaty up to the end of the year. As, however, there was, as has been stated, a second alteration in the wine duties on the 1st January, 1861, no accurate estimate can be deduced of what that cost will ultimately be.

THE FRENCH DISCUSSION ON THE FREEDOM OF THE PRESS.

ONE of the most lively debates which the restoration of free discussion in the French Assembly has produced, was the duel between M. Jules Favre and M. Billault on Wednesday last concerning the restrictions on the French Press. M. Favre used great powers of debate on behalf of a great cause, and in opposition to a strong enemy. Even he did not venture to demand absolute liberty for the Press. The Republican party have apparently convinced themselves that this is inapplicable to the state of France,—that some limitations on the liberty of the Press are essential to the maintenance of a firm Government. But they do demand that the limitations on the liberty of the Press should be defined by law, and enforced by the tribunals, instead of being left to the discretion of the Government. They maintain that even a censorship would be better than the principle of arbitrary warnings addressed to the journals very much according to the fancy of the official whose business it is to watch the newspapers, and yet involving the suppression of the papers warned after a double remonstrance. It is a mockery they say to speak of liberty when no one knows what the consequences of free speech to his property may be; so that a censorship which left the responsibility of publishing or suppressing objectionable matter with the officials themselves, would be far less really oppressive to the journalists than this continued risk of heavy penalty. Indeed, M. Favre went so far as to offend the Liberal journals by the remark that the whole Press of France became the slave of the Government under such a *régime*,—an error of which the Minister happily availed himself to elicit a testimonial to the practical independence of many of the French papers. Knowing that the journalists would be the very last to admit their own absolute dependence, M. Billault appealed to them whether M. Jules Favre had in this respect spoken the truth, and did not appeal in vain. Even *La Presse*, which has always been in the van of the Liberal party in relation to the freedom of the French newspapers, promptly rebuked M. Favre for his rash slur on the Liberal journals, and thus gained for the Government an appearance of appreciating the independence of the Liberal journals more fairly than M. Favre himself.

But the oddest part of M. Billault's defence of the arbitrary Government jurisdiction was the use he made of the illiberal policy of the Orleanists. "From 1830 to 1847,"

he said, "the condemnations which had accumulated against "the Press represented nearly 250 years of imprisonment "and more than a million fines,—and yet the Orleanist "Monarchy fell." As *La Presse* very pertinently remarks, was not this in great measure the reason why the Orleanist Monarchy fell? The Government of Louis Philippe never tried to conciliate popular support. It dreaded the people, and as no one knows better than M. Billault,—for his reputation as an orator was made in a great speech on the gross corruption in the Orleanist elections,—always strove by the most discreditable means to save the Government from genuine contact with public opinion. The fines and imprisonments with which the Press was visited was but one token of this deep distrust,—and therefore it was that at the first sign of the popular uprising, Louis Philippe, knowing that he was at last face to face with the power which he had always treated as his worst enemy, fled at once. Would this have been so had his Government really striven to interpret the national will, and courted all the influences by which it could best ascertain that will? We believe not. We believe that in France, as in England, the people would not have been slow to rally round the throne had they believed that it was the willing representative of the national mind.

M. Billault further denies that the liberty of the Press is the true remedy for arbitrary acts on the part of the Government. The real remedy, he says, is the power of petitioning the Senate. "M. Jules Favre," he says, "gives expression to "new troubles. He is overwhelmed with grievances. Let "him refer them to the Senate; that would save him time." "Make me then," replied the ready orator, "a minister "without portfolio, otherwise it would be quite beyond "my unassisted power."

Sharp as the discussion was, with the force of the argument all on one side, there is every reason to congratulate France on the result. Such discussions cannot take place in the Assembly without influencing the public, and therefore also the Emperor, whose open mind seldom fails to note any indication of popular feeling. It is, besides, abundantly evident that this freedom of discussion in the Legislative Assembly does much to modify the extreme views of the Republican party. M. Jules Favre and M. Emille Ollivier are more different from the Favre and the Ollivier of the Republic in 1848, than the Imperial Government is from the Imperial Government just after the *coup d'etat* in 1851. If they continue to be at once as firm and moderate as they now are, the French Government will probably continue gradually to relax its grasp. At the time we expressed our earnest hope that the decree of November would bring forth this result; and we see daily more reason to believe that this hope may be fulfilled.

A REAL CALAMITY TO IRELAND.

It is not very easy to convince every one in England of the reality of an Irish calamity. It is generally believed that there is much exaggeration in all complaints that come to us from thence; it is shrewdly suspected that there is nothing substantial in very many which are laid before us to claim our pity or to stimulate our efforts. But there is one calamity which it is *said* may happen to Ireland, that really would be very serious and very real.

It is rumoured that the Irish convict system, which has been so admirably managed of late years—which presents such an admirable contrast to our painful English failure—may be remodelled, or crippled, or in some indirect way transferred to other hands. We should deprecate the latter calamity almost as much as the former. The present managers of the Irish system are its creators: they manage it with the capacity which belongs to original men and the vigour which belongs to interested men. In the hands of any other men, we believe upon the grounds we have so frequently explained, that its main principles would be sound, prudent, and judicious. But they would be less valuable,—they would be carried out by those who care comparatively little about them,—who perhaps partially distrust them,—who have no personal enthusiasm on their behalf. And it is possible that even these principles which have been so well tested might be materially modified and seriously impaired. We hope there is no good ground for anticipating these events. It would be a great calamity to Ireland if one of its few efficient offices should be rendered inefficient,—it would be a calamity to the world if the convict system which has succeeded the best should be relinquished the soonest;—it would be a still greater calamity if that system should be replaced by another which has been very unsuccessful.

THE SHIPMENT OF COTTON.

THE PROHIBITORY ACT OF THE CONFEDERATE CONGRESS. The Mobile (Ala.) *Register* publishes the Act passed by the Confederate Congress on the 21st of May, prohibiting the exportation of cotton except through the Southern seaports. It reads as follows:—

An Act to prohibit the exportation of cotton from the Confederate States, except through the seaports of said States; and to punish persons offending therein.

Section 1. The Congress of the Confederate States of America do enact, that from and after the 1st day of June next, and during the existence of the blockade of any of the ports of the Confederate States of America, by the Government of the United States, it shall not be lawful for any person to export any raw cotton or cotton yarn from the Confederate States of America, except through the seaports of the said Confederate States; and it shall be the duty of all the marshals and revenue officers of the said Confederate States to prevent all violations of this Act.

Section 2. If any person shall violate, or attempt to violate or evade, the provisions of the foregoing section, he shall forfeit all the cotton or cotton yarn thus attempted to be illegally exported, for the use of the Confederate States; and in addition thereto, he shall be guilty of a misdemeanor, and on conviction thereof shall be fined in a sum not exceeding five thousand dollars, or else imprisoned in some public gaol or penitentiary for a period not exceeding six months, at the discretion of the court, after a conviction upon trial by a court of competent jurisdiction.

Section 3. Any person informing as to a violation or attempt to violate the provisions of this Act, shall be entitled to one-half the proceeds of the article forfeited by reason of his information.

Section 4. Any justice of the peace on information under oath from any person, of a violation or attempt to violate this Act, may issue his warrant, and cause the cotton or cotton yarn specified in the affidavit, to be seized and retained until an investigation can be had before the court of the Confederate States.

Section 5. Every steamboat or railway car which shall be used with the consent of the owner or person having the same in charge for the purpose of violating this Act shall be forfeited in like manner to the use of the Confederate States. But nothing in this Act shall be so construed as to prohibit the exportation to Mexico, through its co-terminus frontier.

HUNGARIAN COMMERCE AND THE NEW RAILWAY COMMUNICATION BETWEEN BUDA AND TRIESTE.

On the 20th March a branch line of railway was opened in Hungary, which brings the metropolis of that country for the first time into immediate connection with Trieste and the Adriatic. Its starting point is at Buda, on the right bank of the Danube, from which point the line runs in a south-western direction to Kanizsa; thence again with a very slight deflection to the west to Pragerhof, at which point a junction is effected with the main line between Vienna and Trieste.

The whole export trade of Hungary to the Adriatic (with the exception of that part which is conterminous to the Istrian coast) has hitherto been carried on in the following manner:—Ships were towed by means of steamers or by horses along the Danube to Vienna; or goods sent by the railway that runs on the left bank; in each case the goods were taken from Vienna to Trieste across the Semmering. The length of the route from Pesth by way of Vienna to Trieste was 555 (English) miles. The difficulties and inconveniences connected with this traffic were innumerable. During one third of the year the Danube is entirely shut up by drifting or fixed ice; at midsummer the water between Posony and Vienna is often too shallow to allow a brisk traffic in heavy loads. In spring and autumn the rapids of the mighty river render towing by horse power extremely difficult and dangerous. As to carriage by railway, it must be remarked, that the sending of troops, military stores, war materiel, &c., has of late years reduced the traffic in articles of commerce to the lowest possible level, not only because from time to time such traffic was absolutely suspended, but even more in consequence of the uncertainty that prevailed, nobody knowing at what moment such a suspension might happen, or how long a time it would last.

But more important than all this were the difficulties arising from the nature of the road across that branch of the Alps which is known under the name of Semmering, and which separates Austria from the deep and long Styrian Vale. Notwithstanding the millions buried in the works of the Semmering, no heavy loads can be carried across the mountains, and this one circumstance reduces the export trade of Hungary *in that direction* to a minimum.

The nature of the goods which that country is best able to export, at least for the present, requires a line of traffic on which bulk and weight are no insurmountable obstacles to speed, and this requisite the Vienna-Trieste line could not afford.

The new communication between Pesth and Trieste will be carried on in the following manner:—the new line from Pesth to Kanizsa is 145 miles long, running the whole length over a level country. From Kanizsa to Pragerhof there is a junction line 73 miles long; and the portion of the main line from Pragerhof to Trieste is 187 miles.

The immediate advantages therefore are—1st, that the new road is shorter by 150 miles; 2nd, that the Alps of Lower Austria are avoided; 3rd, that no unloading will be necessary. The temporary disturbances arising from the unsettled financial affairs of the Monarchy, as also from the arbitrary usurpations by Government, must of course affect this as well as all other lines of communication; but should the Hungarian Diet once enter upon the exercise of its legitimate functions in the sense of the fundamental laws, and especially according to the laws of 1848, not only would the financial difficulties rapidly diminish, but the credit of the Empire being based upon the national will, all invasions of private rights and usurpations of private property by an absolute Government would become impossible.

Whether we consider topographically that part of Hungary which lies between the Danube and the Styro-Carinthian mountains, or look at those districts that form the rich and extensive plains between the Danube and Tisza, we can scarcely overrate the advantages of the export trade thus opened for Hungary,—indeed, not for Hungary alone, but for the remotest parts of Sclavonia and Transylvania, if no other influences than those of a sound political economy are allowed to direct the Company's activity.

According to the present regulations, the distance from Trieste to Buda-Pesth is a twenty hours' railway journey. The chief gainers by the new line are the large counties of Zala, Somoz, and Tehér, as they will be able to export their surplus of corn by rail, whereas formerly they were obliged to cart it under incredible difficulties, the former means of communication being very much similar to those which run through the swamps and forests of Canada. Styria, Carinthia, and even a part of Tyrol, have no nearer and cheaper market than the said counties, and the Tyrol-Carinthian Railway once completed (the works are carried on vigorously), a very brisk trade in that direction is tolerably certain.

To assert with any confidence what will be the export trade of Hungary to Trieste, now that the connection by rail has been effected, would be a matter of great difficulty. This trade must depend in great measure on the complete settlement of the political difficulties which distract the country. We can only, therefore, point out some branches of agricultural and manufacturing industry, which time and necessity have developed sufficiently to make them the objects of commercial enterprise. Wheat, maize, barley, and oats are in quantity as well as quality likely enough for exportation. Hungarian corn brought from the Lower Danube (Banat) to Pesth, and from thence by rail to Trieste, has already proved to be a match for the same article coming from Odessa. Flour sent by the steam mills of Izezed is a great favourite with the Italians, and there can be not the least doubt that one day the case will be the same as regards England. But to manufacture flour on a large scale requires capital, because experience shows that the produce of river mills cannot answer the purpose, and of mills worked by steam power there are in all some five or six in Hungary. A question of great importance is, whether maize will find a good market in England. A step for solving this problem was made last March, when a sailing vessel, with 2,000 tons of maize, left the port of Trieste for Liverpool. Messrs Bibby and Son will have a just claim to the thanks of Hungary should they succeed in opening a good market for this article.

Alexius de Tenyes, in his valuable work, "Statistics of the Kingdom of Hungary" (1842), estimates the annual produce of the realm in the above specified crops at 90 millions of Pozsony measures,* which is equal to 81 millions of Prussian scheffels, or only about 15,000 imperial quarters in round numbers The annual export at that time was put down by him at 3 millions. p.m., of which quantity a good third, he states, consists in oats. It may be remarked, that the finest wheat comes from the counties of Torontál, Temes, part of the military frontier, and Báis, although the immense plains between the Tisza and Danube, with very slight exceptions, as also great part of the counties on the right bank of the Danube, are extremely fertile.

Among the Hungarians maize is much cultivated, although the only use they make of it is the feeding and fattening of swine. But in the south-eastern part of the country, as also in Croatia and Sclavonia, maize is also the chief nourishment of men; and, strange as it may appear, the Roumans, Servians, and Croats would not exchange their sweet cakes, prepared from the flour of maize, for the finest white bread of the Banat.

Wool and wine are destined to play a prominent part in the export trade; the former, from the want of home consumption; the latter, on account of its cheapness, and its capacity for bearing, in an astonishing degree, changes of climate. The Hungarian vine-grower becomes every day better acquainted with the manner of rendering his produce palatable to English taste; and, notwithstanding the advantages France possesses from her vicinity, a good share in this branch of trade is sure to await the generous vintage of Hungary.

Timber in every variety and to any extent may be had from the vast forests, which, not unlike the virgin forests of North America, are, in several parts of the country, as yet untouched by the axe. The gigantic stone-oaks, which an English engineer, Mr Clark, was the first to turn to account, when preparing the piles for the suspension bridge between Buda and Pesth, could easily be placed at the disposal of ship-building firms in Great Britain; and for other building purposes timber may be had from the forest of Bakony, without its being necessary to go to the forests of Sclavonia, or to the firs and pines, unsurpassed in beauty, of Marmaros. The staves for casks are already much in use in this country, and it is generally admitted that they are superior to those coming from New Orleans.

That the hemp of Apathin* is second to none in the world will be admitted by all ropemakers who make use of it. There can be little doubt that as soon as a direct communication by means of steamers shall have been established between London and the Pesth-Trieste Railway, Hungarian hemp will become a staple article with English ropemakers. The same may be said as regards hides, pork, tallow, &c. Dried fruit of excellent quality is also produced in Hungary, the latter passing often under the name of "Prunes de Bordeaux."

This is but a rough outline of the commercial prospects of Hungary, and at present one rather of promise than of certainty; yet even this promise can only be realised under one condition,—that of political tranquillity, which involves justice from Austria to Hungary,—so long withheld, and even now so faint a hope. The English nation scarcely knows how eagerly Hungary looks for its political sympathy and aid, as well as for that commercial intercourse which may draw the political ties between Hungary and England still closer. If it did, it would scarcely look with much approval on the cheers with which a certain large section in the House of Commons uniformly greets Lord John Russell's declarations of sympathy with Austria, and of his wish to see the great constitutional struggle terminated in a way which must prove fatal to the hopes of every Hungarian patriot.

* The designation for it in Hungary is p.m.

FIRST REPORT FROM THE SELECT COMMITTEE ON PUBLIC ACCOUNTS.

THE Select Committee appointed for the examination from year to year of the audited accounts of the public expenditure, have made progress in the matters to them referred, and have agreed to the following first report:—

Your committee have judged that they should perform the duty entrusted to them most usefully if they directed their attention first to the accounts of some of those services, the estimates for which have not yet been voted. In this view they have considered the accounts for the revenue of the year 1859-60; the last year for which these accounts have been audited.

Your committee have had before them Mr Romilly, the chairman of the Audit Board, and Mr Shephard, the inspector of the Revenue Accounts. They have also examined Sir Thomas Freemantle and Mr Dobell, from the Customs; Mr Gripper, one of the chief accountants of the Inland Revenue; Mr Sendamore and Mr Milliken of the Post Office; and, lastly, Mr Anderson, the financial clerk of the Treasury.

The nature of the revenue accounts and the mode of auditing them is fully explained in the evidence. From that evidence it appears that the accounts of the payments into the revenue are checked in detail in the separate departments, but that on auditing the income accounts at the Audit Office the Board rely mainly on the detailed examination made by the several departments, but exercise no detailed or efficient check themselves.

Your committee have no reason to impugn the manner in which the departmental examination is carried on. But they suggest for consideration, whether the advantage of the independent check of the Audit Office over the receipts might not be secured either by a concurrent audit or by an examination from time to time of a portion of their accounts by the Audit Board. By the latter plan, though no complete audit would be made, a test of the accuracy of the departmental examination would be applied.

With respect to accounts of the expenditure of the revenue departments the case is different. The accounts of the expenditure are checked by the several departments, and are subsequently audited at the Audit Office. The efficiency of this audit does not appear to be the same in all the accounts. In the expenditure accounts of the Excise, the audit is stated to be effective. But some portions of the other revenue expenditure seem not to come under the detailed examination of the Audit Board.

Your committee have not thought it their duty to suggest any remedy for such partial defects. To do this would require official

* The principal locality for that article in the Banat.

information and inquiry. They must content themselves with calling attention to the evidence on this point. An effective audit of all accounts by an independent board is most valuable.

Your committee proceed to call attention to a point to which they attach much importance.

To enable Parliament to obtain a satisfactory account of the expenditure on any vote, it is essential:—

1. That the vote should be taken "for services which will come in course of payment during the year."

2. That at the close of the financial year (viz. 31 March), the account should be closed, and no balance be carried on to meet payments in a subsequent year.

3. That the account should be audited by the Audit Board, and any balance declared by the auditors should be restored to the Exchequer.

4. That the Audit Board should present to Parliament an appropriation account, setting forth the amount of the vote, and of the expenditure; and this in sufficient detail as to the items included under each vote.

With regard to the revenue departments, the votes are for "the services which will come in course of payment within the year." The balance on the vote of one year is not carried on to be applied to the payments of another, and any balances remaining unissued from the Exchequer at the close of the year are surrendered.

It remains that an appropriation account should be framed annually by the Audit Board, and laid by them before Parliament; and that the sanction of law should be given to the whole arrangement, as has been done with respect to the army and navy accounts.

Your committee have the concurrence of the Board of Audit in this view, and the opinion of the different witnesses from the revenue departments, that such accounts could be prepared without difficulty. From Mr Anderson they have learnt that the subject is under the consideration of the Treasury, and a Bill has been prepared to carry into effect the recommendations of the Public Moneys Committee, which Bill includes the votes for the revenue services. As those recommendations are of an extensive character, and may require much consideration, both by the Government and Parliament, your committee would suggest that this improvement, as regards these revenue accounts, should be effected separately, and without delay.

In order to enable the Audit Board to present a satisfactory report of the appropriation of the expenditure on buildings, especially as regards the Post Office, your committee consider that it will be necessary that the estimate should be presented in greater detail. They would suggest that the estimate should specify the sum required for ordinary repairs, and the separate sum for each building not of an ordinary character.

Other questions have arisen in the course of this inquiry respecting the form in which the estimates should be framed. On these your committee purposely abstain from giving any opinion, as they do not consider these questions included in the order of reference.

Agriculture.

THE AGRICULTURAL POPULATION.

The Census just completed discloses the fact that in many of our agricultural districts there has been a diminution of the numbers of the people. And this is coincident with a general improvement in husbandry, which has required an increased number of workmen in the business of agriculture.

It will probably require a careful and precise analysis of the Census reports when published in a complete form fully to understand and explain this apparent anomaly. Yet it may well be that the numbers may be less in the purely agricultural counties, while improvement and a brisk employment of labourers may be going on. The demand for labour which has arisen of late years in all the great towns and in the manufacturing districts has taken off large numbers of lads and young men from the rural districts, and in fact the hands are less than formerly. But until recently agricultural labourers being badly paid, their labour was less effective than it has become, and is becoming, under the more active demand. The discussion on agricultural labour which took place at the London Farmers' Club, to which we recently referred, disclosed the great extent in which piece-work is being adopted in husbandry, and the benefits that system of employment confers on both master and man. Circumstances have drawn forth the force which slumbered in the peasants' arm; and the result has been that, though the labourers are fewer, they have done more work than heretofore.

There have not been wanting persons who have ascribed the diminution of population in certain of the agricultural districts to the enlargement of farms, but every one acquainted with the systems of management on our larger and smaller farms, is well aware that a large farm usually employs more labourers in proportion to its extent than a small one. The subject has been taken up by the "United East Lothian Agricultural Club," where, at a recent meeting, a discussion took place on "An inquiry into the decrease of population in some of the agricultural districts as apparently indicated by the Census returns." Mr Hope, of Fenton-Barns, presided, and, having strictly analysed the returns of his own district, said he was satisfied "from practical experience that, at all events in East Lothian, the number of people employed on the land is now much larger than formerly, and also that their employment is more steady both summer and winter." He had examined the returns for the parish of Dirleton, in which he farms, as divided into districts for the Census of 1851 and 1861, and also the gross returns of previous enumerations, with the detailed returns from every hamlet for 1821, and he stated the results with the inferences he drew from them.

In 1811, the total population of Dirleton was 1,211 persons; in 1831, the number had increased during the twenty years to 1,384; but during that period there were only an increase of three occupiers and two separate dwelling-houses. From 1831 to 1851, another period of twenty years, there was an increase of occupiers or families by 65, and of separate dwelling houses by 53, the increase of persons being 250. The additional dwellings erected from 1831 to 1851 forms a striking contrast to the two dwellings only which had been erected during the previous twenty years. During the last ten years, from 1851 to 1861, there is one additional occupier in Dirleton parish, but the dwelling-houses have *diminished* by 10 and the population by 94, or from 1,634 to 1,540.

How, then, was this diminution to be accounted for? The parish was divided into five districts. In one of those, exclusively agricultural, there had been no change, neither increase or decrease, between 1851 and 1861. In another there had been an increase of two persons. In a third a decrease of 29, in a fourth a decrease of 20, and in the fifth a decrease of 47. The districts in which the decreases had occurred were the villages; and bondagers being no longer required in the districts, the extra hands required at harvest being supplied by Highlanders and Irish who come into East Lothian for the season, there was not the same need for married labourers. It appears also, that in Gullane—a village—there are 15 houses unoccupied. Mr Hope also said: "I rather suspect that there has been a change in the population of the county, that the agricultural districts have become more strictly agricultural by the removal of tradesmen and others not employed in agriculture to the towns. Taking the village of West Fenton for instance, which I know well, I find that in 1821 it contained 191 persons, of which 33 families, numbering 150, were employed in agriculture, and nine families, including 41 persons, depended on trades, &c. Now there are only two families, including ten persons, engaged in trade." Now if this sort of change is going on throughout the agricultural districts of the kingdom, as is probably the case, it will account in part for the diminished population in those districts.

There is no doubt that farmers of late years have obtained their implements from the great manufacturing firms, and less from their own immediate neighbourhoods than they once did, and increased facilities of intercourse have led them to go to the larger and better markets for many of the commodities they require, both in business and for domestic uses. To return, Mr Hope said: "In looking over the returns from 1811 till this date, the most noticeable feature is the almost stationary state of the population during the first twenty years, and this is what might easily be inferred from the history of agriculture during that period. During the first thirty years of the present century there was no change in the rotation of crops, farmers were only distinguished by their more or less skilful conducting of the ordinary labours of the farm. The cutting off of springs in the land and the application of lime were the principal improvements effected. I have a vivid recollection of the farming and the state of the agricultural labourers in 1831. At that period it was the constant subject of discussion, how employment was to be found for the rural population. Spade husbandry was advocated, and trenching the soil was extensively practised even in this county. You could at the shortest notice obtain labourers by the hundred at 8s or 9s per week. But, fortunately, better times were in store for all connected with land. Smith of Deanston, by his advocacy of thorough drainage, and the introduction of tiles for that purpose, created a new era in the farming of the kingdom. It was between 1831 and 1841 that this change occurred, and turnips and other green crops were substituted for plain fallows. Labourers more readily found employment at better wages. More houses were built, and the population rapidly increased. More lately, from facilities afforded by the use of artificial manures, the cultivation of the remunerative potato has wonderfully increased; while from the improved trade and increased wealth of the country, the profits obtained from feeding cattle and sheep are very different since I first recollect, and have steadily added to the wealth of the farming community." This indicates the change which has occurred in the well-farmed county of East Lothian, and more or less elsewhere. And Mr Hope justly added, that more attention should be paid to the dwellings and comforts of the rural labourers by the landlords and farmers whose rents and profits had thus been enhanced. Mr Scott Skirving entirely agreed with Mr Hope that improved agriculture requires more human beings to perform the labour of the farm, and that totally irrespective of all improvements of machinery. He attributed to emigration of labourers great part of the decrease in agricultural districts. Mr Durie said, that in his own district of the county, which was purely agricultural, the population had increased 13 per cent. during the

last ten years, "which," he said, "shows that a population entirely dependent upon itself for the sources of labour—there being no manufacture in the district—does not decrease. It is, therefore, a fallacy to say that the rural districts require less agricultural population than they did, and it is also a fallacy to say that they have less, because they have at present *more effective working people* than ever they had, in consequence of their being more men and women required. In conclusion, it was unanimously agreed, "That it is the opinion of this Club that the apparent decrease of the population in the agricultural districts is caused principally by the limited cottage accommodation of most farms, and also by the removal of various classes of tradesmen into towns." This will, perhaps, furnish a clue to the examination of other rural districts in which there has been a decrease of population.

ANNUAL REPORT OF THE BANK COMMISSIONERS OF MASSACHUSETTS.

ABSTRACTS OF THE RETURNS FROM THE BANKS AND FROM THE INSTITUTIONS FOR SAVINGS IN MASSACHUSETTS. By OLIVER WARNER, Secretary to the Commonwealth. Boston: Wm White, Printer to the State. 1860.

FROM the first of the above official publications it appears that the total number of banks in operation in the State of Massachusetts, in September, 1860, were 178, of which two were established in the previous twelve months, with an aggregate capital of more than 66 millions of dollars (over 13,000,000*l*). Of these, 42 were in Boston, with a capital of 37,700,000 dols (about 7,550,000*l*), and the other 136, with a capital of 28,300,000 dols (about 5,700,000*l*), were in other parts of the State. In their general remarks the Commissioners complain strongly of the laxity of arrangement of some of these institutions, and of the manner in which they contrive to evade the existing law. The Commissioners, however, recommend further measures of restriction.

The second work gives an account in detail of the position of the various banks and institutions for savings in the State.

COAL: Physically and Socially Considered. By J. HUSSEY VIVIAN, Esq., M.P. James Ridgway, 169 Piccadilly.

THIS pamphlet contains the speech of the Member for Truro in the debate which took place in the House of Commons upon the coal clause in the commercial treaty with France, together with a lecture on coal delivered at the Truro Institution five years ago. Mr Vivian is evidently well versed in his subject, and his account of one of the greatest staples of the kingdom—one, he contends with much reason, of the very highest importance to English power and wealth;—will be read with much interest by all classes. There is one point upon which it is satisfactory to be reassured by a practical man, viz., the extent of our present supplies. From a careful estimate, Mr Vivian finds that the coal-field of South Wales alone "could supply all England for 500 years, and her own consumption for 5,000."

BRITISH SETTLERS IN INDIA. A Memorial to the Secretary of State for India. James Ridgway, Piccadilly. 1861.

THIS memorial is in answer to a minute by the Lieutenant-Governor of Bengal, and claims to "show the fallacy of the statements and calculations contained in that paper, besides setting forth the true present condition of British settlers in Bengal." It enters into the question very fully, and contains a mass of extracts of evidence, &c., in support of the arguments put forward. The memorial is undoubtedly composed with much ability, and the case of the planters is made to appear very strong. Its tone is also generally temperate,—a rare qualification in works of this nature.

GENERAL LITERATURE.

EXPLORATIONS AND ADVENTURES IN EQUATORIAL AFRICA. By PAUL B. DU CHAILLU. John Murray, Albermarle street.

MR DU CHAILLU'S volume of African adventures bids fair to hold its ground as the book of the season. The excitement at first roused by its novel descriptions of human and animal life in hitherto unexplored parts of Africa, is kept alive by the battle of pens now waging over its credibility.

Nothing could well have happened more advantageous to a rapid sale of the work; but whether the reputation of the writer will be equally benefited by the discussion, is open to grave doubts. At present, to our thinking, the tide of war runs against him. His published answers to some serious charges brought against his work are but lame and imperfect, yet surely it behoves him to disprove if possible, and as soon as possible, such accusations as that of using old plates of well-known animals and plants, to figure his professedly newly-discovered species.

Into the zoological part of the question, however, we are not qualified to enter. It must be left to naturalists to decide if Mr Du Chaillu has, or has not the merit of adding twenty new species of quadrupeds, including two kinds of apes hitherto unknown, and sixty fresh varieties of birds, to our previous knowledge. A satisfactory answer to this question will no doubt be given in time; meanwhile we may make some guesses, at least, at the ultimate verdict by an attentive examination of the work in which he asserts his claims to the gratitude of the scientific world.

There is no doubt that he is an entertaining writer:—is he as plainly a truthful one? Is there that air of sincerity, that clear and straightforward spirit in his narrative, that would lead us to trust his statements in matters upon which we have only his word to rely? We scarcely think that there is. In saying this, we are not stumbling at the marvels he relates as in themselves incredible. The ourang-outang in his native woods is almost as terrible a monster as the gorilla, nor is the gorilla now for the first time described; the nest-like shelter of the bald-headed ape is not so wonderful a construction as the dam of the beaver; the Fans are, it is true, a strong and uncanny specimen of the cannibal man; still cannibals we know do exist, and varieties in cannibalism may be granted. Our objection lies simply in this, that the narrator does not, by his exactitude in those things about which we can judge, inspire us with sufficient confidence in himself for our credulity to bear, without misgivings, the strain he puts upon it with regard to others which we must take upon his sole authority, or not at all. There is a want of directness and accuracy in his journals; their writer never forgets himself in the absorbing interest of his pursuits and discoveries. He is, on the contrary, intensely self-conscious. Comparing his narrative with those of other African travellers, especially with Dr Livingston's, the most widely and deservedly popular, we are struck with its looseness and superficiality, with the vagueness of its descriptions, and its frequent repetitions. Effect appears to be the thing aimed at throughout—to startle and amuse, the desired end. Such was the impression made upon us by a first perusal, and closer examination has only confirmed and heightened it.

We cannot feel much confidence in the accuracy and reliability of a traveller who gives a double version of one year's work, who contradicts in one set of chapters the whole contents of the preceding,—and this is what Mr Du Chaillu has done.

The events of 1848 are related in two several parts of his volume, under totally different circumstances, and as taking place in separate regions at the same time. Whatever may be his claims as a discoverer, there can be no doubt in the mind of a tolerably careful reader that his journal contains gross contradictions; and if Dr Gray's letters are susceptible of a more complete answer than any they have yet received, we do not see how the letter in the *Athenæum* impugning his chronological accuracy can be answered to the satisfaction of his readers. In order to show how irreconcileable Mr Du Chaillu's statements are one with another, we have only briefly to recount what he did, and where he went, during the time which by his own account he devoted to travels of discovery.

Mr Du Chaillu repeatedly speaks of his four years' explorations. Of the eight years in which he lived on the Western Coast of Africa, he tells us in his introduction he will only give us the details of four—1856, '57, '58, and '59; the previous four having been passed almost entirely in mercantile concerns. Instead of four years, we can only find three years and one month accounted for as spent in actual travel, namely, from January 1856, when he began an acclimatising stay in the Gaboon country, to February 1859. The intervening months up to June of that year, in which he returned to the Gaboon on his homeward journey, were passed in rest and in looking out for a return vessel. They only fill the two concluding pages of his volume.

Three years and one month of time are thus allowed for events that amply fill four years. This difficulty is met by reckoning the year 1858 twice over,—a simple and efficacious remedy, much assisted by the general obscurity and irregularity of the dates throughout the volume. It requires a rather careful search, and many back references, before we can gain a clear notion of his whereabouts at any particular time, or the relative chronological bearings of his various expeditions.

Early in 1856 Mr Du Chaillu set out from the Gaboon and ascended the river Muni. In August we find him among the Shekiani; and by September he has penetrated 150 miles Eastward from the coast, reached the ranges of the Sierra del Chrystal, and made acquaintance with its savage inhabitants, the gorillas and the cannibal Fans. This is altogether the most exciting portion of his adventures. In October he returned to the Gaboon, his starting point and place of retreat during all his explorations; 1856 is finished off by a shorter trip up the river Moondah.

In 1857 we cannot find the precise date of Mr Du Chaillu's departure from the Gaboon; but by May he has reached Cape Lopez in safety, after a rather perilous sea voyage; on the first of June he is engaged in hunting up the country; on the 29th he is again on the sea-coast inspecting the slave barracoons and the state of the slave trade. He once more returns to the Gaboon by way of Fetich Point. This completes the second year's labours.

"During a somewhat protracted stay" at the Gaboon, our author prepares himself for his next and most important tour. This was to the Camma country, lying South of Cape Lopez, between that point and the mouth of the Congo. This region is as yet but little known, and any reliable information about it

cannot but be very welcome. On the 14th of February, 1858, he reaches Elindé, a native town at the mouth of the Fernand Vaz. By the 10th he is settled a little higher up the river at Biagano, where he builds himself a house and christens it Washington. This is his *point d'appui;* here he rests between his hunting excursions, and here he remains for some time, studying the character and habits of the natives, collecting specimens of birds and beasts, and attempting vainly to tame a young gorilla. From the 27th of May to the end of November he is engaged in exploring the Northernmost branch of the Fernand Vaz (the Ogobai) as high as the Anengue Lake—abounding in alligators, and rich in fish—and also in making excursions into the surrounding country. In December he is again at Biagano, or Washington, undergoing an unpleasant experience of negro facility in the art of poisoning. Fortunately, in this case, the skill of the savage was counteracted by an injudicious choice of means. Boulai, the cook, did not know the nature of arsenic, or was ignorant of the fact that extremes meet; he saved his master's life by over-seasoning his soup with the arsenic he had observed him using in the preparation of his skins. A little less liberal use of so convenient and cheap a poison would have ended Mr Du Chaillu's travels prematurely. This, we may remark in passing, was the only instance in which our author met with anything but kindness and hospitality from the natives; leaving out of view, indeed, many shrewd attempts at cheating, and driving of hard bargains, in which accomplishments the African negro would seem to be a proficient.

We have now reached December, 1859, and ought by rights to enter upon 1859. Instead of this, the next chapter opens with the date of January, 1858. This is startling. At first we concluded that this date must be a mistake for January, 1859. Not so. A whole year's adventures lie before us; and we are positively assured that February, 1859, terminated Mr du Chaillu's active travels. As we have before stated, he did nothing between that time and June of the same year, when he sailed for the Gaboon, and from thence to the United States. This is likewise clearly deduced from his preface written in April, 1861, in which he says that "during the twenty months I have passed in the process of writing out my journals since my return to the United States, I have often wished myself back in my African wilds." Twenty months would give July, or at the latest August, 1859, as the time of his return home; June as that of his return to the Gaboon; and February as the close of his actual explorations.

To what year, then, are we to assign the events of Mr Du Chaillus' final expedition up the river Rembo, the most Southern branch of the Fernand Vaz? 1858 has been already fully accounted for; of 1859 only one month remains before that February 10th in which, sick and exhausted, he reached the coast, and endeavoured to recruit his strength while waiting for a vessel to convey him to the Gaboon as the first stage on his homeward voyage. Nevertheless, a whole yearful of "moving accidents by flood and field" lies before the reader. We cannot accept our author's system of double entry, and confess ourselves at a loss what to suggest.

Only thus far is certain, that after recovering from the effects of the poison administered in December, 1858, he finds himself in the January of the *same* year so perfectly recovered that he starts on an exploring voyage up the Rembo; traces it up to the native town of Obindji; from thence takes a pedestrian journey of about a week to the Ashira land, the finest and most delightful country he had seen in Africa; visits early in November the village of Akoonga, "two hundred and forty miles East of Cape Lopez;" goes on a trip to some mountains to the South upon the 10th, returning upon the 12th. As a minor instance of the same inaccuracy, we observe that by turning over a page we find the 12th not spent (as we had just been told with many small notings down of the incidents of the day) in the return journey, but in climbing the principal peak of Mount Andele. This is a slight error that might be readily accounted for, only that there are so many like it scattered throughout the volume.

On December the 4th he collects food for a trip to the hills, the Western spur of the mountain range which, as he conceives, stretches Eastward across the whole continent, till it ends "probably in the country South of the mountains of Abyssinia," or perhaps terminates "abruptly to the North of the Lake Jangauzilla of Captains Burton and Speke." To this range of mountains he proposes to give the unpronounceable name of Nkoomoonabonali.

On the 2nd of January, 1859, half-starved, half-naked, with feet bruised and bleeding, and surrounded on every side by vast untrodden forests, he finds it impossible to advance: so, hanging the American flag from the top of the highest tree where it might overlook the forest below, he unwillingly returns upon his steps. "It was a sorry day for me. I longed more than I can tell to advance. It seemed too great a disappointment to stand as I did just here—to have within my grasp, almost, the solution of a curious and important geographical problem, and to leave it unsolved." On the 10th of February, as we have before seen, he reaches the coast.

Mr Du Chaillu alone can resolve this problem of his own making. We wait for the second edition of his work and its promised explanations with much interest; yet we confess with but faint hopes that discrepancies so deep as these can be explained away or reconciled. We would far rather believe in the truth of Mr Du Chaillu's amusing narrative than that it is only half true; a jumble of facts and fancies; of old journals and imaginative adventures, strung together upon one continuous thread.

If any part of the volume before us may be received with more unreserved credit than another, we should say it was that relating to the character of the natives, more particularly of the tribes residing near the coast. Mr Du Chaillu appears to have studied them attentively; and, as the son of a merchant for many years established among them on a friendly footing, he had peculiar advantages for the study. His conclusion is a hopeful one for the future prosperity of Africa, if once its fertile interior could be opened up to foreign commerce. The native negro is a very different being from his American descendant. The same careless, pleasure-loving, excitable, superstitious nature lies indeed beneath, but freedom, and the necessity of self-dependence, has sharpened and stimulated the faculties which slavery deadens and destroys. Stupidity at least cannot be laid to the charge of the African negro, or at any rate not in those places in which he has any contact with civilised men. Livingston found the tribes on the Eastern side of the continent not indisposed to trade with and learn from the white man. On the West Coast and far into the interior Mr Du Chaillu remarks that "the most characteristic point about the Nepongwe—indeed of all the negro tribes I have seen—is their great eagerness and love for trade." To establish a factory and obtain an advance of goods from a white trader is the universal desire; to cheat him if possible the universal custom. This eagerness for commercial intercourse with distant nations would be of incalculable benefit to Africa, if it were not poisoned by the immoral traffic in slaves, and stunted by a false system of trading. We will give Mr Du Chaillu's account of the routine of commerce on the Western Coast:—

"The rivers which are the only highways of the country, are, of course, the avenues by which every species of export and import must be conveyed from and to the interior tribes. Now the river banks are possessed by different tribes. Thus while the Nepongwe hold the mouth (of the Gaboon) and some miles above, they are succeeded by the Shekiani, and these again by other tribes, to the number of almost one dozen before the Sierra del Chrystal Mountains are reached. Each of these tribes assumes to itself the privilege of acting as go-between or middle-man to those next to it, and charges a heavy percentage for this office; and no infraction of this rule is permitted under penalty of war. Thus a piece of ivory or ebony may belong originally to a negro in the far interior, and if he wants to barter it for 'white man's trade' he dares not take it to market himself. If he should be rash enough to attempt such a piece of enterprise his goods would be confiscated, and he, if caught, fined by those whose monopoly he sought to break down, or most likely sold into slavery." "This would seem to work against the white trader by increasing the price of products. But this is only half the evil. Although the producer sold his ivory, and though it was resold a dozen times, all this trade was only a commission business with no advances. A very small remainder—too often nothing at all—is handed to the poor fellow who inaugurated the speculation or sent the tusk." "The consequence is, that the interior tribes—who own the most productive country—have little or no incentive to trade, or to gather together the stores of ivory, bar-wood, ebony, &c., for which they get such small prices, and these at no certain intervals, but often after long periods, even years elapsing sometimes before a final settlement is found convenient. Thus they are discouraged, and perforce remain in their original barbarism and inactivity."

We could fill more than one column with amusing illustrations of negro acuteness and sharp practice in business matters, but quotations from a book so generally known are unnecessary, and would be superfluous even if our space permitted their insertion here. We take our leave of Mr Du Chaillu too much amused by his "Explorations and Adventures" to think our labour wasted in reading them, whatever may be the proportion of truth or fiction they contain.

FILIPPO MALINCONTRI; or, Student Life in Venetia. An Autobiography. Edited by GIROLAMO VOLPE. Translated from the Unpublished Italian MS. by C. B. CAYLEY, B.A. George Manwaring, 8 King William street, Strand.

IN books, as in pictures, much depends upon the point of view from which they are beheld. A picture that looks distorted or indistinct under one light, shall make a pleasing and harmonious whole when looked at from another; and no book, whether good or bad, will show its whole worth or worthlessness unless the reader will take the trouble to put himself in some degree into the writer's place, to comprehend his aim in writing, and to judge him by the standard he himself has set up.

To one who will do this, the autobiography now before us will not be without a certain value and interest. As a record of individual character it is somewhat colourless,—as a romance of real life it has little variety or attraction. The events of Filippo Malincontri's student life are few and unexciting,—the love story that threads it through is pretty, but far from absorbing. There is nothing remarkable either in the position or character of the hero,—yet these apparent disadvantages are not real ones, since in fact it is precisely in the every-day nature of the events it records,

in the absence of anything uncommon in the student or his history, that the real value of the autobiography consists.

Taking it for granted that the history of Malincontri's early life and education is a real one—and it seems to us to bear the stamp of genuineness—his experience becomes the more important as it represents the experience of many; his character the more worthy of study as it illustrates the effect upon the better and, we trust, the larger part of the youth of Venetia of the influences which are brought to bear upon them from their earliest years by the Austrian Government. If any evidence were needed of the ingrained badness of that Government, and of the impossibility of Venetia becoming, in anything but name, a part of the Austrian Empire, or a source of strength to her rulers, it would be furnished by the testimony of this book to the corrupt and pernicious system of education enforced upon the people, in which "a strict supervigilance and superintendence is exercised over them (the scholars) by the Government, not with a moral or religious object, but purely for infamous political ends, in order that they may turn out obedient servants, or rather vile slaves, or rather beasts of burden, at the full disposal of their rulers." "To show how the inhabitants of Venetia have continually been in a state of warfare with the Austrians, even while they appeared to be resigned to their own deplorable condition, and how the baleful policy of their rulers, ever tending to the complete moral and social corruption of those subjected to it, constantly encountered a powerful reaction among individuals which indirectly prepared the way for the surprising achievements of 1848 and afterwards," is the aim of Signor Volpe in arranging and editing the autobiography of his friend Malincontri; who himself simply describes it as "a study of tendencies."

As such we shall here consider it; and, putting aside the purely personal portions of his life, follow the young Filippo, as shortly as possible, through his school and college career.

Filippo Malincontri was born of wealthy but not noble parents, in one of the highland districts of Venetia. At six years old he was sent to the elementary school of the town in which he lived. The Government has been careful to establish such schools in every town, as also commercial schools in all the country villages. To these "all children in ordinary cases go." This laudable zeal for education gains, however, and probably deserves, little credit from the Italians; for, though "the education of the people is tolerably well regulated," "this arrangement, while it offers an apparent guarantee for the good management of the public education, places in the hands of the Government the entire control of the rising generation, which, in the elementary schools at least, is educated in accordance with its maxims." The masters are appointed and superintended by the Government, to which alone they are responsible, of which they are, in general, the submissive tools, and to which they regularly report not only the progress, but the conduct and dispositions of their pupils. Thus, from their earliest years, high-spirited and manly boys are noted down as turbulent and unsafe subjects, and are treated with suspicious rigour, if not with positive injustice. Filippo, partly from his own disposition, partly from the independent character of his parents, was from the first exposed to a large share of petty persecution. His honest nature rebelled at the sight of fawning and hypocritical lads betraying their fellows, cringing to their masters, and favoured and petted for their very abjectness. He soon, however, found out that "it was useless to make complaints, because the Austrian Government is so suspicious that every act in which an inferior shows any signs of resentment against a superior, however much the former might be in the right, is deemed an act of insubordination, and as bad almost as rebellion."....."It is not that the violence of the latter is authorised; for if it be discovered by the Government through the medium of their own inquisitors, it is very likely to be reprimanded and punished; but if the subaltern upon whom the violence is exercised testifies any resentment, either by the act of his own hands, or by complaints presented in higher quarters, the result is not the punishment of the culpable misuser of his power, but much rather a lasting detriment to the plaintiff, who is put down in the black book as a turbulent and audacious character.

Four years is the usual time passed in the elementary schools. These years were spent by Filippo in a series of revolts against the prevalent injustice of the teachers, but not without credit and advantage to himself. The question now presented itself—a serious one at any time, and especially so in Austrian Italy—to what ulterior aim should the remainder of his education be directed? "There is," says the writer, "nothing more embarrassing than this decision is in Italy." All hope of political advancement is cut off, except for those who choose to be servile tools of the Government. "The medical students are lucky if, after having studied at the universities and taken a doctor's degree, they are able to find employment in a village at a florin a day. Of lawyers there are many who, for having run into some slight scrapes, are dying of hunger. The engineers are no better off. The universities are full of scholars who, after having studied and taken their doctors' degree, must, if they have no resources of their own, live in beggery. The career open for industry and commerce is likewise exceedingly unpromising. There are but a few manufactures, limited in class, and burdened with imposts. The articles of merchandise everywhere bought are German; such only being allowed to circulate in Austrian Italy. The industry of the country consists wholly in selling by retail. The land certainly is fruitful, but the taxes absorb the greater part of the returns, and are a grievous obstacle to improvement. The peasants labour upon the soil; the artisans have their common occupations: but the sons of genteel families absolutely do not know what to do. They live in poverty, sometimes in complete misery, but they must perforce live unemployed."

Is it surprising that under these circumstances frivolity and dissipation prevail amongst the young men of respectable birth, or that so many become the paid, and wretchedly paid, underlings of the Government they hate? In the priesthood alone is there a prospect of attaining a comparative independence and some kind of consideration and influence; and to be a priest became accordingly the intention of Filippo Malincontri. Before, however, this was decided upon, he was sent to the upper finishing class of the elementary schools. This class is founded expressly for those who do not wish to enter upon a four years' course in the Gymnasia, and "in all the Austrian educational institutions there is nothing better devised or more useful." Two years is the usual term of study in this class; but at the end of one, another act of gross favouritism on the part of the masters made it impossible for the high-spirited Malincontri family to keep their son any longer there, and he was sent for one year's study under a parish priest in the mountain region of Volturno. Here he joined in athletic sports, such as one is not accustomed to associate with Italian youth. The primitive, hardy habits, and simple, manly character of the mountaineers are well described in this most pleasing episode of the autobiography.

At the end of the year he was sent to the Gymnasium at Venice. Here he met with many curious and striking characters, both among the professors and in private life. Many of these were priests, and go far to show how natural worth can conquer the trammels of a bad system, and patriotism exist even in the breast of a priest under the Austrian rule. Here, too, he observed the fuller workings of the repressive and spying system that runs through all the educational institutions in Venetia,—a system that, by the abhorrence it inspires, leads to the opposite extreme in Italian families; who allow their sons liberty of action at a very early age, and leave them in greater freedom from control than in most other countries where political freedom is fully enjoyed. Malincontri's life in Venice was thus pretty much unfettered by paternal vigilance, and was spent as much in forming friendships and in love-making as in study. From the Gymnasium he went to finish his studies at Padua's "famed University," and a most curious picture he draws of the priestly students, of whom he was one, and of the priestly professors under whom they studied.

Two years at the University, and two sermons, were the beginning and end of his clerical career. Love, long repressed as hopeless, gained the victory, and in spite of the discredit attached to the throwing off of the priestly garb, however early in the stages of ecclesiastical rank, Filippo Malincontri married Angelica Accosti, and settled down as a country gentleman—or, as he himself better expresses it, to the "homely life of a gentleman farmer,"—until roused into activity by the revolution of 1848. Into the events of that period this book does not enter; we are only led to infer that its hero was not an idle spectator of his country's struggle for freedom, and did not come out unscathed by the resentment of the reinstated Austrian.

THE GRADUATED SERIES OF READING-LESSON BOOKS, for all Classes of English Schools. In Five Books. Book the Fifth. London: Longmans. 1861.

IN this fifth and concluding volume of the Graduated Reading-Lessons, there are four divisions: Miscellaneous; Descriptive Travel; History; and Natural Science. The lessons are extremely well-chosen, comprising extracts from Carlyle, Ruskin, Mill, Emerson, Humboldt, Gosse, Darwin, Huc, Froude, Macaulay, Hugh Miller, Quatrefages, and others. The selections relating to "Descriptive Travel" are arranged in geographical order, so as to make a circuit round the globe; and the historical extracts are arranged in chronological order, ranging from the incursions of the Vikings to the "Charge of the Light Brigade." We can thoroughly recommend this useful and entertaining volume.

NEW MUSIC.

THE ARROW AND THE SONG. Written by Longfellow, the Music composed and dedicated to her Sister, Mrs W. B. Bliss, by MISS M. LINDSAY (Mrs J. W. Bliss). London: Robert Cocks and Co., New Burlington street.

THY VOICE IS NEAR. Song, written by Mrs Aylmer, composed by W. T. WRIGHTON. Inscribed to Her Grace the Duchess of Northumberland. Robert Cocks and Co.

NEITHER of these songs rises above the poorest common-place, nor could any vocal skill render them interesting.

BOOKS RECEIVED.

Words of Comfort. Nisbet and Co.——Jones's Debenture Tables.——Jones' Stock Tables. Jones, 75 Old Broad street, and 26 Lombard street.——The Popular Overland Guide. Ward and Lock.——The Sliding Scale of Life. Houlston and Wright.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

"Great is truth and it will prevail." When the Superior Council of Commerce which was charged to settle the details of the treaty of commerce with England was making its preliminary investigations, M. Aimé Gros, of the great cotton goods firm of Gros, Roman, Odier, and Co. of Wesserling, in the department of the Haut Rhin, appeared before it and pleaded earnestly for high protection. But the same M. Aimé Gros, as I am informed, went a few days back to the Ministry of Commerce and prayed that certain facilities which were lately accorded to the import of unbleached cotton goods and yarns should be extended to mixed fabrics. "What!" was the remark made to him by the official to whom he addressed himself, "*you* an applicant for an extension of commercial liberty,—and yet you spake against that liberty before the Council!" "Ah, yes! But I was mistaken!" It has done us good rather than harm!" "We are really very glad to hear you say so!" "I say more!" said M. Gros manfully: "I say that the treaty of commerce with England which broke down the absurd commercial system of France is the very greatest act of the Emperor's reign, and that eternal honour will belong to the Minister of Commerce M. Rouher, and to M. Michel Chevalier, for having brought it about!"

That this frank confession of M. Gros will be repeated by other manufacturers before many months shall have passed away, there is no doubt. But still the Protectionist fraternity as a body have not quite given up the ghost, and are labouring to create petty difficulties of detail to the execution of the treaty. Thus they have petitioned the Senate to call on the Government to decide that certain descriptions of cotton yarn shall not be brought into France except it be measured in the French metrical system, and that the *acquits a caution* relative to the importation of iron shall be done away with. If they obtain the former they will create serious embarrassments to the importation of English yarn, inasmuch as they will upset the English system of measurement; if the latter, they will do away with certain facilities by means of which, as a set-off to exports of machinery, &c., iron can be imported in small quantities and, under certain circumstances, at less than the regular duty. But it is hoped that the good sense of the Senate and the Government will prevent them from obtaining either.

In the Senate, the other day, a discussion was raised on the question whether or not silver coins of small value should be struck off, with greater alloy than at present tolerated, in order to supply the deficiency of such pieces which has for some time past existed, and from which retail traders, and persons who employ great numbers of workmen, have suffered much inconvenience. M. Michel Chevalier, though called on unexpectedly to speak, demonstrated with great argumentative power, that any measure of the kind would be exceedingly mischievous, inasmuch as it would necessitate tampering with the larger pieces, and would thereby create confusion in the silver currency. The Government has appointed a commission to examine this grave question in its different aspects. Of the commission, M. Michel Chevalier, M. Vintry, councillor of state, Count de Germiny, governor of the Bank of France, M. Gouin, deputy and banker, M. Dumas and M. Sennarmont, both of the Institute, and other eminent personages have been named members.

The bill for doing away with the sliding scale on the importation and exportation of grain and flour, and for substituting a fixed duty on imports, allowing exports to be free, having passed through the Senate and the Legislative Body, has obtained the sanction of the Emperor, and is now the law of the land. The text of this very important measure has already appeared in the ECONOMIST. As it fixes no date for coming into operation, it takes effect forthwith. In connection with this measure, a number of corn and flour dealers are pressing on the Government the desirability of relieving the bakers of large towns from the necessity to which they are by law subjected, of keeping constantly on hand a large reserve of grain and flour. They show that wheat is to be purchased in England, Spain, and the Baltic provinces at a much lower price than in France, but that it is not safe to make imports in presence of the large stores in hand,—stores which at Paris alone amount in flour to 500,000 quintals (the quintal is 2 cwts), —seeing that those stores may, at a word from the Government, be let loose in the market any day.

Contradictory statements having been made in the newspapers as to the state of the negotiations between France and the Zollverein for the conclusion of a treaty of commerce,—one set of statements being to the effect that the negotiations are nearly concluded, the other that they are not likely to lead to any result for months to come,—I have made inquiries on the matter in a quarter likely to be well informed; and I learn that in point of fact the Prussians, who are acting for the Zollverein, are moving on the matter at a pace, which to the impetuous French seems excessively slow, and that they are constantly raising discussions and difficulties which to the French appear puerile.

The Minister of Commerce in a circular to the Chambers of Commerce says that he has taken into consideration complaints which have been addressed to his department against the interdiction to practise what the French call *coupage* of spirits in bond; and that he has come to the conclusion "to allow rum of foreign origin destined for exportation to be reduced in the bonding warehouses by an addition of distilled water to a degree at which it is potable."

The Legislative Body has adopted by a large majority the Budget for 1862 as presented by the Government. Previous to the vote being taken, some deputies complained of the abolition of prohibition to export rags, of certain stipulations in the Belgian treaty, of the said treaty having been concluded without the Superior Council of Commerce having been consulted, &c. But M. Baroche replied in the name of the Government, and the complaints resulted in nothing.

The Compagnie Immobiliere of Paris, one of the Credit Mobilier affairs, is now raising a loan of 18,000,000f by an issue of bonds on which 285f are to be paid, and which are to bear 15f a year interest and to be paid off at 500f.

The monthly Customs returns have appeared to-day. The import duties for May last amounted to 10,594,000f, whilst in May of last year they were 9,911,000f, and in the same month of 1859, 17,969,000f. For the first five months of the present year the said duties amounted to 46,154,000f, whilst in the corresponding period of last year they were 57,213,000f, and in that of 1859, 76,539,000f. Considering the very large reductions which have lately been made in the import duties on the principal articles of consumption, these results must be considered satisfactory. But the advantages of these reductions are still more evident if we compare the *quantities* of goods imported in the present year with those of the two preceding years. Thus, the imports of foreign sugar in the first five months are 73 per cent. more than in the corresponding period of 1860, and 31½ more than in that of 1859; that of coffee was 71 per cent. more than in 1860, and 19 more than in 1859; cotton, compared with the two periods, was 11 and 135; wool, 38½ and 59; pig iron, 148 and 108; coal, 7½ and 6. As to exports, the returns show a decline, especially in wine and refined sugar; but those of tissues have been maintained. In navigation there is an increase in entries, and a decline in clearings.

The Great Russian Railway Company advertises that it will receive at St Petersburg, on the 4th of July next, offers for the supply of the large quantity of 24,570 tons of coal for locomotives. The conditions to be imposed on contractors can be obtained at the offices of the Company in Paris.

The trial of Mirés on the charge of swindling and embezzlement was to have taken place to-day before the Tribunal of Correctional Police, but at his request it was postponed for a week.

Great inactivity has marked the Bourse during the past week; indeed, it has been but very thinly attended, owing to the weather having become very hot. The following are the quotations:—

	Thursday, June 13, f c		Thursday, June 20. f c
Threes	67 85		67 75
Bank of France	2900 0		2910 0
Credit Foncier	985 0		1005 0
Credit Mobilier	698 75		701 25
Orleans Railway	1358 75		1361 25
Northern	992 50		993 75
Eastern	576 25		573 75
Mediterranean	942 50		943 75
Southern	575 0		576 25

Annexed is a report of the markets:—

FLOUR at *Paris*, yesterday, was 71f to 75f the sack of 159 *kilogs*. Four marks were 71f 25c for the present month; 71f 75f for July; 72f 50c for August.

WHEAT.—At *Paris*, yesterday, transactions were not active, and quotations were 38f 50c to 41f 50c the sack of 120 kilogrammes. Of the provincial markets, 16 present a rise of from 25c to 1f the hectolitre, 87 a fall of from 10c to 2f; 5 are reported firm, 26 without variation, 16 calm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 7,984 bales, and the arrivals 3,038. Closing quotations were 1f lower for very low New Orleans and Mobile, and 1f higher for other sorts of New Orleans. Low New Orleans was consequently 105f, and very ordinary ditto, 111f. The stock on Friday last was estimated at 322,150 bales: at the corresponding date of last year it was 261,850. On the first two days of this week business was very active and prices were firm. Yesterday, business was not important, but prices remained unchanged.

COFFEE.—At *Havre*, in the week ending Friday, very little was done: 335 sacks Hayti Port-au-Prince went at 77f 50c the 50 kilogs; 70 ditto

Cape, 79f; 1,409 Rio, not washed, 65f 50c; 500 ditto at prices kept secret. The arrivals were about 7,500 sacks of different sorts, and some casks and bales. This week, some damaged Hayti has been disposed of; also a quantity of Ceylon sound at 92f to 98f, and 1,000 sacks Rio at prices kept secret. At *Nantes*, last week, there were no sales. This week, nothing has been done. At *Bordeaux*, last week, 2,500 sacks Guayra *grage* and *non-grage* went at different prices; also 450 sacks of the former at 80f in bond; 220 of the latter sort at 82f 50c; some lots of Santiago went at 92f 50c to 99f; and a quantity of damaged Cayenne was also disposed of. This week, some Santiago has been taken at 95f; and some damaged Guayra has been sold. At *Marseilles*, last week, about 2,000 sacks Rio went at 62f to 72f. Larger sales might have been effected, but holders were reluctant to give the credit required.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 100 casks French West India at 48f duty paid; a small lot of ditto at 50f; a quantity of ditto, "usine," part at 57f 50c, part at 61f; 3,500 casks Havana disposable, 34f in bond; 5,130 ditto old, 33f; and 1,846 ditto, 30f to 32f 25c. The arrivals were 2,630 casks Havana. This week, French West India has been at 47f duty paid, and "usine" at 57f 50c; Porto Rico, 46f duty paid; Havana, 33f 75c in bond. At *Nantes*, last week, some French West India went at 47f 50c, and some ditto "usine" at 52f 50c to 59f. A quantity of damaged Reunion was also sold. This week, nothing has been done. At *Bordeaux*, last week, 4,000 bales Reunion went part at 50f 50c, part at 55f; and 2,000 for delivery at 49f 75c; some lots of French West India at 46f 75c to 47f; 3,695 sacks Cochin China at 50f. This week, a quantity of Havana has been sold; a lot of Martinique at 47f; and a quantity of Reunion at 49f 50c. At *Marseilles*, last week, business was not important, and prices manifested a downward tendency. This week, some damaged Havana has been disposed of.

INDIGO.—At *Havre*, in the week ending Friday, 75 to 80 cases Bengal new went part at 1f 10c above the estimates, part at prices kept secret. The arrivals were 20 cases. This week, some Bengal has been disposed of, part at prices kept secret, part at 1f 29c premium. At *Bordeaux*, last week, 32 cases Madras, 26 Bengal, and 66 Kurpah were sold, but prices are not stated. This week, some lots of the same sorts have been sold; prices not given.

HIDES.—Business at *Havre*, in the week ending Friday, was not active: 600 Monte Video salted cow went at 48f 50c the 50 kilogs; 1,400 horse, La Plata salted, 88f the 100 kilogs; and 325 Irish, 61f 50c. The arrivals exceeded 18,000. This week, New York salted has been at 47f 50c; Martinique, 60f; horse Buenos Ayres, 9f each.

WOOL.—At *Havre*, in the week ending Friday, business was somewhat animated: 80 bales La Plata, unwashed, went at 1f 25c to 2f 80c the kilog; 139 Chili, unwashed, 1f 52½c; 230 Russia, washed, 6f 70c to 7f 20c; also some lots of damaged Rio Grande. The arrivals exceed 1,800 bales. This week, Chili, unwashed, was been at 2f to 2f 50c; Monte Video, 1f 52½c.

TALLOW.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. This week, a lot of New York has been sold at 65f the 50 kilogs. At *Paris*, yesterday, the 100 kilogs were 129f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, disposable, was 89f to 90f the hectolitre; *Montpellier*, 89 deg. 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 125f; ditto beetroot, first quality, 100f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following official statement, in reference to the importation of grain and meal into France, was published in last night's *Gazette*:—The Right Honourable the Lords of the Committee of Privy Council for Trade hereby give notice that the French *Moniteur* of the 18th instant contains a decree fixing as follows the duties to be charged upon the importation into France of grain, flour, and other alimentary substances:—

	Grain. Per 100 kilos. f c	Meal. Per 100 kilos. f c
Wheat, spelt, and meslin:—		
By French vessels and by land	0 50	1 0
By foreign vessels	1 0	1 50
Rye, maize, barley, sarrasin, oats, dried vegetables, chestnuts, canary seed, millet, and vetches:—		
By French vessels and by land	Free	Free
By foreign vessels	0 50	0 50
Bran of all kinds:—		
By French vessels and by land	...	Free
By foreign vessels	...	1 50
Bread, ship biscuit, pearled or husked barley, groats, semolina in groats, and indigenous feculæ:—		
By French vessels and by land	...	1 0
By foreign vessels	...	1 50
Rice in the husk:—		
By sea: In French vessels — From non-European countries	...	0 25
By sea: In French vessels — The growth of European countries	...	0 25
By sea: In French vessels — From elsewhere	...	1 75
By sea: By Foreign vessels	...	1 75
By land: The growth of European countries	...	0 25
By land: From elsewhere	...	1 75
Rice in grain:—		
In French vessels: From non-European countries	...	0 50
In French vessels: From elsewhere	...	2 0
By foreign vessels and by land	...	2 0
Sago, salep, and exotic feculæ:—		
In French vessels: From non-European countries	...	1 0
In French vessels: From elsewhere	...	2 50
By foreign vessels and by land	...	2 50
Semolina in paste and Italian pastes:—		
By sea: French vessels — From non-European countries	...	5 0
By sea: French vessels — The growth of European countries	...	5 0
By sea: From elsewhere	...	7 0
By sea: By foreign vessels	...	7 0
By land: The growth of European countries	...	5 0
By land: From elsewhere	...	7 0

the above-mentioned grains, meals, and other alimentary substances, and also potatoes, are exempted from export duties by the same decree, which likewise provides that grains and meals arriving from abroad may be deposited in private bonded stores. It is further provided that such of the provisions of the decree of the 22d August last, relating to the importation of grains and meals, and of the decree of the 5th of December last, relating to the importation of dried vegetables and their meals, as are more favourable than those of the present decree, shall continue in force until the 30th September next.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added:—

DEBTOR.	June, 1861. F c	May, 1861. F c	June, 1860. F c
Capital of the Bank	91,250,000 0	91,250,000 0	91,250,000 0
Ditto, New	91,250,000 0	91,250,000 0	91,250,000 0
Profits in addition to capital (Art. 8, Law of June 9, 1857)	2,255,347 32	2,254,119 40	1,510,527 65

A Parliamentary return has just been issued showing the amount of duty paid by the Fire Insurance Companies of the United Kingdom. From this document it appears that the sums paid by the London offices stand as follows when arranged in the order of their respective totals:—

DUTY PAID BY THE LONDON OFFICES DURING THE YEAR 1860.

	£		£
Sun	216,275	Union	32,190
Phœnix	138,578	General	17,013
Royal Exchange	86,682	Unity	16,280
County	70,473	Royal Farmers	12,302
Imperial	61,897	Hand-in-Hand	10,490
Alliance	51,849	Law Union	7,196
Globe	45,858	State	5,697
Atlas	45,727	Church of England	5,370
Law	35,938	Equitable	2,180
Guardian	34,172	United Kingdom Provident	1,398
London Assurance	33,620	Emperor	704
Westminster	33,053	Preserver	24

DUTY PAID BY THE COUNTRY OFFICES, INCLUDING SCOTCH AND IRISH, DURING THE YEAR 1860.

	£		£
Norwich Union	82,300	Salop	4,088
Liverpool and London	60,952	Newcastle-upon-Tyne	3,782
West of England	59,856	Sheffield	3,635
Royal	59,534	Norwich Equitable	3,140
Manchester	41,791	Hants, Sussex, and Dorset	2,464
Leeds and Yorkshire	27,588	Shropshire and North Wales	2,061
Lancashire	24,698	SCOTCH.	
Yorkshire	22,870	Scottish Union	32,001
Birmingham	15,925	North British	26,879
Kent	15,601	Northern	21,841
Birmingham District	8,998	Caledonian	12,950
Essex and Suffolk	7,120	Scottish Provincial	10,081
Provincial	6,594	National	6,895
Queen	6,251	IRISH.	
Midland Counties	5,503	National	6,948
Nottingham and Derbyshire	4,996	Patriotic	6,264

From the above it appears that the London offices have contributed 964,970*l*; the country offices, 469,756*l*; Scotch, 110,647*l*; and Irish, 13,212*l*, making in the aggregate the sum of 1,558,585*l*. The same return shows that the total sum insured in the year 1860 on farming stock (which *is* exempt from duty) in England and Wales was 65,963,073*l*; in Scotland, 6,300,772*l*; and in Ireland, 1,046,053; making a total of 73,309,898*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of June, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,892,965	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,155,442
		Silver Bullion	262,523
	25,892,965		25,892,965

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,888,607
Rest	3,245,994	Other Securities	19,721,896
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,855,633	Notes	6,708,095
		Gold and Silver Coin	977,828
Other Deposits	11,082,951		
Seven Day and other Bills	558,848		
	37,296,426		37,296,426

Dated the 20th June, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,743,718	Securities	29,532,503
Public Deposits	7,855,633	Coin and Bullion	12,395,793
Private Deposits	11,082,951		
	38,682,302		41,928,296

The balance of Assets above Liabilities being 3,245,994*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£189,262
An INCREASE of Public Deposits of	288,130
An INCREASE of Other Deposits of	130,716
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	144,917
An INCREASE of Bullion of	383,889
An INCREASE of Rest of	9,388
An INCREASE of Reserve of	543,109

The above return is more favourable than might have been expected. Notwithstanding the extensive withdrawals of sovereigns for the United States, there is a considerable increase in the bullion, while the reserve has also largely augmented. The increase in the public deposits arises from the customary revenue payments at this period of the quarter. The decrease in the other securities indicates a falling off in the demand for money—a rather unusual circumstance at this time of the year.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 13,973,872	£ 20,182 914	£ 21 195,367	£ 21,467,153	£ 19,743,718
Public deposits	8,635,559	7,296.156	9,304.619	8,688,191	7,855,633
Other deposits	8,713,685	12.582,872	14,019,013	12,115,000	11,082,951
Government securities	13,544,281	10,656 138	11,281,376	9,764,106	9,888,607
Other securities	13,234 757	14,614,369	18,376,275	19,325,818	19,721,896
Reserve of notes & coin	9,283,645	13,058,941	12.134,789	10,146,576	7,685,923
Coin and bullion	14,198,360	18,033,136	18,110,414	16,498,501	12,395,793
Bank rate of discount	3 p. c.	3 p. c.	3 p. c.	4 p. c.	6 p. c.
Price of Consols	97¼ xd	95⅝ xd	92⅛ xd	93⅛ xd	90⅛ xd
Average price of wheat	40s 7d	43s 10d	49s 11d	54s 11d	53s 9d
Exchange on Paris (shrt)	25 0 2½	25 2½ 10	25 5 10	25 12½ 20	25 32½ 37½
— Amsterdam ditto	11 15½ 15⅝	11 15 15½	11 12 12½	11 14⅛ 15	11 18 19
— Hamburg (3months)	13 7½	13 7	13 3½ 4	13 5¼ 5¾	13 9½ 10

In the corresponding week of 1851, the Census for that year had just been published. The proceedings of Parliament were of little importance, the principal measure passed being the Inhabited House Duty Bill. The accounts from California continued promising, the export of gold in the first four months of the year having considerably exceeded 3,000,000*l*. The news had arrived of an earthquake at Valparaiso, which destroyed 200,000*l* worth of property, but fortunately no lives.

In 1858, nothing of importance occurred to affect the markets, and money remained easy.

In 1859, whilst at home all was calm and confidence in the new Government of Lord Palmerston, abroad a little anxiety was occasioned owing to the turn the war in Italy was taking and the menacing attitude towards France which Germany appeared to be on the eve of assuming.

In 1860, the Baden Congress had just met, and the first interviews had taken place between the Emperor and the Prince Regent (now King) of Prussia. In England the principal event was the great Volunteer review by the Queen in Hyde Park. The Great Eastern had sailed for New York. There was an increased demand for money in the discount market, but the Bank rate was only 4 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,521,072*l*; in 1858, a deficiency of 2,031,497*l*; in 1859, a deficiency of 4,357,262*l*; and in 1860, a deficiency of 7,210,818*l*. In 1861, the deficiency is 8,638,945*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount this week has been very moderate, but the rate in the general market still remains within a fraction of the Bank minimum of 6 per cent. Within the last day or two, however, a disposition has been shown to do business upon easier terms. On the Stock Exchange there has again been some pressure, especially this afternoon, and loans on Government securities can only be effected at 5½ or 6 per cent. The shipments of gold to America have again been considerable, but have exercised comparatively little influence, owing to the larger arrivals from Australia and the Continent. The effect of the approaching requirement of coin for the harvest is now occupying some attention.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	6	...

ENGLISH FUNDS.—The funds have shown further depression during the week, owing to sales for money, believed to be on banking account. It is believed that the country bankers, owing to the assistance afforded by them to the agricultural interest since the failure of the last harvest, are short of money and obliged in some degree to realise their resources in London. To-day the encouraging character of the Bank return caused a slight temporary improvement, but it was almost immediately lost, and the quotations this afternoon were the lowest of the week. The last price for money was 89⅝ to ¾, and for the account 90 buyers, showing a reduction compared with last Friday of about ⅜ per cent. The public continue to exchange their investments from Consols to other securities with a higher interest, India Five per Cents. being especially purchased.

Exchequer bills continue in little demand, and have shown rather a tendency to droop. For the June issue, with the increased interest, the price is only par to 3s premium, while the March are 7s to 3s discount. India bonds were also flat at 18s to 12s discount.

Under the influence of the steady investments of the public, the Indian Five per Cent. stock not only maintains the late rise, but has experienced a further slight improvement, the last price for money being 98⅝ to ⅞.

FOREIGN STOCKS.—The business in this department has again been limited, and no general movement has taken place. Turkish Six per Cents. have relapsed, especially the new stock. Sardinian has improved on the recognition of the kingdom of Italy by the Emperor of the French. Brazilian and Russian stocks continue in little favour, although the latter are a shade firmer than last week. Mexican experienced a renewed fall.

The last price from Paris this evening was 67f 85c, showing a reduction of an eighth from the advance of three-eighths last week.

The following satisfactory letter has been published with regard to the last Turkish loan:—

Sir,—I am instructed to notify to you that the Court of Directors have to-day received from Messrs Dent, Palmer, and Co., the contractors of the Turkish loan of 1858, a letter intimating that it is their intention by the next mail to appoint, on the nomination of this bank, Mr Edward Gilbertson (now holding the office of local director of the Constantinople branch), a member of the Syndicate, in the room of the late Mr F. de P. Falconnet.

As reference has been made in a recent number of your journal to the amount received by the Ottoman Bank on account of the dividend, I am desired to append the particulars of such receipts, amounting in the whole to 24,800*l*, viz.:—

£	
800	Received on 29th April last.
3,000	Ditto on 4th May.
4,000	Ditto on 11th May.
3,000	Ditto on 17th May.
2,200	Ditto on 24th May.
800	Ditto on 3d June.
7,000	Ditto on 8th June.
4,000	Ditto on 15th June.

I am, &c.,
WILLIAM W. LANDER, Assistant-Secretary.
The Ottoman Bank, 26 Old Broad street, E.C.,
London, June 19, 1861.

A meeting of Mexican bondholders is called for the 4th of next month. The Committee have just published their report, consisting of the various documents, correspondence, &c., that have passed since the last meeting in May, 1858.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money		Consols, Account		Exchequer Bills,

RAILWAYS AND OTHER SHARES.—The public continue to do very little business in the railway market, and the daily quotations have varied entirely according to the transactions of the dealers. The general tendency has been rather flat, owing to the expectation of lower dividends for the current half-year and the belief that the traffic returns must soon suffer through the American crisis. The fine weather, on the other hand, exercises a favourable effect. Manchester, Sheffield, and Lincolnshire improved in the early part of the week, on the report of some arrangement with the London and North-Western, but a partial reaction has since taken place. Ambergate, Nottingham, and Boston was also higher on a similar rumour with regard to the Great Northern. To-day the market has been generally heavy, but no serious decline occurred.

In the colonial market there has been a fall in Canadian descriptions,—in Grand Trunk, partly in consequence of the reported resignation of the Canadian Board. Indian guaranteed remain comparatively steady.

No change of importance has taken place in foreign shares, except a rise in Great Luxembourg. American securities remained without alteration until to-day, when the announcement of a decline in New York caused a corresponding movement on this side, Illinois Central leaving off at 41¼ to 40¾ discount, and New York and Erie, 20 to 21.

In the miscellaneous market there have again been some inquiries for joint stock bank shares, particularly those of the London and Westminster. Universal Marine Insurance shares fell suddenly to ⅝ to ½ discount, on a report that owing to some losses it will be necessary to make a call, but a rally has since taken place to ⅜ to ⅛ discount. The new Natal Land are quoted ½ to ¾ premium, and Great Ship 7s to 7s 6d.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Railways.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The rates this week have been generally firm. The quotations for Vienna and Trieste, however, are lower, the movement being in favour of the Austrian currency.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week and in Indian rupee paper:—

Gold.—We have to report the arrival of two more vessels from Australia—the Kleber, with 35,500*l*; and the Themis, with 94,000*l*. Large amounts of gold coin have also come to hand from Constantinople and the Continent; and, as the demand for export is still very small, the Bank of England has purchased, during the past week, about 472,000*l*; and further sums will be sent in. Sovereigns, however, continue to be sent to America, the Anglo-Saxon having taken 32,000*l*, the Europa 191,770*l*, and the Etna 236,119*l*: the steamer to leave on Saturday will also take a considerable amount. In addition to the vessels mentioned in our last circular as having left Melbourne with gold for England, may be added the Dover Castle, to sail the 27th April. This vessel would probably bring a large sum in gold, 69,000*l* having then been sent on board. The Pera has taken 12,292*l* to the East.

Silver.—The market for silver has experienced a further decline, the bars ex Atrato having been sold at 60⅜d per oz standard. The shipments to the East on mercantile account are now but small, the Pera having taken only 188,357*l* to India and China, and of this amount Government sent 100,000*l*. We quote the price as 60⅜d per oz standard, with but little business doing.

Mexican Dollars.—The dollars held over from the Tasmanian, in expectation of a rise, have been sold at 59⅛d per oz, being a slight fall from the price at which the greater part of those brought by that vessel were sold on the 5th inst. There is but little doing in this coin, and we quote the price as 59⅞d per oz, with a dull market.

Exchange on India remains the same. Banks' drafts on Bombay and Calcutta, 60 days' sight, are 1s 11⅜d to 2s; bills with documents, 1s 11¼d to 1s 11⅜d; Madras—banks' drafts, 60 days' sight, 1s 11⅜d to 1s 11⅞d.

India Government loan notes have improved since our last circular, owing, no doubt, to the improvement which has taken place in India. 5 per Cents. are 94, and 5½ per Cents. 100¼ ⅜.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold refinable, 77s 11d per oz std; United States gold coin, scarce. Silver—Bar silver, 5s 0⅜d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅜d per oz std, last price; fine cake silver, 5s 5d per oz, last price; Mexican dollars, 4s 10⅞d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

The amount of bar gold and foreign coin bought by the Bank since the making up of the last account is 205,000*l*, viz., 150,000*l* yesterday and 55,000*l* to-day, while 35,000 sovereigns are known to have been taken for America.

FAILURES AND MERCANTILE EMBARRASSMENTS.—At a meeting of the creditors of Messrs T. and R. Raikes and Co., of the Hull and East Riding Bank, held at Hull on Tuesday, a report was submitted by Mr Jay, of the firm of Quilter, Ball, Jay, and Co., accountants, showing liabilities 89,025*l*, with assets estimated to realise 22,137*l*, or nearly 5s in the pound. It appears that the bank was established in the last century, and, though at one period profitable, has latterly suffered heavy losses. The large fortune of 300,000*l* left by the late senior partner has thus disappeared, including the landed property, which in 1845 had been disentailed.

It was resolved to appoint a committee of inspection to wind up the estate under the private arrangement clauses.

A meeting of creditors of Mr A. Psichari, Levant merchant, took place on Wednesday, when a balance-sheet was presented, showing direct liabilities 40,253*l*, and indirect 37,040*l*. Of the latter, however, 12,700*l* are fully provided for, and only 10,000*l* of the rest is expected to come upon this estate. The assets are estimated at 107,578*l*, exclusive of 15,000*l* in landed property. The principal asset is a claim upon the Turkish Government for 95,892*l*, of which 44,000*l* was directly advanced upon the security of some tithes, while the remainder represents an outlay upon the Imperial arsenal. Mr Psichari is the Turkish Consul in London, and his business for some time past has been chiefly confined to transactions on account of the Ottoman Government. It was resolved to authorise Mr Psichari to liquidate his estate himself, and, if necessary, to proceed to Constantinople or elsewhere for that purpose.

An adjourned meeting of the creditors of Mr B. de Cuadra, Spanish merchant, who suspended on the 1st of April, was held yesterday, when an amended balance-sheet was read, by which it appeared that the liabilities have now been considerably reduced, the total expected to rank upon this estate being 87,838*l*, with assets estimated to yield 110,263*l*, leaving an apparent surplus of 22,425*l*. There are, however, additional liabilities on bills payable of 18,461*l*, a portion of which may be otherwise provided for. Resolutions were passed authorising Mr de Cuadra to liquidate his estate under the inspection of two creditors, ordering the immediate payment of a dividend of 5s in the pound, and providing that further distributions of 2s 6d shall be made as soon as sufficient funds shall have been realised.

PUBLIC COMPANIES.—The annual meeting of the South Australian Bank was held on Tuesday, when the report was adopted and a dividend declared at the rate of 10 per cent. per annum free of income tax. The operations of the past year have been satisfactory, the profit realised being 47,320*l*. The colony is also prosperous, especially as regards mining enterprise, which has lately caused much excitement and speculation. Two new branches have been opened, one at Robe, in a district which is being rapidly stocked with sheep and cattle, and the other at Wallaroo, to supply accommodation to the large mining interests now in course of development. Out of the profits, 4,834*l* has been added to the reserve, now amounting to more than 80,000*l*, and which in all probability will reach the stipulated maximum of 100,000*l* in about two years. Some discussion took place upon the report, chiefly of a congratulatory nature, in the course of which it was mentioned that strict instructions have been given to the local officers to act with great caution in the present speculative mining excitement in South Australia. The meeting concluded with the usual votes of thanks.

The report of the London and Provincial Marine Insurance Company, issued preparatory to their meeting on the 27th, states the total premiums received in the past year were 100,257*l*, while the claims were only 52,826*l*. The available balance, after deducting all charges, is 39,320*l*, out of which it is proposed to pay 5 per cent. interest on the paid-up capital, leaving 35,000*l* to be carried forward.

The annual meeting of the South Australian Company took place on Wednesday, when the report was adopted and a dividend declared at the usual rate of 7 per cent. per annum. It was stated that, notwithstanding heavy losses in the early part of the year through drought, the affairs of the Company are in a satisfactory position. The customary valuation of the property at the end of the year gave a total of 453,154*l* in 1860, being rather less than the amount in 1859, the diminution arising from sales of land and a reduction in the value of wood houses at Port Adelaide. There is a slight decrease of 46*l* in the receipts from town lands, and an increase of 555*l* in the rents under country leases. The letting of the port lands has suffered from the stagnation in trade, but the wharfs have been more employed, the number of vessels which have loaded and discharged during the year showing an augmentation of 14 ships and 5,655 tons. The sales of land have produced a profit of 2,722*l*. Only one small purchase has been made. After deducting the dividend and interest on debentures, a balance remains to be carried forward of 6,432*l*.

At a meeting of the Kapunda Mining Company, on Monday, the first dividend was declared of 2s per share, or at the rate of 10 per cent. free of income tax. The operations of the past year have been satisfactory, notwithstanding the depression in the copper trade. The actual profit realised during that period was 16,096*l*.

At the annual meeting of the St John del Rey Mining Company to-day, the report was agreed to, and a dividend declared at the proposed rate of 50s per share free of income tax. It appears that the operations of the past year have been more successful than in 1859, the ore raised and the produce being 91,361 tons and 166,321*l* in 1860, against 88,968 tons and 138,649*l* in the preceding twelve months. In 1858, the yield was 106,976*l* only. There has been an increase in the cost, partly under the item of "export duty on gold" consequent upon augmented shipments, and partly from the additional outlay in labour necessitated by a very severe and unprecedented drought. The customary addition of 10 per cent. on the dividend has been made to the reserve, which now stands at 26,516*l*. A resolution was also proposed by the Board and carried, appropriating a sum not exceeding 1,000*l* to the superintendent and officers as a special mark of approbation.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.7⅜ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 5-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves little, if any, profit on the transmission of gold to the United States.

The Commercial Times.

LETTERS FOR CONSTANTINOPLE VIA VIENNA AND KUSTENDJIE.—A postal communication has been established between Vienna and Constantinople by way of Tchernavoda and Kustendjie. Mails for conveyance by this route are despatched from Vienna twice a week, viz., on Mondays and Thursdays; and letters from the United Kingdom intended to be forwarded by such mails will, in the ordinary course of post, be in time for the mail of Monday, if despatched from London via Ostend on the evening of the previous Friday, and for the mail of Thursday, if despatched from London on the evening of the previous Monday. Letters for Constantinople which the senders may desire to forward by this route must be specially addressed "via Kustendjie." The postage chargeable upon letters will be the same as via Trieste, viz., 1s 1d for a letter not exceeding half an ounce in weight, and so on. Letters for Constantinople may also be forwarded by the quick mail from Paris, if specially directed "via Paris, Vienna, and Kustendjie." Letters intended to be sent by this route, must be posted in or reach London in time for the day mail to France on the mornings of Saturday and Tuesday. The postage upon letters thus sent will be at the rate of 1s 2d for each quarter of an ounce. In either case the prepayment of the postage will be optional with the sender.

Imports of the week ..... 366,802 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

So little business was transacted in English wheat at Mark lane, to-day, that the quotations were almost nominal. To have forced sales, 1s to 2s per quarter less money must have been submitted to. Foreign wheat was very dull, and drooping in price. All spring corn was heavy, and lower to purchase. In flour, scarcely any sales took place. The imports of foreign produce, this week, amount to 14,420 quarters of wheat, 2,680 barley, 59,890 oats, 1,660 sacks and 6,130 barrels of flour.

At Liverpool, this morning, wheat declined 1d to 2d per cental, and flour 6d per sack and barrel.

The tone of the Liverpool cotton market during the present week has been quiet but steady, the total sales amounting to 55,000 bales, including 37,000 bales to spinners, 10,000 bales on speculation, and 8,000 bales for export. American descriptions command the full rates of last week, but East India cotton is rather in favour of the buyer. To-day's sales are 8,000 bales. The market closes pretty firm, but lifeless, and without alteration in prices.

Messrs Briggs and Co. report the state of the cotton trade at Alexandria to the 4th inst. as follows:—"The less encouraging news from Europe last had the effect of checking business, without however making much, if any, change in price; now, again, full rates are demanded, and but little is doing, with a very small stock to choose from. The weekly sales have been:—55 bales low ordinary, at 6d to 7d; 506 bales ordinary to middling, at 7d to 8d; 341 bales good middling to fair, 8d to 8¼d per lb f.o.b. Freights by steamers for cotton, ⅜d per lb; and for grain, 6s per imperial quarter in full. Exchange is pretty steady at 95 piastres to 95¼ per £ sterling, with rather a tendency to rise. Shipments of cotton in bales from the 17th of May to the 1st inst.:—Great Britain, 6,208; France, 1,738; Austria, 566; total, 8,512."

The transactions in tea have continued on a very moderate scale. In prices, however, no quotable change has taken place.

Although only moderate supplies of raw sugar have been on offer, the demand generally has been in a most inactive state, at barely the late decline in value. On the whole, a full average business has been transacted in coffee, at, in most transactions, previous rates.

Owing to the continued decline in the value of wheat, all kinds of rice have moved off heavily, and prices have had a drooping tendency.

Next to nothing has been passing in saltpetre, and the quotations are nominally unaltered.

The periodical public sales of silk commenced on Wednesday, and are concluded. The quantity offered was 1,600 bales Bengal silk, 7,000 bales China, and 1,000 bales Japan. As too frequently happens, the whole were allowed to pass without biddings, except for some few parcels of the Japan, which were generally of inferior quality, and realised proportionately low prices. The general market continues very quiet, but the uncertainty and fear as to the result of the European crop induces importers to be fairly firm.

There is a fair amount of business doing in Scotch pig iron at 49s 6d cash mixed numbers. Spelter is very dull at 15*l* 15s per ton on the spot. Straits tin has realised 120*l*.

The shipments of Scotch pig iron exhibit a satisfactory increase, as will be seen from the following statement of the export during three months ending the 8th inst.:—

Week ending	1861. tons.	1860. tons.	Week ending	1861. tons.	1860. tons.

April 27	15,522	11,179			

These figures show an increase during the three months of no less than 30,587 tons.

A Government contract for 50,000 gallons having been announced, the market for rum has ruled steady, at full prices. Most other spirits have commanded very little attention.

The transactions in oils have been somewhat restricted; nevertheless, no change of importance has taken place in the quotations.

Tallow has moved off slowly. P.Y.C. on the spot is selling at 53s; June, 53s; July to September, 52s 6d; October to December, 52s per cwt. Town tallow, 50s 3d net cash.

"Nearly all departments of trade and commerce," says the New

York *Shipping List* of the 5th inst., "continue to languish. The rise in the rate of discount by the Bank of England from 5 to 6 per cent., consequent upon the rapid efflux of gold from England to America, having been generally anticipated, occasioned little surprise, and produced no effect either upon stocks or shares. In the money market here, there is little change to note. There would seem to be a growing ease for loans on call, and with the right kind of securities, which, by the way, must be United States or New York State stocks at 5½ to 6 per cent., and on bond and mortgage at 6 to 7 per cent., which is rather lower than has been quoted for some time past. Prime endorsed bills running 60 to 90 days to 4 and 6 months go at 7 to 8 per cent. First-class signatures also find accommodation at 7 per cent., but all other bills are looked upon with suspicion, and rates take a wide range—in fact, there is no quotable rate. We quote as follows:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	7 ...
Do. 4 to 6 months	8 ...
First-class single signatures	7 ...
Other good bills	... ...

Dulness and depression continue to be the only prominent features in the dry goods trade. There is next to nothing doing outside of military goods, and there is very little excitement even in this department. The tone of the dry goods markets in Boston and other cities is but the reflection of our own, and inactivity is everywhere the ruling feature. Prices are merely nominal."

The market continues to be destitute of animation, and prices are nominally unchanged; it may be remarked, however, that to effect large sales, lower prices would have to be accepted. The sales foot up about 2,000 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	11¼	11¼	11¼	11¼
Good ordinary	12⅛	12⅛	12⅛	12⅛
Middling	13⅞	14	14⅛	14⅛
Good middling	14⅛	14⅛	15	15⅛
Middling fair	14⅞	14⅞	15⅛	15⅛

The arrivals have been from Texas, 25 bales; Florida, 392; Baltimore, 2—total, 419 bales. Total import since 1st inst., 419 bales; total import since 1st September, 429,724 bales. Export from January 1 to May 31, 1861, 143,920 bales, against 99,690 in 1860. Export from 1st to 4th June, 795 bales, against 2,137 in 1860.

NEW YORK, June 7.—There is a good demand for all kinds of cotton, and the sales to-day have amounted to 3,000 bales. Middling Upland has been disposed of at 14c to 14¼c per lb.

NEW ORLEANS, June 7.—Cotton irregular. Sales of the week, 2,500 bales; receipts of the week, 1,200 bales; receipts below last year, 3,000 bales.

LIVERPOOL MARKET.—JUNE 21.

The cotton market has been quiet throughout the week, though a fair amount of business has been daily transacted. There is little or no change to notice in the prices of any description, but with the present large stocks, it is not easy to make rapid progress in the sale of anything. The above remarks will apply equally to long-stapled kinds, and to East India. The sales to-day are 8,000 bales. A quiet but steady market. The reported export amounts to 7,880 bales, consisting of 3,300 American, 350 Brazil, and 4,230 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for goods in the manufacturing markets held this week has been very inactive, but without leading to any change in the quotations. Stocks, generally speaking, are not to say very large for the time of year. The iron trade has continued in a healthy state, but coals have moved off heavily on easier terms.

MANCHESTER, June 20.—The market has continued as before, dull and in favour of buyers, who, however, are watching their opportunity of coming in at lower prices as stocks proceed to accumulate with each succeeding week. Manufacturers are altogether discouraged with the absence of demand, and only maintain prices on the question of cotton supply. Spinners see no prospect before them but that of lessening their production, which they are now but beginning to do in isolated cases, and that most unwillingly. The class of yarns represented by Blackburn 32's are ⅛d to ¼d per lb lower than last week. We repeat our quotations generally, but there are few transactions at them.

BRADFORD.—Rather more wool has changed hands, but at prices which must have proved a serious loss to the sellers, and whether it has reached the lowest point seems more than doubtful. At all events, it does not induce speculative purchasing, and spinners only buy as much as will cover them for a short period. No animation exists in the yarn market. The piece market is without material change.

LEEDS.—The markets in the cloth halls have been of a fair character. The demand is chiefly for the home trade, the prospects of which are improving in consequence of the fineness of the weather and the favourable reports as to the harvest prospects. Wools are steady in price, as are also those of sound good cloths. The flax trade is not so brisk as it was a short time ago, and some firms are contracting their rates of production.

ROCHDALE.—Both the flannel and the wool markets have been very inanimate, and manufacturers, from the slackness in the demand, are beginning to reduce their rate of production. Yorkshire goods also sell slowly, and to force sales lower terms have to be acceded to. Long wools are lower than last month, but late prices of short wools are held firmly.

LEICESTER.—There is not much activity in the hosiery trade generally, and buyers for the most part hold off purchasing, except in small lots. Business also at Hinckley, Loughborough, and

the country districts remains extremely dull. There is not much stock on hand, hosiers making pretty generally to order. Many framework knitters continue unemployed. Wools are difficult to sell, at recent prices. Yarns are not in request, and spinners produce cautiously.

NOTTINGHAM.—Nothwithstanding the fineness of the weather and the advancement of the season there is no improvement in the lace trade. The cotton branch is as depressed as it has been for a considerable time past, without much hope of amendment until the affairs in America become more settled. Plain nets and fancies are alike a dull sale. The demand for shawls, mantles, &c., continues. In hosiery there is a moderate amount of business doing for the home market, and a few foreign orders are executing; but the state of both the staple trades is far from encouraging. Yarns hold firm.

BELFAST.—There has been a favourable turn in the demand for the lighter styles of linens. Buyers are very cautious, however, and seek rather to keep stocks assorted than to go into large transactions. The lawn trade is languid: some effective clearances were made in the course of the week, at slightly reduced rates. Damasks lower in stock. Power-loom linens have been accumulating pretty largely. No change in the diaper trade.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 7s 6d to 3*l* 10s; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 5.—The demand for State and Western flour continues fair, but the market has been somewhat heavy during the past three days, and common grades have experienced a further depreciation of 5 to 10 cents per bbl. Canada flour is in moderate request, and common grades are lower; the sales are 2,200 bbls, including 900 yesterday, at 5 dols to 7 dols 50c. The market for Southern flour is without especial change. The demand is moderate, and prices rather favour the purchaser. The sales comprise 5,000 bbls.

EXPORT from Jan. 1 to May 31.

	barrels		barrels
1861	938,574	1860	340,271

EXPORT from 1st to 4th June.

	1861. barrels	1860. barrels
Wheat Flour	38,447	28,109

The demand for wheat has been rather less active since our last, and holders of inferior grades have had to submit to a further reduction in order to realise. Prime grades continue scarce, however, and being in tolerably active request, both for local milling and for export, have generally commanded full previous prices. The sales since last Friday foot up 550,000 bushels. The demand for corn continues uninterrupted, and the sales for the three days have been tolerably heavy, comprising 435,000 bushels, including 150,000 yesterday.

EXPORT from Jan. 1 to May 31.

	1861. bushels	1860. bushels
Wheat	5,594,803	667,225
Corn	3,862,831	687,747

	1861. bushels	1860. bushels
Wheat	218,885	120,300
Corn	29,612	221,451

NEW YORK, June 7.—For nearly all kinds of flour, the trade is heavy, at fully the late decline in the quotations. Wheat moves off slowly, at drooping currencies. Corn may be considered steady. Freights firm and advancing.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing, in some measure, to the favourable accounts which have come to hand from most parts of the United Kingdom in reference to the general appearance of the growing crops, and the continued heavy imports of produce from abroad, there has been very little inquiry for English wheat in any of the markets held this week, and prices have further declined 1s to fully 2s per quarter. Foreign wheat, too, has commanded very little attention, and importers have become free sellers at 1s to 2s per quarter less money. Both English and foreign barley, though in limited supply, has moved off heavily, at barely stationary prices. In malt, the sales have been almost wholly in retail, at late currencies. There has been very little inquiry for oats, at 6d to 1s per quarter beneath previous rates. Both beans and peas, as well as inferior flour, have ruled in favour of buyers.

The Continental markets have been very inactive for all kinds of produce, and the quotations have had a drooping tendency. Advices from New York state that flour was offering at depressed rates, with rather large supplies on offer. Wheat and maize, however, were held at full prices.

In Scotland there has been great inactivity in the demand for wheat, on lower terms. Other articles have sold heavily.

The Irish markets have been dull for wheat and other kinds of produce. Prices, almost generally, have had a downward tendency.

At Mark lane, to-day, the show of English wheat was limited. There was no disposition, however, on the part of buyers to operate, and where sales were effected less money was accepted. Foreign wheat was very dull, and prices ruled nominal. Oats, owing to the large importation, moved off heavily, at a decline of 6d per quarter. Malt was dull, at barely late rates. Barley, beans, and peas were a slow sale, and the quotat ons had a downward tendency. Flour was very dull, and next to nominal in value.

The following observations on the floating cargo trade are furnished by Mr E. Rainford:—The arrivals off coast reported since the 13th are 80, comprising 33 cargoes of wheat, 24 maize, 14 barley, and 9 miscellaneous, viz.:—Wheat, 20 cargoes from Odessa, 2 Alexandria, 3 Trieste, 2 Ibraila, 2 New York, 1 Berdianski, 1 Santander, 1 Galatz, 1 Ancona; maize, 2 Trieste, 6 Galatz, 1 Enos, 3 Odessa, 6 Ibraila, 2 Alexandria, 1 Gibraltar, 1 Sulina, 1 Fatza, 1 Saffi; barley, 6 Odessa, 3 Ibraila, 1 Sulina, 2 Alexandria, 2 Ismail; rye, 1 Eupatoria, 1 Ibraila, 1 Odessa; flour, 1 Marseilles, 1 Santander; beans, 1 Mazagan; millet-seed, 1 Ibraila; maize and wheat, 1 Odessa; oats and peas, 1 Odessa. Some of these were previously disposed of. Sales of cargoes afloat have been slow till to-day, when there has been a little more doing, but prices drooping. The following are transactions since this day week:—Wheat, per 492 lbs, on passage, Marianople, 50s; arrived, Odessa Ghirka, 46s 6d; arrived, per 480 lbs, Polish Odessa, 47s and 47s 6d, and a cargo (for Antwerp) at 48s; Saide, 36s; Sandomirka, 54s (for the Continent). Maize, arrived, per 492 lbs, Odessa, 31s; ditto, not perfect, 29s 6d; Galatz, 30s 3d and 31s, also a cargo, not perfect, at 30s 6d; per 480 lbs, Enos, some damage, 28s; Salonica, 30s; Ibraila, 31s, 30s 6d, and 2 cargoes at 28s 6d. Rye, arrived, per 480 lbs, Eupatoria (for the Continent), 32s 6d. Beans, on passage, Egyptian, at 30s per 480 lbs.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand for floating cargoes of foreign has been active, and in some instances prices ruled rather firmer than last week. Since Friday the market presents little change, moderate transactions having taken place on the spot at the decline then quoted. 1,527 casks West India had changed hands in the three days, including the parcels offered by auction which partly sold: Barbadoes, 35s to 41s 6d; Grenada, 33s to 36s per cwt. Foreign descriptions in the public sales have gone off steadily. The landings last week were nearly 9,000 tons, consequently the stock has increased to 64,550 tons. Contrasted with that of 1860, however, it shows a deficiency of 5,650 tons. The deliveries have improved, and were 4,800 tons during the last week.

Mauritius.—7,513 bags in the public sales were about half disposed of: grainy, 36s to 40s; crystallised, 39s to 42s; brown chiefly taken in; very low to good, 29s 6d; soft grey and yellow at 35s 6d to 39s per cwt.

Foreign.—1,058 casks 276 barrels Porto Rico offered by action were mostly disposed of: brown, 34s to 36s; low heavy greyish to very fine yellow, 36s 6d to 47s. 2,000 boxes Havana sold from 34s 6d to 42s 6d for brown to fine yellow. 523 casks foreign muscovado, soft Cuba kind, 32s 6d to 36s 6d. 450 casks 265 barrels Cuba partly sold at 32s 6d to 38s for brown to good yellow. Privately, 3,400 bags clayed Manilla have sold at 32s 9d. A floating cargo of Havana is reported for Gottenburg, chiefly No. 16, at 28s; with a small portion No. 10, at 23s 9d; one, No. 12, at 24s, for a near port; and one of white, No. 18½ to 19, at 30s 6d for St Petersburg. A cargo of Bahia 22s 3d for Gottenburg. Six floating cargoes of Havana have sold for the United Kingdom: Nos. 11½ to 13, 24s to 25s 6d; No. 9, 23s.

Refined.—Dry goods have experienced a decline of 6d, the lower qualities selling at 49s 6d to 50s; middling to fine, 50s to 51s. Crushed steady, at 47s to 48s 6d.

MELADO.—913 casks partly found buyers at 23s to 26s; dry and sugar, 27s 6d to 30s 6d.

MOLASSES.—280 casks Cuba muscovado were bought in at 17s per cwt.

RUM.—The Government have advertised for 50,000 gallons, contracts to be sent in on the 3rd proximo. This has not influenced the market, which remains steady with a fair demand. 450 casks Mauritius sold at 1s 8½d; Leewards, 1s 9d to 1s 9½d. A few sales have been made in Jamaica and Demerara at previous rates.

COFFEE.—The market has been steady, and the various parcels brought forward have chiefly found buyers at full prices. 851 casks 487 barrels and bags plantation Ceylon went off at 68s to 71s for fine fine ordinary to low middling, and 71s 6d to 75s 6d for middling to good middling. 1,506 bags native: ordinary to good, 60s to 62s. 33 half-bales Mocha: clean garbled yellow, much broken, 95s. 80 casks 258 barrels and bags Jamaica: ordinary to low middling, 61s to 69s 6d. 92 casks Neilgherry were chiefly bought in at 72s per cwt.

COCOA.—457 bags Grenada cocoa were withdrawn, there being no offers made near the previous value. 346 bags Trinidad were taken in: grey to good red, 58s to 75s. 37 bags St Lucia at 55s. Some small orders have been executed in Trinidad privately at high rates for fine marks, viz., 93s to 95s per cwt.

TEA.—Moderate transactions have occurred in blackish leaf congou by private contract, Otherwise the market remains quiet, and several public sales will be held next week.

RICE.—This article is still very slow of sale, owing to the fine weather for the growing crops. Low middling to fine bold white Bengal has sold privately at 10s 6d to 15s, and Ballam at 9s 6d to 9s 9d per cwt.

IMPORTS and DELIVERIES of RICE to June 15, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	30270	13240	10060	55820

Exported	*	8055	11120	7360
Stock	32725	47800	72430	96060

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—The sales up to yesterday were generally unimportant and the market is quiet. 535 bags pimento were partly sold at 2⅝d to 2¾d per lb for low and common quality. 222 barrels Jamaica ginger: low to good middling realised 2*l* 3s to 3*l* 16s. 140 cases cassia lignea were withdrawn at 4*l* 10s per ewt for pile 1.

SALTPETRE.—This article remains dull and unsettled. Some few orders were executed in Bengal during the earlier part of the week at about previous rates: refraction 10 to 3⅓, 34s 6d to 37s 3d. 887 bags Bengal by auction were bought in above the value, but since partly placed at 35s 9d per cwt, refraction 6½ to 6 per cent. There now appear to be sellers rather under these rates.

IMPORTS and DELIVERIES of SALTPETRE to June 15, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons

Delivered	6450	5850	9000	7150
Stock	4520	4710	3670	5210

Deliveries last week 145 tons.

COCHINEAL.—Owing to the unfavourable reports from Honduras respecting the crop, the market is firmer and many parcels have been withdrawn. Prices may be considered 1d to 2d per lb dearer. Mexican silver, 2s 4d to 2s 5d. 71 bags Teneriffe by auction went at a proportionate rise for silvers, viz., 2s 6d to 2s 7d; a few lots black, 2s 8d to 2s 10d per lb.

IMPORTS and DELIVERIES of COCHINEAL to June 15, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imports	9120	8370	8260	3995
Deliveries	7740	7725	8360	6650
Stock	8420	6710	5600	5330

There were 560 serons delivered last week.

DYESTUFFS.—1,318 bags Cutch, by auction, sold at 22s. 61 bales safflower brought 3*l* 10s to 6*l* 15s for ordinary to good, being about the previous value. Bengal turmeric was bought in at 16s per cwt.

SHELLAC is again higher, and the market very firm: good livery orange has sold at 9*l* 5s; native liver, 8*l* 10s; fine orange, 10*l* 7s 6d per cwt.

RUBBER.—East India partly sold at 1s 1d to 1s 1½d per lb for common quality.

HEMP.—1,820 bales Manilla, by auction, sold at 20*l* 7s 6d to 21*l* 10s for roping sorts, being 1*l* per ton lower.

JUTE.—The sales on Wednesday were 4,635 bales, of which a portion sold, and some of the common marks barely supported their previous value: low to fine, 12*l* 5s to 20*l* 5s per ton.

LINSEED is steady. Calcutta, 55s; Bombay, 52s 6d to 53s per quarter.

OILS.—Sperm is dull, 95*l* 10s being taken for fine colonial. 60 tuns pale seal to arrive have sold at 36*l*. Olive neglected. A floating cargo of Gallipoli is reported at 54*l* for the Baltic. Linseed quiet, at 29s 9d. Rape dull; foreign refined, 41s; brown, 38s per cwt. Cocoa-nut is almost neglected: Ceylon, 44s; Cochin, 45s. Palm dull, at 45s per cwt.

TURPENTINE.—American spirits sell slowly at 43s 6d to 44s per cwt. Rough held at 16s per cwt.

METALS.—A quiet tone still pervades the market. Foreign tin is nominally unaltered in value. A few contracts have been made in spelter, at 15*l* 15s to 16*l* per ton. To-day the market is much firmer at 16*l* per ton. All kinds of iron is steady. Scotch pig has advanced to 50s per ton for mixed numbers.

TALLOW.—The market remains dull, and there has been a further decline established for foreign on the spot, viz., 1st sort Y.C., 53s; for delivery in October to December, 52s per cwt accepted.

PARTICULARS OF TALLOW.—Monday, June 17.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The moderate quantity brought forward to-day was chiefly sold, viz., 534 casks Porto Rico, 128 casks Barbadoes, 130 casks Jamaica, and 4,116 bags Mauritius. There have been 2,517 casks West India sold this week. A floating cargo of Havana, No. 13½ to 14, sold at 26s 6d per cwt for the United Kingdom.

COFFEE.—127 bags Cannon's Mysore were sold at 85s 6d to 88s. 359 casks 404 barrels and bags plantation Ceylon realised previous rates, and 106 casks 389 barrels and bags native were bought in. 2,000 bags Rio were taken in at 54s to 56s per cwt.

COCOA.—108 bags Trinidad part sold at 70s to 85s for good and fine red.

RICE.—3,750 bags Bengal rather more than half sold: middling to good middling white, 11s to 11s 9d; Ballam, 9s 6d to 9s 9d per cwt.

SAGO FLOUR.—326 bags went at 15s 6d per cwt.

SPICES.—175 cases nutmegs sold at 1s to 3s 4d for brown sorts, being barely the former value. 36 cases mace, 9d to 1s 1d for low to fair. 2,600 bags Penang pepper partly sold at 3⅜d to 3½d for dusty to good. 64 bags Penang white were bought in at 6d per lb. 51 cases East India ginger, rough Cochin, rather wormy, 50s to 52s. 79 bags African were bought in at 33s.

SALTPETRE.—1,353 bags Bombay partly sold at 30s 6d to 31s 6d.

376 bags Bengal were taken in: refraction 9, 35s 6d to 36s. Privately, 500 bags 9¼ have sold at 34s 6d per cwt.

OIL.—250 casks palm were bought in.

TALLOW.—106 casks 110 boxes South American were chiefly taken in at 51s to 53s. 134 hhds Australian sold: beef, 48s 3d to 48s 6d. Town, 52s, against 52s 9d last Friday.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very quiet; sales mostly in favour of the buyer. No alteration to note in Dutch crushed.

GREEN FRUIT.—A good demand exists for all kinds. Oranges lower than last week; some parcels of Valencia and Lisbon, sold by Keeling and Hunt at public sale, went at 2s to 3s per package lower. Lemons improved in value, with a diminishing stock. Nuts without alteration.

DRY FRUIT.—Notwithstanding the healthy reports of coming crops, the market keeps its ground and shows no weakness. Quotations are unaltered.

ENGLISH WOOL.—Very little business. Prices in favour of buyers.

COLONIAL WOOL.—No change to notice in the colonial wool market.

FLAX rather lower this week; but little doing.

HEMP.—Market without alteration in quotations, still a very fair amount of business has been transacted during the week.

COTTON.—Sales of cotton from Friday, 14th June, to Thursday, 20th June, inclusive:—1,300 bales Surat at 5¼d for middling fair old Broach; 5¾d for good fair Oomrawatty, 5½d to 5⅝d for middling to middling fair old Oomrawatty, 5¼d for middling fair Dhollera, 5¼d for fair Mangarole, 100 bales Tinnevelly at 5⅞d to 6⅛d for fully fair to good. The transactions have again been moderate, and the market dull, and in some cases ⅛d per lb lower for Surat, whilst Tinnevelly, although much neglected, commands previous rates. 58 bales Carriacou and St Vincents, 12 African, and 84 American are advertised for public sale on Thursday next, 27th inst.

TOBACCO.—The greatly advanced rates for home-trade descriptions demanded by holders have confined sales to very limited quantities for immediate use. The market has presented increased firmness, and some difficulty has been experienced in purchasing at present quotations.

LEATHER AND HIDES.—The leather trade continues unaltered. The transactions of the week show the same limited demand without change in prices. The supply of fresh goods on Tuesday, at Leadenhall, was considerable, but without a corresponding increase in the demand; best tannages of crop hides, 45 lbs to 50 lbs, were again in request.

METALS.—Matters are no way altered in our market, unless it be that the depression is intensified. Copper is so heavy that an alteration of prices is imminent, but even a reduction can hardly stimulate demand. Iron remains as hitherto, very much depressed, and difficult of sale. Tin is inanimate, both from slackness of general business and the usual uncertainty immediately preceding the annual sale of Banca in Holland. Spelter is heavy in stock, and depressed in price. Lead is neglected. Tin plates find a continued heavy sale.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	0
Fat by ditto	2	8
Yellow Russian	54	6
Melted stuff	36	6
Rough ditto	21	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market steady at 74s f.o.b. Delivery large. More Hamburg selling at slight advance. Friesland dull at 90s, quality inferior. York and Irish hams in fair demand. Great run on American, all being sold on arrival.

METROPOLITAN CATTLE MARKET.

THURSDAY, June 20.—Although only a moderate supply of beasts were on offer here to-day, all kinds moved off somewhat heavily at Monday's currency. With sheep we were fairly supplied. The best Downs and half-breds were steady, otherwise the mutton trade was very inactive at late rates. We have to report a dull inquiry for lambs at about stationary prices, viz., from 5s 6d to 6s 4d per 8 lbs. The supply of calves being extensive, the veal trade ruled heavy at a further decline in the quotations of 4d per 8 lbs. The top price was 4s 8d per 8 lbs. Pigs and milch cows moved off slowly at barely late rates.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	0	5	2
Second quality ditto	3	10	4	2	Large coarse calves	3	6	4	0
Prime large oxen	4	4	4	6	Prime small ditto	4	2	4	8

Prime coarse-woolled do.	4	4	4	10	Quarter old store pigs	22	0	29	0

Lambs, 5s 6d to 6s 4d.

Total supply—Beasts, 782; sheep and lambs, 2,540; calves, 590; pigs, 440.
Foreign supply—Beasts, 250; sheep, 1,500; calves, 400.

NEWGATE AND LEADENHALL.

FRIDAY, June 21.—The supplies of meat on sale here are only moderate. The trade, however, is in a sluggish state, and prices have a downward tendency.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	2	Middling mutton	3	10	4	4

Large Pork	3	10	4	2	Lamb	5	0	5	8
Inferior mutton	3	4	3	8					

HOP MARKET.

BOROUGH, Monday, June 17.—The reports for the period of the year cannot be more unfavourable. The blight is rapidly progressing in nearly every district, and the present estimated duty of 70,000*l* finds no backers. The market continues busy, and the recently improved currency firmly supported. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, June 21.—The accounts at hand from the plantations this morning are decidedly more satisfactory, and the duty is now estimated at about 70,000*l*. The market, however, continues firm, and the late advance in the quotations is well supported.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, June 17.—During the past week the arrivals coastwise have been moderate, but owing to the extreme heat of the weather very few were wanted. Yorkshire Flukes, 110s to 140s; Lincolnshire Regents, 60s to 80s; North Berwick ditto, 60s to 90s; Perth, Forfar, and Fife ditto, 50s to 70s; ditto, ditto, ditto Rocks, 60s to 70s; ditto, ditto, ditto Reds, 60s to 70s per ton.

BOROUGH AND SPITALFIELDS, Friday, June 21.—The arrivals of old potatoes have now almost ceased. The supply of new, both English and foreign, has been more extensive, yet the demand for them has continued steady, at from 8s to 17s per cwt.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 10s to 2*l* 0s per load. Trade slow.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 14s to 2*l* 0s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade heavy.

COAL MARKET.

FRIDAY, June 21.—Wall's-end:—Haswell 18s 6d—South Hetton 18s 6d—Hartlepool 18s—South Hartlepool 16s 9d—Kepier Grange 16s 3d—Thorpe 16s 6d—Harton 15s 9d—Tanfield Moor 12s 9d—Bebside Hartley 15s 6d—Strakers Hartley 15s 6d. Ships at market, 41.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 21.—The considerable fall in the price of English wool continues to affect our demand; consequently there is little doing.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 21.—Market moderately attended. Wheat in demand at 1d to 2d lower. Flour slow sale, at 6d per barrel and sack decline. Indian corn dull, 28s 6d to 29s for mixed, and 29s for yellow. Beans in moderate request at 32s for Bakers and 33s to 33s 6d for new Saidi. Oats and oatmeal dull, prices nominally the same as on Tuesday.

The Gazette.

TUESDAY, June 18.

BANKRUPTS.

T. Bacon, Newmarket, hotelkeeper.
T. Symons, Princes terrace, Caledonian road, and St John street, Clerkenwell, leather seller.
C. Kerman, Millbrook, near Southampton, engineer.
J. Tree, Worcester, scrivener.
W. Howls, Little Stretton, Shropshire, licensed victualler.
J. B. Brown, Coventry, riband manufacturer.
J. Douglas, Wolverhampton, dealer.
P. Alder, West Malvern, builder.
T. Perkes, Ecclesfield, Yorkshire, corn miller.
E. Parkin, sen., Sheffield, file manufacturer.
W. T. Smith and S. Cannon, late of Melbourne, Australia, merchants.
H. Kidd, Stockport, cotton manufacturer.
J. Turner, Bury, Lancashire, cotton manufacturer.

SCOTCH SEQUESTRATIONS.

J. M'Hardy, Aberdeen, ironmonger.
G. F. Rutherfurd, Glasgow, wine merchant.
T. Turnbull, Morebattle, Roxburghshire, grocer.
T. Bain, Loanhead, near Edinburgh, grocer.
C. Sharp, or Gavin, Glasgow, clothier.

GAZETTE OF LAST NIGHT.

BANKRUPTCY ANNULLED.

J. Holroyd, chemist, Winterton, Lincolnshire.

BANKRUPTS.

C. Wakefield, timber dealer, Torriano terrace, Kentish town.
G. Zanni, optician, King street, Holborn.
H. Cooper, tailor, Southampton.
J. French, corn factor, Martock, Somersetshire.
M. Gluckstein, tobaconist, Leeds.
S. W. Moore, lace manufacturer, Nottingham.
C. McLoughlin, gun maker, Cheltenham.
F. Rundall, wine merchant, Tower hill, City.
R. Royds and H. F. Whittle, contractors and builders, Freemantle, Hants.
J. Peacock, licensed victualler, Upper Gornal, Staffordshire.
T. Cooper and H. S. Wallis, millers, Perry Barr, Staffordshire.
J. Holroyd, chemist, Winterton, Lincolnshire.
W. Thomas, draper, Lanerchymedd, Anglesey.
Dalton Brothers, calico printers, Manchester.
G. Moorhouse and Co., cotton manufacturers, Manchester.
R. Harris, builder, Church terrace, Kentish town.
F. Bielefeld, papier mache manufacturer, Wellington street North, Strand.
A. D. Kidd, straw hat manufacturer, Cripplegate buildings, City.
D. Browne and W. Browne, silk manufacturers, Macclesfield.
W. Laidle, boot manufacturer, Sunderland.

SCOTCH BANKRUPTS.

W. P. Shaw, merchant, Dundee.
Yuill and Son, power loom cloth manufacturers, Glasgow.
A. Ritchie, sharebroker, Glasgow.
R. H. Brown, ironmonger, Rutherglen.
W. Jardine, slater, Glasgow.
W. Smith, miller, Glamis, Forfarshire.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 17.—The railway market to-day was rather firm. In the colonial market, East Indian stock improved to 100½ to 101. Other descriptions were quiet. The only important change in the foreign market was a fresh rise in Great Luxembourg to 7⅞ to 7. South Austrian and Lombardo-Venetian remain at ⅜ to ½ discount. In American securities, New York and Erie shares were quoted lower. Mines were rather flat, particularly East Caradon. St John del Rey, however, exceptionally advanced. No material variation occurred in joint stock banks. In miscellaneous descriptions, Australian Agricultural shares were higher. Great Ship were steady at 7s to 7s 6d the ordinary shares, and 15s to 1*l* the preference.

TUESDAY, June 18.—The railway market to-day showed increased heaviness. Sheffield receded 1 per cent.; Midland, and Lancashire and Yorkshire, ½; Great Western, ⅜; and South-Eastern, ¼ per cent. Great Northern were exceptionally rather firm. The public continued to do little or no business. In the colonial market there were few transactions, and prices generally remained without change. East Indian stock was steady at 100½ to 101. Foreign shares were rather dull, and Lombardo-Venetian declined to ½ to ⅜ dis. American railway securities closed about the same as yesterday. Mines were quiet, but rather more steady. In joint stock banks, Australasia shares were firmer. The only alteration in miscellaneous descriptions was a fall in Universal Marine Insurance shares to ⅜ to ⅝ dis., on a report that, owing to some losses, a call may be required.

WEDNESDAY, June 19.—The railway market was without the slightest animation the whole day, and closed rather flat, owing to the prospect of reduced dividends and lower traffic returns. In most cases a decline of ⅛ to ¼ per cent. took place, the only improvement being in Sheffield, which rallied ½ per cent. Great Western of Canada shares and Grand Trunk debentures were also lower. There were few bargains in foreign descriptions, and the only alteration was a reduction in Bahia. American railway securities left off without alteration. Mines were rather dull, and a reaction occurred in St John del Rey. In joint stock banks, London and Westminster improved. Miscellaneous descriptions closed without material variation.

THURSDAY, June 20.—There has been scarcely any business doing in the railway market, and little change occurred. Eastern Counties stock, however, was slightly lower, and the general tendency at the close was rather unfavourable. In the colonial market, Grand Trunk of Canada stock and Great Western shares receded, the latter closing at 10⅜ to ½. Indian guaranteed descriptions were also rather dull. The principal movement in foreign shares was a recovery in Bahia. Lombardo-Venetian, on the other hand, were quoted a fraction lower. American securities were without alteration. Mines closed about the same as yesterday.

FRIDAY, June 21.—The railway share market was inactive, and rather heavy. A reduction of ¼ to ⅜ per cent. took place in most of the principal stocks. Great Western, London and North-Western, and South-Eastern were, however, little affected. London and North-Western stock was quoted 94⅛ to ⅜; Great Western, 72⅞ to 73⅛; Midland, 120⅝ to ⅞; Lancashire and Yorkshire, 111¼ to ½; South-Eastern, 80⅞ to 81⅛; Caledonian, 97 to ½; Great Northern, 108 to 109; and Eastern Counties, 50⅛ to 51. Lombardo-Venetian Railway shares were dull, at 9-16 to 7-16 dis. Indian railway stocks steady. Great Western of Canada Railway shares had a drooping tendency.

POLYTECHNIC INSTITUTION.—This popular place of instructive amusement has once more been opened under new and energetic management. All the new decorations of last season have been refreshed and others added, until the whole interior now presents an exceedingly attractive appearance. A very valuable novelty has this season been introduced in the shape of a picture gallery, which Mr Phené has established for the praiseworthy purpose of enabling young and rising artists who are as yet unknown to fame to make way with the public.

THE INDIA HOUSE.—The sale of the East India House has taken place, the tender accepted being for 155,000*l*. This is a higher sum, reckoning proportionate extent of site, than was obtained for the Excise Office. It is understood to have been purchased with the view of constructing extensive offices and chambers.

The Economist's Railway and Mining Share List.

HOLLOWAY'S OINTMENT AND PILLS.—Female Complaints.—The disorders peculiar to women are the most delicate and difficult to be conducted to favourable terminations. Upon their early and judicious treatment hangs the momentous question whether women enjoy strength, soundness, and cheerfulness, or pine away in weakness, disease, and misery. Holloway's inestimable preparations are the most reliable remedies for restoring weakened or suspended functions. The Ointment should be rubbed on the back and stomach for at least ten minutes every night and morning till restoration takes place and perfect functional regularity be induced. While thus using the Ointment, Holloway's Pills should be freely taken in order to purify the blood and cleanse the system, by which natural process all obstructions are readily removed.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the eneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of all booksellers

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

MEDICAL ADVICE.

DR WATSON, U.S., F.R.A.S., &c. (specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

Re-appearance of Mr and Mrs Dion Bourcicault, in the great sensation drama of THE COLLEEN BAWN.

On Monday, and during the week, A TURKISH BATH. Messrs J. Toole, and Mr P. Bedford. THE COLLEEN BAWN. Messrs Dion Bourcicault, D. Fisher. DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March at 56 Rosebank terrace, St George's road.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

COLLARD AND COLLARD'S NEW

WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,

ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

SIX PER CENT. DEBENTURES.

CANADA LANDED CREDIT COMPANY,

Incorporated by Act of the Parliament of Canada.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. M. Cameron, M.L.C.
R. L. Denison, Esq., Treasurer Board of Agriculture.
W. P. Howland, Esq., M.P.P., President Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffatt, Esq., Director Bank British North America.
William McMaster, Esq. (McMaster and Nephews).
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
Charles Donaldson, Esq.
E. W. Thomsen, Esq., President Board of Agriculture.
BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, and ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day—viz., the 1st of January and 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done made to the Government of Canada, prospectuses, and the debentures, may be had at Messrs Brunton and Son, stockbrokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the Half-Yearly Interest on the Company's Debentures will be paid on and after the 1st of July, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths, 1 Lombard street, London, E.C.

SOLICITORS—Messrs Ellis, Parker, and Clarke, Cowper's court, Cornhill.
SECRETARY—George Grant, Esq.
Temporary Offices, 16 Bishopsgate street within, E.C., London.

This Company has been formed for the purpose of purchasing and working the several patents secured in this country by Mr Nathan Thompson, marine engineer, of New York, for his process of building boats by machinery. Mr Thompson, after many years of close study and the unremitting application of his mechanical skill, has perfected a system of the most simple and effective character for the construction of boats of every size and mould, which must, to a great extent, supersede the present mode of building them by hand labour, every part being prepared with the greatest accuracy and finish by machinery.

Full copies of the prospectus, forms of application, with appendix, containing copies of testimonials, as given at length in the "Times" and "Daily News" of the 17th instant (to which reference is made), will be forwarded on application to the brokers, or to the Secretary, No. 16 Bishopsgate street within, E.C., London.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

TO MERCHANTS,

SHIPOWNERS, and FORWARDERS.—For Rates of Freight per Grand Trunk Railway, the most direct and only safe route, to all parts of Canada and the Western States, apply at the Grand Trunk Railway Offices, 21 Old Broad street, London, E.C.

HERNE BAY—Saturday and Wednesday, at 10 morning.

MARGATE and BACK at one fare every Sunday, at 8.30 morn.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street and St Katharine Wharf.

sionists. Their answer was uniform—and uniformly insolent and impatient. It was virtually:—'We want severance, 'not reconciliation—we want decided preponderance, not fair 'participation.' They went on their own way, disdaining even to listen to the almost suppliant remonstrances and propositions of the North. Is it probable, is it possible, now, when the passions of both sides have been raised to the highest pitch by mutual invective and by actual bloodshed, that the Southerners will listen to the terms they scouted a few months ago,—or that the Northerners will offer any terms half as liberal? People will do many things to avert a breach which they would never dream of doing to repair one—especially when the repair could only be so imperfect and so transient as it would be in the present case.

But the Federalists themselves admit that the time for compromise is gone by. They are now as little inclined for it as their antagonists. They say they are going to subdue the South—so completely to defeat them as to force them back into the Union—and to keep them in it by compulsion and restraint. This achievement, which in March their own chiefs all disclaimed as wild and unattemptable, they have now worked themselves up to the delusion of believing practicable and within easy reach. To such a point has fury blinded their naturally shrewd intelligence.—This, then, is the project the feasibility of which we have to consider. We appeal to the *map:* we remind our readers of the *race.*

The Seceding States extend, from the North of Virginia to the South of Florida and Texas, over 15 degrees of latitude, and from Missouri to North Carolina, over 20 degrees of longitude. This enormous space is inhabited by a rough, scanty, and widely-scattered population, and contains few large towns. A traveller marches for days, and meets only occasional shanties and log-houses. Flying columns might march for days and meet no foe, and no shelter. The largest army would be a mere speck in such a desert. The best appointed army, with the most skilfully organised commissariat, might be in despair at such roads, such rivers, such forests, and such distances. Cleverly managed guerilla bands might harass an army of any size and any quality into speedy ruin. What, then, would become of such a militia as the United States army consists and must consist of—nearly all ill-disciplined volunteers, and scantily provided with the *materiel* of war? It is obvious that anything like a conquest by land of such a country it is mere idleness to speak of. The Confederate troops might, possibly enough, be defeated on the plains of Virginia; but when they retired South, what General would venture to pursue them?

Probably the more rational among the Federalists will admit all this. But they will say:—'That is not our plan, 'nor our expectation. We believe that the Secessionist 'forces are inferior to ours; that they cannot be extensively 'recruited; that they will disperse, especially after disaster, 'more speedily and more certainly than our volunteers; and 'in fact will soon become sick of the contest. Moreover, 'we trust mainly to our blockade. By shutting up all the 'Ports, we shall ruin the planters—prevent them effectually 'from buying what they need and from selling what they must 'sell in order to raise the purchase money—and in six months 'compel them to surrender at discretion.'

Well: we will suppose them to be as successful in dispersing Southern forces and in blockading Southern ports as they expect to be. We will for the moment put aside the two possibilities of the blockade being evaded by a fair proportion of enterprising merchantmen, or raised by Confederate privateers and cruisers,—even if no other contingencies should interfere. Is it so certain that mere defeat in the field added to all the inconveniences and privations consequent on an interrupted commerce *will* induce the Southerners to confess themselves vanquished, and submit to accept terms at the dictation of the conqueror? Does any one acquainted with the temper of the Southerner—who unites all the fiery pride of a Frenchman with all the stubborn pride of an Englishman—believe that defeat and privation will do more than envenom and exasperate the strife? Has it not been apparent from the very beginning of the dispute that fanatical passion and not calculating sense has guided the whole people; and that now their cause has become elevated in their eyes into something that is quite patriotism and almost religion? And can we really believe that such men (who are to be counted by millions), because they can only sell their cotton and buy wine and tea and clothing by driblets, will be persuaded to re-enter that Union as suppliant and defeated rebels, in which they refused to remain unless they could wield its whole power and monopolise its whole emoluments? The superior might of the North we do not for one moment question: they have a vast preponderance in wealth, in numbers, in ships, in education; they are as brave, more intelligent, and may possess or create as able leaders;—and all these resources will tell enormously in the long run. Certainly at last—possibly even from the first—victory and success will incline to their side. But victory is not conquest; success will not necessarily entail the enemy's submission. And they are fighting, not with savage Indians, nor with feeble Mexicans, but with Anglo-Saxons as fierce, as obstinate, and as untameable as themselves. Therefore, granting the utmost that can be alleged as to the difficulties and the poverty of the South, and the numbers and resources of the North, we conceive that though the Federalists may be victorious in the strife, they cannot be successful in their aim. For this last object, they must compel eight millions of free men—trained to self-government and accustomed to regard themselves as not only politically independent but politically supreme—to *sue for peace,*—and to sue to men whom they have habituated themselves to look down upon as snobs and vulgar tradesmen, whom of late they have begun to hate with a *familiar* bitterness, and whom they will detest with tenfold animosity when the humiliation of defeat rankles in their bosoms. Is this a rational anticipation?

There is another and very serious set of considerations connected with this subject, which we must defer till next week.

THE NEW ITALIAN PREMIER.

Baron Ricasoli has inherited a difficult task. He has to carry out a policy of his own beneath the shadow, as it were, of a still greater name. Italians will never cease to compare what he does and what he does not do, what he attempts without success, and what he succeeds in, with the wonderful achievements of Cavour. It is true it is not required of him to erect a little State *into* a great Kingdom,—but his task is scarcely less difficult to complete the unfinished work, to rescue Venice and win Rome, and govern Naples; and all this under the disadvantage of a running comparison in the mind of Europe, as well as of Italy, between what he actually effects, and what conjecture leads men to suppose that Cavour would have effected in his place.

The commencement of his administration has been marked by great success. He still retains Cavour's vast majority on all ministerial questions. His influence with the House is very great; he is popular in the country; even the Garibaldians trust him more than they trusted Cavour; and Tuscany is satisfied and proud to supply at such a crisis the Prime Minister of Italy. His relations with France are good, but there is no fear of their becoming too good. When he declared in the House the other day, amidst general cheering, that the recognition of the Italian Kingdom by France was wholly unconditional, he declared what every Italian believes. They all feel that the last man in the world to compromise the integrity or dignity of the new Kingdom will be Baron Ricasoli; and therefore it is that he has been called by acclamation to occupy the vacant place of the greatest of Italian statesmen.

He is far from an untried man,—far from untried, we mean, in those great qualities which statesmanship requires,—the equanimity in peril, the firmness against persuasion, the audacity to originate what other men think dangerous, the shrewdness to set definite limits to his own audacity, the elasticity to resist the fretting cares of business, the imagination to discriminate the great ends from the little means, and to hold the former always in living force before his mind. These are great qualities, and Baron Ricasoli has given proof of possessing them. He is likely soon to take so prominent a place before the Cabinets of the world, that it is of real interest to retrace the steps of that career which

turned all Italian eyes upon him as soon as their idol was no more.

Baron Ricasoli is the head of one of those old Tuscan aristocratic families who have handed down their estates from father to son for many generations. Some even of his tenantry are said to be living on farms belonging to the barony, which the same family has tilled for 500 years. Ricasoli himself has all the rural tastes of a great landowner. He has more than once shown a positive eagerness to retire from great public positions to his estates at Brolio among the Chianti hills. Naturally he is very unlike Cavour,—more reserved, more proud, more inflexible, and less full of broad and genial humour. The group of Tuscan statesmen with whom in his youth he was most familiar, aspired even then to unite Italy in a confederation of free States, while they leaned strongly to an aristocratic creed. His public life began in 1847, when he presented to the Grand Duke a memorial on the political reforms needful in Tuscany. The chief grievance on which he insisted was the condition of the clergy. It is remarkable that Ricasoli has always been more hostile to the Ultramontane party than Count Cavour himself. As early as 1847 he had practically declared against the principle of the union of Church and State, and had exposed the evils of the ecclesiastical system in the strongest form. But he did not confine himself to the ecclesiastical system. He warned the Grand Duke in very striking terms that if he did not rally Tuscan reformers round him, they would be forced to look elsewhere. "The fulness of time for this work," he said, "is now come. For the torrent of internal and external "events *might draw away elsewhere all the Tuscan elements*, if "they do not become strongly bound together and compacted "in a new form; a *monarchic form* certainly; but one adjusted "to the wisdom of our former days, adapted to the progress "of the present age and of that about to follow it."

This was in 1847. He was sent in the same year to Turin to negotiate the annexation of certain Piedmontese districts on the Northern frontier to the Duchy of Tuscany,—districts which wished to become subject to a Grand Duke who was then thought to be the most prominent of Italian Reformers. His mission was successful. Within twelve years it was his duty to reverse this process, and to annex to Piedment, not certain districts of Tuscany, but the whole of it,—yet for exactly the same reason as before, because Tuscany was bent on being governed by the great Reforming King of that day, Victor Emanuel. It is difficult to find a more striking attestation to the general desire of the Tuscan people for honest and liberal monarchic government, or to their comparative indifference to the particular person who should wield it. Ricasoli's correspondence shows that he was bent in 1847 on assimilating the policy of Charles Albert to that of the then liberal Pope and Grand Duke. In 1859, he had lost all hope of assimilating the Grand Duke's policy to that of Charles Albert, and was forced to advocate the Grand Duke's deposition. It was at this time that Ricasoli accepted temporarily the office of Gonfaloniere, or chief municipal magistrate of Florence. It is one of the most hopeful signs in Tuscan politics that the aristocratic families value the distinctions thus conferred upon them by the great city of their State. When the Grand Duke treacherously called in the Austrians in 1849, Ricasoli retired to his estates, and remained in retirement till Napoleon's speech to the Austrian Ambassador broke the ten years' lull.

Even in 1859 Ricasoli still clung to the hope of maintaining on the throne a Grand Duke who should prove himself genuinely Italian instead of Austrian at heart. But he deliberately took the lead of the anti-Austrian party. He signed the noble manifesto "Toscana e Austria," which demonstrated to the Tuscan people that Tuscany had been ruled as a mere province of Austria,—a manifesto which drew Tuscany into the war. Had the Grand Duke accepted this national policy heartily, Ricasoli and his friends were still intent on saving his throne. The Grand Duke elected to cast in his lot with Austria, and from that moment Ricasoli became one of the political Unitarians of Italy, and a dictatorship over Tuscany was offered to Victor Emanuel *during* the war of independence. With the peace of Villafranca the protectorate of Victor Emanuel over Tuscany necessarily came to an end. Buoncompagni was withdrawn, and between the end of July and 29th of September, 1859, all would have been confusion but for the firmness and ability of Ricasoli. He took the helm into his own hands; he got from the people the free and unfettered expression of their determination to have the King of Sardinia for their King,—and on the 29th of September he had so far prevailed, that Victor Emanuel accepted provisionally on the consent of Europe, the title offered him. The resistance of France was strong and protracted. Agents were sent to persuade the Tuscans that they did not know their own minds,—but all in vain. If they did not know their own minds, Ricasoli knew it for them, and they were quite content to follow his guidance. On the 7th of November the Chambers proposed to elect a Regent to govern in the name of Victor Emanuel till he could himself assume the reins. In the masterly statement which he made on this occasion, Ricasoli told the Assembly that Tuscany was in no hurry for annexation; that she was quite willing and able to govern herself as long as might be needful; but that the difficulties in a prolonged expectancy which Tuscany did not feel, Europe did feel. "As we "have already relieved Europe from all fear of anarchical "tentatives among us, and have reassured it as to the good "use we are capable of making of our recovered liberties, "we ought now to reassure it on this point,—that it is our "wish to retain that monarchic constitution under which the "greater part of the civilised nations live at the present "day, and give guarantees that our principles of na-"tional constitution are not susceptible of being changed "or transferred into a threat against European order." This expresses the essence of his politics. He is, indeed, a conservative of a more rigid, though quite as *national* a type as Cavour. His whole policy has been support of Italian monarchy and unity,—as against the persuasions or threats of France, the necessary indecision and embarrassment of Piedmont during Rattazzi's administration, and, above all, against the anarchic or republican party. No sooner had Victor Emanuel assumed the reins, than Ricasoli, with generous self-forgetfulness, consented to act as a mere Lieutenant-Governor for a time in the country where he had been supreme, and to submit his own judgment to the advice of a ministry at Turin. As soon as he could be spared, he retired again to his estates, and was only drawn out of his retreat by the danger of a collision between Garibaldi and Cavour. He went to Turin, and his admirable speech in April last not only healed the breach, but concentrated all eyes on him as the alternative for Cavour: and this, weeks before the nation had any presage of the approaching loss.

Such is the man who now rules in Cavour's place. We think we are not sanguine in anticipating for him perhaps the noblest, if not the most magnificent of all reputations,—that of worthily completing great plans without any shadow of jealous desire to eclipse his greater predecessor.

THE REPORT OF THE COMMISSIONERS APPOINTED TO INQUIRE INTO THE STATE OF POPULAR EDUCATION IN ENGLAND.

The Commissioners appointed to inquire into the present state and the possible improvement of English education have made a report full of important information, and drawn up with singular care. This was to be expected from the accomplished persons who composed it and from the mass of valuable details placed at their disposal; but what was not so surely and so certainly to be expected, they have made a *recommendation*. A Commission of Inquiry into a complicated subject is very apt to be overwhelmed with the results of its industrious investigations. Each member entered upon the inquiry with certain prepossessions; each member finds that unexpected arguments may be urged against those prepossessions; the subject widens upon the minds of all in unanticipated directions; in the end every one is puzzled, and the Commission concludes its labour with an elaborate report, recounting all the facts, enumerating all the diffi-

culties, explaining everything, and proposing nothing. The Education Commissioners, though, from the largeness of their subject and the practical difficulties which encumber it on every side, they would have every excuse for following this pleasant and pardonable example, have not, however, done so: they have proposed *something new.*

It appears, nevertheless, that the discussions of the Commission did not always terminate in an unanimous decision. The report is the report of a majority; and what majority on each point we do not know. We are in a rather unpleasant uncertainty as to the persons who are claiming the natural deference of our judgment. There are various members of the Commission, and we should attach very various degrees of weight to the opinion of the respective members. We should like to know, as in the analogous instance of a Parliamentary Committee, who voted for a given passage of the report and who voted against it. This wish can never be granted, but one of the Commissioners (Mr Senior) has voluntarily given us something very like it as far as he is himself concerned. He has given us a series of papers which he submitted to his colleagues, the substance of which was in some cases adopted and in other cases rejected. We own that we wish Mr Senior's judgment had prevailed more universally. He is well known to have a great power of "taking things to "pieces;" he has the acute habits of an experienced lawyer and the disciplined habits of an habitual thinker; he has used both on this occasion; he has taken the subject submitted to him very completely to pieces.

What is our present system of education?—for the recommendation of the Commissioners can only be judged with reference to that and as a substitute for that. What are its merits, and what are its defects?

The great excellence is, that it gives some sort of an education to the great mass of the English people—to a greater portion of that people than most of us are aware of. The Commissioners tell us that the total number of children who *ought* to have been receiving some education was 2,655,767; the actual number in receipt of some sort of education was 2,535,462, leaving only 120,305, or about one-twentieth part of the whole, at present entirely unprovided for. The Commissioners carefully warn us, and we are most anxious to repeat their warning, that we must not permit ourselves to be misled into agreeable dreams or pleasurable reveries by these simple figures. They tell us that the instruction at present given is mostly defective in quality, is not given by the best persons, is not given on the most appropriate subjects, is not given in the most efficient manner, is given not to a steady class of habitual attendants, but to a casual class of irregular attendants. Still, after all deductions, the reassuring fact remains—nineteen-twentieths of our children are receiving an education of some sort. We may well be warmed into hope by this result, though we should neither be lulled into apathy nor stimulated into over-confidence. We have a fair basis to begin upon, even if we have not more. We are half-way advanced in the great task. We have to surmount, not the perplexities of commencement, but the difficulties of continuance.

The principle of the present system of education is that of aiding and augmenting the contributions and efforts of different localities in a degree somewhat proportioned to those contributions and efforts. The professed rule is that of helping those who will help themselves, and of not helping those who will not or who cannot help themselves. It gives some money towards building schools to those who have themselves other money; it gives a part of the salary of the teacher to those who can find the rest of that salary; it gives under the name of a "capitation" grant a certain fee to all schools which have scholars already. Upon these principles in twenty years between 1839 and 1859, it has has expended 4,378,183*l* in the following items:—

	£
Building grants	1,047,648
Training teachers	2,544,280
Capitation	186,230
Administration (including inspection)	457,936
Sundries	142,089
	4,378,183

Both the advantages and the disadvantages of this system lie on the very face of it, and are inseparable from its vital system. If you say you will only assist those who are really, truly, and spontaneously exerting themselves, you secure to yourself the benefits of the best co-operation; you secure that your money will be appropriately spent, fairly husbanded, and watchfully superintended; you secure that your money will be expended by the objects of your bounty as if it were part and parcel of their own bounty;—but, on the other hand, you are neglecting the weak to help the strong. You are giving to those who have, not to those who have not; you are conceding to the rich localities where good subscriptions may be expected that which you refuse to poor places where there are no opulent residents,—no person to care for anything but the rent of the houses and of the land,—where the half-pauperised, half-vicious population are left almost wholly to themselves. Such is the inevitable dilemma of the present system: it purchases a great good at the cost of a great evil. Is it wise to do so?

We cannot finally decide this question without a careful examination of many considerations, and a study of the suggestions of the Commissioners and of others also. But we are bold enough to say, in opposition to what may at first sight seem likely, that the reasonable presumption of a thinking mind is rather favourable than opposed to it. It is not and cannot pretend to be an agreeable or comfortable principle, but looks like and is a practical and an intelligible one.

There is a very great difficulty in doing good,—a difficulty which weighs heavily upon individuals, but weighs upon a Government even more—in fact, far more. This is the difficulty of knowing what you are doing. The mass of men's time is occupied; they cannot spare the time, or the labour, or the mind to superintend the charities to which they are willing to contribute, or the practical steps which are being taken to attain the great philanthropic objects they are desirous to befriend. They are necessarily in the hands of agents whom they can scarcely watch, and whom they cannot effectually control. A Government—at least an English Government—is hampered besides by the habitual cumbrousness of political administration: it must act by justifiable rule, upon proved facts, in a recorded manner; it must be able to defend what it does in the face of day by convincing arguments before a public which always leans to an individual against the Government, which the friends of an individual are often eager and not unfrequently able by miscellaneous exertions to prepossess and influence. How, then, can a Government be safe? How can it be sure that its gifts are not wantonly lavished and inefficiently expended?

Two guarding checks have been discovered, both of which are in their respective ways tolerably effectual. One of these is the principle of the English poor law,—the principle of a *compulsory* local check. For the purpose of the poor rate the country is divided into small districts called Unions—each of which is charged with the administration of its own affairs, and is empowered to raise the funds it requires by imposing a rate on the parishes situated within it. This check is found very effectual in preventing what was once considered to be the most formidable social symptom of English civilisation—the alarming increase of the poor rate. The guardians will not spend a halfpenny more on the support of the poor than is absolutely necessary, because they are spending their own money as well as that of others.

But would this principle be as perfect in its effects upon the education of the people as it is upon the subsistence of the paupers? We fear not. There is a very decisive difference between the two. Food is a physical thing, and subsistence a proveable fact. Whether paupers are starved or not, is a question upon which plain evidence may be easily taken. But who is to be the judge whether they are sufficiently educated or not? Education is an immaterial acquisition, as to which there are very generally two opinions. The farmers who compose the board of guardians in agricultural parishes are usually, though with many exceptions, opposed to education; they doubt its value; they deprecate its necessity; they wish to use the boys in agricultural labour. If, as the principle of compulsory local taxation requires, the local taxing body is to be the discriminating and deciding authority, the farmers would decide that a bad education would be quite sufficient for the poor. In the work-

house schools they have always decided so. The guardians have always been either unable or unwilling to manage them properly. They have generally grudged the necessary expense, or have been intellectually incompetent to form a good judgment upon the matter in hand. To intrust the education of the country poor to the farmers, would be to intrust it to the reluctant energies of old opponents, to the unskilful agency of half-instructed men.

The second check on the improper expenditure of public money is the voluntary local check: it is that which the Committee of Privy Council have selected. They say, 'If 'you voluntarily choose to do something, we will help you in 'so doing'; and by that expedient they secure the advantages we have named, at the cost of the evils for which a remedy is desired.

These are the only two checks which seem possible. It is necessary that this checking body should be on the spot; and if so, apparently we must choose either the parties on the spot who choose to exert themselves from zeal and philanthropy, or the whole inhabitants of the district who may be compelled to exert themselves by the law. There seems no third alternative. The Education Commissioners, however, believe that they have found one which we will endeavour to explain to our readers at a very early opportunity.

STATISTICS OF THE FREE STATES AND THE SLAVE STATES.

THE following statistics, which are founded on the late Census of the United States, have not, we believe, been anywhere published as a whole in this country. Their importance, however, in the present state of America, is but too apparent. They have been carefully collected and commented on in a very valuable pamphlet called "The Effect of Secession upon the Commercial Relations between North and South, and upon each Section," published at the office of the *New York Times*, which is well worth the perusal of our readers if they can procure it:—

BOARD OF TRADE RETURNS.

We have elsewhere commented on the most material inferences to be drawn from the Board of Trade Tables, and need, therefore, only give a brief statement of their principal results:—

	£
Our exports have been for the month of May, 1859	10,485,744
— — — — 1860	10,949,188
— — — — 1861	11,206,070

showing an increase for this month, though for the five months immediately preceding the reverse has been the case:—

	£
The exports have been in the five months ending the 31st of May, 1859	52,337,268
— 1860	52,783,535
— 1861	49,780,532

There has been a considerable increase in the export of cotton this month to various countries—sufficient to counterbalance the American demand, and to give an increase of 500,000*l*. The particulars are apparent from the following table:—

DECLARED VALUE.

	Month ended 31st May. 1859. £	1860. £	1861. £

Agriculture.

THE CROPS AND THE SEASON.

A reasonably correct estimate may now be made of the agricultural products of the present year. The season since March has been in many respects favourable; and even when not immediately beneficial to the growing crops the weather has been such as served to correct the ill state of the land from the excessive superabundance of moisture which had fallen upon it during the previous eighteen months. Dry and cold weather in April and May has been succeeded by very hot sunshine during June, and until the 20th there was but little rain. Since the 20th June, we have had heavy showers and several spells of continuous rain. This has retarded haymaking, and prevented many farmers from commencing to cut their grass, but it has been highly beneficial to the grain crops, and will do something to thicken the hay crops on meadow land, which are yet uncut. The clovers and other artificial grasses are generally heavy crops; but the meadows will not produce much more than half the quantities grown last year. The grazing pastures also have been hitherto somewhat bare, and have not sprung up after the bite of the stock as is usual. In truth, all strong soils were so saturated and bound down from long-continued wet, that it required a considerable period of dry weather and much sunshine to restore them to healthy condition. This, we hope, has now been effected, and the recent showery weather seems to be producing a large growth of grass on the pastures carrying live stock. The animals grazing, especially cattle, are also looking remarkably well. On the whole, we believe that the breeders and feeders of stock whose main reliance is grass land will have to complain only of a short crop of hay, confessedly an important qualification. The aftergrass, however, promises to be abundant, and a good deal of late hay will probably be made from grass land fed early in the season, and in this way a fair stock of winter provender may be obtained.

With regard to root crops, mangold wurzel has failed more generally than we recollect for some years past. This has mainly arisen from the rough state of the land, the late period to which the sowing was necessarily postponed, and the long continuance of dry weather. Turnips, however, are more promising, and many fields of mangold have been wholly or partially resown with swede turnips, so that upon the whole we hope there will ultimately be no great deficiency of roots.

Of the wheat crop we cannot give a very good account. The plant is generally thin, and, let the yield from the straw be as large as possible, the crop can scarcely be a full one. The growth of wheat plant has, however, been very favourable, the colour is remarkably good, while the late rains will give it a decided impulse. The breadth sown is comparatively small, and a good deal of that sown was sown on land in a foul state. Beans, too, will not generally be good from thinness of plant, although the growing plants are very thriving and promise to yield well. Of barley and oats, far better accounts are given, both being full of plant and healthy, and both will receive much benefit from recent rains. The farmers may do much this year to put their land into better condition than the year and a half's constant rain left it, but they will require another and a better season than this promises to be, in order to recover the losses of last year.

THE RELATIONS OF VEGETABLE AND ANIMAL PRODUCE.

Every farmer of observation is aware of the intimate connection which exists between the vegetable productions of a farm and the kind and breed of animals which can be profitably maintained upon it. From the highly educated farmer who read a scientific paper on this subject at a recent meeting of the London Farmers' Club, to the men who so often say "We can't keep such stock as that on our land," it is more or less distinctly recognised that it is necessary carefully to consider the quantity of stock and the kinds of stock which can profitably be kept, having regard to the provender the farm will grow. That good farming has lessened, and will still further lessen, the strict dependence on the character of the soil of any district of the stock which may be there fed is beyond question, because all good farming implies and involves an increased growth of provender. Hence improved breeds are constantly extending themselves into districts which, as originally farmed, would not support them with advantage. But it is also certain that the increased produce will not always enable land from which such increase has been forced by good farming to maintain stock as well as other land of greater natural fertility. This is every day's experience, and one useful lesson to be drawn from it is, that for

the purposes of ordinary farmers it is safer to improve the natural stock of any district, even by crossing, if necessary, than to introduce new and even better breeds. We say for the ordinary farmer, as the best farmers may and do keep, and in many instances acclimatise, so to speak, the best breeds into districts where they were before unknown. Perhaps cattle are more easily naturalised in new districts than sheep, and the Shorthorn, in particular, is constantly getting into new localities; but still all local breeds retain their positions with a tenacity indicative of some substantial reasons for the preference with which they are regarded. It thus becomes a practical question with each farmer how far it is prudent to depart from the kinds of stock commonly found in his own district. Nor is the scientific paper read by Mr Hobson (of Lincolnshire) on "The Vegetable and Animal Kingdoms in their Mutual Relations, as Bearing on the Science of Practical Agriculture," at all remote from the every-day interests of the farmer. It is quite true that "it is not the province of science to seek out the means of increasing produce or augmenting incomes. She inquires not what is profitable; this belongs to experimental art, with which she has been confounded. The business of science is to seek for causes." What is wanted from the practical man is such an amount of appreciation and heed to the data ascertained by science as to enable him to come to a good understanding and to co-operate with the scientific inquirer. The practical farmer might also greatly assist the man of science by carefully observing and recording the results of numerous old or new operations.

After adverting to various scientific writers, Mr Hobson mentioned the effect of high culture as illustrated by the market gardens by which the population of the metropolis was supplied with vegetables. It has been shown that 12,000 acres of the richest land are necessary to produce that supply. Manure and deep culture produce the most extraordinary quantities of produce. "By these agencies, four and sometimes five crops are extracted from the land in the course of the year. The old-fashioned farmer, accustomed to old-fashioned leases, would stare at such a statement, and ask how long that would last? But his surprise would be still greater at being told that after every clearance the ground is deeply trenched and its powers restored with a load of manure to every 30 square feet of ground. This is the secret of the return, and here we have a striking example of town and country reciprocation: the same waggon which in the morning brings a load of cabbages, is seen returning a few hours later filled with dung." This reciprocity between town and country might be still further extended by preserving from waste large quantities of manure now wholly lost in the refuse of towns.

The animals of every locality are found to be, when in a state of nature, adapted to the vegetation which supplies them with food. Of this the rein-deer, fed by the snow-covered lichen, the camel on its thorny shrub, and the chamois on the scanty grass of its Alpine regions, are familiar illustrations. "The same principle applies itself to the selection and management of stock, the grazing of cattle and sheep, with reference to soil, climate, and herbage. And no problem connected with the economy of farming is more important to be solved than the adoption of the breed of cattle and sheep most calculated to yield the largest balance of profit from the food consumed, with the most judicious general management. The different breeds are best adapted to their native pastures; and though they may and have been greatly improved, they can very rarely be displaced with impunity. How would the heavy Cotswold or the fat Leicester enjoy a scramble, in company with the active game-like little Welsh, in search of a scanty breakfast on his native mountains! What has been done by skill, capital, and enterprise, in bringing to perfection some of our choicest breeds of cattle and sheep, is too well known and appreciated to need special reference. It has not, however, been effected without a constant studious attention to this principle on which success mainly depends. The food directly or indirectly derived from vegetables must be skilfully adapted in quality and quantity to the requirements of the animal to be sustained or fed; and the animal must have such vigour of constitution and aptitude to thrive and fatten as shall enable it most beneficially to assimilate the largest amount of nourishment to be derived from the food presented to it. The formation of animals, breeding and grazing in all their departments, are amenable to this law of vegetable and animal dependence." Then how much food is often wasted on ill-bred, ill-shaped animals, while in some, though less numerous instances well-bred animals are deteriorated by the absence of suitable food and skilful general management.

Mr Hobson also enforced the necessity of constant attention to the continuous progress of our live stock, saying, "If the master's eye grazes the ox, assuredly it should not long be diverted from the fold if he would avoid that 'one bad day' which every flock-master knows too well will take many a good one to recover."

Again, it may found by examining the vegetation that animals which had not hitherto been kept in any particular district or country might be usefully introduced. The successful introduction of the alpaca into Australia is an instance of this. The *Ichu* grass, which is the favourite food of this animal in Peru, has been found indigenous on the vast grazing grounds of the Australian continent, while the climate of Australia brings the animal to earlier maturity than that of South America.

We find an indication of the difficulty of introducing new breeds [illegible] districts in the report of the *Mark Lane Express* of "the Norfolk Agricultural Association," which held its meeting last week at Swaffham. Both Devons and Shorthorns have been bred in Norfolk, but at the Swaffham meeting there was only one exhibitor of Devons, and but for Lady Pigot's herd there would have been but a poor show of Shorthorns. Mr Torr, one of the judges, said they had largely improved in Leicester sheep, and the exhibition of cart-horses was highly creditable; but "with regard to Shorthorns, he must pull them up a little bit, for had it not been for Lady Pigot's Shorthorns they would have cut a most miserable figure. With regard to their home breeds, he saw in them very marked excellence; he had always been one of those who advocated not improved breeds so much as the improvement of breeds natural and congenial to the county. Of the polled cow class, he declared without favour or affection—being a Shorthorn breeder himself, and having a pretty general knowledge of the aboriginal breeds of the country—that he never saw in his life a more perfect specimen than Mr Oliver's cow. If this breed was congenial to the climate and lands of Norfolk, why should they not cultivate it? The cow which he had mentioned might be made a mine of gold. She might produce, if well crossed by good and compact bulls, a breed which might be most successful and valuable. It was not only the best breeds which were of the most value abstractedly, but a great deal more might be done by improving breeds congenial to the climate than by puffing up one breed against another. He was a thorough-bred Shorthorn breeder, and therefore they would receive this remark unprejudiced. Shorthorns were best adapted to the North of England, as they could be got up at a much earlier maturity, and the inhabitants of the North did not care so much for the London market as to the value per pound, as they got more pounds for consumption. If it was found that in Norfolk that they had a home breed which could be got up with advantage, just as in North Devon they had a breed adapted to that climate, let them keep to it by all means, and they were sure to succeed; but let them not fall into the false economy of breeding merely class against class, a course which was not to be supported upon the true principles of breeding. Let every man try in his own circle of breeding to improve those animals which had been placed in his hands by nature. If he found them not congenial, let him import others, but let the importation be from an original stock. They had in Norfolk Highlanders crossed with Norfolks; whether it was to their advantage in paying their rents he would not say; but he believed they would do more by improving that which nature had given them than by seeking by violent crossing to abrogate the principle which God had laid before them. Violent crossing might pay for a certain time; but he believed it to be decidedly wrong in principle; for one should try to improve nature, and not to alter nature." There is much sound sense in these remarks.

Literature.

COMMERCIAL LITERATURE.

Jones's Stock Tables. By Edwin H. Jones, Accountant. London: E. and E. H. Jones and Theodore Jones and Co.

Mr. Jones modestly contents himself with stating in his preface that his "tables are designed to reduce labour and to facilitate the operations of dealing in Government funds and other public securities," and does not add, as he might with perfect truth have done, that his work is the best of the sort in existence. By these tables the value of any amount of stock at any rate from 70 to 99¾ per cent. can be ascertained at a glance, and the converse operation of finding the precise quantity of stock at a given rate that must be sold to raise a definite sum is also readily performed. The labour that has been bestowed in the preparation of this work has been very great in order to ensure perfect accuracy.

Jones' Debenture and Investment Tables. By E. and E. H. Jones, Accountants. Published by the Authors, 75 Old Broad street, London.

The above is a useful but smaller work of the same description as the "Stock Tables." It shows the market value of debentures issued at the various rates of interest, and running from one to seven years. Appended are some investment tables, exhibiting the income derived from 100*l* stock in proportion as its market value varies from 51 to 250, with dividends varying from 2½ to 10 per cent. per annum. The accuracy of both these sets of tables can be relied upon.

GENERAL LITERATURE.

Essays from the "Quarterly Review." By James Hannay, Author of "Singleton Fontenoy, R. N.," "Satire and Satirists," &c. London: Hurst and Blackett, 13 Great Marlborough street. 1861.

It is not often that a reprint of miscellaneous articles is marked by a character at once so individual in tone and so wide in sympathy as these nine Essays of Mr Hannay's. Those on "British Family Histories," "The Historic Peerage of England," "Admiral Blake," "English Political Satires," and "Electioneering," all

belong to one class of subjects. The Essays on the "Minstrelsy of Scotland," the "Life of Tytler," and "Table Talk," form a second group, nearly related to the first; while the article on "Horace and his Translators" may be said to stand by itself. The pervading sentiment of the volume is a rooted attachment to the historic glories of England, combined with a keen delight in every varied form of heroism or poetry for which England has been distinguished. Mr Hannay's style is always graceful, and often pungent, and the elastic buoyancy of his temperament is well blended with a sense of the sterner realities of life and death that preserves him from anything like flippancy. His sympathies are wide and discriminating; he can appreciate Cavaliers and Puritans, Luther and Horace,—in fact, his moral estimate of Horace (pp 267-8, 298-9) is as good a specimen as anything in the volume, of that felicitous union of moral perceptiveness with cultivated good sense which makes the charm of these Essays.

Mr Hannay does not, however, write only for the pleasure of making graphic sketches of his literary or historical favourites; he has a speculative view of things to support, and he loses no opportunity of pressing its claims on his readers. He does this with so much candour and good taste, that it is not easy at first to discern the boundary line at which his theoretic conservatism limits the range of his human sympathies. But a collation of the various Essays gradually reveals it. Mr Hannay is one of those in whom no social class excites enthusiasm till it has reached the blossoming period. He dislikes crude abstractions and unrealised aspirations, and demands concrete achievements from any man or class that lays claim to social esteem. No doubt this side of the truth is of primary importance, and Mr Hannay has some excellent things to say thereupon. Aristocracy was, he says, "an institution which sprung from deep roots in the heroic history of Europe; and which, in England, had helped to create 'liberty,' as it had created titular distinctions. Those who maintained its cause [in the arguments of the 18th century] dwelt too much on what was secondary and accidental about it, and so provoked an antagonism which did not spare what was primary and intrinsic." "It is an 'accident' as regards the *individual* that he should be born from this or the other source (as, in one sense, it is an 'accident' that he should have genius or beauty), but it is not an accident that whole bodies of men acquire the predominance in a country, and display superior vigour and conduct in keeping it."—(Pp. 65-6.) "It is the historical aspect of Aristocracy of which the world knows least; yet this is the element which makes the study of it wise, and the respect for it generous."—(P. 162.) This is perfectly true, and well urged. Further, Mr Hannay maintains that our debt to the aristocracy of our country includes a large proportion of celebrated men whose mothers came from noble or "gentle" families, and who may be supposed to have thence derived their genius. His enumeration of these cases is interesting, and is too essential to his theory to be omitted.

We humbly submit, that when a great man is talked about we should have due honour given to his mother and ancestors in the female lines.....The mother of William of Orange was a Stuart princess. The mother of Cromwell was, as we believe, of one branch of the family. So was the mother of the Admirable Crichton; and of the famous soldier Alexander Lesley, first Earl of Leven. Chatham was nearly and directly from the royal stem, through his grandmother—a descendant of the Regent Murray. Fox's mother, Lady Lennox, was immediately descended from Charles II. Byron had the blood in his veins. How interesting to see eminent families sharing in this kind of way in a great man's renown! The gifted Shaftesbury's mother was a Manners; Algernon Sidney's, a Percy; and his famous kinsman, Philip's, a Dudley;—the poet Beaumont's, a Pierrepont. The mother of Marshal Stair was a Dundas, and the brilliant Peterborough was the son of one of the brilliant Carys. The Ruthvens and Carnegies gave mothers to Montrose and Dundee. The Villierses gave a mother to Chatham; the Granvilles to Pitt; the Douglases of Strathenry to Adam Smith. Nelson inherited the blood of the Sucklings and Walpoles; Collingwood that of the Greys and Plantagenets. From the Hampdens came the mother of Waller; and also Mary Arden (of that ancient Warwickshire family), the mother of Shakspeare. The literary talent runs through female lines like other qualities. Swift's mother was a Herrick, and his grandmother a Dryden. Donne derived through his mother from Sir Thomas More; and Cowper in the same way from the Donnes. Thomson had the Hume blood in his veins. A daughter of Beccaria produced Manzoni. The late Bishop Coplestone evidently got his playfulness from the Gays; as Chesterfield his wit from Lord Halifax. The relationship between Fielding and "Lady Mary" is well known. Sometimes, when a notable man comes from a family never before heard of, it happens that he just comes after a marriage with a better one. Thus, the mother of Selden was of the knightly Bakers of Kent; Camden's of the ancient Curwens of Workington; and Watt's of the old stock of Muirhead. The observer, who chooses to keep his eye on such points in the course of his general reading, will find that "blood" shows itself a great deal more than people who know nothing whatever of the subject would probably admit. The loose notions about "aristocracy" prevalent in England—notions strangely vague, when we consider how thoroughly aristocratic England really is—the distinction drawn between nobility and gentility, terms once synonymous here, and still synonymous everywhere else—have the effect of making people forget how many great men have really been of what a Frenchman, for instance, would call "aristocratic" families. Philosophers like Bacon, Hume, and Berkeley; poets like Spenser, Cowper, Shelley, Scott; novelists like Fielding and Smollett; historians like Gibbon; seamen like Collingwood, Howe, Jervis; Vanes, St Johns, Raleighs, George Herberts, and many other men of the ancient gentry, amply vindicate the pretensions of old families to the honour of producing the best men that England has ever seen.—(Pp. 61-2.)

In short, Mr Hannay agrees with the Elizabethan heroes who "held the old Greek doctrine, that 'nobility is virtue of race,' and believed that those who possessed it were naturally superior to other men. Their portraits—calm, stately, brave, and wise faces—justify their creed to the eye; and the men they produced—the Sydneys, Raleighs, Bacons—justify it to the understanding. By and by there will be a hearing again for this side of affairs in Europe, after the total failure of the revolutionary party to produce governing intellects has had a still wider scope to show itself in."—(P. 198.)

But the nobility which is really "virtue of race," is not that against which the current of revolution has ever set. It is the nobility of merely titular distinctions which has given rise to the epigrams of wits and the scorn of moralists, and positive tyranny is required to add to these the hatred of the mob. The natural instinct of men is always loyal to established power as long as it is not proved to be unworthy. Even in the most fanatical of all revolutions, who was more idolised than the high-born Mirabeau? Among the ultra-democratic artisans of England at the present time, no feature is more touching than the warm reverence shown for those above them in birth and culture, whose genuine friendliness to their class has penetrated the crust of their class prejudices and suspicions. We may instance the remarkable influence exercised by the late Mr Robertson of Brighton, and also that possessed by Mr Maurice, over men who would have defied the mere "parson," and cared nothing for the nominal gentleman. Professor Newman's name is another which (as we can personally testify) has power to excite a deep respect and trust among working men, who *feel* the charm of his culture and the glow of his enthusiasm, even when he is combating their own favourite doctrines. The power which such men wield is not gained by pandering to class passions, but by going down to the deep human affections which lie beneath them, and by using upper-class culture to interpret and unfold the needs, the rights, and the duties of our common humanity. Men who do this in a whole-hearted spirit, seldom fail to be respected and trusted by their social inferiors. If there are times at which the populace refuse currency to the true gold, it is only when a bankrupt Government has so mixed it with alloy that men, not unnaturally, cease to expect what is never shown to them. While, therefore, Mr Hannay dwells upon the greatness of our debt to the gentle blood of England, we are entirely at one with him: but when he uses this as an argument for Conservatism, we must enter our dissent. He himself shows, in his article on the "Historic Peerage," how the nobility was recruited from trade and from the law, even in the middle ages, and we have seen his illustrations of the process by which the greater families intermarried with the less distinguished ones, and thus penetrated the whole of English society. All this goes to prove that if nobility be "virtue of race," it is not the virtue of one or two races only, but of many. This country is, evidently, not one in which all the governors are of one stock and all the governed of another, but a mixture of many, whose relative proportions it is difficult, if not impossible, to calculate. However truly, therefore, we may recognise the nobility of race, we cannot make it a cause for social or political exclusiveness. Mr Hannay may perhaps reply that there is a limit in social position beyond which we cannot expect to find traces of noble descent. There are "fanatical cobblers," radical tailors, &c., who are not likely to have had high-born mothers, and to whom, therefore, the "career opened to talents" will prove valueless. Yet a certain tinker produced a "Pilgrim's Progress" which England is not likely to forget; and it was a "fanatical cobbler" who opened a new spring of spiritual life for a generation whose clergy had nearly lost hold of any deep faith. In our own day, too, Ebenezer Elliott, the Sheffield blacksmith, though retaining to the last many of the prejudices of his class, showed sparkles of true genius in his nervous rhymes, and with his graphic and touching sketches of Yorkshire life and scenery, and his sincere reverence for all that he *felt* to be above him, both in the visible and invisible worlds,—Elliott was a genuine specimen of plebeian "virtue of race," born in the very heart of modern Radicalism. George Stephenson was another man of genius, springing from a still poorer class, whose manly persistance conquered the most formidable obstacles, and enabled him to take his true place among his intellectual peers. Now the objection we make to Mr Hannay's point of view is this: that he does not give full weight to the fact that such men as these display a "virtue of race" which *is* nobility, and thus he leaves a very true doctrine unsupplemented by its needful counterpart. The only plebeian genius of whom he speaks as such is Burns, whom he is anxious to prove not to have been a "radical." He points out that it was from the past that Burns "drew his choicest inspirations and his most deep-seated beliefs," and that no man respected more than he the great families which still represented the ancient history of the country. So far Mr Hannay only illustrates what we have already expressed as our belief, that no unperverted mind fails to give honour where honour is due. But when he says of the song, "A man's a man for a' that,"—"There is much in that strain which Feudalism really attempted to organise into institutions,"—we must take leave to think that his usually clear perception of facts is curiously

blurred by his theoretic predilections, and that to an extent which shows how such predilections must obstruct the action of his judgment in certain directions. He is too genial to be unjust to distinguished merit in any class; but he does not penetrate to the deep though often inarticulate or ill-expressed sentiment which animates a rising class that has not yet attained its intellectual maturity. Until they reach that point, he does not take them up into his sympathy, so as to give them an honourable place in his idea of the nation. To a merely superficial writer we should not think it worth while to enter this objection, but Mr Hannay's love for the ancient elements of greatness in our country is so substantially just and discriminating, that we could not but endeavour to show that it need be no barrier to the recognition of other elements of greatness also. We have left ourselves no space to particularise the separate Essays, except to remark that "The Minstrelsy of Scotland" and "Electioneering" are among the most characteristic, and that the former is especially interesting.

RAGGED LONDON IN 1861. By JOHN HOLLINGSHEAD. Smith, Elder, and Co., 65 Cornhill.

THE condition of a large portion of the London poor is at all times a standing reproach to the first and richest city in the world. Slaveowners, ardent in defence of their "domestic institution," and forgetful of the crowd of poor whites who, in the lowest state of degradation, hang on to the skirts of their own large plantations, or squat upon those that slave labour has left barren and exhausted, taunt us with the misery and vice of our very poor, and ask if there is not something they might envy in the life of even a negro slave. The reports of Government commissions attempt, from time to time, to probe the wound, and give us statistics of its extent and depth; but figures are poor exponents of humanity; and even the estimated numbers of 81,000 in-door and 252,000 out-of-door paupers in one year, in the metropolis alone, fail to give more than a faint idea of the destitution, to say nothing of the dirt, squalor, and vice that choke the narrower streets, lanes, and alleys of the town.

It requires some such season of unusual severity as that of the past winter to bring out in full relief, and to force upon every one's notice, the mass of misery that lies festering under the outward comfort and prosperity of our cities. When 2,000 men and women crowded in one day the doors of a single police court waiting for the temporary and scanty assistance it would give,—when strong men fell down dead from hunger as they tramped the streets with their doleful songs of want,—the wealthier classes were roused to a fuller comprehension of the need that lies in general unheeded though within reach of their doors, and gave promptly with a liberal hand. When, however, the crisis of an immediate distress is past, the causes of that distress, the state of things that makes such crises not only possible but inevitable, are apt to be forgotten, and men, all but those—and their number happily is increasing—who take a permanent and active interest in the welfare of the working population, cease to remember that thousands are daily living upon the verge of that gulf of utter destitution from which they have with difficulty been rescued during the bitter month of January last; and that from their homes, education, and whole way of life, it is all but impossible that a fresh season of calamity should find them any better prepared to meet it.

The newspapers of the earlier months of this year were filled with articles and letters upon the prevailing distress. Among others there appeared a series of letters under the somewhat melodramatic title of "London Horrors," which are here republished with an introduction and some additional chapters. They give a forcible and minute account of the poor town neighbourhoods and their squalid poverty. Mr Hollingshead appears to have a personal knowledge of the wretched haunts of a wretched population, who are all the more deserving of pity because they are insensible to the amount of their own degradation, and are "in the main contented to live as they do live."

In the first chapters of this description of "Ragged London," we are led through Clerkenwell in the City; Whitechapel, St George's in the East, and Shoreditch in the East; Westminster and Regent street in the West; King's Cross, Marylebone, and Agar Town in the North; and Southwark and the Waterloo road in the South:—a melancholy round, from which we return with an almost hopeless feeling of the inadequacy of any proposed means for the cure of the wide-spread want and depravity we have just seen. Mr Hollingshead himself does not try to suggest any. He confines himself to a faithful exhibition of the disease, and confesses his disappointment at the results of all the means that have hitherto been employed, with the one exception of ragged schools.

To education alone he looks for a remedy, not for simple poverty, but for that hopeless, helpless poverty that drags on its days in, or only one degree removed from pauperism, and cares not even to attempt to better its condition. Until some degree of self-respect, some love of order and cleanliness, finds its way among the masses who have never known anything but dirt, disorder, and immorality from the cradle, all outward material help must, he conceives, be vain. Model lodging-houses do not raise the neighbourhoods in which they are built, but rather serve to attract a more respectable class of residents from other places, thus adding to instead of diminishing the overcrowding which is the great curse of the poor. "They fly over the heads of those who are in most need of improvement. They attract a crowd of sharp-sighted tenants from outside districts, who are a little more advanced in cleanliness and civilisation, and are quick to see where ten shillings' worth of comfort is selling at less than half price."

In writing this, Mr Hollingshead does not, we imagine, mean to depreciate the efforts of those who wish to provide in even a small degree for that first and most pressing want of the working man—decent homes, but to show, as he proceeds to do, that model lodging-houses, as at present managed, are not more successful in raising the lowest class of poor into decent dwellers in wholesome houses, than they are as a pecuniary investment. He does not indeed in any way, and we think rightly, lay much stress upon what outside benevolence can do for the poor, except, as we have before said, in the matter of education. "Philanthropy can do no harm and much good by devoting all its energies to the young, and the more it improves their mind and morals, the more chance is there that they will aim at a higher standard of living. This is the only road out of the slough of pauperism, dirt, and overcrowding which exists in London, and if this fails us there is no hope." "The present generation, the idle and industrious (?) poor who have passed the age of manhood, I am afraid must be given up. Their habits are formed; they are beyond the influence of schools or classes, and their ambition can only be excited on behalf of their children."

Legislative enactments for draining, cleansing, and building may do something, voluntary benevolence something more, an equalisation of poor rates over the richer and poorer town parishes may make the working of the poor laws more just and satisfactory; but the only real and efficient reform must come from within and not from without. The working classes must themselves desire their own elevation before it can be successfully attained; yet this they can hardly do while ignorance, prejudice, and the force of habit keep them in a brutal indifference to all but the gratification of the lowest physical wants. In the training of the young lies the only sure hope for the future. No measures of sanitary reform, no benevolent exertions need be relaxed because they are recognised as but subsidiary to the greater end of education: rather they will all be needed in raising up a generation of London poor who shall be at least one step removed above the "Ragged London of 1861."

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Legislative Body has adopted the Government Bill for making what is called the "third network" of railways, that is a number of lines and prolongations regarded as of third-rate importance. The number of these new railways is 25; the total length of them 1,325 kilometres—828 miles; and the estimated expense 367,300,000f—14,692,000*l*. The Government is to buy the land, and execute the earthworks, bridges, tunnels, &c.; and the Companies to which the lines may be hereafter ceded are to do the rest. The outlay of the Government for these new lines is estimated at from 180,000,000f to 200,000,000f. When the new net work shall be completed, France will have altogether 16,940 kilometres of railway. The total expense of them will be 6,789,000,000f; and to that sum the Government will have given, in land, works, or money, 1,110,000,000*l*,—the Companies supplying the rest.

The Government, as is known, has had a Bill passed through the Legislative Body, authorising it to raise, by the issue of bonds redeemable in thirty years, the sum of 104,000,000f, to enable it to keep the engagements into which it has entered with railway companies. In financial circles this measure is much blamed. It will, it is calculated, impose on tax-payers a charge of 6½ or even 7 per cent., though if the Government had frankly made a loan (as it must do sooner or later to meet other obligations than those arising from railways), the expense need not have exceeded 4½. Doubts are entertained too that the thirty years' bonds can be easily disposed of.

A Bill of considerable importance was adopted yesterday by the Legislative Body—one, namely, which breaks down what is called the Colonial Compact, that is which frees the French colonies from the restrictions which have hitherto been imposed on them and which have prevented them from prospering. By this Bill, all foreign merchandise, of which the import into France is permitted, can be imported into the islands of Martinique, Guadeloupe, and La Reunion (Bourbon), on the same terms as into France, and by foreign vessels as well as by French, subject, however, to duties varying from 10f to 30f the ton on foreign ships; whilst the productions of the said colonies may be exported not only to France, but anywhere, and by foreign as well French ships. To this Bill the Protectionists, as usual, made objections:

it would, they said, be injurious to French shipping,—would, by allowing exports of sugar and other colonial productions, increase the price of such articles in France,—and would deprive France of the colonial markets for the sale of her productions, &c., &c.; but the Chambers very wisely paid no attention to these croakers.

The Legislature has also adopted the Bill for transferring to the Compagnie Générale Maritime supported by the Credit Mobilier, the concession for the establishment of regular lines of steamers between France and the United States—a measure which has been for many years under discussion, but of which some strange fatality has hitherto always prevented the realisation. In addition to various privileges, the Government gives the Company a sum of 18,600,000f.

The Discount Bank (Comptoir d'Escompte) some time back made a bold venture—with what success remains to be seen—to wrest from English bankers part of the business done by them between Europe and the East. It is now trying to extend its operations to North America. It announces that "it has organised a special service, having for its object to assist commerce in its present relation with the United States, by means of credits reimbursable, according to circumstances, by drafts on Europe, or by the despatch of specie, as may be best for the interest of French importers." In other and plainer words, it offers to make advances to French merchants trading with America, such advances to be paid back either by American bills on Europe or in specie.

The Board of Customs has addressed a circular to all the chiefs of Custom Houses, giving the necessary directions for carrying into effect the Bill for the abolition of the sliding scale on grain and flour.

The *Annuaire de l'Economie Politique et de la Statistique pour* 1861 has just been published by Messrs Guillaumin and Co. As in previous years, it is edited by M. Block and M. Guillaumin; and does the highest honour to their dilligence and intelligence. It contains a really prodigious mass of statistical and other information relative to the population, budget, debt, commerce, navigation, civil and criminal justice, savings banks, railways, post office, &c., of France; details of great interest respecting the city of Paris and the colony of Algeria; and, lastly, the principal statistics of foreign countries. All this information is drawn from official or other authentic sources, is set forth with remarkable clearness, and is enriched with sagacious observations. The object of the *Annuaire* is utility, and certainly that object is perfectly attained. To statesmen, politicians, economists, journalists, and merchants, the work recommends itself. It abounds in facts and figures, to which they have constantly occasion to refer, and which they can find nowhere else collected in such a narrow compass. The present number of the *Annuaire* is the 18th, and an existence of 18 years is the best testimony that could be given to the merits of a book of the kind.

Although the past week has been marked by two events of great political importance—the recognition by France of the Kingdom of Italy, and the death of the Sultan—the Bourse has been very calm. The following are the quotations:—

The following is an account of the markets:—

FLOUR.—Although the demand is not active at *Paris*, the quotation yesterday was 70f to 74f for the sack of 159 kilogrammes. The four marks were for the current month 72f.

WHEAT.—At *Paris*, yesterday, the offers were limited, but they exceeded the demand. The quotations varied from 37f 50c to 40f 50c the sack of 120 kilogrammes; for choice qualities the price was 41f to 41f 50c; extra, 42f. In the provincial markets there is generally speaking a decline, 126 markets having fallen from 10c to 2f the hectolitre, whilst only 7 present a rise varying from 9c to 1f 70c; 3 markets are reported firm, but without variation; 18 calm.

COTTON.—At *Havre*, last week, the sales were 13,566 bales, and the importations 782. Closing prices were 1f higher for Georgia of all sorts above low, but New Orleans and Mobile were unvaried, and New Orleans was consequently 105f the 50 kilogs, and very ordinary ditto 111f. On the first two days of this week a fair amount of business was done and prices were firm. Yesterday, sales were very active and prices exceedingly firm.

SUGAR.—At *Havre*, in the week ending Friday, the sales were 410 casks French West India, part at 47f, part at 47f 50c duty paid; 158 ditto "usine," 57f 50c; 190 casks Porto Rico, 46f; 1,000 casks Havana, 33f 75c. The arrivals were about 2,000 casks French West India, 1,500 Porto Rico, and 2,300 Havana. This week, French West India has been at 47f. Some damaged Havana has also been sold. At *Nantes*, last week, the sole sale was of a small lot of French West India "usine" at 60f. The nominal quotation of ordinary ditto was 47f 50c to 48f, and of Reunion 50f 50c to 51f. This week, some French West India "usine" has been taken at 60f. At *Bordeaux*, last week, a small lot of French West India was taken at 47f, and 3,900 bales for delivery at 49f 50c. This week, there have been no sales. At *Marseilles*, last week, some lots of Havana went at 36f, and of San Yago at 32f 50c.

COFFEE.—At *Havre*, in the week ending Friday, business was calm. 256 sacks Hayti Port-au-Prince went at 16f 50c the 50 kilogs in bond; 60 ditto Cape, 79f; and 1,000 Rio below, it is said, 60f. By auction, upwards of 3,000 sacks damaged Hayti of Port-au-Prince, Gonaives, and Cape were sold; as were also 57 sacks Ceylon sound, 92f to 98f. The arrivals of the week were nearly 13,000 sacks. This week, Hayti has been at 76f; Porto Rico price kept secret; Rio, washed, 90f; ; ditto, unwashed, 71f in bond, 74f 50c duty paid. Some damaged Hayti has also been sold. At *Bordeaux*, last week, various lots of San Yago went at from 92f 50c to 26f; 1,450 sacks La Guayra at various prices, and 100 ditto, *non grage*, 80f in bond; 260 sacks Rio not washed, 1f 45c to 1f 55c the kilog in bond. Some lots of damaged Guayra were also disposed of. This week, there have been no sales. At *Nantes*, last week, nothing was done, and the same has been the case this week. At *Marseilles*, last week, 2,600 sacks Rio went at 63f, and 2,000 at from 60f to 72f. A small lot of Mocha was taken at 105f. This week, some damaged Guayra has been disposed of.

INDIGO.—The demand at *Havre*, in the week ending Friday, was somewhat animated, the sales having been 171 cases Bengal new at 1f to 1f 25c above the estimates; 5 Kurpah, at 7f 75c the ½ kilog, and 10 ditto at prices kept secret. The arrivals were insignificant. This week, there have been no sales. At *Bordeaux*, last week, business was active, the sales being 94 Bengal, 57 Madras, 97 Kurpah—prices not stated. This week, nothing has been done.

HIDES.—Business at *Havre*, in the week ending Friday, was not active: 1,000 Monte Video salted went at 72f 50c the 50 kilogs, 214 New York, 46f 50c; 300 New Orleans, 45f; and 67 Martinique salted, 60f; 690 horse La Plata, 9f each; 3,663 horse, salted, 88f the 100 kilogs. This week, Monte Video salted have been at 72f 50c; and some New York salted have been sold at prices kept secret.

WOOL.—The demand at *Havre*, in the week ending Friday, was rather active: 130 bales La Plata unwashed, 1f 32½c to 2f 60c the kilog; 78 Chili unwashed, 2f to 2f 60c; 10 Donskoi, 2f 2½c; 2 bales sheepskins, Buenos Ayres unwashed, 1f 5c. The arrivals exceeded 2,000 bales. This week, Buenos Ayres unwashed has been at 1f 80c to 2f 25c.

TALLOW.—The business at *Havre*, in the week ending Friday, consisted of the sale of 25 casks New York at 64f 50c the 50 kilogs, and 100 New Orleans at 63f 50c. This week, there have been no sales. At *Paris*, yesterday, the 100 kilogrammes on an average 128f 50c—a decline on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 89f; Montpellier of 86 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 125f; beetroot, first quality, 95f.

MADRID, June 23.

A Royal decree, "considering that it is of urgent necessity to introduce into the Peninsula cotton in the wool in order that the national manufacturers shall not be deprived of that material," enacts that from the 15th Sept. next to the 16th January, 1862, imports shall be made on the following terms:—

	By Spanish Vessels.	By Foreign Vessels.
From Spanish producing colonies	2r 40m the quintal instead of 7r 40m	14r 40m instead of 26r 50m.
Foreign producing markets	3r 60m instead of 15r 90m	20r instead of 37r.
Foreign non-producing markets	6r instead of 12r 40m	24r instead of 64r.

The quintal is 100 lbs, and the real about 2d.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following is dated Calcutta, May 22:—Produce Market.—"More business has been doing during the past few days, and shippers show more disposition to operate. This is mainly attributed, no doubt, to the favourable news from Europe per last mail. Altogether more activity is noticeable. Import Market.—Transactions during the past fortnight have been on the most restricted scale, as, in addition to the want of speedy means of transit for goods up country, owing to the season of the year, there has been a great want of confidence among dealers in the bazaar, in consequence of large losses in opium sustained by several of the leading men, who have been obliged to suspend payments, and the uncertainty as to how many dealers may suffer in consequence. During the last few days sales and deliveries have been in a measure suspended. We have little change to notice in prices of goods generally, and cannot look for improvement until the rains have rendered the rivers navigable. Stocks are reported to be very light up country."

The annexed information is dated Bombay, May 25:—"Money keeps in an easy state, and the Bank's rates are unaltered. Government securities have slightly receded, and we now quote the Four per Cent. at 82, the Five at 96, and the Five-and-a-Half at 102. In imports there has been a very moderate business transacted in grey staples, and in some instances at slightly better rates. Cotton has advanced, and continues to be dealt in freely, principally on native account. Seeds, owing to continued scarcity of supplies, have also somewhat improved.

We have received the following from Singapore, dated May 21:—"Our market for imports has been duller during the past month than we have ever known it at this season of the year, and, though there has been but little addition to our stocks, holders have not been able to realise most staple articles of manufacture, except at reduced rates. A fair business has been done in exports at about previous rates, and we think that the prices for the staple articles will advance, as supplies will only come into market slowly, the crop of this season's pepper for instance having been nearly all sold.

Statement of coinage at the United States Mint in Philadelphia, for the month of May, 1861:—

Denomination.	Coinage. No. Pieces.	Value dols	c
Gold—Double eagles	220,055	4,401,100	0

The following has been received by the last West Indian mail:—"A considerable quantity of rain had fallen at Barbadoes. The young crops were, however, progressing. The island was healthy. Exchange on London, 30 days, 490 dols. The Jamaica Cotton Company had commenced planting operations in the eastern part of the island. The markets were without alteration; prices had advanced, and transactions were exceedingly limited. Irish butter 14d. Coffee: stock light, sales at 44s to 46s. Freight to London 55s. Pimento: no inquiry. Rice firm. Rum for export 12*l* 4s per 95 gallons, proof 18, in bond. Sugar, middling 16s. Tobacco, no demand. Exchange, 90 days, ½ per cent. pm."

The total quantity of coal and coke exported from the various coal ports of the United Kingdom during the month of May was, of coal 688,850 tons, and of coke 20,345 tons. Of this quantity, which shows a very considerable decrease when compared with the returns for the preceding month, Newcastle-upon-Tyne shipped 198,038 tons of coal, and 9,457 tons of coke; Ayr, 470 tons of coal; Shields, 3,649 tons of coal, and 53 tons of coke; Blyth, 12,699 tons of coal; Amble, 6,221 tons of coal; Sunderland, 109,373 tons of coal, and 1,774 tons of coke; Seaham, 5,153 tons of coal; Hartlepool and West Hartlepool, 68,790 tons of coal, and 3,205 tons of coke; Hull, 9,901 tons of coal; Goole, 162 tons of coal; Middlesborough, 13,580 tons of coal, and 3,630 tons of coke; Maryport, 1,031 tons of coal; Liverpool, 48,328 tons of coal, and 847 tons of coke; Stockton, 140 tons of coal, and 35 tons of coke; Swansea, 48,027 tons of coal; Newport, 17,293 tons of coal; Cardiff, 86,603 tons of coal, and 497 tons of coke; Greenock, 3,981 tons of coal; Grangemouth, 7,888 tons of coal, and 24 tons of coke; Alloa, 3,964 tons of coal; Borrowstoness, 3,322 tons of coal; Charlestown, 8,025 tons of coal; Llanelly, 14,274 tons of coal, and 690 tons of coke; Inverkeithing, 1,499 tons of coal; St David's, 6,075 tons of coal; Glasgow, 5,090 tons of coal, and 133 tons of coke; and Port Glasgow, 234 tons of coal. The quantity of coal, coke, and culm shipped during the month at different ports in the United Kingdom was, of coal 801,110 tons, of coke 3,473 tons, and of culm 7,994 tons. Of this quantity, which exceeds by nearly 100,000 tons the shipments made in the month of April, Newcastle shipped 194,360 tons of coal, and 1,615 tons of coke; Shields, 2,030 tons of coal; Ayr, 10,026 tons of coal; Blyth, 13,384 tons of coal; Sunderland, 139,970 tons of coal, and 84 tons of coke; Amble, 782 tons of coal; Seaham, 62,304 tons of coal; Goole, 6,432 tons of coal; Hartlepool and West Hartlepool, 118,777 tons of coal, and 240 tons of coke; Stockton, 95 tons of coal; Swansea, 17,521 tons of coal, and 4,887 tons of culm; Middlesborough, 16,615 tons of coal, and 520 tons of coke; Llanelly, 27,327 tons of coal, and 3,107 tons of culm; Alloa, 1,121 tons of coal; Borrowstoness, 4,804 tons of coal; Maryport, 32,090 tons of coal, and 60 tons of coke; Charlestown, 6,762 tons of coal; Cardiff, 97,708 tons of coal, and 844 tons of coke; Inverkeithing, 671 tons of coal; Newport, 56,831 tons of coal, and 98 tons of coke; St David's, 245 tons of coke; and Whitehaven, 14,385 tons of coal, and 12 tons of coke. During the month 8,065 vessels were employed in the trade, of which 2,984 were engaged in the foreign and 5,081 in the home coal trade.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of June, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,153,680	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11 466 281
		Silver Bullion	212,399
	26,153,680		26,153,680

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9 967,654
Rest	3,258,846	Other Securities	20,180,066
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8 159,026	Notes	6,949.160
		Gold and Silver Coin	965,980
Other Deposits	11,511,296		
Seven Day and other Bills	580,692		
	38,062,860		38,062,860

Dated the 27th June, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,785,212	Securities	30,069,720
Public Deposits	8,159,026	Coin and Bullion	12,644,660
Private Deposits	11,511,296		
	39,455,534		42 714,380

The balance of Assets above Liabilities being 3,258 846*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£41,494
An INCREASE of Public Deposits of	303,393
An INCREASE of Other Deposits of	428,345
An INCREASE of Government Securities of	79,047
An INCREASE of Other Securities of	458,170
An INCREASE of Bullion of	248 867
An INCREASE of Rest of	12,852
An INCREASE of Reserve of	229,217

The above return shows a continued improvement in the position of the Bank. Notwithstanding the large increase in the "other" securities arising from the demand for temporary loans on stock, there is an augmentation of nearly a quarter of a million both in the bullion and the reserve. The addition to the public deposits indicates that the payments on account of revenue are steadily coming in. A considerable increase has likewise taken place in the "other" deposits.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,376,021	21,191 899	21,992.768	21,618,119	19,785,212
Public deposits	9,102,585	7,395.129	9,832,957	9,327,313	8,159,026
Other deposits	9,012,082	13 201,968	12 979,340	12,356,700	11,511,296
Government securities	13,544,281	10,676 963	11,281,376	9,814,106	9,967,654
Other securities	14,246 662	16,425 689	18,458,897	20.263,535	20,180,066

Coin and bullion	14,317,965	17.938,447	18,321,333	16,552,030	12,644,660
Bank rate of discount	3 p. c.	3 p. c.	3 p c.	4 p. c.	6 p. c.
Price of Consols	97¼ xd	95½ xd	93⅝ x1	93⅞ xd	89⅝ xd
Average price of wheat	42s 4d	43s 0d	48s 3d	57s 0d	52s 8d
Exchange on Paris (shrt)	25 0	25 2¼ 10	25 7½ 12½	25 10 30	25 35 42½
— Amsterdam ditto	11 15½ 16	11 15	11 12 12½	11 14½ 15	11 19 19½
— Hamburg (3months)	13 7½ 7⅝	13 6¼ 7	13 3¼ 4¼	13 5 5⅛	13 10 10½

In the corresponding week of 1851, a fire had destroyed some of Alderman Humphrey's warehouses on the other side of London Bridge, the damage done being estimated at 150,000*l*. News had also arrived of the burning of the whole of the better part of the town of Archangel. The Sardinian Government were about to contract a loan in London of 3,000,000*l*. The Spanish Budget for 1852 had just been made public. In the English Parliament the Ecclesiastical Titles Bill had passed through the Committee of the House of Commons.

In 1858, extreme stagnation prevailed in the Stock Exchange and in all speculative circles. Owing to the demand incidental at this period of the quarter, coupled with the payment of an instalment of 25 per cent. on the Brazilian loan, the rate of discount in Lombard street had recovered to the Bank minimum of 3 per cent.; and the return of that establishment showed an increase of a million and three-quarters in the "other" securities, and a decrease of a million in the reserve.

In 1859, the demand for money was rising, in anticipation of the instalment on the Indian loan of 5,047,000*l*, due on the 19th of July, but the reserve of notes was very large, and the prospect of peace between France and Austria caused great buoyancy in the funds.

In 1860, the proposals for the new Russian 4½ per Cent. loan of 8,000,000*l* had just been issued, at a price which was estimated to amount to 90⅜. The present quotation for that stock is now below 90. News had been received of the loss of the Peninsular and Oriental steamer Malabar. The advices from British Columbia mentioned fresh provocations from the notorious General Harney.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,234,580*l*; in 1858, a deficiency of 3,223,721*l*; in 1859, a deficiency of 5,479,557*l*; and in 1860, a deficiency of 7,909,835*l*. In 1861, the deficiency is 8,668,770*l*.

DISCOUNT AND MONEY MARKET.—There has again been only a limited demand for commercial purposes during the greater part of the week, but the continued pressure on the Stock Exchange caused the rate to be fully maintained at 6 per cent. A considerable portion of the funds usually employed in discounting bills is now being lent on Government stock, these transactions not only offering the best security, but also yielding the highest attainable rate of interest. Hence capitalists are indisposed to take even the choicest paper at less than 6 per cent., and the tendency is to require more. To-day the general demand has been exceptionally very active, owing to-to-morrow being the last day of the quarter.

The following are the rates of discount in the chief cities of the Continent, showing no alteration:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	6	...

ENGLISH FUNDS.—In consequence of the great fire, there has been another fall in Consols, from a belief that the insurance companies will have to realise a portion of their investments to meet the heavy losses they have sustained through the disaster. Speculative operations have also taken place in anticipation of these sales, and hence the market has been throughout the week with a tendency to droop. Yesterday there was a slightly firmer appearance, but to-day renewed heaviness has been shown, and the closing quotations were 89⅜ for money, and 89½ to ⅝ for the account, being a decline since last Friday of nearly a half per cent. Notwithstanding the low point to which Consols have now fallen, the public exhibit little inclination to invest, although from the experience of past years small purchases for money used invariably to take place in great numbers when the funds could be bought below 90. Reduced and New Three per Cents. have likewise receded, and are now relatively much lower than Consols. The market is in some degree prejudiced by the expectation of the new Indian loan, which will now be brought forward very shortly.

Exchequer bills continue in diminished demand, and notwithstanding the comparatively high rate of interest they bear have fallen to a discount, the June issue being quoted 3s discount to par, and the March 10s to 6s discount. India bonds remain without change, at 18s to 12s discount.

The Indian Five per Cent. stock has slightly given way, partly in sympathy with Consols, and partly from the approaching new creation of stock. The decline, however, is only a quarter per cent., the final price this afternoon being 98⅜ to ⅝.

FOREIGN STOCKS.—The announcement of the death of the Sultan of Turkey caused little or no variation in the price of Turkish Six per Cents., but within the last day or two they have been in more request, and the 1858 issue has experienced an advance of ½ per cent. The unsatisfactory advices from Mexico caused a decline in Mexican this morning, from which there has been no recovery. The

statement of the successes of the liberal General Mosquera over the governing party of New Granada has been followed by a few inquiries for the bonds of that republic, but no material variation occurred in the price. Sardinian continues firm. The general transactions of the week have been unimportant.

The closing price from Paris this evening was 67f 55c, showing a reduction in the week of more than a quarter per cent. The movement is attributable to the fall in the English funds.

The annexed memorandum is from the Committee of Mexican Bondholders :—

The Committee have received advices from Mr Whitehead, dated Mexico, the 28th ult. Sir Charles Wyke had arrived in the capital, and was received officially on the 25th ult. The Mexican Government have done nothing yet to provide for the repayment of the 660,000 dols robbed, and in Tampico they still persist in ignoring the Convention with Captain Aldham. In Vera Cruz our agents had received 768 dols in bills on Mexico, and 9,634 dols to be divided between the bondholders and the Convention creditors on account of arrears. In the Pacific ports the custom houses appeared to obey no orders but those of the military officer commanding there. Congress had been in constant session without doing anything of importance, except a vote of 1,000,000 dols, to be raised by loan, to carry on operations against Marquez. Who was to be President was not decided yet. Juarez had by far the greatest number of votes, but there seems to be a strong disposition in Congress and among the public to advise him to retire. He had for about a fortnight been without a Cabinet, but one had been named a week previously to the date of Mr Whitehead's letter. Senor Castanos, a young man little known, had been named Minister of Finance. The reduction of the tariff is still in the hands of a Committee. Among the reports presented to it was one from a British merchant, recommending that interventers should be placed in all the ports on behalf of the British foreign debt, the Convention debt, and the manufactures.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day :—

Railways and other Shares.—There has been little business doing in the railway market this week apart from the fortnightly settlement, which was concluded to-day. The principal feature was an increased supply of Midland stock, and London and North-Western, especially the former, the public appearing to have less confidence in the prospects of these lines from the continuance of the war in America. Lancashire and Yorkshire on the other hand has improved. Great Northern has suffered a severe fall on the report of an unfavourable dividend. It is generally believed that, although the traffic returns throughout the half-year have remained comparatively satisfactory, the working expenses on most of the leading railways have again been high, and that the dividends will, therefore, be generally reduced.

In the colonial market there has been a serious decline in Grand Trunk of Canada ordinary stock and debentures. Great Western shares are also flatter. Indian guaranteed descriptions have been rather less steady.

In foreign railways, Great Luxembourg shares continue in demand, while Lombardo-Venetian show a reduction. American railway securities have rallied from the late fall, especially Illinois Central.

There have again been some inquiries for joint stock bank shares, but prices are generally without change. A decline has taken place in Peninsular and Oriental Steam. Natal Land left off at ½ to ¾ premium, and Universal Marine Insurance ⅜ to ⅛ discount.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day :—

	Railways. Closing prices last Friday.	Closing prices to-day.

Foreign Exchanges.—In the foreign exchanges this week there has been a slight rise in the rates on Hamburg and Amsterdam.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper :—

Gold.—Since our last circular of the 20th instant, the Bank has purchased further small amounts of gold, in all about 81,000*l*; and as there is but little demand for export, any immediate arrivals will also be sent into that establishment. Further shipments of sovereigns, &c., have been made to America during the past week, the Nova Scotian having taken 40,000*l* to Quebec; the Persia 154,467*l*, and the Edinburgh 203,672*l*, to New York. Some considerable sums of gold coin have arrived from Constantinople, and these, with sovereigns withdrawn from the Bank, have furnished the needful supplies for America. The Ellora has taken 1,650*l* to Bombay.

Silver.—Our market has been very quiet for the past few days; there has been but little demand for Bombay, the steamer having taken but 89,513*l*, 50,123*l* of which was on Government account. The Shannon has arrived from the West Indies with about 491,000*l*, but this specie will not be deliverable for some days yet.

Mexican dollars, quoted by us, in error, in our last circular as 59¾d per oz, instead of 58¾d per oz, have been but little in demand during the week. A large amount of dollars have arrived by the Shannon, but will not be deliverable in time for the China mail of the 2nd July.

Exchange for bank's drafts on Bombay and Calcutta, at 60 days' sight, remains unchanged—1s 11¾d to 2s; Madras, 1s 11⅝d to 2s. Bills with documents, Bombay and Calcutta, 1s 11¼d to 1s 11⅜d.

India Government Loan Notes remain the same as quoted on the 20th inst., viz., 100¼ to 100¾ for 5½ per Cents., and 94 to 94¼ for 5 per Cents. The prices for these securities telegraphed from Bombay yesterday are 102 and 96 respectively; but rates at Calcutta by letters delivered to-day are 1 to 1½ per cent. below the Bombay quotations.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 78s to 78s 3d per oz; South American doubloons, 73s 6d to 73s 9d per oz; United States gold coin, scarce. Silver—Bar silver, 5s 0⅜d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅜d per oz std., last price; fine cake silver, 5s 5d per oz, last price; Mexican dollars, 4s 10⅞d per oz, last price; Spanish dollars (Carolus), in demand, scarce.

About 45,000*l* in bar gold and sovereigns was taken from the Bank to-day for exportation, chiefly to America.

Failures and Mercantile Embarrassments.—A meeting of creditors of Mr R. Brandt, who lately failed in the Russian trade, was held on Monday. It appeared that the four establishments at London, St Petersburg, Riga, and Archangel belong to one firm, and that therefore their total liabilities and assets will be dealt with conjointly. Sufficient materials have not been received from Russia to form a per-

fectly accurate view, but it is believed that the estate will show about 450,000*l* liabilities, with assets of about 280,000*l*, or 60 per cent. The Russian Government are creditors for more than 100,000*l*, which had been advanced some weeks since with the view of averting the stoppage, and which had been employed in meeting some bills in the hands of Russians then falling due. The Government have agreed to waive any priority they might possess, and have consented to a private liquidation. The discussion at the present meeting turned chiefly upon some cargoes of corn valued at about 80,000*l*, which have been bought to come over from Riga and Archangel, and for which payment either wholly or in part has been made beforehand. It was stated that the creditors in this instance cannot specifically claim these goods, but in order to prevent loss and inconvenience it was agreed they should purchase and pay for them over again, claiming upon Brandt's estate for their previous advances. Among the assets are shares in the White Sea Company, valued at 54,000*l*, and the failure is attributed to speculations in these and other securities. The legitimate business of the concern had been highly lucrative. After some discussion, it was resolved to wind up under a deed of inspection, and a committee was appointed to co-operate with the inspectors named by the Russian Government.

At a meeting of creditors of Messrs P. C. Salvago and Co., Greek merchants, who stopped last February, it was agreed to accept a composition of 6s in the pound, payable in three instalments, one in cash, and the others at nine and eighteen months. The amended balance-sheet shows liabilities to rank upon the estate 46,721*l*, while the assets are valued at 11,988*l*.

A meeting of creditors of Messrs Alexiadi Delta and Co. was held yesterday, when a *pro formâ* balance-sheet was presented, showing liabilities expected to come upon the estate of 84,447*l*, and assets estimated at 123,534*l*. The failure has arisen from the non-payment of a debt due from the Turkish Government; Messrs Delta, together with one of their debtors, having a claim for about 200,000*l*. The house at Marseilles owes about 40,000*l*, with assets equal to half that sum, which will proportionably increase the engagements of the London establishment. If, however, the debt due from Turkey is satisfactorily arranged, Messrs Delta will have a surplus of 80,000*l* to 100,000*l*. The liabilities of the firm have been latterly greatly reduced, the total in September last having been as much as 450,000*l*, while in January they were 210,000*l*. Messrs Delta were authorised to continue the liquidation of their estate with the assistance of a member of the firm of Coleman, Turquand, Youngs, and Co., accountants.

At a meeting of creditors of Messrs Lascaridi and Co., who recently stopped in the Levant trade at London and Marseilles, this afternoon, a balance-sheet was read, by which it appeared that the liabilities expected to come upon the firm were 242,184*l*, with assets estimated to produce 133,433*l*. The house was established about six and a-half years ago, and a capital paid in of 131,000*l*, and it was determined to allow the profit to accumulate for a certain period, the partners receiving a salary for managing the business. The failure has been caused entirely by the enormous losses of the London house under Mr G. P. Lascaridi, who retired in 1859, the Marseilles establishment having been conducted with great profit. After some discussion, it was resolved that Messrs Lascaridi be authorised to wind up their estate under the supervision of a committee.

A meeting of creditors of Messrs Mackay and Read has just taken place, when a statement of affairs was read, by which it appeared that the expected liabilities are 16,150*l*, while the estate is estimated to realise 4,959*l*, or about 6s 1d in the pound. An offer of 5s in the pound was made, but further information being considered desirable, it was determined in the first instance to name a committee to investigate the books and report at a future meeting.

The creditors of Mr J. H. Cohn, East India merchant, who suspended in the commencement of last year, have agreed to accept a sum of 22,000*l*, payable in three instalments, in satisfaction of their claims. The liabilities are about 60,000*l*.

Among the suspensions that have lately taken place in the Northern States of America are the houses of Sampson and Pattan, East India merchants of Boston, and of Waldo, Barry, and Co., dry goods merchants of New York. Both firms held a good position, and the liabilities are considerable.

PUBLIC COMPANIES.—It is understood that in consequence of the late fire the leading insurance companies contemplate raising their rates, and have already held one or two preliminary meetings on the subject.

The first annual meeting of the London and Provincial Marine Insurance Company took place on Thursday, when the report was adopted unanimously, and interest at the rate of 5 per cent. per annum, free of income tax, was ordered to be paid on the called-up capital of 70,866*l* out of the profit of 39,320*l*. The actual return is therefore equal to 55 per cent. on the capital, and it is intended to deal with the balance of this sum at the next meeting. It was explained that the present position of the Company was satisfactory. The chief object of the Directors has been to obtain a small and safe, rather than an extensive and hazardous business. The total policies granted have been for 7,000,000*l*, of which less than 2,000,000*l* remained to run off at the date of the report, and this amount has since been reduced by about 600,000*l*. The losses have been not more than about 53 per cent. of the premiums, notwithstanding the severity of the past winter and autumn. The Company have formed a good connection. The present capital is considered at present sufficient, and it is not intended to issue any more shares, nor, except in very adverse circumstances, to make a call. In answer to questions, it was mentioned that the agents at the outports are not permitted to take insurances, the Directors considering it expedient to confine their business to London, where it remains under the immediate supervision of themselves and their underwriters. The risk taken on any one ship is limited to a certain amount. About 7,000*l* has been lost since the making up of the report by American steamers, but, on the other hand, 20,000*l* has been received in new premiums.

The General Mining Association of Nova Scotia also held a meeting on Thursday, when the report announcing two half-yearly dividends of 15s each, together with a bonus of 5s, free of income tax, was agreed to unanimously. The operations of the Company during the past year have progressed steadily, the coal sold having been 304,972 tons, or nearly 40,000 tons more than in the preceding twelve months. The Directors express a hope that the demand in the current year will be as favourable as in the last. The extensive works on the Sydney and Albion mines, mentioned in the last report, have been thus far met out of the current profits. An explosion has taken place at the Albion mines, but although two boys and a man were killed, the precautions used have prevented any fire, or even the temporary stoppage of the works.

At a meeting of the Canada Company a dividend was declared of 4*l* 10s per share, free of income tax. A report on the proceedings during the first five months of the current year shows that the land sold and leased amounted to 15,352 acres at an average of 56s 10d per acre, against 9,548 acres in the same period of 1860 producing 48s 5d per acre. The total receipts were 62,798*l* currency, being an increase of 5,586*l* over the preceding year.

The report of the Peel River Land and Mining Company, issued preparatory to their meeting on the 5th of July, states that the available balance is 23,141*l*, out of which a dividend is proposed at the rate of 3½ per cent.

At a meeting of the Queen's Hotel Company on Wednesday, a dividend was declared at the rate of 10 per cent. per annum. The report stated that there has been no falling off in the attendance of visitors to the hotel in the past season, notwithstanding the inconvenience arising from the building operations and the badness of the weather. It is proposed to raise 6,000*l* more capital, of which three-fourths are already promised.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.7½ per *l*l sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves little, if any, profit on the transmission of gold to the United States.

Imports of the week ..... 242,730 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was only a limited demand for both English and foreign wheat at Mark lane, to-day. Compared with Monday, however, no change took place in the quotations. The barley trade ruled heavy, and the inquiry for malt, oats, beans, peas, and flour was much restricted, at about previous rates. The imports from abroad, this week, amount to 14,510 quarters of wheat, 9,200 barley, 14,530 oats, 6,990 barrels and 10,500 sacks of flour.

At Liverpool, this morning, all descriptions of produce moved off heavily, at about Tuesday's currency.

The sales during the present week in the Liverpool cotton market have amounted to 80,000 bales, including 50,000 bales to spinners, 17,000 on speculation, and 13,000 bales for export. Quo-

tations for American descriptions ard ⅛d per lb above last Friday's rates; those of East India are unchanged. The market to-day closes firm, with sales of 12,000 bales. There has been a regular demand, well maintained throughout the week. The Liverpool stock will no doubt soon begin to diminish, and the feeling of holders has been firmer since the calamitous fire of Saturday, which destroyed more than half the total London stock.

"Business in cotton," observe Messrs Briggs and Co., of Alexandria, writing on the 18th inst., "is now very unimportant, from the trifling stock which remains for sale. The transactions of the week are as follows:—55 bales low ordinary, at 6-31d to 7d; 339 bales ordinary to middling, 7.31d to 7.83d; 347 bales good middling to fair, 7.90d to 8.17d.; 266 bales good fair to good, 8.24d to 9.12d; 100 bales good to fine, 9.31d per lb, free on board. Freights by steamers, ⅜d per lb in full.

The public sales of tea held this week have gone off slowly, but without leading to any important change in prices. By private contract very little is doing.

The annexed intelligence in reference to tea and silk is dated Hong Kong, May 12:—

Canton Silk.—A small quantity of the new silk has arrived; the quality is inferior to last season's. No settlements have yet been made owing to the high rates demanded. Quotations are:—Loongkong, 425 dols; Kumchuck, 415 dols; Kowkong, 395 dols; re-reeled Kumchuck, 470 dols to 480 dols; Mahtow, 170 dols to 180 dols. Tea.—Settlements of country congous amount to only three chops at an advance of about five mace. A small quantity of the new Tayshan tea has arrived in bulk, and a settlement of 500 half-chests is reported at 23 taels. The quality of the musters as yet shown is decidedly inferior to those of last season. Several musters of new scented orange pekoe have been placed on the market, and contracts have been made to the extent of 3,300 boxes of medium to fine qualities at from 27 to 31 taels. These teas also are inferior to many of the early arrivals last year. Sales are as follows:—Congou.—3 chops Ohnams, 22½ to 25½ taels; Oopacks, 26 to 31 taels; stock, 9 chops. Souchong.—No sales; stock, 1½ chop. Canton-packed Congou. — 5,000 half-chests at 17½ to 19½ taels for refined country tea mixed with old Tayshan leaf. Tayshan Tea, new.—500 half-chests, at 23 taels. Scented Orange Pekoe, old.—700 boxes, at 22 taels; ditto, new, 3,300 boxes, at 27 to 31 taels. Scented Caper.—No sales. Canton Green Teas.—Gunpowder, new, 2,500 boxes, at 20 to 22½ taels; new and old mixed, 4,000 boxes, at 15 to 19 taels; young Hyson, new, 300 boxes, at 23 taels; 200 half-chests, at 22 taels. Country Green Teas.—Sales, 900 packages; stock, 15,800 packages. Quotations—Hyson skin, 20 to 22 taels; young Hyson, cargo, 24 to 28 taels; ditto, middling to finest, 32 to 42 taels; Hyson, cargo, 30 to 36 taels; ditto, middling to finest, 45 to 65 taels; gunpowder and imperial, common to finest, 35 to 53 taels. Freights to London, 3*l* Foochow advices are to the 2nd inst. No arrivals either of black or green tea have taken place, and settlements during the fortnight amount to only 730 congou, at 14 to 19 taels, short. Stocks on the 2nd of May:—Congou, 7,500 chests; Oolong, 1,100 half-chests; pekoe, 630 chests. Quotations nominally as under:—Congou, low dusty to fair common, 8 to 13 taels, short; good common, 14 to 14½ taels, short; common to fair Ningchow, 16½ to 19½ taels, short; Oolong, fair cargo, 19 taels, short. Shanghai advices are to the 3rd inst. Silk.—The continued unfavourable advices from Europe had greatly checked business, and settlements for the fortnight had only reached 500 to 1,000 bales at rates which had not declined, but which had ruled irregularly. Total settlements for the season amount to 80,500 bales. Stock on the market estimated at 4,000 to 5,000 bales. Total export of silk from China to Europe is 79,943 bales, against the same time last year 62.752 bales, showing an increase for this season of 17,191 bales. Tea.—Settlements of black for the fortnight have been very small owing to the absence of supplies:—Congou, Oopack, 1,200 chests, at 25 to 26¼ taels; pekoe, 200 chests, at 22 to 32 taels. In green teas transactions have been limited at Shanghai, but at Ningpo a large business has been done at about 2 taels advance on previous purchases. Settlements at Shanghai since last mail are 6,675 packages; at Ningpo, 25,000 packages have found buyers during the month. Stocks.—Black, 1,800 chests, against 11,000 chests last year; green, 4,000 half-chests, against 8,000 half-chests last year. Total export of tea from China to Great Britain is 79,528,900 lbs, against 75,043,200 lbs last year, or an increase for this season of 4,485,700 lbs. To the United States the export is 24,515,100 lbs, against last year to same time 30,414,900 lbs, showing a decrease for 1860-61 of 5,899,800 lbs.

The transactions in the sugar market have continued on a very moderate scale, and, in some instances, prices have ruled a shade lower.

We have no change to notice in the value of any kind of coffee. On the whole, the market is in a healthy state.

The following intelligence refers to the state of the coffee trade at Colombo to the 30th ult. It is forwarded by Messrs Fryer, Schultze, and Co.:—A few sales of plantation parchment have been made during the fortnight at unchanged values, but there is very little of this description now on our market. A good deal of rain has lately fallen in the interior, which has much improved the prospects of crop in the lower districts. Some parcels of Ouvah native coffee have found buyers at rather higher rates, the quality of these being good, though not yet obtainable to any extent. Freight.—Tonnage, though abundant, has been in good request, and favourite ships filling up have obtained 4*l* and 4*l* 5*s* for coffee in casks; the rates generally ruling are 3*l* 15*s* to 3*l* 17*s* 6d. The weather since our last, although broken, has been generally favourable to shipping operations, and a good deal of coffee has been exported. The shipments to date of the present season's crop stand thus:—

PLANTATION COFFEE.

The business doing in wheat at Alexandria, for the week ending June 18, was much restricted; nevertheless, prices were supported. Beans, however, were in active demand, at extreme rates. Saide wheat, private trade produce, sold at from 29s 9d to 30s 3d; Beheireh do., 28s to 28s 6d; Saide beans, 27s to 27s 9d; Beheireh do., 24s 6d to 25s; and barley, 17s 6d to 18s 6d per quarter, free on board. Freight for beans to United Kingdom, 5s 6d to 5s 9d per quarter.

Owing to the continued decline in the value of wheat, the demand for rice is extremely heavy, and prices are nominally 3d per cwt lower.

There is a fair average business doing in rum, at full currencies. Brandy and grain spirits are inactive.

Most kinds of saltpetre move off slowly, but no decline has taken place in the quotations.

Scotch pig iron has changed hands at 50s 6d cash mixed numbers. Copper is offering at a reduction of 5*l*, and lead has given way 5s per ton. Tin, tin plates, and spelter are a dull inquiry.

Linseed oil is in but moderate request, at 29s 9d per cwt. Most other oils are a dull inquiry.

The tallow market is steady. P.Y.C., on the spot, is quoted at 53s; June, 53s; July to Sept., 52s 9d; October to December, 52s per cwt. Town tallow, 49s 6d net cash.

The New York *Shipping List* of the 15th inst. observes:—"There is no apparent improvement in the state of general trade. The two great constituents, an abundance of capital and cheap food, co-exist, and all that is wanting is the return of the full measure of confidence, without which it is impossible to carry on an active business. The accumulation of specie from the large receipts from England and California combined has contributed to an easy money market for loans on call at from 5 to 6 per cent., but no money is loaned at these rates except on the most undoubted securities and to the very best firms, of which there are very few who wish accommodation. Western produce is coming forward with alacrity, the indebtedness of the West to the seaboard rendering it necessary for the farmers and storekeepers to ship their supplies, notwithstanding the low and unsatisfactory prices that they now obtain. The same stagnation in the general dry goods trade continues, and there are few encouraging indications. The export demand for cottons continues, however, which serves to keep up prices, and prevents an accumulation of stock. The home trade is very insignificant. It will be seen by the following rates of discount current yesterday, that there is little change, though for bills running four to six months, rates are a little higher. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	7 ...
Do. 4 to 6 months.....	10 ...
First-class single signatures	7 ...
Other good bills	... ...

There has transpired little of unusual interest at the Stock Exchange; the aggregate business continues small."

COTTON.

NEW YORK, June 11.

New York Market.—There is little change to report in this market; business continues very quiet, and there is no disposition either to buy or to sell cotton at the present time. The course of the Liverpool market has disappointed holders and checked speculation, but without producing any material effect upon prices. The business of the past week has been confined to the pressing wants of spinners to fill Government contracts. The stock on hand at this point is estimated to be about 35,000 bales, the bulk of which is firmly held, and much of it withdrawn from the market for higher prices. The transit business is over for the season. Middling upland on the spot is quoted 13⅜c to 14c according to strictness of classification. Yesterday about 800 bales changed hands, but to-day there is little doing, and the market closes very quietly.

The following is a statement of the movements of cotton for the past week, and since 1st September last, compared with the five preceding years:—

	Receipts		Exports for the Week.		
	Week's Receipts. bales	Since 1st Sept. bales	To Great Britain. bales	To France. bales	To other For. Pts. baies
1860-61.....	3000	3426000	33000	3000	6000
1859-60.....	15000	4398000	49000	9000	4000
1858-59.....	11000	3608000	22000	4000	10000
1857-58.....	19000	2942000	40000	2000	6000
1856-57.....	9000	2859000	14000	3000	3000
1855-56.....	19000	3405000	62000	6000	8000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	2118000	571000	362000	3031000	109000
1859-60	2554000	565000	460000	3579000	326000
1858-59	1862000	393000	515000	2710000	332000
1857-58	1526000	352000	326000	2201000	426000
1856-57	1305000	368000	376000	2048000	260000
1855-56	1745000	470000	473000	2608000	262000

Thus the receipts show a decrease of 972,000 bales from those of last year, and a decrease of 182,000 from 1858-9, and the exports exhibit the following results—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 436000	Inc. 6000	Dec. 97000	Dec. 548000	Dec. 217000
Compared with 1858 9	Inc. 316000	Inc. 178000	Dec. 152000	Inc. 321000	Dec. 223000

Southern Markets.—There has been scarcely any business to report at the South for some weeks past. The only movement of consequence has been the completion of ships' cargoes to enable them to clear for sea before the expiration of the time allowed by the blockading force. The few vessels on the berth have reaped a harvest in the high rates of freight obtained. Prices have been very irregular at all points, and quotations impossible. Stocks are reduced to a mere bagatelle. By telegraph we learn that only 5,800 bales were on hand at New Orleans on the 8th inst., and this will probably be shipped.

Crop, &c.—Since the suspension of mail communication with the South, we hear but little of the progress of the growing crop. Accounts of personal observation are rather conflicting as to its condition and prospects. Our last New Orleans advices are less favourable than heretofore, the cool nights of spring having retarded the growth of the plant, and in Mississippi it is estimated to be about a fortnight later than last year. From Texas the accounts are favourable, and the first "bloom" there was reported on the 23d ult. Last year the crop was unusually forward, new cotton being received in New Orleans on the 3d July—twelve days in advance of the earliest previous year.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenhaw, of Manchester.*

New York, June 15.—The market has assumed a firmer tone since our last, and holders have been enabled to realise a slight advance. The sales comprise 3,500 bales. We quote:—

New York Classification.	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	11⅛	11⅛	11¼	11½
Good ordinary	12⅛	12⅜	12½	12¾
Middling	14	14⅛	14⅛	14⅜
Good middling	14⅝	14¾	15⅛	15½
Middling fair	15	15	15¼	15⅝

The arrivals have been from Florida 686 bales; Boston, 23 bales; total, 709 bales. Total import since 1st inst, 1,544 bales; total import since 1st September, 430,819 bales. Export from 1st to 11th June, 3,161 bales, against 4,198 bales in same time last year.

In the early part of the week the demand for cotton was only moderate, but during the last few days it has greatly improved, and on the whole a good business has been done. Full-stapled cotton of all grades, if free from sand, commands ⅛d per lb advance. Egyptian are in fair request, but owing to the abundance offered it is very difficult to obtain former rates, excepting in the better qualities. Brazil are firm at last week's prices. East India have with difficulty maintained former rates. The sales to-day are 10,000 bales. The market remains firm. The reported export amounts to 13,340 bales, consisting of 6,900 American, 140 Brazil, and 6,300 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices from the various markets held this week are chiefly to the effect that trade still continues in a most unsatisfactory state. In prices, however, no change of importance has taken place, and the stocks of goods have not increased to any extent. The iron trade is, on the whole, firm, at full quotations; but the demand for coals has fallen off.

Manchester, June 27.—Where any change has been observable since last week it has been extremely slight, the bias of prices being still rather against producers, and the amount of business insignificant. Spinners have quoted occasionally ⅛d per lb less to tempt sales, but with little effect, notwithstanding the tendency and prospects of cotton. In shirtings and Eastern cloths some considerable sales which took place last week have both imparted firmness to those who sold, and reduced those who did not sell to the same level of prices. But many manufacturers, or such of them who are able, refrain from offering their goods in this market; yet, though the losses involved are undoubtedly great, little more than nominal progress has been made in working short time. India and China advices to-day have caused no change.

Comparative statement of the cotton trade.

Bradford.—The transactions in wool of the week have been somewhat more numerous, but in insignificant lots, as buyers want confidence to make more than "hand to mouth" purchases so long as the trade with America is cut off. Prices are quite firm, perhaps a little hardened from last week, owing partly to the rates given at Leicester being higher than was generally anticipated. The consumption, however, does not warrant any tendency of this kind. The supply of new wool in this market is hitherto only scanty. We have no improvement to report in the yarn trade. Indeed it is one of the flattest markets we have had. We have to report a little more activity in pieces, and the inquiry for plain goods has slightly increased. Fancy goods, however, particularly mohairs and reps, are still mostly in demand.

Leeds.—There is an absence of buyers, and great quietness has prevailed in the cloth warehouses this week. The market at the cloth halls was likewise very dull. There was an indifferent attendance of merchants, and those who were present purchased sparingly, and only a small quantity of cloth was cleared out. Notwithstanding the care manufacturers exercise, the rate of production is rather in excess of the demand, and the prospects for the autumn and winter trade do not brighten.

Rochdale.—The flannel and wool markets have been again very quiet. For goods, both Lancashire and Yorkshire, merchants made very small demand, as is usual when they are stock-taking, as many of them are at present. Prices keep tolerably steady, manufacturers refusing to make any material concession from last month's terms. Short wools continue to maintain late rates, but long wools show some weakness.

Leicester.—Most departments of the hosiery trade continue dull, and there is not an average demand for any branch; consequently the operatives are only partially employed. At Loughborough and the country hosiery districts generally the same dull state of things continues to exist. The wool market remains unsettled, there not being much demand. No important change in the price of yarns, spinners working to order.

Nottingham.—The lace trade continues without much change; very little is being done at the warehouses. The foreign buyers who are in the market do not purchase largely and the home trade continues dull. All branches of the cotton trade are extremely flat. There continues to be a fair amount of business doing in some descriptions of the silk lace trade. Stocks of all kinds of goods are being kept low. In hosiery there is a little more doing, the home demand having slightly improved. The dulness in this trade is in consequence of the absence of the demand for the American markets. Yarns are firm, and high in price.

Wolverhampton.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales),

No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

IMPORTS OF FOREIGN AND COLONIAL WOOL.

COLONIAL and FOREIGN WOOL imported into London, Liverpool, and Hull, from Jan. 1 to May 31, 1860 and 1861, and the total imports, including Bristol, Leith, Grimsby, and Hartlepool:

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 11.—The market for flour was heavy and irregular for good to high grades of State and Western, while shipping brands of State and Western superfine were steady. The sales footed up 5,000 to 6,000 bbls, closing within the range of the following prices:—Superfine State, 4.80 dols to 4.95 dols; extra State, good to choice, 5.05 dols to 5.35 dols; superfine Western, 4.85 dols to 4.95 dols; common to choice Western extra, 4.95 dols to 7 dols; mixed to straight Southern, 5.75 dols to 6.35 dols; straight to good extra Southern, 6.45 dols to 8.75 dols; choice extra family and bakers' brands, 8.75 dols to 9.25 dols; rye flour, 3 dols to 4 dols; corn meal, Jersey and Brandywine, 3 dols to 3.20 dols. Canadian flour was rather more active, with sales of about 1,000 bbls at 5 dols to 7.50 dols for extra brands. Southern flour was steady, while the sales embraced about 800 bbls, closing within the above range of prices. Flour and corn meal were without change of moment, while prices were unchanged. Wheat was firm and tolerably active for good to prime lots, while common qualities were heavy and irregular in prices. The sales footed up about 190,000 bushels at 1.70 dol for choice white Kentucky, 1.42 dol to 1.47 dol for white Indiana, 1.19 dol to 1.20 dol for choice amber coloured Iowa, 1.30 dol to 1.31 dol for winter Western, 1.12 dol to 1.14 dol for Racine club, 1.08½ dol to 1.10 dol for Chicago club, 96c to 97½c for Chicago spring, and 95c to 1.18 dol for heated to prime Michigan club. Corn was heavy and lower for new, while a fair demand existed from the trade and for export. The sales embraced about 120,000 bushels, at 39½c to 40c for new heated Western mixed, 44c to 45c for good to choice shipping lots of ditto, 46c to 56c for Western yellow, 50c to 52c for white Western, and 48c for round yellow. Rye was steady, with sales of 4,000 to 5,000 bushels, at 68¼c. Freights.—Engagements were light. To Liverpool about 18,000 bushels corn and wheat were engaged at 7d, in ship's bags, by an American vessel. Flour was 1s 4½d to 1s 6d.

NEW YORK, June 15.—The demand for State and Western flour has been moderate, and prices of nearly all kinds have further declined 10 to 25 cents per bbl., the market being dull and heavy at the reduction. Common grades of Canada flour are dull and lower; prime grades are unchanged. The sales are 2,500 bbls, including 800 yesterday. For common grades of Southern flour the demand is exceedingly light, and the market dull. Choice grades are in good request, and the market is firm.

EXPORT from 1st to 11th June.

	1861. barrels	1860. barrels
Wheat *Flour*	87,159	63.010

The market for sound spring and winter red wheat has been firm, and sales have been pretty heavy. There has also been a more active movement in white Western for export. Inferior and unsound wheat is in more plentiful supply, and the market has ruled dull and heavy, while prices have experienced a further considerable reduction. Corn has been in steady fair demand, and prices are without material change; the sales amount to 435,000 bushels, including 134,000 yesterday, at 40 to 56 cents for old and new Western, and 36 to 40 for unsound.

EXPORT from 1st to 11th June.

Corn	380.784	463,078

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only limited supplies of English wheat have been on offer in the leading markets of consumption held this week, the demand for all kinds has ruled heavy, and prices have given way fully 1s to 2s per quarter. At the outports, foreign wheats have declined to the same extent, with a dull sale. There has been very little passing either in English or foreign barley, and the quotations have had a drooping tendency. The malt trade has been in a most inactive state, on former terms. Owing to the abundance of pasture food, oats have further given way 6d to 1s per quarter. Both beans and peas, as well as most kinds of flour, have been offering at reduced currencies.

The accounts at hand from nearly all parts of the United Kingdom, in reference to the general appearance of the wheat crop, are very favourable. Everywhere, a great improvement is observed in it, and most of the growers appear to be of opinion that the yield will be a full average one, both upon light and heavy soils.

The continental markets have ruled heavy for wheat on lower terms. All kinds of spring corn moved off slowly at barely stationary prices. For the time of year, the supplies on offer are moderately good. Letters from New York state that both wheat and flour have ruled in favour of buyers, owing to increased arrivals.

The Scotch markets have been heavy for wheat, and prices have had a drooping tendency. All spring corn has been offering on lower terms.

In Ireland, the grain trade generally has been in a most inactive state at depressed currencies. The shipments to England have somewhat increased.

The show of wheat at Mark lane, to-day, was very small; nevertheless, there was no improvement in the demand for either red or white qualities, yet prices remained unaltered from Monday. In foreign wheat, the transactions were limited, at previous currencies. Barley, malt, oats, beans and peas changed hands heavily. In their value, however, no quotable change took place. The flour trade was in a sluggish state, at the late decline in the quotations.

Mr E. Rainford has furnished us with the annexed remarks in reference to the floating trade:—Since the 21st, 83 arrivals off coast are reported, consisting of 45 cargoes of wheat, 22 maize, and 16 miscellaneous, viz.:—Wheat, 11 cargoes from Odessa, 2 Venice, 2 Marianople, 9 New York, 2 Casabianca, 3 Ibraila, 1 Kertch, 5 Alexandria, 1 Oporto, 2 Trieste, 4 Santander, 2 Philadelphia, 1 San Francisco; maize, 1 Ordu, 2 Odessa, 2 Galatz, 2 Trieste, 6 Ibraila, 2 Alexandria, 1 Saffi, 1 Scala Nova, 3 New York, 1 Venice, 1 Philadelphia; rye, 1 Galatz; barley, 2 Galatz, 2 Ismail, 5 Ibraila, 1 Sulina, 1 Scala Nova; beans, 1 Saffi; millet seed, 2 Ibraila, 1 Ismail. Some of these had been sold previously. Cargoes afloat have been in good demand this week, maize at a slight advance. The following are transactions since this day week:—Wheat, arrived, per 492 lbs, Odessa Ghirka at prices varying from 43s to 45s; Oldenburg at 52s 6d, and Berdianski at 51s 6d, both for Continent; Taganrog Ghirka at 44s 9d; Marianople 49s 6d; per 480 lbs, Polish Odessa at 49s, 48s 6d, and 48s, for the Continent; ditto for United Kingdom at 43s, 45s 6d, and 47s; amber American 50s, American red 48s 6d. Maize, arrived, per 492 lbs, Odessa, a few quarters discoloured, 30s; Galatz (two cargoes), 30s 3d; Ordu, 28s 9d; per 480 lbs, Ibraila (two cargoes) at 28s 3d, and five at 28s 6d; 1 ditto (imperfect), 27s 9d; Bulgarian, 28s 6d; Egyptian (some warmth), 25s 7½d; Ordu, damaged, 27s 3d. Rye, arrived, per 480 lbs, Odessa, 30s. Barley, arrived, per 400 lbs, Ibraila, 23s, 23s 3d, and 22s 9d; Egyptian 24s; Odessa, 23s and 23s 3d; Galatz, 23s; Moldavian, 23s 3d. Millet seed, Galatz, 23s 1½d; Ibraila, 23s. Oats, arrived, per imperial quarter, Odessa, 17s 9d.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

By the last return of Cotton's and the Depot wharfs the following goods were on hand previous to the recent fire. The present stock account therefore does not include the following:—

Sugar	tons	900	Lac Dye	packages	1,966
Coffee		400	Saltpetre	tons	370
Cocoa	bags	313	Jute		670
Tea	packages	30,000	Cotton—Bombay	bales	16,738
Rice	tons	3,300	Bengal		250
Pepper—White		56	Madras		6,300
Black		185	Cutch	tons	50
Ginger—West India	casks	30	Hemp		490
East India	cases	757	Oil—Palm	tons	34
East India	bags	162	Cocoa-nut		180
Cassia	packages	167	Castor Oil	cases	427
Cloves	bags	684	Safflower—Bengal	bales	152
Sago	tons	772	Shellac	packages	110
— Flour		88	Turmeric	bags	1,500
Cochineal—Honduras	bags	225	Tallow	casks	8,600
Teneriffe		300			

HAY'S WHARF.—This wharf is partially destroyed, but we have not obtained a stock return. It is however known that 15,000 bags Mauritius sugar were lying in this warehouse. 350 tuns olive oil were in the cellars.

SUGAR.—The market continues exceedingly flat, and rather lower prices have in several cases been accepted, without leading to any return of confidence on the part of the buyers. There was at one time an improved demand for floating cargoes of foreign, which has since abated. The public sales have gone off without animation, many parcels being taken in. Up to yesterday (Thursday) 2,854 casks West India had sold, including the portion offered by auction. Barbadoes, 34s to 40s per cwt. Other kinds chiefly taken in. The deliveries last week amounted to 3,600 tons, and the stock at the close was 64,400 tons against 71,520 tons at the same period in 1860. There were 4,600 tons, delivered last week.

Mauritius.—On Tuesday, 9,294 bags partly sold at previous rates to 6d decline: low to good brown, 29s to 34s; soft grey to middling greyish yellow, 35s to 37s; grainy and crystallised, 37s to 44s; white, 46s 6d per cwt (the latter 16s duty).

Madras.—3,500 bags native about two-thirds sold: brown, 30s to 30s 6d; good bright yellow, 32s 6d per cwt for a few lots.

Foreign.—2,900 bags soft unclayed Manilla sold at 29s 6d. 1,270 casks 230 barrels Porto Rico partly sold at from 34s to 44s for brown to fine yellow. 242 casks Cuba, at 33s to 37s 6d. 490 boxes clayed: fine dry greyish (16s duty); 47s; middling to fine strong grey, 38s to 43s 6d. 890 boxes Havana were mostly bought in; fine grainy yellow Derosne (16s duty), 47s; the remainder at 35s 6d to 42s 6d for brown to fine yellow. A floating cargo of Cuba muscovado has sold at 23s, and four floating cargoes of Havana for the United Kingdom, Nos. 12½ to 13, 25s 9d to 26s 6d; 11 to 11½, 24s 4½d to 24s 9d. A cargo of unclayed Manilla, 16s 6d per cwt in bond, for a near port. A cargo of Java equal to No. 11½, 24s 9d per cwt for the United Kingdom.

Refined.—At 6d to 1s under last week's quotations, more business has been done, but the market is now quiet again. Common to fair grocery goods may be quoted at 49s to 50s; crushed, 47s to 48s per cwt.

MELADO AND SUGAR.—670 casks at public sale brought 23s to 26s 6d, and 30s to 32s per cwt respectively.

MOLASSES.—No sales are reported.

RUM.—Moderate transactions have occurred in common kinds at previous rates: Leewards 1s 9d; Demarara, 1s 10d to 1s 11d; Mauritius, 1s 8d per proof gallon. The market is now quiet.

COCOA.—250 bags Trinidad were bought in at high prices.

TEA.—The large public sales have chiefly occupied the attention of the trade. There were 42,750 packages brought forward from Tuesday to yesterday (Thursday), and about 10,800 packages sold, about 6,200 packages being printed "without reserve." In China descriptions, previous quotations were generally maintained; but a small quantity of Assam tea went at lower prices. Further sales of China and Assam will take place next week.

COFFEE.—The public sales have passed off steadily, and some business has been done privately in plantation and native Ceylon. 41 casks 10 barrels 47 bags of the former by auction sold at full rates, from 68s to 73s for fin ordinary to middling coloury. 224 casks 262 barrels and bags Jamaica found buyers at 61s to 85s for good ordinary to superior, with one lot fine, 96s. 87 cases East India realised 70s to 74s 6d. 57 half-bales good small berry Mocha were bought in at 115s; and 511 bags Rio: ordinary to good ordinary, 52s to 53s 6d. Privately, native Ceylon has sold at 61s to 62s per cwt for good ordinary to good.

RICE.—Of 7,604 bags Bengal by auction, 6,000 bags sold: good to fine, 13s 6d to 14s 6d; cargo, 9s 6d. Privately, a moderate amount of business has been done, chiefly in white Bengal at 11s to 12s. Good new Necrancie Arracan sold at 10s per cwt.

IMPORTS and DELIVERIES of RICE to June 22, with STOCKS on hand

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	31600	13650	10100	56000

Exported	*	8175	11800	8080
Stock	29900	47000	71450	95300

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—Small sales have been made in pimento at last week's prices. 15 cases brown nutmegs sold at 1s to 3s 3d, and a few cases mace at 11d to 1s. 55 cases Penang cloves sold at 1s 1d to 1s 3d. 97 bags Zanzibar were bought in at 4d, and 40 bags Amboyna at 4⅝d per lb. 299 barrels Jamaica ginger partly sold at 2l to 2l 11s; and 51 cases Cochin, small and mixed, at 45s to 48s per cwt.

SAGO.—Holders ask such enhanced rates that the business has been very limited. Good bold grain sold as high as 22s per cwt by private contract. There were 772 tons at Cotton's wharf supposed to be destroyed by the fire, and the stock is now returned at 1,110 tons.

SALTPETRE.—There have been some orders executed in fine Bengal at 37s to 37s 3d. By auction, 1,560 bags Bombay found buyers: refraction 54½ to 40½, 30s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to June 22, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	6600	7055	10330	6100
Delivered	5630	5970	9300	7360
Stock	4200	4950	4000	5350

Deliveries last week 180 tons.

SHELLAC has further improved in value. Low to fine pale red button sort has sold at 8l to 9l 7s 6d; fine orange, 10l 5s to 10l 7s 6d per cwt.

COCHINEAL is firm at the advance paid last week.

DYESTUFFS.—1,175 bags Cutch sold by auction at a further decline of 6d to 1s, viz., 21s to 21s 6d. Gambier is quiet. At public sale, yesterday, good quality realised 16s; heated and sea-damaged, 15s 6d per cwt. No change has occurred in other articles.

CASTOR OIL is again rather dearer.

LAC DYE.—This article has not been much in demand. A few parcels offered by auction realised 11d to 1s 3½d for middling to good marks; 1½d to 1⅝d for very low. D T was bought in at 2s 1d per lb.

RUBBER.—A sale of good East India is reported at 1s 3d per lb, and the market is firmer.

METALS.—An important reduction has been established on some descriptions, The Netherlands Trading Company's spring sale, held on the 26th inst., went off at lower rates, viz., 69 florins, or equal to 117s 6d per cwt laid down here. Straits can be obtained 5s under the late nominal value, viz., 115s, and English will shortly be reduced in price. The smelters have put down the rates of English copper 5l per ton. More inquiry has prevailed for spelter, and the last transactions were at 16l to 16l 5s per ton. Tin plates dull. British iron remains steady. Scotch pig has advanced: mixed Nos., 50s 3d to 50s 6d per ton.

HEMP.—The market is still dull and unsettled. 750 bales Manilla offered by auction were bought in at 20l to 22l per ton. Jute has not been influenced by the large quantity burnt at the wharfs in Southwark. The sales on Wednesday contained only 2,250 bales, which partly sold at rather lower rates, viz, 12l 17s 6d to 19l per ton.

NITRATE SODA.—5,900 bags by auction, refraction 6 to 4, were bought in at 13s 3d to 14s per cwt.

LINSEED.—There have been large arrivals from the East Indies. Bombay has sold at 54s 3d; Calcutta, 52s to 52s 6d. 500 tons arrived at 51s 6d c. f. and i. Several cargoes of Black Sea and Azoff are reported at 52s 6d per quarter for the United Kingdom.

OILS.—There is no improvement in the demand for olive, although 300 tuns have been destroyed by fire. Speculators have pressed sales of cocoa-nut as low 42s for Ceylon, but the importers do not accept this reduction. Palm dull, with sellers of fine at 44s 6d. The market for linseed oil has not presented any alteration, and is now quiet at 29s 9d. Rape sells very slowly: foreign refined, 40s 6d to 41s; brown, 38s 6d; and the continental crops of seed look well. Fish oils present no change to notice.

TURPENTINE.—About 1,000 barrels American have sold at 43s 6d. Rough is firm, at 16s per cwt.

TALLOW.—On Monday and Tuesday foreign was firmer, owing to the destruction of Cotton's wharf by fire. Y.C. on the spot rose to 54s. The market has since assumed its former quiet tone, closing at 53s 6d and 52s per cwt for arrival in the last three months.

PARTICULARS OF TALLOW.—Monday, June 24

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market remains flat. There have been 3,740 casks West India sold during the week. A floating cargo of Havana, No. 11½, brought 24s 6d for a near port. 5,455 bags Mauritius partly sold at previous rates; also 339 casks Barbadoes, and 200 casks 350 barrels other West India. 862 bags Penang, 31s 6d to 36s 6d per cwt.

RICE.—3,561 bags Bengal sold, at and after the sale: good middling to fine white, 13s to 15s; cargo, 9s to 9s 6d per cwt.

SPICES.—1,500 bags pimento realised 2⅜d to 2⅞d. 459 bags good Penang pepper, 3⅛d to 3⅝d per lb for greyish black.

OIL.—Linseed, 29s 9d per cwt.

TALLOW.—356 casks Australian chiefly sold at 44s 9d to 52s 3d. 136 casks Taganrog bought in. 56 casks North American sold at 49s 3d. 110 casks Calcutta bought in at 52s 6d to 53s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues neglected; prices rather lower. Treacle continues in fair demand for export at 16s 9d to 17s; golden syrup at 18s. The Dutch market for crushed is rather firmer; several sales have been made here in S & T superfine and B & H No. 1, at previous rates, f.o.b. in Holland.

GREEN FRUIT.—Market quiet. Owing to fruit of home-growth being plentiful, a parcel of Lisbon oranges and Palermo lemons, sold by Keeling and Hunt at public sale, went at lower prices. Nuts of all kinds in moderate demand.

DRY FRUIT.—The market shows no alteration in price for any description. At a public sale some very ordinary red raisins were sold at 26s to 27s. Valencias show signs of weakness, but sales are very limited.

COLONIAL WOOL.—The market remains without change.

FLAX unaltered.

HEMP.—Market quiet and very little business passing.

COTTON.—Sales of cotton from Friday, 21st June, to Thursday, 27th June, inclusive:—400 bales Surat, 5⅛d to 5⅛d middling fair to fair Compta; 1,000 bales Tinnevelly, 6d good fair. The market opened quietly, and on Saturday 200 bales Surat were sold at previous rates. On the afternoon of that day a fire broke out in Messrs Scovell's, Cotton's, and Depot wharf, Tooley street, and in spite of every exertion the whole of the extensive premises were entirely destroyed, with merchandise of various descriptions, including about 17,000 bales Surat cotton, and 6,500 Madras (mostly Tinnevelly). There is more inquiry for Tinnevelly, and on Wednesday 1,000 bales good fair were sold at 6d per lb. Altogether the market closes pretty steadily, but business is interrupted by the confusion caused by the late fire, and the smallness of our present stock. 12 bales African and 84 American are advertised for public sale on Thursday next, the 4th proximo.

SILK.—Market continues extremely quiet. No change in prices.

TOBACCO.—The market continues very firm for all descriptions, and for choice qualities a further advance may be quoted. Sales have been unusually limited, in consequence of the extreme views of holders and the withdrawal from the market of several parcels. Present quotations must be considered in a great measure nominal.

TIMBER.—The wood market is very much depressed; the prices of goods in most respects being below the average of those quoted in the price current, and selling is only accomplished by some concession. The fresh supplies are coming in, while the surplus stock of 1860 remains larger than was expected to be found at this time of year. Prices at the foreign ports have not been reduced sufficiently to promote business, for the import cost continues to be greater than the value here.

LEATHER.—There has been an increased demand for leather during the past week, including almost all descriptions of goods; but at Leadenhall, on Tuesday, very little business was doing. The supply of fresh leather was small, and prices in general unaltered.

METALS.—We have little change to note in our market. Copper was reduced in nominal quotations of English on the 24th, but having been fully anticipated there is no change in the position of the article. Iron continues to be extremely depressed. Tin is lower in price of foreign, in consequence of the rate realised at the Dutch sale of Banca on the 26th inst., when the price obtained was equivalent to about 115*l* per ton there. Lead very much depressed. Spelter rallied slightly in the middle of the week, but is again flat. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	0
Fat by ditto	2	8
Yellow Russian	54	6
Melted stuff	36	6
Rough ditto	21	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The excitement of the great fire having somewhat abated, business which at the beginning of the week was at a standstill, has been resumed. The large quantity of bacon (about 2,000 bales) either consumed or consuming in the burning ruins has augmented the price and placed dealers in a very awkward position, not a bale of fine bacon being left in the market. Its destruction at the present moment is the more unfortunate as the consumption of bacon is now at its greatest height. The short supply has been a severe check on the trade. The nominal price of fine Irish is 78s landed, and Hamburg 70s. Friesland butter very brisk at 94s, quality indifferent.

METROPOLITAN CATTLE MARKET.

THURSDAY, June 27.—There was only a moderate supply of beasts on offer in to-day's market. All breeds commanded a steady sale, at prices fully equal to Monday. The show of sheep was seasonably good. Downs and half-breds moved off freely, at full currencies, and the value of long-wools was well supported. We were well supplied with lambs, which commanded full quotations—viz., from 5s 6d to 6s 4d per 8 lbs. Owing to the supply being rather extensive, calves were a dull inquiry, at the late decline in value. There was a moderate business doing in pigs; but milch cows were very dull at late rates.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	10	Prime Southdown sheep	5	0	5	4
Second quality ditto	4	0	4	4	Large coarse calves	3	6	4	0
Prime large oxen	4	6	4	8	Prime small ditto	4	2	4	8

Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	4	10
Second quality ditto	3	10	4	0	Suckling calves.....each	20	0	30	0
Prime coarse-woolled do.	4	4	4	10	Quarter old store pigs	20	0	29	0

Lambs, 5s 6d to 6s 4d.

Total supply—Beasts, 850; sheep and lambs, 12,650; calves, 440; pigs, 392.
Foreign supply—Beasts, 220; sheep, 1,300; calves, 360.

NEWGATE AND LEADENHALL.

FRIDAY, June 28.—The supplies of meat on sale here are only moderate, and the trade generally rules steady, on higher terms.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	0	3	4	Middling mutton	4	4	4	8
Middling ditto	3	6	3	8	Prime ditto	4	10	5	0

Large Pork	3	10	4	2	Lamb	5	4	6	0
Inferior mutton	3	8	4	2					

HOP MARKET.

BOROUGH, Monday, June 24.—Our reports from the various districts are on the whole more unfavourable, there being from day to day fresh attacks of vermin, and the plant in a large part of the plantations has already yielded to the severity of the blight. The duty has declined to 60,000*l*. Our market is firm, but with less demand. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, June 28.—The plantation accounts are still very unfavourable, and the estimate of the duty is only 65,000*l*. For all kinds of hops, the market is still very firm, at extreme rates. The inquiry, however, is by no means active.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, June 24.—The imports of new potatoes continue to increase, and larger supplies of home grown have been on sale. On the whole, the demand for them rules steady, but by no means active, at from 8s to 17s per cwt. Last week's imports were 3,780 boxes from Lisbon, 1,242 baskets from Rotterdam, and 1,323 baskets from Dunkirk.

FRIDAY, June 28.—Increased supplies of both both home-grown and foreign potatoes have been on sale here since our last. Prices range from 8s to 17s per cwt, at which there is a moderate demand.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 14s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 15s to 2*l* 0s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 15s to 2*l* 0s per load. Trade dull.

New meadow hay is selling at from 2*l* 10s to 4*l* per load.

COAL MARKET.

FRIDAY, June 28.—Hetton 18s 6d—Lambton's 18s—Kelloe 17s—Acorn Close 14s 9d—West Hartley 14s 9d—Howards West Hartley 14s 2d—Tanfield Moor 12s 6d—Bell's Primrose 12s. Ships at market 112; sold 103.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 28.—The near approach of our public sales, combined with the depression in the English wool market, continue to exercise their influence; and there have been but few sales by private contract during the last week.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 28.—There is materially no change in the market to-day, but the downward tendency appears checked, and the little business done has been at full prices of Tuesday.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 28.—The market for manufactured iron continues in a depressed state, prices remaining almost unaltered. The recent improvement in Scotch pig iron has been maintained throughout the past week, and prices have been well supported. Copper, which has been remarkably dull of late, has this week been reduced in price ¼d per lb on manufactured, and 5*l* per ton on tile and cake copper. The business in most other metals has been limited, and prices are nominally without change.

The Gazette.

TUESDAY, June 25.

BANKRUPTCY ANNULLED.

J. Lock, Barnsbury grove, Islington, builder.

BANKRUPTS.

H. E. Spark, Oxford street, carver.
J. Petford, Ferdinand place, Hampstead road, smith.
C. Ashfield, Home terrace, Hammersmith, boot manufacturer.
J. Hayday, Little Queen street, Lincoln's inn fields, bookbinder.
G. W. Seager, High street, Newington butts, licensed victualler.
W. P. Andrew, Crutchedfriars, wine merchant.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 15th of June amounted to 546,680*l*, and for the corresponding week of last year to 529,880*l*, showing an increase of 16,800*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 248,276*l*, and for the corresponding week of 1860 to 244,641*l*, showing an increase of 3,635*l*.

BOMBAY, BARODA, AND CENTRAL INDIA.—The report of the directors states that up to the beginning of April last the mileage open had reached 110 miles, and by the 10th inst. that distance had been further increased to 173 miles, including the Nerbudda viaduct, 3,700 feet in length, the most difficult work on the line, erected, as in the case of the Taptee viaduct, over a great tidal river. This will give a continuous line of 133 miles, from the Mhye river to Omulsaree southward, with a detached portion of 34 miles on the north of that river to Meemood, and open for traffic.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 24.—The railway market to-day was extremely dull and declined in the morning, but subsequently experienced a partial recovery. Some of the leading stocks, however, were a fraction lower than on Saturday. Sheffield, on the other hand, improved 1 per cent. The general operations were unimportant. In the colonial market, Grand Trunk of Canada stock was heavy at 18¼ to 19, and Great Western shares at 10⅛ to ¼. Indian guaranteed descriptions were steady In foreign railways, Lombardo-Venetian receded, while Great Luxembourg remained steady at 7¾ to ⅞. American railway securities were firmer.

TUESDAY, June 25.—The railway market was slightly firmer in the morning, but relapsed towards the close. Some leading stocks left off rather lower than yesterday, Great Northern especially declining 1 per cent. North-Eastern descriptions and Eastern Counties were also flat. London and North-Western, Midland, and Great Western, on the other hand, slightly improved. Business in this department continued at a complete stand. In colonial descriptions, Great Western of Canada bonds receded. The shares closed at 10⅛ to ¼, and Grand Trunk stock, 18½ to 19. Indian guaranteed stocks were less steady. No change of importance occurred in foreign railway securities. Mines were heavy at an occasional decline.

WEDNESDAY, June 26.—The railway market to-day was depressed, the preparations for the fortnightly settlement showing an increased supply of stock, especially of London and North-Western, Midland, and Great-Western, all of which declined ⅜ to ⅝ per cent. Great Northern also experienced another fall of 1 per cent. Lancashire and Yorkshire and Sheffield improved, the former on the favourable traffic return. The market was in some degree influenced by rumours of a decided decrease in the dividends of several of the more important companies. There were few transactions in colonial stocks, and prices were generally without change.

THURSDAY, June 27.—The railway market was depressed, especially in the afternoon, owing to the unfavourable traffic returns. The principal feature was a marked increase in the supply of Midland and London and North-Western stock, particularly the former. Great Northern rallied in the morning, but subsequently relapsed, and closed the same as yesterday. After official hours, however, the A stock improved to 97½ to 98½, being a recovery of 1½ per cent. North-Eastern descriptions were firm. In the colonial market the chief movement was a fall in Canadian securities, Grand Trunk stock leaving off at 17½ to ⅛, and Great Western shares 9⅞ to 10⅛.

FRIDAY, June 28.—The railway share market was very quiet. With the exception of a slight improvement in Caledonian, Great Northern, and Eastern Counties stocks, prices were quoted the same as yesterday afternoon. Lombardo-Venetian Railway shares were quiet. There was a further heavy fall in Grand Trunk Railway stock, which was last marked 16¾. The debentures likewise declined. Great Western of Canada Railway shares continued to droop. Mining shares were very quiet; nevertheless, prices ruled without material alteration.

The Economist's Railway and Mining Share List.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE OF PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

CHUBB'S PATENT SAFES —the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

RIMMEL'S PATENT PERFUME VAPORISER, an Elegant, Cheap, and Portable Apparatus, recommended by Dr LETHEBY and Dr HASSALL for diffusing the fragrance of flowers in apartments, ball-rooms, &c, and purifying the air in dwelling-houses and sick-rooms. Price from 6s. Sold by all Perfumery Dealers, and by the Inventor and Patentee, EUGENE RIMMEL, Perfumer, 96 Strand and 24 Cornhill, London; and 17 Boulevard des Italiens, Paris.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the Inventor's works for self-instruction at his only institution, 113 Strand.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and Co., Sworn Brokers, (Successors of Holmes, Hall, and Sons,) Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

HOLLOWAY'S OINTMENT AND PILLS.—Dropsical Swellings.—Whatever may be the remote cause of collections of water in the human body, it must be prudent to disperse them as soon as possible. The readiest means of accomplishing this end are supplied by using Holloway's Ointment to increase the activity of the absorbents. When this Ointment is well rubbed upon the skin it removes all venous congestion, overcomes all mechanical obstruction to the free return of the blood, and prevents the deposit of serum or water. Holloway's Pills likewise augment this absorbing power; they act more circuitously on the capillaries through the circulation, while his Ointment acts directly through the skin. Both should be employed in dropsies and diseases of the kidneys.

Free for four stamps,

ELECTRICITY AND ITS WONDERS in conjunction with the newly discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Dr WATSON, U.S., F.R.A.S., No. 27 Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8.

They will have succeeded in *losing the premium* they would have obtained if they had sold it some months back. They are like some of our farmers who would not sell their hay a few months since when it was very dear, and are now selling it when it is comparatively cheap.

Two reasons are assigned for the policy of the Bank of France, both of which are so absurd, that if the conduct pursued were not equally absurd we should not suppose them to have any influence. Nor do we now suppose them to have any influence with any one who is practically conversant with the business of banking. But there is in France another authority, higher than any in the mere money market or at the Bank, who is known to have intervened actively at a former time, who is known to have commanded the Bank of France to keep their silver when they should have sold it, and who may very possibly be influenced by considerations which would not occur to an ordinary person, and would be at once decided by one who was instructed by a daily experience of mercantile affairs.

It is said that the Bank of France wish to prevent the French gold going to America, and, therefore, the Bank of France is to put out its silver, which does not not suit the American markets. But the laws which regulate the movements of the precious metals are not to be controlled by the petty devices of a single establishment. Gold is plentiful enough in France; it can be procured in many other places besides the Bank; it has wholly superseded the old five-franc pieces which used to warm the wrath of foreign travellers. If French gold is wanted for exchange operations, French gold will soon be found.

Secondly, it is said the Bank of France, or the higher power which directs their operations, fancies that by paying in silver, the most inconvenient coin to the public, it will induce the public to use Bank notes, and not to demand coin. It is said to hope that, by issuing a currency which the French have learnt to dislike, and which certainly is abundantly inconvenient, that currency will return to them either in deposits or in exchange for the more commodious currency of a paper circulation. If the phrase may be pardoned, the Bank is *boring* the public with its silver in order to prevent its being any more asked for. But the reply to this pretext is a very simple dilemma. Either Bank notes are disliked and discredited in France, or they are not. If they are, people will submit to the inconvenience of employing a slightly cumbrous precious metal, more especially as it is the metal which was in extensive use in France until lately, instead of a paper currency which is from any circumstances distrusted and out of favour. If, on the other hand, as is indisputably the fact, Bank notes are still highly popular in France, any drain on the Bank which may have arisen has been occasioned, not by a dislike or a distrust of them, but from a desire to use the precious metals for a purpose for which a paper currency is by its very nature unadapted,—from a desire, in plain English, to *export it*

It can scarcely be doubted that the Bank of France has felt both the American drain and also the means which we have ourselves taken to meet the force of that drain. The American trade with France is usually very large. The Americans are very large consumers of French luxuries: they buy and consume annually very large amounts even of their most costly kinds. A trade in luxuries is always to a certain extent unstable—it is always liable to suffer from any passing calamity, and even from any passing apprehension. Much more, then, must it suffer from a great civil convulsion—from a great and diffused Revolution such as is now happening in the United States. The French exports to America have, it is certain, fallen off very seriously. Their place must be supplied somehow, and, as here, it must be supplied with gold, the only article which the Americans for the moment wish for.

Again, *we* have raised our rate of interest so as to attract gold from the Continent. We intended to attract it, and we have attracted it. The Bank of France has, doubtless, lost gold which has been sent hither; her rate of discount was five per cent., ours was six per cent.

The true policy of the Bank of France under these circumstances is to raise the rate of interest. We cannot until their next return is published, estimate the magnitude of the drain upon them, and, therefore, cannot say *how* needful this step may have been. But as they have condescended to employ the absurd expedient on which we have commented, it seems probable that the demand upon them must have been considerable.

AMERICA;

THE PROJECTED SUBJUGATION OF THE SOUTH.

We last week discussed the prospects of the Unionists reducing the Secessionists to *submission* by mere fighting and blockading, by defeating them in the field, and shutting up their ports. We assumed for the sake of argument that Northern victory over Southern troops and Northern destruction of Southern commerce was as probable as the Federalists believe it to be certain. We granted all that the Free States boast as to the superiority of their resources. And, notwithstanding, we arrived at a most confident conclusion that the forcible re-incorporation of the Seceding States was about as hopeless a scheme as it is unwise an aim.

But suppose it done. Suppose the South so effectually beaten and broken down by the ruin of its commerce, the privation of its people, and the defeat of its army, that it is reduced to sue for peace and to accept the terms dictated by the conquering North. Let us suppose further that those terms are not needlessly humiliating, but consist merely in the rescinding of all the Secession ordinances and the restoration of the authority of the Washington Government over the whole of the rebellious States. What has been gained thereby? And how much of what is gained can be preserved? How is the conquest to be upheld? How is the suppressed will of the people to be kept down? How are the captive millions to be retained in their forced allegiance? How can they be made to work a joint system of Government, of which they are thwarting members and unwilling constituents? How is the administration of ten distinct States, all recalcitrant and covering hundreds of thousands of square miles, to be carried on? Are Federal governors and Federal officers to be appointed to the work? and how, amid a hostile people, can they enforce their decrees? The Slave States, forced back into the Union, must be governed either as conquered lands, or as free and equally-endowed portions of a Federal Republic. If the former, what staff of civil officers and what military force would be adequate to maintain authority and to enforce order and obedience? If the latter, *how will the State machine work*, with three-fifths of the Senate and of the House of Representatives bent upon thwarting every movement? Ten independent States and eight millions of freemen CAN only be governed with their own consent and through their own officers and their own citizens. And what chance is there that their own officers and their own citizens will govern them in conformity with the wishes and plans of a Central Government which has just conquered them, humbled them, overrun their plantations, bombarded their cities, ruined their commerce, and inflicted the deadliest wound upon their pride? The very idea is absurd. To subjugate the Slave States, difficult as it is, will be infinitely easier than to keep them in subjection. It is obvious on a moment's consideration that they can only be kept in the Union (after being forced back into it) with their own free consent,—and what prospect of that free consent can even the most sanguine fancy hold out to us? It was peremptorily—even insultingly—refused before a blow was struck and when all was comparatively calm:—will it be given by men infuriated by the mortification of defeat and disappointment to men whom they disliked and despised as equal fellow-citizens, and whom they will absolutely abhor as conquerors and masters? In fine: COULD the forcible reconstitution of the Union be maintained for a year? or would it bring with it any one advantage even if maintainable?

But one single consideration would seem to be sufficient to render all this argument superfluous. Does not the mere existence of Democratic Institutions—(and no one, so far as we have heard, has ever dreamed of abolishing these)—render any policy or any government impossible that is denounced and detested by the people? Unless, therefore, the Southerners or a decided majority of them are, or can be made, friendly to the Union—*unless*, that is, *the Secessionists are, or become, hostile to Secession*—the reconstruction of the Union is a pure impossibility. Some Americans, we hear, are wild enough to asert that the influential, if not the numerical, majority in the Slave States are Unionists at

heart,—or will become so after a good beating. But this is a question of contingent fact, on which we can accept no man's dictum.

Some Americans from the North, and a few Englishmen who sympathise warmly with their wishes, occasionally hint, though as yet only in a cautious whisper, that they have yet another resource in the background—an ally in reserve, to be called out if necessary—by whose aid they can *ensure* the submission of the South, in case we should prove correct in pronouncing their own unaided powers inadequate to the achievement. They believe it impossible for the Seceding States, with their four millions of slaves—*i.e.*, internal foes—to prolong for any length of time a conflict which can scarcely fail to arouse and render unmanageable the Negro population. In plain terms, they anticipate the probability, in case the Slave States do not speedily succumb, of exciting a servile insurrection; and they are confident that the dread of such a proceeding, as soon as the likelihood of it can be realised, will bring their antagonists upon their knees. This is so grave a matter that (since it has been spoken of) we must say in very distinct language what we think of the scheme, looking at it both from a moral and a strategic point of view.

Our own strong convictions on the subject of Negro Slavery in America have been too often expressed and are too well known to need repeating here. It is an economic blunder; it is a social stain; it is a moral wrong; it is a detestable system even more demoralising to the master than to the slave. Its eradication by any means less evil and mischievous than itself would be an unquestionable gain: its eradication by any gentle and decent means would be a blessing of unequalled magnitude. Till it is eradicated, or in process of eradication, it will be impossible to regard the future of the Southern Confederacy without the gloomiest misgivings, or to contemplate its prosperity and power with unalloyed or unmingled satisfaction. All this time we have no scheme of our own to propose for the extinction of Negro Slavery; and we have never heard one propounded which seemed in any high degree rational, hopeful, or attractive. Yet we confess that the prospect of securing victory to Northern arms by the aid of Negro insurrection—of raising the Slaves in order to subjugate the Secessionists—appears to us at once a desperate expedient, and an enormous crime. That it should even be dreamed of by sober politicians and Christian citizens shows but too clearly how fearfully civil conflict has already disturbed the minds and perverted the feelings of those engaged in it.

Conceive for a moment what a general Slave insurrection, if it could be excited, *means*, and would involve. In six of the States (South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana,) the slaves form on an average *half* the population:—the per centage ranges from 43 to 57. In many portions of these States there are ten Negroes to one white man. On many plantations, isolated and separated from all assistance by miles, there are fifty slaves to one overseer. In the other States the disproportion between the two races is much less, or is reversed. In many provinces the whites are three to one; in cities and whole districts they are ten to one. The instant a servile war broke out, or became imminent, the frenzy of alarm would seize one race, and the frenzy of vengeance would seize the other. The barbarism of savage life and the barbarism of civilised life would be let loose upon each other. Where the Blacks decidedly preponderated they would massacre the Whites. Where the Whites decidedly preponderated they would massacre the Blacks. This would not be the worst: much would go before massacre, and much would accompany it. We have already from time to time had glimpses and warnings of what would happen. The women would be outraged; the men would be tortured: both victims and criminals would be burnt alive. What has happened on a small scale before now, would happen on a great scale then. It would speedily become a war of extermination;—and who can doubt which race would succumb? But before this point was reached—at the first rumour of an intention on the part of the Northerners to emancipate and raise the Slaves, every fetter would be doubled, every stripe would be multiplied by ten. Mistrust and terror would goad the Slaveowners and their overseers to the wildest excesses of severity, and might thus even expedite the menaced outbreak and the fearful retribution. Words cannot paint the state of affairs that would prevail throughout the entire South the moment Slaves and Slaveholders became aware that the Negro population were to be summoned to the field as combatants and arbiters of the strife. We will only ask two questions to those who either suggest or contemplate such a proceeding. Could ANY object, or any result, justify those who brought about such a hideous Saturnalia of atrocity and crime? And could those whose friends and fellow-citizens had suffered such outrages as we have hinted at, ever, for generations to come, forgive those who had let loose the nameless horrors upon them and theirs? *On what terms* could those who had called out four millions of Slaves to wreak their vengeance on their former masters, and those who had undergone that vengeance, ever again unite in one commonwealth, or become citizens even of one Empire? "There are in-"juries which Nature cannot forgive: she would cease to be "Nature if she did."

It is idle to argue that Slavery is so heinous a social crime that any means, however awful, by which its purgation can be effected ought to be made welcome. Man may not take upon himself the responsibility of adopting *such* means as we have been discussing—especially when he does so merely to enable him to compass his own political aims, and cloaks sectional ambition in the guise of benevolent sympathies that have always slept till now. In such a condition of national affairs as America has reached, there is one thing which is even more clearly and more monstrously a crime than Slavery—and that is the fomenting of a general insurrection of the Slaves. Civil war is bad enough, but servile war is incomparably worse. And a servile war on a scale and with elements never before dreamed of in history, created for their own purposes by one of the parties in an internal political dispute, would be about the most enormous sin ever laid upon a human conscience.

But we cannot say we have much expectation that even American madness will ever reach a pitch like this. The citizens of the Free States, as we have often pointed out, are not Abolitionists nor friends of the Negro, except as regards a small minority. They are not fighting for Emancipation. They never contemplated such a result as the issue of their political conflict; they deprecate it, and, unless driven desperate by discomfiture, will never (we feel confident) willingly aid it or accept it. They desire the subjugation of the South, but not its ruin. They have no wish that all the rich plantations and fertile fields scattered over 800,000 square miles should go out of cultivation and once more become a wilderness. They would see with dismay and self-reproach the cessation of that productive agriculture which gave 60,000,000*l* yearly of exportable cargo to their commerce. Little as they love the Whites of Georgia or Alabama, they love the Blacks still less. And they will never arm or hound on the ignorant and brutal Negro whom they so despise, to the massacre of fellow-citizens with whom, in the midst of their fighting and their fury, they still are conscious of their kindred.

THE BREACH BETWEEN HUNGARY AND AUSTRIA.

THE Emperor of Austria has refused to accept the address of the Hungarian Diet, and the Diet has very nearly refused to hear his reasons for this refusal. The more moderate counsels, however, prevailed so far as to induce the Diet to listen in gloomy silence to the Emperor's lecture on their behaviour and exhortation to remodel their address so as to make it more palatable to the Imperial ears. There can, however, be little ground for expecting that the Diet will yield. They have taken up their ground,—and though a dissolution and a new *régime* of force is all but certain if they persist in their present attitude,—they may well conceive that no step would be so foolish as to exchange their unassailable historical position for a bribe which may at any moment be withdrawn.

The Emperor wishes to extort their consent to the abrogation of the old Constitution. He wants to incorporate them into the general body of his dominions, and for this purpose he offers them what might seem a permanent voice in the Council of the Empire, while he urges them to abandon their

historical claim to a separate control over the taxation and the army of Hungary. But gloomy as are the prospects of the Hungarians, with many of their soldiers quartered in Bohemia, and so cut off from their country, and but few in either Hungary or Venetia, where they might exercise some influence over its fate,—the Hungarians would, we think, be extremely foolish to yield. They at least have no reason to rely on the Emperor's good faith. They cannot even count confidently on the continued existence of the *Reichsrath* at all, much less on its efficient political organisation, or their own continued influence over its counsels. All this is mere promise,—the shadow which has so often been given by the Austrian Government without the substance. It may be that in a fit of Imperial displeasure the *Reichsrath* itself will before long be extinguished. It might be that even if the *Reichsrath* continues to exist and to be active, the Emperor, supported by the arrogance of German superiority, would soon diminish the contingent of representatives offered to Hungary, and put the country practically under German rule; it would almost certainly happen that the first use of the central power would be to paralyse the influence of the local Diets, and to consolidate the unity of the Empire. On this the Emperor and all his German subjects are resolutely bent. The Liberals of German Austria are as eager to rule absolutely over the barbarians, as they call them, as is the Minister President himself. And it is absolutely certain that every modification of the new Parliamentary system which might be introduced would be in one direction only, the centralising.

Under these circumstances, what should the Hungarians do? It is true that there is but little to hope at present from resistance,—unless, indeed, they act in concert with the Italians, and even then it is not impossible that Austria is strong enough to hold her ground. But, however hopeless their immediate prospects, there is more hope in resistance than in concession. While they stand on the historical ground which M. Deak so ably marked out,—while they simply call upon the Emperor to keep those engagements with the Hungarians which all his predecessors solemnly ratified, and which he, if he is to claim their allegiance, must ratify likewise,—they are on the defensive,—they are right in the sight of Europe,—they still keep the future open and uncompromised, if at any time fortune favours their enforcement of the claim. While they persist that there is no political, but only a dynastic and personal union between Austria and Hungary,—that the Emperor of Austria has, on certain conditions, the right to be recognised as King of Hungary, but no right to govern Hungary by any other than an Hungarian constitution, they may suffer, indeed, for the present, but they hold the future in their own hands. They will not have surrendered a single link of the chain of historic precedent, they will not have sacrificed an iota of the practical legality of their position, and they will keep the Emperor in the wrong. But once let them lend themselves to the principle of a Central Parliament, and they cut all the ground from under their feet. The Emperor will then plead that by their own act they have abandoned the Pragmatic Sanction, and all the rest will depend either on his complaisance, or on their power to organise revolution. But at present they are not revolutionists. They have all the advantage of strict constitutional ground, and the Emperor all the disadvantage of an attempt to compel them to yield that ground. What may be the penalty of resistance it is impossible to say,—perhaps a period of great suffering, and probably an unsuccessful revolution. Still, if the nation is firm, this cannot go on for ever. We have heard much of an impossibility of an effective conquest of the Southern States of America by the North. But it is *less* impossible than an effective conquest of Hungary, because half the population of the Southern States consist of discontented slaves,—while the 11,000,000 of Hungarians are all of one mind and heart. And such a kingdom as this, though it may be conquered and overcome, and kept under martial law for almost any moderate length of time, cannot be forced into final submission against its own will.

On the other hand, the audacious speech in which Baron Ricasoli declared to the Parliament of Turin that he intended to develop the military power of Italy, not only for purposes of defence, but in order to complete her natural territory, appears to indicate that Italy is not unprepared to act in concert with Hungary should a revolution there take place. Such a speech was in fact a direct challenge to Austria, and was either very wild, or was expressly intended to tell on the depressed and perplexed Hungarian people, and to nerve them for a last effort to defend their constitution. Should this be the actual, as it seems to be the natural effect of Ricasoli's speech,—we may look for a speedy and decisive breach between the Emperor and the Hungarian Diet.

The sympathies of England are not, perhaps, worth as much to Hungary as they are to Italy. Our power to dictate a policy there in any effective way is much less, even if our Ministry could be induced to act on the principle of not only dissuading from, but prohibiting, such an intervention as concluded the Hungarian revolution in 1849. But whatever influence English sympathy can exert, will certainly be due to Hungary. Never has a spectacle been exhibited of calmer and more noble constitutional resistance to oppression than that which has excited the admiration of all Europe in the party headed by M. Deak.

THE PRESENT STRIKE IN THE BUILDING TRADES.

The present strike in the building trades brings strikingly into view the utter futility of the last. On that occasion a nine hours' day was the single *sine quâ non* contended for by the men. They alleged that they were overworked; that they wished for recreation; that they wished to have time to improve their minds; that they wished to have relaxation not on selfish grounds, but in order to become better working machines for the benefit of their masters. They said themselves:—"We ask a reduction of the working day from ten "hours to nine, and the present rate of wages to continue. "The applying of machinery to all the pursuits of human "industry has, to a great extent, rendered the demand for "manual labour unnecessary. In our own particular trade "it already rips the material, ploughs, mortises, and "tenons, and does everything except the bare putting toge-"ther; and we are warranted in anticipating further depres-"sive aggressions, and justified in attempting to provide "a barrier against future distresses by shortening the "hours of labour. We ask for the continuance of the pre-"sent rate of wages, because, through the uncertainties of "employment, they do not afford more than the bare "means of subsistence. We seek to abolish systematic "overtime. In many of the building firms, it is a common "practice for the men employed to work six and a half to "seven days a week, summer and winter, busy or otherwise, "without the slightest necessity either for trade or public "convenience, but merely to satisfy a hungry craving on the "part of a few, while thousands of able and willing "mechanics are starving in the streets for the want of that "food which a part of that labour would supply them with." We always alleged that the strike, of which the professed principle was then expounded, was only a strike for higher wages, and that the working men did not much desire briefer hours or more protracted rest.

The event has proved the correctness of our conclusions much more conspicuously than we could have hoped. A nine hours' day has been conceded to the workmen, and they refuse to accept it. Many of the masters in the building trade are now willing to pay by the hour; and this of course would permit the workmen to leave off work, if they really wished for relaxation, at the period at which they began to want it. But the money difficulty is too distinct. If they were paid by the hour, the working men would not get the same wages for a nine hours' day as for a ten hours' day, and this they do not wish for. The assertion that their wages afford no more than the bare means of subsistence is simply contrary to the real facts. An industrious workman in these trades can earn more than 30s a week—more than thrice the amount upon which a bare subsistence can be, and in the agricultural districts is, unfortunately, supported. If we consider the present strike, solely in reference to the history of the last, we shall not be long in deriving an irrefragable inference from it:—we shall say it proves the secret aim of the latter to have been an enhanced remuneration, not a diminished employment.

To persons in any degree conversant with the inherent necessities of the building trade, it was always evident that it was an occupation to which a rigid maximum in the hours of labour was peculiarly inapplicable. It is a trade dependent on the weather, dependent on the season; dependent, as far as particular localities are concerned, upon casual events, upon the erection of buildings which may not be required, according to the caprice of an owner or the incalculable anticipations of a speculative purchaser. A trade in which the demand is so fluctuating, in which it depends on causes so intermittent, on causes so impossible to foresee beforehand, is evidently the last in which a fixed "day" is fitting. A builder must work thirteen hours on a fine day, because he cannot work to any purpose on a very wet one.

But is this the only lesson of the present strike? Let us examine its exact peculiarities and circumstances. Unfortunately this attempt is not a very easy one. On the last occasion the respective parties to the dispute embodied their respective views in carefully written documents which greatly facilitated a correct judgment. Upon the present occasion this exellent precedent has not been followed, and we are obliged to comment upon facts which are not thoroughly authenticated, and which may easily mislead us. Even the result of private inquiries is not absolutely conclusive, for there is much difference of opinion, and much difference of practice, among the masters on the present occasion.

We believe, however, that the masters against whom the strike is, required *two* things in compensation for one offer. They said they would pay by the hour, which was an evident concession of the much-demanded nine hours' day, but they also said that they must reserve to themselves the right of employing ten hours' men, if they could get them, in preference to nine hours' men; and secondly, that they could not allow any such payment for unusually long hours as had formerly been the practice when the working day was a fixed day of ten hours. 'When you had a regulation day,' they said to the workmen, 'you had a sort of right to a more than 'ordinary payment in excess of the regular rate of payment, 'but when you have a payment by the hour, the thirteenth 'hour must be paid at the same rate as the fifth.'

These conditions obviously raise many questions very different from those which were involved in the strike of the last year.

In the first place, it is certain that the masters have an evident right to employ ten hours' men, if they can get them, in preference to nine hours' men. They were perfectly fair and honest in giving, as we have reason to believe they did, full notice that such was their intention. The employer of labour has an indisputable right to the sort of labour which will suit him best out of all the different kinds in the market, and no false sympathy with one working man more than another should for one instant seduce us into forgetting this guiding and indisputable principle.

With respect to the second condition, it is a simple question of the amount of the wages and of the mode in which those wages should be paid. If the masters can obtain those favourable terms for themselves, they may be justified in standing out for them; but, on the other hand, if the working men can frustrate the adoption of regulations so inexpedient *to them*, on their side they are quite justified in endeavouring so to do. By the rule that the thirteenth hour is to be paid at the same rate as the first, and at the same rate only, the hardest working man would evidently be injured. Under the old system he would have had three hours' *extra* pay for the work done after the end of the regular day of ten hours; now he will not have any such extra pay. In a trade like the building trade, in which much "overtime" and many prolonged days of work are from its very nature almost a necessity, it seems hard to pay a man only the same sum for the first hour of pleasurable exertion in the morning, and the last hour of painful exertion in the evening and at the limit of his strength.

THE INDIAN FIVE PER CENT. STOCK AND OTHER INDIAN SECURITIES.

It is very important for investors in the Indian Five per Cent. Stock to be aware of its exact legal position, and to observe that its quantity may be largely increased by the absorption of the other kinds of Indian securities.

By the present Act, Sir C. Wood is empowered to raise a sum not exceeding 4,000,000*l*, "either by the creation of "bonds or debentures," or, if he preferred it, by the creation of a "capital stock or annuities," or "partly by one mode "and partly by the other." Later on in the Act he is empowered to raise money for the repayment of any principal money secured under the authority of the Act in any of the *modes aforesaid*. So that if he had chosen to borrow on debentures on the present occasion, he might, when those debentures became payable, have raised an equivalent sum in the Five per Cent. Stock to provide the needful funds.

This was the case likewise in the Act by which the Five per Cent. Stock was first created (the 22nd and 23rd Victoria, cap. 39), but the clause in that Act was not confined to the securities created "by its authority." On the contrary, it recited that "By an Act passed in the twenty-first "year of Her Majesty, chapter three, power was given to "the East India Company to raise money by bonds and "debentures to the extent of eight millions. And that by "an Act passed in the last session, chapter eleven, power "was given to the Secretary of State in Council of India to "raise money by bonds and debentures to the extent of "seven millions." And then enacted that "Upon or for "the repayment of any principal money secured under the "authority of this Act, or under the authority of either "of the recited Acts, the Secretary of State in Council "may at any time borrow or raise, by all or any of the "modes aforesaid, all or any part of the amount of principal "money repaid or to be repaid, and so from time to time "as all or any part of any principal money under this Act "or either of the recited Acts may require to be repaid, "but the amount to be charged upon the revenues of India "shall not in any case exceed the principal money required "to be repaid." So that it is quite possible to increase the amount of the Five per Cent. Stock up to the somewhat wide limits fixed by the Acts mentioned.

THE REVENUE.

The return of the Revenue is so far very favourable to Mr Gladstone's calculation. Both the Excise and Customs show a slight increase on the corresponding quarter of the last year. The figures are:—

	£
Increase of Customs	87,233
— Excise	57,000

The comparatively depressed state of commerce has not therefore begun to tell as yet on the aggregate consumption of the people.

Stamps also show a slight increase, in part attributable to the "petty taxes" imposed last year, but partly indicating also that the diminution in our trade—much as it is talked about and real as it is—has not been sufficient as yet to affect the revenue arising from stamps very materially.

The property tax shows a large increase, which is, however, largely swelled by the peculiar operation of the new mode of collection.

Agriculture.

OBSTACLES TO IMPROVEMENT.

RELATIONS OF LANDLORD AND TENANT.

Truth is sometimes more wholesome than pleasant; and unpleasant truths may be so uttered as to excite the utmost degree of irritation in those for whose benefit the utterance is intended. Now, few persons have the knack of stating truths unpleasant to the agricultural mind, in such a way as to produce the maximum of irritation, as Mr Mechi. There is a self-sufficient air in all his references to his own experience which certainly does move the choler of the English farmer, and it is this, perhaps, which renders his often valuable hints less heeded than they deserve to be.

In a letter which Mr Mechi has just addressed to a daily newspaper, he refers to our late disastrous harvest, and says we have paid to foreigners forty millions sterling for foreign corn, being some thirty millions over and above our usual average payments, and he argues this enormous sum has been abstracted from our annual profits, thereby disturbed our financial arrangements, ruined or crippled many of our merchants, manufacturers, and traders, limited credit, and thrown great numbers of working men out of employment. From these evils, he says, "farmers have suffered more than any other class, for they have incurred the expense of preparing for an ordinary crop, but have

failed to obtain it or its equivalent in price." And he adds:—"The great and principal cause of our misfortune has been our generally imperfect mode of farming, which is unable to meet the emergencies and difficulties of an unpropitious season." This is not strictly accurate. Such a season as that of 1860 must be most disastrous to the farmer, let his farm be in ever so good condition, both as regards permanent improvements and cultivation; but it is also certain that an ill-drained and ill-managed farm suffers much more from a wet season than one of a contrary character. That there can now be no such rise of prices in bad seasons as will enable the English farmers to throw their losses upon the consumers must have been made obvious by the past year, and it is, therefore, indispensable that farmers should consider how the evils of wet seasons, the recurrence of which occasionally must be calculated upon, can best be mitigated. Mr Mechi says:—"Such a summer as the last teaches a stern lesson to that large class of non-improvers who greatly predominate, both as landlords and tenants, over the comparatively limited number who have profitably applied commercial principles to the cultivation of the soil." And he adds, that the difference last year in favour of the occupier of a well-drained and well-cultivated farm was one hundred per cent. He believes that the non-improved condition of agriculture arises, not from want of means or opportunity, "but that it is a want of belief in the profit of improvement on the part of both landlords and tenants (quite as much the former as the latter), rather than a want of means, which retards progress." He then makes an estimate of the cost of improving "many millions of exhausted grass lands and poor stiff clays" by investments of capital varying from 20*l* to 36*l* per acre, which "would certainly result in individual and national profit." Speaking from practical experience, he says:—"I know that it would be a happy circumstance for the generality of clay-land farmers to have their present rents doubled or even tripled, provided that the increased rental represented a fair interest on a sum expended on landlords' improvements." There is some truth in this, but the mode of stating it is not likely to render it attractive to the farmers, while the acreable cost mentioned as required for the improvement of poor stiff clay land might not unreasonably deter landowners, trammelled as they are by settlements and encumbrances, from entering on the path of improvement at all. Then, after hazarding some calculations of the average amounts of agricultural capital per acre invested in England by landlords and tenants, he says:—"A long experience has taught me that nothing is more certainly profitable than judicious agricultural improvement," a sentiment in which we entirely coincide. It may, however, be a question whether such large outlays on poor land are judicious, or, if they are, whether they may not be accomplished by a better system of management than at present prevails on most English estates. It is very well for the owner of a few hundred acres, perhaps in his own occupation, to contemplate or make outlays of from 20*l* to 36*l* per acre, but when we recollect the vast masses in which land is held in England by individual proprietors, and consider the utter inability of nine-tenths of the landowners to make such outlays on any considerable proportion of their estates, we may discard Mr Mechi's suggestions as affording no practical remedies for want of improvement.

The truth is, the necessary improvements will only be effected gradually, and for the most part they will be done, if at all, by tenants holding under long and rational leases. Even drainage and buildings, essentially landlords' improvements, will either be effected by tenants under special contracts, or by landlords through the agency of companies, who, advancing the capital required, obtain rent charges for a definite term of years, which rent-charges will be paid by the tenants.

We look, then, to tenant-farmers as the chief agents of improvement, where the landlords afford all the facilities in their power, rather than to large expenditure of capital by the proprietors. And this is the view taken by the most practical landlords and farmers in the country, indications of which we meet with on almost every occasion when agricultural topics are discussed.

Thus, at a recent meeting of the Croydon Farmers' Club, Mr J. Wood read a paper "On the Propriety of an Alteration of our Four-Course Rotation," in the course of which he touched incidentally on circumstances bearing on this question. He considered the existing competition for land, by which rents are unduly raised, to be a great injury to farmers. Persons who have made money in other businesses are seduced by the assumed pleasurable character of the farmer's occupation, and being themselves ignorant of the value of land, give whatever rents the proprietors think fit to demand. This competition acts on farmers, whose rents are also raised. Mr Wood, who we suspect is an old Protectionist, says that wheat cannot be grown in England at a profit much under 60s per qr, and thinks that the agricultural interest ought to be "more encouraged than it has been of late years by the Government"! Still this obsolete economist is evidently a practical farmer, and he cites the opinions of many eminent farmers that one of the remedies for low prices—prices he admits likely to be permanent—is to be found in giving greater freedom to the farmer in the cultivation and management of his farm. He approves of such propositions as these:—"He would not, as a practical agriculturist, venture to lay down a stringent rule for any positive rotation of crops"; the four-course system "would ruin any man in England to be bound down irrevocably to that system"; "generally speaking, landlords know nothing about leases and covenants, but had a notion in their heads, which it was difficult to remove, that the four-course shift is the best"; and that "a freer exercise of his judgment should be allowed to a diligent occupier" than the binding him to any prescribed course permitted. The particular relaxation, however, claimed by Mr Wood was permission to substitute a five-course for a four-course rotation. He would not go beyond that. Other speakers took broader views, and one of them, Mr Fuller, regarded Mr Wood's paper as doing good in bringing to the attention of landlords the unfortunate condition of farmers during the past year; and one speaker recommended farmers to buy land and mortgage it for the sake of having entire control over it; a recommendation we certainly cannot back, unless the farmer could obtain his farm on the terms of paying a perpetual and ascertained rent. That, undoubtedly, would be a capital plan.

We find, however, the farmers around Tamworth addressed more directly on the relations of landlord and tenant, by Mr John Peel, a neighbouring landowner, who in many parts of his address offered a favourable contrast to the lecture of Lord Sidney Godolphin Osborne in Dorsetshire on the same subject.

Mr Peel said the degree of productiveness on many well-managed farms "would have appeared fabulous in times gone by," and that the produce of land was capable of great, almost indefinite extension. And the question which suggested itself to the mind of every foreigner was, why was the produce of the farms surrounding perhaps one in a state of high productiveness, ridiculously small? The reply would be, "that it was not that the farmers of England were wanting in intelligence or energy; that it was not that they were not alive to their own interests and the public good, but it was that high farming was very expensive; that it was an operation involving the permanent outlay of a great amount of capital in machinery, implements, manures and stock; and that when a man had taken a farm and made that outlay, he had no security for a sufficiently continued length of occupation to enable him to recover the money he had laid out, or of compensation at the termination of his occupancy for the improvements made in the soil." Yet, having made that statement, he said he thought long leases were very disadvantageous to the landlord (the Scotch landowners could tell a very different tale), and that tenant-right agreements were to be preferred. We have often shown the utter fallacy of that notion, and that to leases alone can we look for steady progress in agriculture.

Of the actual system of yearly agreements Mr Peel says:—"So far as these agreements had come under his own observation, they simply amounted to this; they bound over the tenant to go through a certain routine of cropping, to do certain things and to abstain from doing others under serious, if not ruinous, penalties. In none of these agreements had he ever found equally stringent clauses upon the landlord for neglecting to do his duty. They appeared to be simply bills of pains and penalties upon the tenant. There was no obligation on the part of the landlord to do anything but what he liked; while the tenant was obliged to perform certain things stipulated in the written contract. That was not even-handed." He then produced the form of an agreement which he considered well adapted to the locality, and by which the landlord bound himself to allow the tenant for unexhausted improvements upon a scale defined in the agreement. This appears to be framed on the Lincolnshire model, and contained nothing worthy of special notice. Mr Knight thought there would be no advantage in such an agreement over a simple yearly tenancy without any written agreement, with a good personal understanding between landlord and tenant. And if there is to be no lease, perhaps a tenant is better without any written agreement which confers no security, and may be made an engine of vexation should disputes arise with his landlord. Several speakers stated they occupied as yearly tenants without agreement, but each considered his case, as exceptional, from "the perfect understanding maintained between himself and his landlord." He believed there was a great deal of land in this country which would be improved to a considerable extent if remuneration were made for unexhausted improvements.

The Chairman suggested that though a farmer might improve his farm without security, in full reliance on the personal character and forbearance of his landlord, yet on the landlord's death his successor would probably have the estate valued, when the best farmers would have their rents raised, the land being in fact worth more in consequence of their own improvements. That is by no means an unusual result of a yearly tenant farming highly. One speaker said "he would not have a landlord without an agreement, even if it were his own brother"; and Mr Peel, in replying, pointed out the possibility of the next successor, after a liberal landlord, might have fallen into pecuniary difficulties, so that he could not indulge in generous sympathies if he had any.

All these remarks point to one thing, and one thing only, *i.e.*, that defined terms binding on both parties, and security of possession for the tenant, are indispensable to the improvement of husbandry and the success of those who follow it as a business. It is, then, to a system of leases that landlords and tenants ought to direct their attention, as the best means of curing or preventing the numerous evils and hazard which are incident to farming.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended June 30, 1861, compared with the corresponding periods of the preceding year.

Literature.

COMMERCIAL LITERATURE.

THE PHILOSOPHY OF MANUFACTURES. By the late ANDREW URE, M.D., F.R.S. Third Edition. H. G. Bohn. 1861.

THIS is a new edition of Dr Ure's well-known work, with a continuation to the present time by Mr P. L. Simmonds, F.S.S., who has also edited the *History* of the Cotton Manufacture by the same author. It is unnecessary to notice Dr Ure's work in detail, as it has already been sufficiently discussed before. On one point, however, it may be observed that the arguments used by him against the Ten Hours' Bill, on the ground that the care and affection of parents would prevent any overworking or ill treatment of children, is singularly disproved by the report of the Commissioners recently employed to investigate the system in the lace and other trades. The appendix by Mr Simmonds forms more than half of the present volume, and contains a vast mass of statistical and other useful information.

SOLUTION DES PROBLEMES RELATIFS A LA PROTECTION ET AU LIBRE-ECHANGE. Par J. DU MESNIL-MARIGNY. Paris: E. Brière. 1861.

THIS is one of those strange pamphlets on economic questions almost peculiar to the French. Although ably and ingeniously written, it wanders into a maze of philosophical speculations respecting free trade and protection, the apparent result which the author arrives at being that free trade is good for the world in general, while protection is preferable for each nation in particular. In a former work the author says he has proved the correctness of his views by algebra, but spares his readers from any such demonstration in this. M. du Mesnil-Marigny also appears to have got far beyond "Adam Smith and his school."

GENERAL LITERATURE.

THE MASSACRES IN SYRIA. By J. LEWIS FARLEY, Author of "Two Years in Syria," &c. London: Bradbury and Evans, 11 Bouverie street. 1861.

THIS slight and sketchy volume consists of a series of letters written from Constantinople during the summer of 1860. The 1st, 2nd, and 4th of them were originally contributed to the *Morning Post;* the others, although partially written at the dates indicated, are now published for the first time. Nearly two-thirds of the series are occupied with a narrative of the massacres in the Lebanon and in Damascas, after which comes the controversial part of the book, for the sake of which it appears to be published, and upon which alone it is worth while now to dwell. Mr Farley's purpose is to plead the innocence and peaceful temper of the Maronites, and the wisdom of French policy in protecting them against their many foes. He heads his tenth letter, "Who were the Aggressors?" and after quoting the evidence of two American missionaries and of Mr Cyril Graham to prove that "the Druses were the first aggressors," he goes on to adduce "the official despatches of our Consuls in Syria," which "clearly prove that for the last two years the Druses have in every instance been the aggressors." He then gives seven pages of extracts, dating from September, 1858, to May, 1860, containing accounts of outrages committed by Druses on Christians, after which he says that the accusers of the Maronites "have not put forward a single proof of guilt against them." He is very warm on this point, treating as an unfounded calumny all that has been urged to the contrary, which he attributes either to "an unpardonable want of good faith or an unparalleled ignorance of the subject." If Mr Farley had studied the official despatches of 1860-61, as well as those of 1858-60, he could scarcely have spoken so confidently on this matter. The question is not whether the Druses have behaved like savages,—of that, unhappily, there is no doubt; but whether the Maronites are in any important degree superior to them; whether they have manifested the "surpassing patience" with which Mr Farley credits them (p. 122), or whether they have been as ferocious and revengeful as their neighbours. Upon this question the despatches of Lord Dufferin leave no doubt whatever, and he has recorded the grounds of his conviction in the plainest words. "When I first came to this country," he writes to Sir H. Bulwer, Feb. 24, 1861, "I was under the impression of those natural sentiments of indignation which animated every one who had heard of the horrible atrocities perpetrated by the Druses on the Christians, and I fully expected that the investigation it has become my duty to pursue would only confirm my previous impressions. To my surprise, however, I soon began to discover that the subject was

more complicated than I had imagined; that there were two sides to the story; and that it was quite possible it might become necessary to modify my opinions. In proportion as the real truth unfolded itself this conjecture became a certainty, and I am now in a position to state, without fear of contradiction, that however criminal may have been the excesses into which the Druses were subsequently betrayed, the original provocation came from the Christians, and that they are themselves, in a great measure, responsible for the torrents of blood which have been shed."

In another despatch, dated December 10, 1860, he says: "For months beforehand, the calamity was impending. When I was last in the country, the sentiments which animated either tribe were notorious. The Druses did not want to fight: the Maronites thought their hour of victory was come. Custom-house returns can prove that upwards of 120,000 stand of arms and 20,000 pistols were imported into the Lebanon between January, 1857, and the spring of 1860, while the sinister influence exercised by Bishop Tobia and his associates was so universally recognised that his withdrawal from Beyrout was insisted upon, as a necessary preliminary to all chance of peace. It is true his Eminence asserted on that occasion that nothing could be proved against him, for he had not committed himself to paper, but this very observation is sufficiently significant of the part he had been playing."

One letter of Bishop Tobia's has been obtained, dated May 20, 1860, and addressed "to the chief people of Deir-el-Kamar," in which he expresses his desire "to agree entirely to your proposition for the expulsion and hatred of the Druses." Another letter exists, written by Halib Akawi, a Christian of Deir-el-Kamar, a few days later, and just before the outbreak (which the writer was earnestly endeavouring to prevent), and containing abundant evidence to implicate Bishop Tobia in the stirring up of the Maronites. Even M. Thouvenel admitted, in July, 1860, in conversation with Lord Cowley, "that it was very likely that the Maronites had been instigated by certain of their priests to commence the fray, by asserting a sovereignty over the Mixed Districts." And Lord Dufferin, in a Minute enclosed to Sir H. Bulwer, February 24, 1861, states that previous to the outbreak, "arms were imported in extraordinary quantities; martial assemblies were convoked in various parts of the Mountain; inflammatory missives, purporting to proceed from the spiritual chiefs of the Maronite party, were extensively circulated; a Central Committee of very questionable character was established at Beyrout; and there is reason to believe that Christians of other denominations were required, under pain of vengeance in case of their refusal, to take part in the Holy War."

Equally clear is the evidence as to the spirit in which the Maronites have acted since the war. "In the day of their triumph," says Lord Dufferin, "these last have not proved themselves a whit less bloodthirsty than their enemies"; an assertion fully justified by the savage murders of women, children, and old men, as well as of adults, and by many acts of indiscriminate persecution. It is important to notice that several of these atrocities were committed by the Maronites who were in the camp of the French army. Lord Dufferin having acquainted the French Commissioner, M. Béclard, with some of the earliest of these murders, the latter expressed great indignation, and promised to ask General Beaufort to punish the criminals. Yet M. Thouvenel, five months later, in February, 1861, told Lord Cowley that "he had no knowledge of any such acts." And Mr Farley is equally ignorant. The only allusion he makes to any such possibility as Maronite retaliation, is in reference to an accusation which the Bishops deny, but in which their denial amounts to very little. Fuad Pasha had requested the Bishops to furnish him "with sworn lists of those persons the pre-eminent atrocity of whose crimes render them worthy of death." The list sent in demanded 4,600 heads! At the remonstrances of Fuad Pacha, this was subsequently modified, but the Christians would not consent to reduce it below 1,200. Fuad then endeavoured to bring the accusers to make distinct charges against the individuals accused; but this they refused to do. "The whole 1,200," they said, "are worthy of death, and it is not necessary we should descend to particulars." The Pasha reasoned with them in vain; they persisted in their refusal. He then informed them that he would have a declaration drawn up, stating the fact of their refusal, which he should require them to sign. This they also said they could not do. A second and a third day were given them to reconsider their decision, but they remained obstinate. On the third day Fuad Pasha asked them if they would draw up a list of 200 names of the Druses whom they judged to be most guilty? They took a day to consider the proposal, and then refused that also. The next day (Jan. 17, 1861) they were very properly dismissed to their homes. Lord John Russell having referred to this affair in the House of Commons, the Maronite Bishops, headed by Tobia, published their version of it in a letter which Mr Farley reprints. The points on which they rest are these: that they did not give the first list of names themselves, but only indicated the sixteen laymen who furnished that list; that the proportion of the heads demanded from the hostile populations was not that of 4,600 to 8,000 Druses, as had been stated, but to 30,000 fighting men of the Druses, Mussulmans, and Metualis inhabiting the Lebanon, Anti-Lebanon, and the Hauran (a palpable subterfuge, as Lord Dufferin explains, in his letter to Lord John Russell of March 23, 1861, that he had seen the lists himself, and that only 632 were Moslems or Metualis, and only four, inhabitants of the Hauran; the remainder being Druses of the Lebanon: he also states that the list comprised not 4,600, but 4,946 individuals); that Fuad Pasha told them "he knew perfectly well that all the Druses were guilty"; and lastly, that the Christians did not think of demanding that all the persons indicated should be punished; two statements which are notoriously false. That the Maronites' refusal to furnish evidence against specific individuals was part of a plan to ruin their enemies *en masse*, there can be little doubt. Major Fraser, writing to Lord Dufferin from Mokhtara, the seat of Fuad Pasha's before-mentioned investigations, says (Jan. 10, 1861):— "I have now discovered an emissary in this village, who waylays witnesses coming to give evidence regarding the murder of their relatives, and induces them to withhold this, recommending them instead to lay it before the heads of their sect at Beyrout; otherwise, that the Government will only put a few Druses to death, thus depriving the Christians in general of the full satisfaction they desire." But of these details, and of the elaborate letter of Lord Dufferin, in which he enclosed the Bishops' remonstrance to Lord John Russell, and fully exposed its falsehoods and equivocations, Mr Farley appears to know nothing.

In view of such ignorance of his subject-matter, it is not possible to put any reliance on our author's judgment. He refers occasionally to his personal knowledge and experience of Syria, but it is only in general terms; he never states a single fact on his own authority. He has, moreover, a blind trust in the beneficent character of French influence in Syria, which is far from being justified by recent events. Sir H. Bulwer states (Aug. 8, 1860) that before the outbreak, the Maronites "seemed excited and filled with ideas of conquest and French protection"; and it was in the very camp of the French army that the brutal retaliations taken by the Maronites commenced. And nothing is more evident throughout the official correspondence than the sleepless and insidious endeavours of France, from first to last, to use the troubles of Syria as a plea for gaining a footing in the Sultan's dominions. Lord Cowley reports, indeed (Jan. 28, 1861), that M. Thouvenel plainly said to him, "I will not deny that we place a certain value in the preservation of our influence over the Maronites." It may be worth while to add that the rule of the Emir Beshir, which Mr Farley, following the French traditions, regards as the golden age of the Lebanon, is very differently described by Lord Dufferin. The Emir, writes his Lordship (Jan. 13, 1861), was a savage, energetic despot, half Mahometan, a quarter Christian, and a quarter Druse," who "contrived to keep the Mountain in subjection," "by dint of assassinating his enemies, putting out the eyes of his rivals, and terrorising his subjects." Such was the ruler under whom, Mr Farley tells us (p. 149), "life and property were perfectly secure, and no one, no matter how exalted his position, was permitted to extort anything from the people," &c.

We must not quit the subject without saying that while we consider Mr Farley entirely mistaken as to the respective merits of the Druses and Maronites, we do not doubt in the least that the Moslem fanaticism of which he speaks is a reality of the most fearful nature. To this, in connection with the shameful corruption of the Turkish officials, the massacre at Damascus is doubtless to be attributed. But that melancholy catastrophe stands upon different ground from the quarrels in the Lebanon, and forms part of a great and difficult subject, upon which we cannot enter on the present occasion.

THE CORNHILL MAGAZINE. July. Smith, Elder, and Co.
MACMILLAN'S MAGAZINE. July.
TEMPLE BAR. July.
THE SIXPENNY MAGAZINE. No. I. Ward and Lock, Fleet street.

IT is no slight task in the present rush of periodical literature to keep the mind clear and unperplexed by the numerous demands which are made on our attention in the shape of novels continued from month to month. Of the three principal ones contained in the magazines we are now noticing we have frequently spoken. From the close and heated atmosphere of Mr Thackeray's and Mr Sala's pages, clever as they undoubtedly are, we turn with the same feeling of strong relief to those of Mr Hughes with which we should leave the stifling ball room, or the hot and ill-smelling police court, for the pure bracing air of the open downs. We take leave of our old friend "Tom Brown" in this number with great regret. We have not space here to enter into a lengthened criticism of the work, but we cannot lay down its last pages without expressing our strong admiration of the literary ability as well as the pure and noble spirit in which it is written,—a spirit which, if it could be more widely diffused, would purify the whole atmosphere in which we live, would raise men's hearts and thoughts to a higher standard, and would enable them, while giving its full value to hearty practical work, to see beyond the dust and soil with which it is inevitably mingled, "the pure river of water of life, clear as crystal."

"Ravenshoe," by Henry Kingsley, also in "Macmillan," is a very spirited tale now verging to its close. There is much originality and vigorous drawing in the characters, and the bits of wild scenery on the Southern coast are touched in with a master's hand. Of the other articles, the most interesting are a paper on

the "New Indian Budget" by Mr Ludlow, and "Recollections of Cavour's last Debate."

In the "Cornhill," Philip pursues his way through the world, attended at present by his full share of troubles and misfortunes. Clever and sparkling as it is in parts, as a whole we find it disagreeable and tedious. The meannesses and weaknesses of human nature are dwelt upon with too microscopic an eye; they pervade the story even in its better points. It is very far from a healthy or improving occupation to be always spying out our neighbour's faults and our servants' peccadilloes. Mrs Stowe has, we think, made a mistake in leaving her own country for the plot of her story. Her homely graphic style was exactly suited to New England life and character: in Italy, she is conventional and tame. Some exquisite bits of nature painting are interspersed here and there, but we are all too well acquainted with the angelic maiden, the audacious cavalier, the pious sister, &c., &c., from inferior hands, to submit quietly to be reintroduced to them by a woman of Mrs Stowe's really original genius.

We have scarcely left ourselves room to advert to the new magazine at the foot of our list,—"The Sixpenny Magazine,"—which promises well. It contains several amusing articles, the best of which is Edmond About's "King of the Mountains," which is illustrated by some very droll and clever little woodcuts. One in particular is a gem,—the head of a philanthropist. We wish we could transfer it to these pages: in default of this we give the description of him in M. About's words:—

I took my meals with Christodulos and the boarders in the house. There were four living in it, and one lodged out. The first-floor was divided into four rooms, the best of which was occupied by a French archæologist, M. Hippolyte Mérinay. Were all the French like him, you would be a very scrubby nation. [The story is supposed to be told by a German]. He was a little man between the ages of forty and five-and-forty, very red-haired, very feeble, talking vastly, and armed with two soft flabby hands, which never left hold of the person he was addressing. His two ruling passions were archæology and philanthropy. Hence, he was a member of several learned societies, and of various benevolent fraternities. Though he was a great apostle of charity, and his relations had left him a fine fortune, I do not remember having ever seen him give a halfpenny to a poor man. As to his archæological acquirements, everything leads me to the belief that they were more serious than his love of humanity. He had been crowned by, I cannot say what, provincial academy, for a memoir on the price of paper in the time of Orpheus. Encouraged by this first success, he proceeded to Greece to collect materials for an immortal task: it was nothing less than to determine the quantity of oil consumed by the lamp of Demosthenes while he was writing the second Philippic.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS)

PARIS, Thursday.

An event which nobody would have expected a short time back has occurred: the Bank of France is making payments in silver in preference to gold, and this is owing partly to the excessive drain of silver to Asia having ceased, and partly to large arrivals of that metal from America having taken place. If the Bank could have foreseen this early change in the situation of that precious metal, it would not perhaps have taken the measures it did some months ago to protect its stock of silver. So abundant has silver become, that even in petty purchases at shops one now receives 5f pieces in exchange for gold: for a long time coins of that amount had almost entirely disappeared.

The Bill authorising the issue of bonds redeemable in thirty years for raising 104,000,000f for railways has been promulgated, and the issue is expected to take place very shortly.

The trial of the famous M. Mires has occupied the Tribunal of Correctional Police for five days, and has not yet concluded. It has revealed financial scandals of the gravest kind. Mires was managing director of a sort of bank, in shares, called the Caisse Generale des Chemins de Fer, and by its statutes he was expressly interdicted from speculating on the Bourse; and yet it has been proved that he speculated in the wildest manner, and it is affirmed that in a great number of cases he personally appropriated the profits of successful operations on the ground that they were made for himself alone, and threw on to the shareholders the losses arising from unsuccessful ones, on the pretext that he acted as their agent. The principal business of his bank was to make advances on the deposit of shares and other securities, and on the eve of the Italian war, he, being embarrassed, sold off all the shares and securities he had in hand without calling on the owners to redeem them by paying what they owed,—without even giving them any notice of his intention. And this was neither all nor the worst. In about every case he represented that the sale realised much less than it did in reality, and he of course pocketed the difference. He got up a company for constructing ports at Marseilles, and received 15,000,000f from persons who subscribed for shares, and of that sum he appropriated 5,000,000f. He bought for a company formed by him the concession of the Pampeluna Railway in Spain, and represented that he had paid or was to pay 200,000f a kilometre for it, when in reality what he gave for it was only 145,000f the kilometre. He concocted the Roman Railway Company, and by means of it cheated unfortunate shareholders to a vast amount. The result of his proceedings is, that a vast number of persons have sustained grievous loss, and that many in the lower ranks of life have been entirely ruined. As to the extent of his depredations, it is impossible, in the labyrinth of figures his accounts present, to calculate them exactly; but the public prosecutor yesterday set them down roughly at 52,000,000f (2,080,000*l*), exclusive of the losses which, from wild speculation, fall on the Roman Railways and the Caisse Generale. The capital of the latter, 50,000,000f, is, it appears, altogether lost. But the French law is such that all this man's dishonest acts only constitute what is called swindling and embezzlement, and consequently he will escape with the punishment of simple imprisonment for a period more or less long. He is, however, accused of another offence, that of distributing dividends out of capital. It has been proved that though his wild speculations frequently, indeed generally, ended in heavy loss, he took no account of the loss in the yearly statements he presented to his credulous shareholders. On this score he can be mulcted in pecuniary penalties; and, as notwithstanding the ruin he has brought on others he is in possession of a large fortune, hopes are entertained that such penalties will be imposed. The affair altogether throws curious light on the famous "institutions of credit" of which we have heard so much in these parts; and it demonstrates that a reform in the laws relative thereto is imperatively demanded, so as to prevent dishonest *gerants* from enriching themselves and despoiling their hareholders.

The Bourse has been very inactive during the week, but to-day there has been a sort of revival. The following are the quotations:—

	Thursday, June 27. f c		Thursday, July 4. f c
Threes	67 65	.....	67 90
Bank of France	2845 0	.....	2845 0

The Bank of France is now paying the dividend for the first half of the present year, which is 72f per share.

The Compagnie des Services Maritimes des Messageries Impériales is about to make an issue of 30,000 new shares, for raising the capital for establishing postal communication between China and India.

About this time last year I noticed the *Annuaire Internationale du Credit Public* of M. J. E. Horn. The number for the present year has just been published. It consists entirely of original matter, which is divided into three parts: the first consisting of details relative to the budgets, debt, and financial situation of Austria, England, France, Belgium, Russia, and all other civilised countries, great and small, in Europe, Asia, and America; the second of a mass of information relative to banks and "institutions of credit" of the said countries; and the third of information respecting their railways. There is also a division of "Varieties," in which the movement of the precious metals and other matters of interest are treated of. This book is of great utility to that numerous class who have to occupy themselves regularly or occasionally with the situation of different nations. The details it gives are copious, are drawn from official sources, and are brought down to the latest dates possible. Some of the chapters are very remarkable, especially those on the provinces of England, Austria, Holland, and Russia. That on England is by M. Legoyt, chief of the Statistical Department of France. The work is most carefully edited, and altogether it will add to the high reputation M. Horn already enjoys as an economist.

Annexed is an account of the markets:—

FLOUR.—The quotations at *Paris*, yesterday, varied from 70f to 74f the sack of 159 kilogrammes, and the four marks were 72f to 72f 25c for disposable, and 32f for the current month and for August. In the evening, the four marks for distant epochs had a slight downward tendency.

WHEAT.—At *Paris*, yesterday, the quotation was 37f 50c to 40f 50c for good sorts for the sack of 120 kilogs, and 41f to 42f for choice. Of the provincial markets, 24 present a rise of from 15c to 1f the hectolitre, 86 a fall of from 12c to 2f: 10 are reported firm, 46 without variation, 12 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 16,074 bales, and the importations 13,756. The demand was so active that the brokers fixed the closing prices at 1f higher for very low qualities of all sorts, and 1f to 2f higher for other qualities. Low New Orleans was consequently 106f the 50 kilogrammes, and very ordinary ditto 112f. On Monday and Tuesday of the present week sales were very active, and low New Orleans was 108f to 109f; very low ditto, 95f to 96f. Yesterday, the transactions were very spirited, exceeding 5,600 bales, and low New Orleans rose to 110f.

COFFEE.—At *Havre*, in the week ending Friday, business was somewhat more active than in the week preceding, but prices were lower. 5,392 sacks and some casks of Porto Rico not yet landed went at quotations kept secret; 102 sacks Port-au-Prince, at 76f the 50 kilogs in bond; 100 ditto Cape, 78f; 27 Rio, not washed, 69f; 518 ditto for delivery, 71f to 74f 50c; 40 ditto, washed, 90f. In addition, various lots of damaged Hayti, Rio, and Malabar were sold by auction. The arrivals exceeded 9,000 sacks. This week, Hayti has been at 76f; Cape ditto, 78f 50c. At *Nantes*, last week, some damaged Hayti, Port-au-Prince, and Gonaives was disposed of. This week, there have been no sales. At *Bordeaux*, last week, the sales consisted of a lot of Santiago, at 92f to 93f in bond; 1,400 sacks Malabar, at 109f; 3,600 sacks Guayra *non grage*, 80f 50c; 1,400 ditto *grage*, 85f 90c. This week, Santiago has been done partly at 95f, partly at different prices; Guayra *grage*, 85f; Rio, not washed, different prices; ditto washed, 87f. At *Marseilles*, last week, 3,500 sacks Rio went at prices varying from 60f to 72f.

SUGAR.—At *Havre*, in the week ending Friday, 410 casks French West India went at 47f the 50 kilogs duty paid; 20 ditto, "usine," 58f; 64 casks, 49f 50c; a lot of Porto Rico for delivery, 46f; one of superior ditto, 49f to 50f; 600 casks Havana, 33f 50c in bond; and 600 ditto for delivery at prices kept secret. The arrivals of different sorts exceeded 5,500 casks and 18,000 sacks. This week, French West India has been at 47f 25c; Havana, 34f. Some lots of different sorts of damaged have also been disposed of. At *Nantes*, last week, a small lot of Reunion went at 52f 50c, and another at 53f 75c; and 40 *gros grain* at 56f; and a small quantity of French West India was taken at 47f 25c to 47f 50c. This week, some Reunion has been taken at 54f 25c; also a large quantity at prices not given: a small lot of French West India, "usine," at 50f and 50f 50c. At *Bordeaux*, last week, there were no sales of Reunion, but 180 casks French West India went at 46f 25c —a decline of 75c; and 1,380 casks Havana at prices not stated. This week, French West India has been at 46f. At *Marseilles*, last week, the sole sale was a very small lot of French West India.

INDIGO.—The sales at *Havre*, in the week ending Friday, were active,—51 cases Bengal. Prices were firm. There were no arrivals. This week, there have been no sales. At *Bordeaux*, last week, business was active. 64 cases Mexico, 52 Kurpah, 72 Madras, 122 Bengal: prices not given. This week a small lot of Bengal and another of Kurpah have been disposed of, but prices are not given.

WOOL.—At *Havre*, in the week ending Friday, 135 bales La Plata unwashed went at 1f 80c to 3f the kilogramme; 5 Donskoi, 2f 2½c; 4 Australian, washed 6f 55c; 13 sheepskin, unwashed Monte Video, 1f 20c to 1f 25c. The arrivals did not amount to 2,000 bales. This week, some lots of damaged have been sold.

ST PETERSBURG, June 28.

The Government has just sanctioned the establishment of three Land Banks—one in this city, the other at Moscow, the third at Odessa. They are to be private affairs. Russia is decidedly progressing in commercial enterprise, but not so rapidly as could be wished. For the moment, however, commerce is very inactive, and is suffering greatly from the scarcity of gold and silver coin. The Government is under the necessity of making a new issue of Treasury bills to the amount of 6,000,000 roubles.

COMMERCIAL AND MISCELLANEOUS NEWS.

A report on the financial and commercial condition of Russia, by Mr Erskine, Her Majesty's Secretary of Legation at St Petersburg, has just been printed. The opinion is that at the present day the expenditure is about 44,500,000*l*, and the revenue about 40,000,000*l*, showing a deficiency of 4,500,000*l* sterling. In 1858 the cost of the army alone was estimated at about 15,000,000*l*. The most productive source of Russian revenue is the duty on spirits, amounting to the astonishing sum of 19,000,000*l* per annum. This revenue is farmed out to the highest bidders, and is now in the hands of 216 persons, who retail the spirit at about 1s 4d per imperial quart. With regard to the public debt of Russia, a statement compiled by Mr G. F. Kolb, which is said to be worthy of credit, places the total at 243,000,000*l*, to which must be added the 8,000,000*l* loan contracted in August last with Messrs Baring and Hope, thus raising the aggregate to 251,000,000*l*, on which the annual interest and sinking fund amount to more than 9,000,000*l*. This debt has accumulated steadily, and in most cases largely, during every year of the present century, with the exception of the interval between 1824 and 1828. In the year 1859 the increase was 30,475,759*l*. In addition to the funded debt, the Government are liable for the note circulation of over 100,000,000*l*. The following table exhibits roughly the value of the foreign trade of Russia in 1858:—

	Exports. £		Imports. £
Sweden	159,000	.....	21,000
Norway	79,000	.....	238,000
Prussia	2,380,000	.....	3,320,000
Denmark	480,000	.....	110,000
Hanseatic Cities	420,000	.....	1,740,000
Netherlands	1,060,000	.....	1,260,000
Belgium	480,000	.....	160,000
Great Britain	10,100,000	.....	6,450,000
France	2,500,000	.....	1,670,000
Portugal	60,000	.....	80,000
Spain	30,000	.....	390,000
Sardinia	400,000	.....	50,000
Tuscany	235,000	.....	30,000
Two Sicilies	2,000	.....	710,000
Austria	1,000,000	.....	1,300,000
Ionian Islands	2,000	.....	40,000
Greece	4,000	.....	70,000
Turkey	1,360,000	.....	1,060,000
United States	270,000	.....	1,160,000
West Indies	...	.....	70,000
Other countries	136,000	.....	235,000
	21,164,000		20,164,000

Of the Russian produce taken by Great Britain in 1858, the following were the proportions:—

	£
Grain	3,200,000
Tallow	1,720,000
Flax	1,550,000
Flaxseed and hempseed	1,350,000
Hemp and yarn	800,000
Wool	550,000
Bristles	235,000

The following commercial news has reached us by the last mail:—Rio Janeiro, June 8.—The coffee market became paralysed after the receipt of the late unfavourable news, but upon the concession by dealers of 300r in the price of superior, and 400r in inferior qualities, business was effected to the extent of 42,700 bags. The stock now exceeds 140,000 bags. Sugar—The market continues animated for exportation; whites are quoted at 3,800r; brown at 2,200r. Since the last English mail 1,596 cases have been sold. Bahia, June 10.—The weather has been more favourable for produce, and fair hopes are entertained of good crops for next season. In the market, sales of sugar have been effected at 2,100r per arroba for brown in cases, and 2,600r to 2,700r for white. Stocks are being considerably reduced, and supplies falling off. Sugar costs 19s 4d and 23s 10d per cwt, free on board, freight included. Pernambuco, June 13.—Sugar—Prices of white descriptions have been without variation, with the exception of first and second qualities, which have declined 200r to 400r per arroba.

The annexed report of the timber trade at Quebec is dated June 21:—"The sales of white pine during the last fortnight have been very limited. The spring fleet being nearly loaded, shippers are only buying for immediate wants. A few small common rafts have been sold at 5d to 6*d*, and a very fine raft of St Lawrence wood 1s 3d waney, 2s 3d square, 10¾d in shipping order. Red Pine—The stock is very much diminished, but as an ample supply is expected, prices have not altered. Elm—35 feet rock is worth 11d, 40 feet 13d to 14d. Oak—Some old second-class wood is offered at 16d, but higher rates are demanded for new. Staves are selling at about 42*l* 10s for mixed specifications of standard, 45*l* all pipe, and 13*l* W. I. pun. Deal—Bright, of good specification, are selling at 15*l*; floated, 13*l* or 14*l*, according to specification. Salt—Liverpool coarse, in bags, is worth about 2s. Exchange without alteration."

The Eastern mackerel fishery has been prosecuted with more success off Lowestoft during the past week, several boats having come in with 1,500 to 3,000 fish each. At Yarmouth the catches made were indifferent, and prices ranged at 30s per 100. Taken as a whole, the season, which will close in about three weeks, has been a discouraging one, as in successful years fish are so abundant as to sell at 18s or 20s per 100, while this year they have been disposed of at as high a figure as 60s per 100. The Midsummer herring fishery continues to exhibit indifferent results. Some of the most successful boats delivered 1,000 to 3,000 fish in the course of last week, but in other cases the return is *all* but *nil*. Prices are quoted at 10s to 11s per 100.

A supplement to the *London Gazette* was published on Tuesday with the treaty entered into between Great Britain, Austria, Belgium, Brazil, Denmark, Spain, France, Mecklenburg-Schwerin, the Netherlands, Portugal, Prussia, Russia, Sweden and Norway, and the Hanse Towns on the one part, and Hanover on the other part, and signed at Hanover on the 22d of June, 1861, for the abolition of the Stade Dues.

According to the statement issued by Mr James Low, the portion of the public debt of India registered on the London books on the 30th ult. was 8,136,950*l*, being an increase of only 133,720*l* during the half-year. The amount of specie shipped from Great Britain to the East in the six months was 4,839,531*l*, of which 530,367*l* was gold. The amount from Mediterranean ports was 1,356,010*l*, making an aggregate of 6,195,550*l*.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 19.—Under a tolerably active demand yesterday, the market for State and Western flour became more buoyant, and nearly all kinds were more firmly held, while for some grades prices showed a trifling improvement. The sales for the three days foot up 46,000 bbls. Canada flour is steady, and prices are generally supported. Southern flour continues dull, but without essential change in prices.

EXPORT from 1st to 18th June.

	1861. barrels	1860. barrels
Wheat Flour	134,123	105,151

The market opened yesterday with a better demand for wheat for export, and was more buoyant, while prices were generally a trifle higher. The sales for the three days foot up about 615,000 bushels, of which 215,000 changed owners yesterday, including 76,000 Milwaukee Club at 75c to 1.16 dol; 17,500 amber Iowa, 1.17 dol to 1.18 dol; 2,500 very choice amber Wisconsin, 1.20 dol; 18,700 winter red Western, 1.28 dol to 1.29 dol; 38,500 North-Western Club, 1.03 dol to 1.12 dol; 46,500 Racine Spring, 1.12 dol to 1.15 dol; 5,800 California, 1.23 dol to 1.25 dol; and 6,400 Canada Club, 1.17 dol. The market for corn has also been somewhat irregular, and prices have fluctuated; the sales comprise 235,000 bushels, including 65,000 yesterday, at 41c to 47c for new Western mixed, and 56c for old ditto.

EXPORT from 1st to 18th June.

	1861. bushels	1860. bushels
Wheat	1,922,831	395,313
Corn	542,298	739,938

NEW YORK, June 22.—The market for State and Western flour is further depressed, and prices have fallen 10 to 15 cents per barrel. Canada and Southern qualities, however, have moved

off steadily, at full quotations. Prime wheat has been in fair request, for export to Great Britain and France, at full currencies; but inferior and medium qualities have ruled less active. Corn, the supply of which on offer is limited, commands extreme rates.

NEW YORK, June 28.—The flour trade continues dull, and prices have further declined. Wheat moves off heavily, at lower currencies for all medium and inferior qualities. Corn, however, being in short supply, commands previous quotations.

EXPORT from June 1 to June 18.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Nearly the whole of the leading markets of consumption, held this week, have been scantily supplied with home-grown wheat. Good and fine samples have sold somewhat freely, at full prices; but all other kinds have commanded very little attention, at the recent decline in value. On the whole, there has been an improved feeling in the sale for foreign wheat, at quite last week's currency. Although the supplies of both English and foreign barley have continued on a limited scale, the trade has been much restricted, at about previous rates. In the value of malt, we have no change to report. Both beans and peas have commanded very little attention, and the inquiry for flour has not improved.

The annexed table shows the extent of the arrivals of cereal produce into London during the second quarter of 1859, 1860, and 1861:—

	Wheat.	Barley.	Oats.	Beans.	Peas.	Flour.

The accounts from most parts of the United Kingdom, in reference to the growing crops, continue very favourable. The wheats especially have made considerable progress, and all kinds of spring corn are looking healthy.

Most of the continental markets continue to be fairly supplied with wheat, for which the inquiry is much restricted, on rather easier terms. Barley and most other articles are a dull sale. The latest advices from New York state that large quantities of breadstuffs were coming forward, and that both wheat and flour were offering at further reduced quotations.

In Scotland, wheat has moved off slowly, but without change in price. Spring corn has commanded very little attention.

The Irish markets generally have continued in a most inactive state, and late rates have been with difficulty supported.

At Mark lane, to-day, the show of English wheat was small, and all good and fine samples moved off steadily, at quite Monday's currency. Inferior qualities were difficult of sale, yet no change took place in their value. The supply of foreign wheat was large; nevertheless, the demand exhibited a slight improvement; and, in some instances, prices improved 1s per quarter. Barley, oats, beans, and peas, however, were a dull inquiry, and the quotations had a downward tendency. Most kinds of flour were in limited request, on former terms.

Mr E. Rainford remarks as follows on the trade in floating cargoes:—The reported arrivals for orders up to last night since the 25th ult. are 13, consisting of 10 cargoes of wheat, 2 maize, and 1 beans, viz.:—Wheat, 7 from New York, 1 Philadelphia, 1 Santander, 1 Odessa; maize, 1 Galatz, 1 Alexandria; beans, 1 Saffi. There has been a large business in wheat bought for the Continent this week. The following are transactions since this day week:—Wheat, arrived, per 492 lbs, Venetian 51s 9d, and Oldenburg 52s 6d, for the United Kingdom (buyers of both to pay extra freight and insurance to the Continent); Oldenburg, for the United Kingdom, 52s; hard Odessa 41s, and Odessa Ghirka equal to about 47s, both for the Continent; Odessa Ghirka, 44s 6d and 44s, for the United Kingdom; per 480 lbs, Ibraila, 41s 3d; Milwaukee, 50s 6d and 50s; red ditto, 50s 6d; red American, 50s 6d; Sandomirka, 53s 6d, all for the Continent; Polish Odessa 45s, and Wallachian 38s, for the United Kingdom; Saide, 34s 6d; on passage, per 480 lbs, Milwaukee at equal to 51s, and red winter equal to about 52s 3d, both for the Continent. Maize, arrived, per 480 lbs, yellow American equal to 28s 2d, mixed American 27s 3d; Scala Nova, 27s 3d; Ordu, not perfect, 27s 3d. Barley, arrived, per 400 lbs, Ibraila, equal to about 23s and 23s 4d; Egyptian, 22s 6d; Odessa, not perfect, 21s 6d.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria. cap. 32, for the week ending on Wednesday, the 3rd day of July, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,696,910	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,149,946
		Silver Bullion	71,964
	25,696,910		25 696,919

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities(including Dead Weight Annuity)	9 980,202
Rest	3,307,315	Other Securities	21,401,660
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7 291,844	Notes	5,633.830
		Gold and Silver Coin	849,862
Other Deposits	12,092,482		
Seven Day and other Bills	620,513		
	37,865,554		37,865,554

Dated the 4th July, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20.683,993	Securities	31,303,862
Public Deposits	7,291,844	Coin and Bullion	12,071,772
Private Deposits	12,092,482		
	40,068,319		43,375,634

The balance of Assets above Liabilities being 3,307,315l, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£898,781
A DECREASE of Public Deposits of	867,182
An INCREASE of Other Deposits of	581,186
An INCREASE of Government Securities of	12,548
An INCREASE of Other Securities of	1,221,594
A DECREASE of Bullion of	572,888
An INCREASE of Rest of	48.469
A DECREASE of Reserve of	1,437,448

The changes in the above return are chiefly caused by the payments usual at the close of the quarter, when a large quantity of gold is temporarily withdrawn for Government salaries and the like. The decrease in the bullion is also in some degree attributable to the silver taken for shipment to the East this week by the Council of India. The augmentation in the other securities and the falling off in the reserve are explained by the heavy demand for money up to the 4th inst.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.

Average price of wheat	43s 5d	42s 8d	46s 4d	58s 5d	51s 6d
Exchange on Paris(shrt)	25 0	25 2½ 10	25 7½ 15	25 12½ 20	25 40 47½
— Amsterdam ditto	11 16½ 16⅝	11 15	11 12 12½	11 14⅛ 15	11 18⅛ 19
— Hamburg(3months)	13 8 8½	13 6¼ 7	13 3½ 3¼	13 5 5¼	13 10¼ 10⅜

In the corresponding week of 1851, Parliament was occupied with a number of useful measures, but none of any prominent importance. The Great Exhibition continued to be crowded with visitors. The advices from California mentioned the total destruction by fire of San Francisco. Several serious questions had been laid before the German Diet, the principal being the admission of the non-German provinces of Austria into the Confederation, but it was believed that this proposal would be withdrawn

In 1858, the rate of discount in the open market was 2½ per cent., but gold was flowing out of the Bank. Rumours of a Turkish loan were in circulation. Political and commercial affairs were alike quiet.

In 1859, great excitement prevailed in consequence of the conclusion of an armistice between France and Austria. Consols rose from 93¼ to 94¾, and the rate of discount was ½ per cent. lower in Lombard street than at the Bank, the prospect of immediate peace overriding the fact of supplemental Army and Navy estimates to the extent of 3½ millions.

In 1860, the House of Commons was discussing the privilege resolutions brought forward by the Select Committee appointed to examine and report upon the precedents for the late rejection by the Lords of the Paper Duty Repeal Bill. The notorious failures in the leather trade, comprising Messrs Streatfeild, Laurence, and Mortimore, and many other houses, had just taken place. A revolutionary movement had been commenced in Naples, and the King had fruitlessly proclaimed the constitution of 1858. Prince Jerome Napoleon, the ex-King of Westphalia, had lately died. The advices from Lisbon mentioned the dissolution of the Ministry, and that the Marquis of Loulé had been intrusted with the formation of the new Cabinet.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,555,390*l*; in 1858, a deficiency of 3,529,800*l*; in 1859, a deficiency of 5,101,034*l*; and in 1860, a deficiency of 7,922,050*l*. In 1861, the deficiency is 9,309,178*l*.

DISCOUNT AND MONEY MARKET.—The demand for money was very active at the commencement of the week, owing to the preparations for the 4th of the month, when, as usual, large quarterly payments became due. In the discount market no business was transacted under 6 per cent., and the applications at the Bank were on a very large scale. Yesterday, however, there was more ease, but to-day there has again been a good demand, although not so heavy as previously. Occasionally, the best short paper was taken this afternoon at a fraction below 6 per cent., but these transactions were altogether exceptional. On the Stock Exchange loans on Government securities are still sought, and the rate remains at 6 per cent. with an upward tendency.

It has been officially announced that a subscription will be opened at the Bank of France for the issue of 300,000 bonds of 440f each, bearing 20f a year interest, and redeemable in 30 years at 500f. This will represent a total of about 5,300,000*l*, which is to be applied to the construction of railways.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	6	...

ENGLISH FUNDS.—A further decline took place in Consols this week, the quotations up to the day before yesterday having been 89¼ to ⅜ for money, and 89⅜ to ½ for the present account, the fall being caused by the continued sales, it is believed on account of the provincial banks. A recovery, however, has since ensued, the low prices having at last brought in the public as buyers. To-day there has been especially a heavy purchase, and the market has shown more firmness than for some weeks past. Consols closed this evening at 89¾ to ⅞ for money and the 10th instant, showing an advance since last Friday of between ¼ to ½ per cent. The announcement of the new Indian loan of 4,000,000*l* exercised at one period a slightly adverse effect, but has been fully counteracted by the operations of the public.

Exchequer bills have been again depressed, although the final quotations of to-day were rather better than at one time. They still, however, remain at a discount, the June issue being 5s to 1s dis., and those of March 11s to 6s dis. India bonds are a shade firmer at 17s to 10s dis.

The following notice has been issued with regard to the new Indian loan of 4,000,000*l*. It will be seen that the tenders will on this occasion be taken at the Bank of England instead of the India Office, and that fractional parts of a shilling other than 6d will not be accepted. The price of the present stock went ⅛ to ¼ per cent. lower on the publication of the announcement, but a rally has since taken place, and the present quotation is 98⅜ to ⅝, or the same as last Friday.

India Office, Victoria street, Westminster, July 2.

The Secretary of State for India in Council gives notice, that he will be prepared to receive on Friday, the 12th of July, at or

before 12 o'clock, tenders for a loan of 4,000,000*l*, on security of stock to be created under the provisions of an Act of the present Session of Parliament, and to bear interest at the rate of 5 per cent. per annum, payable half-yearly at the Bank of England, on the 5th of January and the 5th of July in each year.

The stock not to be redeemable until the 5th of July, 1870, but to be redeemable at par on or after that day, upon one year's previous notice having been given in the *London Gazette* by the Secretary of State for India in Council.

The books of the stock will be kept at the Bank of England, where all assignments and transfers will be made. No stamp duties whatsoever will be charged on the transfers.

The tenders to be for the whole or any part of such loan, but not for sums of less than 500*l* stock, and to state what amount of money will be given for every 100*l* of the said stock. Tenders at a price including fractions of a shilling other than sixpence will not be accepted. Tenders by the same person at various prices must be made out and delivered separately. Each separate tender is to be delivered in, sealed, at the chief cashier's office, Bank of England, and the amount of stock subscribed for to be written on the outside of the tender.

A deposit of 2 per cent. upon the amount of stock tendered for must, at the same time, be paid at the same office, to be returned in the event of the tenders not being accepted, and parties tendering must be careful not to enclose the deposit in the sealed tender.

So much of the amount tendered and accepted to be paid at the Bank of England, on account of the Secretary of State for India in Council, on Friday, the 19th of July, 1861, as, when added to the deposit paid, on the tenders being delivered, will leave 80*l* for each 100*l* of stock to be paid, as under, viz :—20*l* per cent. on Tuesday, the 20th of August, 1861 ; 20*l* per cent. on Tuesday, the 24th of September, 1861 ; 20*l* per cent. on Tuesday, the 22nd of October, 1861 ; 20*l* per cent. on Tuesday, the 19th of November, 1861 ; but parties who so desire may pay up in full, and will be allowed a discount at the rate of 5 per cent. per annum upon the anticipated payments.

The dividend payable on the 5th of January, 1862, to be a six months' dividend upon the capital amount of stock contracted for on the said 12th of July.

In the event of the receipt of tenders (at or above the *minimum* price to be fixed by the Secretary of State for India in Council on the 12th of July) for a larger amount than that proposed to be raised, the tenders, at the lowest price accepted, will be subject to a *pro rata* diminution.

Due notice will be given when the scrip receipts are ready, and these will be delivered only to the parties entitled, or to their order, at the chief cashier's office at the Bank of England.

For each instalment after the payment of the first, which is due on the 19th of July, 1861, a proportional amount of stock will be created for the contributors. The stock for the first instalment, including the deposit, to be created at the same time with that which will be due on the last.

No tender will be received after 12 o'clock on the said 12th day of July, nor unless upon a printed form, which must not be enclosed in an envelope.

This form may be obtained at the chief cashier's office, Bank of England, or of Mr Henry Scott, the broker to the Secretary of State for India in Council, 16 Throgmorton street, London, E.C.

J. Cosmo Melvill.

Foreign Stocks.—The most important movement this week in the foreign market has been a considerable advance in Turkish Six per Cents., especially the 1858 loan, on the financial reforms announced by the new Sultan. The rise has been steadily maintained, the final prices this evening being the best of the week. Mexican has also improved. Russian stocks have been heavy, the Three per Cents. in particular showing a decline. The news from Buenos Ayres of the imminent outbreak of hostilities in that Republic has hitherto caused no effect in the price of the State bonds.

The closing price from Paris this evening of French Three per Cents. was 67f 85c, showing a recovery of fully a quarter per cent.

Foreign Stocks.—A numerously attended meeting of Mexican bondholders took place yesterday, when resolutions were carried declaratory of the bondholders' rights, and petitioning the British Government to cause them to be put in force. The disgraceful manner in which the various Governments of Mexico have evaded or disregarded the claims of the national creditors, notwithstanding the sacrifices they have made by a reduction in their rate of interest, was much commented upon, and especially the most flagrant instance of the late robbery of 132,000*l* by General Miramon. The opinion was universally expressed that if proper reparation were not exacted for this outrage, there is an end to British protection, not merely in Mexico, but all over the world. It is only necessary for the English Government to show that it will not be trifled with by sending a naval squadron to the coast, but mere verbal remonstrance will, as heretofore, prove utterly futile. There being a sufficient sum lying in the Bank to pay the remanet of the coupon of 1854 within 3,000*l* or 4,000*l*, the chairman of the committee, Mr D. Robertson, M.P., and the deputy-chairman, Mr McGarel, agreed to advance that amount, but owing to some difficulties with the financial agent of Mexico, the distribution could not be made. A deputation was appointed to wait upon that gentleman, but without result. It is intended to draw up a memorial for presentation to the Government forthwith.

A meeting of bondholders of New Granada was also held on Wednesday, to consider the best means of utilising the public bonds assigned to the national creditors under the recent arrangement of the foreign debt. It appears that the total waste land of that State is no less than 120 millions of acres, or about triple the cultivated portion, and that the soil is described on competent authority as being of inexhaustible fertility, and producing several of the most valuable staples of the globe. The climate is also stated to be generally favourable. The portion of land allotted to the bondholders amounts to about 4,300,000 acres, and it is considered of vital importance to select and secure at once the richest tracts. It is therefore proposed to establish a land company, and, in consideration that the enterprise will be beneficial not only to its promoters but to the State generally, the Government have agreed to assist their operations by a loan of 50,000*l* stock, on an assignment for a term of years of half the contributions from the Panama Railroad. It was resolved, after much discussion, to accept the former proposal, and to invite the bondholders to subscribe 2*l* of capitalised stock out of every 100*l* active bonds they hold, the interest of which will be devoted to the preliminary expenses, surveys, &c., of the undertaking.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day :—

Railways and other Shares.—The public continue to restrict their operations in railway securities as much as possible, and the market thus remains influenced solely by the transactions of the dealers themselves. The daily variations have been unimportant, and have mainly depended upon the traffic returns. Reports have also been circulated, chiefly unfavourable, respecting the approaching dividends. Compared with last week, the only material alteration has been a rise in North-Eastern stocks.

Foreign descriptions have been generally neglected, Great Luxembourg shares alone being in any demand. Lombardo-Venetian declined during the week, but have since rallied. American railway securities are firm, Illinois Central having especially improved to 38½ to 38 dis.

There has lately been a good inquiry for London Dock stock, and the price which some time back was about 49, is

now 63. Natal Land shares have fallen to par to ¼ premium. London and Provincial Marine, which formerly stood at a slight discount, have risen to par to ⅛ premium on the favourable meeting of last week.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day :—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The rates have again been firmer this week, partly in consequence of the determination of the Bank of France to cash its notes in silver instead of gold.

BULLION.—Annexed is the weekly circulation of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper :—

Gold.—During the past week, about 30,000*l* has been sent into the Bank. Several amounts have been received from the Continent, but these have been forwarded to America, together with large withdrawals of sovereigns from the Bank. The exports comprise the North Briton with 49,200*l*, to Quebec; the Canada with 103,267*l*, to Boston; the Saxonia with 14,300*l*, and the City of Washington with 223,183*l*, to New York; the Ceylon with 5,636*l*, to the East Indies; and the Atrato with 96,186*l*, to the West Indies. The Shannon has brought 36,500*l* from the West Indies, and the Oneida 31,895*l* from the Brazils. Arrivals from Australia may now be daily looked for.

Silver.—The Shannon has brought 491,000*l* in silver and dollars from the West Indies; this large arrival, coupled with the intelligence that the Bank of France will now make its payments entirely in silver, has caused a reduction in price, which we quote as 5s 0½d per oz standard; at this rate there are buyers to a moderate amount for the Indian markets. The Ceylon has taken 269,045*l* to India and China, 140,434*l* of which was on Government account.

Mexican Dollars.—A large amount is on the market, and the price, which last week was quoted as 4s 10⅞d per oz, has declined to 4s 10½d per oz, at which rate nearly the whole of those ex Shannon have been disposed of.

Exchange on India for Bank's drafts, 60 days' sight, Bombay and Calcutta, is nominal at 1s 11⅞d to 2s; Madras, 1s 11⅝d to Madras, 1s 11⅞. Bills with documents, Bombay and Calcutta, 1s 11¼d.

India Government Loan Notes remain at last week's quotations, with perhaps a better tone; we quote 5 per Cents. 94 to 94½ and 5½ per Cents. 100¼ to 100¾.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 71s 0d to 78s 3d per oz, last price; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0½d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅝d per oz std, last price; fine cake silver, 5s 4¾d per oz, last price; Mexican dollars, 4s 10⅞d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

About 9,000*l* in gold was taken to the Bank yesterday, and about 12,000*l* to-day. A large number of sovereigns, on the other hand, are known to have been withdrawn for shipment to America to-morrow.

According to a statement prepared by Mr James Low, it appears that the total amount of the native debt of India registered in London on the 30th of June was 8,136,950*l*, showing an increase of only 133,720*l* during the half-year. The bullion exported to India since the commencement of 1861 is 6,195,550*l*, of which 4,839,531*l*. went from Great Britain, and 1,356,019*l*. from Mediterranean ports.

In the colonial market there has been a marked rally in Grand Trunk of Canada, Great Western shares having also improved. Indian guaranteed are about the same as before, notwithstanding the announcement of the new loan.

FAILURES AND MERCANTILE EMBARRASSMENTS.—At an adjourned meeting of creditors of Messrs Mackay and Read, East India merchants, it was resolved, in accordance with the recommendation of the committee appointed at the last meeting to investigate the accounts, to accept a composition of 5s in the pound, payable in instalments at 6, 10, and 14 months—the last to be secured. The report stated that the stoppage had been too long delayed, and that the firm had gone on trading at a time when they ought to have known they were insolvent.

PUBLIC COMPANIES.—A meeting of the Colonial Bank was held on Wednesday, when the report announced that the net profit in the six months ending December 31, 1860, was 36,774*l*, out of which a dividend at the rate of 10 per cent. per annum was recommended, leaving 11,774*l* to be added to the reserve, which now amounts to 92,714*l*. The proprietors were congratulated on the satisfactory position of the affairs of the Company, and it was also mentioned that the accounts for the current year compare favourably with the same period of 1860. In reply to a question, it was stated that the bank cannot suffer directly from the crisis in America, but may possibly in an indireect manner experience some small loss. After a short conversation, the report was carried unanimously.

The Linares Lead Mining Company have declared a dividend of 3s 4d per share.

At the half-yearly meeting of the London Dock Company this afternoon, a distribution was ordered at the recommended rate of 1½ per cent. The number of loaded ships that entered the docks in the last six months was 537, measuring 261,810 tons, against 548 in the corresponding period of the previous year, measuring 228,200 tons. The revenue and expenditure were respectively 223,472*l* and 167,923*l*, against 226,788*l* and 169,719*l* in 1860. The stock of goods in the warehouses on the 31st of May was 107,290 tons, being nearly the same as last year. With reference to the late fire, it was mentioned that the warehouses are insured for 682,777*l*.

At the Peel River Land and Mineral Company's meeting, a dividend was declared at the proposed rate of 3½ per cent. per annum, free of income tax. The revenue during the past half-year was stated to show an increase, from the heavier weight of the wool and the better prices obtained. The live stock is healthy, the deaths that have occurred being below the average. It is intended to reduce the number of cattle, and to dispose of the greater portion of the horses, and to replace them with an additional flock of sheep. With regard to the growth of cotton in Queensland, a quantity of seed has been sent out, with which a fair trial will be made on a portion of the Company's estate at the Peel.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.7¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 7-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves little or no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was only a limited supply of English wheat on offer at Mark lane to-day, and most kinds were taken off steadily, at Monday's prices. Foreign wheat commanded more attention, and fine samples were held for 1s per quarter more money. Spring corn was heavy at barely previous rates. In flour, very little was doing. The imports from abroad amount to 24,520 quarters of wheat, 5,610 barley, 38,930 oats, 1,770 sacks and 10,970 barrels of flour.

At Liverpool, to-day, wheat, and the best qualities of flour, have moved off freely at full currencies.

The following report of the grain trade at Odessa to the 21st ult. is forwarded by Messrs Pietronie and Draper:—Although the supplies from the interior are very large, our grain trade does not yet derive benefit therefrom. Owing to all that arrives being so badly-conditioned, holders of the small quantities of dry wheats which we have ask prices out of all proportion with those of the places of consumption; whilst, on the other hand, damp wheats are sold at very low prices, in order to avoid the enormous charges of drying and warehousing, which have doubled and even tripled. This state of things renders operations nearly impossible; and it is, consequently, not to be woudered at that business is paralysed. During the last five days nothing has been done in Polish Odessa, Ghirka, and Sandomirka. Current prices at Odessa, 9-21 June:—Polish Odessa wheat, fair average, 39s 6d; Sandomirka ditto, fair average, 40s per 480 lbs; Ghirka ditto, fair average, 40s; hard ditto, 40s 6d; maize, 22s 9d per 492 lbs; barley, 17s per 400 lbs; oats, 13s 1d per 300 lbs; rye, 22s 6d per 480 lbs; superior sifted linseed, 47s 6d; fair average ditto, 45s 6d; unsifted ditto, 43s 3d; fair average rapeseed, 25s 9d per qr, f.o.b.

A very active demand has prevailed during the present week in the Liverpool cotton market, resulting in total sales of 165,000 bales, including 90,000 bales to spinners, 49,000 bales on speculation, and 26,000 bales for export; prices are ⅛d to ¼d per lb dearer than on Friday last, according to quality. The market closes to-day very firm at full rates. There appears now to be no chance of a peaceable solution of the difficulties in America, and the question of the supply of cotton to be received from that source is regarded as a critical one; and when American accounts speak of importing cotton from Liverpool, it is no wonder that the latter market should become somewhat excited. Meantime, however, the supply of East India cotton is abundant.

The public sales of tea held this week have gone off heavily, and, in some instances, prices have given way 1d per lb. In the private market, very little is doing.

Good and fine raw sugars have been in somewhat improved request, at full prices; but other descriptions have met a dull inquiry.

The coffee market may be considered steady. In the quotations, however, no change has taken place.

The following is from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEA PORTS, for the Five Months ending 31st May, 1860 and 1861.

There has been only a limited inquiry for all kinds of rice at about previous rates.

We extract the following from Messrs Churchill and Sim's circular of the timber trade:—

Comparative Stock of Timber at the Public Docks on July 1.

	1861.	1860.	1859.
Foreign deals pieces	846,000	744,000	779,000
Battens, boards, and ends	481,000	582,000	502,000
Fir timber loads	40,700	29,000	37,300
Colonial pine deals & battens. pieces	602,000	254,000	360,000
Spruce ditto	387,000	348,000	420,000
Pine timber loads	6,400	6,900	5,400
United States pitch pine timber	3,900	4,700	5,000
East Indian teake	3,600	6,200	13,400

Messrs Powell and Co. thus refer to the state of the leather trade for the past month:—The transactions in leather during the past month show an increase as compared with those of May, more particularly during the last fortnight. The demand, however, is still of the same restricted character, equal in most articles to the supply, so that there has not been any accumulation of stock, and sufficient to maintain generally the quotations of last month. The fine weather, affording so good a prospect for the approaching harvest, imparts a better feeling in the market, and tends to the expectation of an increased consumption. In raw goods the most important feature of the month is the large arrival of South American hides, of which the stock is nearly doubled; other imports are considerable, and, with the exception of East India kips, prices have tended downwards. Exceedingly low quotations are still given for hides in the North American markets, so that continued shipments may be expected thence to Europe. The demand has been on the whole about an average of the last few months.

The transactions in saltpetre have been much restricted. Holders, however, continue firm.

The wool trade is heavy. The stock of colonial wool is about 73,000 bales. The next sales will commence about the 18th inst., by which time the quantity arrived will most likely reach 90,000 bales. Quantity arrived to date:—From the Cape of Good Hope, 7,691; Sydney, 18,535; Port Philip, 20,720; Van Dieman's Land, 10,507; South Australia, 5,041; New Zealand, 9,868; Swan River, 903—total, 73,265 bales.

Scotch pig iron has changed hands to a moderate extent, at full prices. In the value of other metals very little alteration can be reported, except English tin, which has fallen 4*l* per ton.

It will be seen by the following statement that the increase in the exports of Scotch pig iron has been continuous in the quarter just closed:—

Week ending	1861. tons.	1860. tons.	Week ending	1861. tons.	1860. tons.

May 18	18110	13600			

These figures show a total shipment of 201,857 tons during the past quarter, as compared with 158,096 tons in the corresponding quarter of 1860, being an increase of 27.85 per cent. The stock of iron in the yards at Glasgow is now estimated at 164,200 tons, against which warrants are in circulation for 161,800 tons.

The following is the monthly statement of Banca tin in Holland:—

	1861. slabs	1860. slabs	1859. slabs
The stock on the 31st May	20896	26640	15475
Deliveries in June	6820	9115	2235
Stock on warrants June 30	14076	17525	13240
Stock for annual sale	166799	151513	139128

The annexed remarks, from Messrs Witherby and Son's circular, refer to the dry fruit trade for the past month:—"Currants.—The London stock on the 1st inst. consisted of 626 carroteels, 10 pipes, 937 half-pipes, 64,203 barrels, and 19,189 cases, or 8,500 tons, against 9,400 tons on the 1st July, 1860. The market has been in a state of activity for a period of two months, but, judging by the clearances, the trade have been reducing their stocks. The absence of any pressure to realise or to force off at public sale, shows the market to be in the same strong and healthy position which has characterised it for so many months. No correct estimate can yet be made of the probable produce of the present year's crop, but according to the latest advices, if no injury occur from rains during the harvest, the total crop would be equal to that of last year. Raisins.—Deliveries in London in June were 315 tons, against 360 in 1860, and the exports 260 tons, against 472. Those in the United Kingdom in the first five months of this year were 3,161 tons, against 3,772 in 1860. The exports have fallen off considerably, having been only 738 tons, against 2,100 tons in 1860, when prices were below those of the Continent. The stock of raisins has been worked down to 2,200 tons, whereas last year in July it was 3,350 tons. The transactions of the past month present no new feature. Valentias find but a retail sale at reduced rates. The advices from Spain are satisfactory, and a similar crop to last year's is anticipated, both in Valentias and Muscatels. No reports have yet been received from Turkey."

With regard to the tobacco trade of the past month, Messrs Grant and Hodgson observe:—"The market last month presented increased firmness, and a decided disinclination on the part of some holders to make sales, unless at a considerable advance on our quotations; business has in consequence been of a very limited character, and insufficient to require any special details. The most influential portion of the trade having purchased very freely in the early part of the season, the market has not been supported by any purchases of magnitude, or prices enhanced by speculative action, otherwise it is not improbable that the present and prospective state of American affairs might have placed the market in a different and more embarrassing position as respects the manufacturing interest. Imports, 3,462 hhds: deliveries, 909 hhds, against 1,069 hhds in the corresponding month of last year: stock, 19,407 hhds, against 15,495 hhds in 1860; 10,414 hhds in 1859; 7,677 hhds in 1858; 9,513 hhds in 1857."

Linseed oil is dull, at 29s 9d per cwt. Rape may be purchased on easier terms. American turpentine, owing to limited shipments from New York, has sold at 50s to 50s 6d per cwt.

The public sales of cochineal have gone off freely, on higher terms, and the spirit market may be considered steady.

The tallow market is steady, at 53s per cwt for P.Y.C. on the spot, and 50s 6d for the last three months.

"In financial circles," remarks the New York *Shipping List* of the 19th ult., "a superabundance of capital, and an ardent desire to find desirable and profitable employment for it, continue to be the leading features. The protracted stagnation of trade causes a great scarcity of unexceptionable business paper, which is much sought after by the banks and discount houses, at comparatively low rates of interest. There is every indication of an easy money market for loans on call until the revival of active trade. There is comparatively little doing in money matters, and rates are nominally unchanged. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	7 ...
Do. 4 to 6 months	10 ...
First-class single signatures	7 ...
Other good bills	... ...

The market for domestic goods remains without any essential alteration. The inquiry for army goods, and for cotton goods for export, afford about the only exception to the general dulness which has prevailed during the entire spring and summer, while there are no indications of a recovery in any branch. Meanwhile prices of most goods are merely nominal, and we therefore omit

further specifications. In the other principal dry goods marts the market is reported as dull and depressed."

The same journal of the 22nd ult. observes:—"The leading features in financial and commercial circles continue to be an excess of unemployed capital and inactivity in nearly all departments of trade. Notwithstanding the comparatively small amount of business in progress during the past several months, the supply of mercantile paper is pretty large, and in consequence of the universal distrust which everywhere prevails, neither banks nor note-brokers care to risk investments in it. The small amount of business which has transpired in money matters since our last has been on the basis of our previous quotations, though prime endorsed paper, running 60 to 90 days, has been negotiated, in some cases, at somewhat lower rates. In paper having four to six months to run, but little has been done."

The market remains firm, under a moderate demand, at our previous quotations. The sales for the three days foot up 3,000 bales.

The arrivals have been from Eleuthera, 25 bales; Baltimore, 1—total, 4 bales. Total import since 1st inst., 1,548 bales; total import since 1st September, 430,853 bales.

NEW YORK, June 22.—The market has ruled firmer since our last, and, with an increased demand, prices have improved fully ⅛c per lb. The sales foot up 5,000 bales, about one-half in transit. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	11⅛	11⅛	11⅛	11⅛
Good ordinary	12⅛	12⅛	12⅛	12⅛
Middling	14⅛	14⅛	14⅛	14⅛
Good middling	14⅞	14⅞	15⅛	15⅛
Middling fair	15	15	15⅛	15⅛

The arrivals have been from Philadelphia, 3 bales. Total import since 1st inst., 1,602 bales; total import since 1st September, 430,907 bales. Export from 1st to 18th June, 5,839 bales, against 5,466 in 1860.

NEW YORK, June 28.—Our market is firmer, and middling upland cotton is worth 14⅛c per lb.

Surat and Madras	4⅛	5⅛	5⅝	5⅞	6	6⅛	2⅜	3⅜	4

We have had a very extensive demand for cotton this week, speculators, exporters, and the trade having all bought heavily. Prices of American have advanced generally ⅛d to ¼d per lb. The supply of cotton offering is, however, very large, so that rapid progress in sales is not easy. There has been, in the last two days, a large speculative demand for Egyptian, which has resulted in an advance of ⅛d to ¼d per lb in the lower grades from 8d to 8½d per lb. Brazil are also held for high figures. East India have been largely dealt in at an advance commensurate with that on American. The sales to-day are 15,000 bales. The market is firm, but not excited. The reported export amounts to 25,950 bales, consisting of 9,880 American, 40 Brazil, and 16,030 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the comparative activity in the cotton trade at Liverpool, manufacturers, almost generally, have demanded higher rates for most descriptions of goods. Numerous buyers have come forward at recent quotations; but the business doing is much restricted. The iron trade is in a healthy state, and the demand for coals is steady, but at low currencies.

MANCHESTER, July 4.—Since this day week a considerable business has been done, but only by a few buyers. The general demand has not improved, but where orders have been held over from want of confidence in prices, buyers in general have been anxious to place them if last week's rates could now be accepted. Both spinners and manufacturers decline these terms, believing that the value of cotton will be maintained, and that a decrease of production in yarn and cloth will be thus ensured. In some mills notices have been given of reduction in the hours of working, and it is expected such will be very numerous indeed by the end of this month. We quote an advance, currently held for but not largely obtainable, of 3d per piece in shirtings, 1½d to 3d in printing cloths, and ¼d per lb in yarn, whilst the advance during same time in cotton has been nearly as much again.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There have been more sales made, and wool is rallying a little from the recent depression in price. Somewhat higher prices have been paid in the country, but staplers find it difficult to realise a profit when it reaches this market. Yarns continue in a very unsatisfactory state. Beyond a few orders for the continental markets, and the most limited possible demand from the home merchants, nothing whatever is doing, except sales from stock, at ruinous prices. The piece market is quiet, but better than of late.

LEICESTER.—There is no new feature in the hosiery trade; business in most branches remains flat, and there is not much doing in the warehouses. Both the home and foreign trades continue dull. At Loughborough and the country districts generally the operatives are very partially employed. There is not much doing in yarns, and spinners are producing cautiously. Wools are not much in demand, and prices hold without material change.

NOTTINGHAM.—The lace trade continues exceedingly dull. As far as regards the demand for the home market very little is doing except in goods suitable for summer wear. Cotton goods are in very slight request. There is a little doing for the continental markets, but business generally is decidedly dull, and as long as affairs remain unsettled in America no great foreign demand is anticipated. The hosiery trade is quiet, a great number of hands being out of employ. There is a fair demand for the home market for the time of the year, but very little doing in shipping orders. There is a great deal of distress in the town, and meetings of the unemployed operatives are being held. Yarns keep up in price.

BELFAST.—Exports of goods have been still lighter, not only to the ports of America, but to the West India and continental markets. There is such a cautious spirit abroad with buyers from the home as well as distant markets, that it is almost impossible

to push off goods in the quantities usually moved when business is active. Trade, in the meantime, holds on steadily, and, if sales are light, payments continue to be pretty well kept up. South American markets have been taking larger lots of linens, and some orders are to hand for the Australian isles. Active operations are general in all the extensive bleachfields, and, in general, the stocks are not much above the ordinary average.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10*s*, at the works; best bars, 8*l* 10*s*; sheets, 9*l*; doubles, 10*l* 10*s*; nail sheets, 8*l* 10*s*; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10*s*; hoops, 8*l* 10*s*; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5*s* to 3*l* 7*s* 6d; best native hydrate pigs, 3*l* 7*s* 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 7*s* 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Barrow hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Workington hæmatites, 3 6*s* 3d to 3*l* 7*s* 6d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10*s* f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites from 3*l* 2*s* 6d to 3*l* 7*s* 6d, according to brand or quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The consumers still restrict their operations to immediate requirements, and the market presents a quiet appearance: quotations occasionally rule 6d per cwt cheaper. Very moderate supplies were offered at the public sales during the week. Floating cargoes are less inquired after than of late. The refiners have taken off West India rather freely at the decline already established, the sales to yesterday, including some parcels by auction, reaching 2,250 casks: Barbadoes, 34*s* to 41*s*; Jamaica, 34*s* to 36*s*. Grainy Berbice withdrawn. The landings last week were 5,600 tons, and the deliveries 3,565 tons; leaving the stock at the close 67,000 tons, against 68,850 tons in 1860 at the same date.

Mauritius.—3,870 bags brought forward on Tuesday found buyers at previous rates: grainy and crystallised, 36*s* 6d to 41*s*; soft brown and grey, 30*s* to 35*s* per cwt. Nothing of interest has transpired by private contract.

Bengal.—439 bags good Goosery sold at 41*s* to 42*s* 6d per cwt.

Madras.—2,965 bags partly sold: native brown, 30*s* to 30*s* 6d; yellowish date kind, 29*s* 6d to 30*s*. Jaggery withdrawn at 29*s* 6d to 30*s* per cwt.

Manilla.—200 bags common clayed sold by auction at 32*s* 6d per cwt.

Foreign.—A floating cargo of Havana, No. 10½ to 11, has sold at 24*s* for Bristol, and one of Cuba muscovado at 23*s* 3d for the United Kingdom. 1,295 bags Guatemala were chiefly bought in at 31*s* to 34*s* 6d for low to good grainy brown, a few lots selling at 31*s* 6d. 1,568 casks 748 barrels Cuba muscovado partly sold at 32*s* to 34*s* for brown, and 34*s* 6d to 39*s* for low greyish to fine yellow.

Refined.—Pieces and crushed have been sold on reduced terms. Dry goods are in steady demand at the decline already established, low descriptions commencing at 48*s* 6d to 49*s* per cwt. The supply has again become limited.

MELADO AND SUGAR.—1,283 casks by auction partly sold from 23*s* 6d to 33*s* per cwt.

MOLASSES.—712 casks clayed Cuba were bought in at 14*s* 6d to 15*s* 6d. 116 barrels sold at 15*s* 6d per cwt.

RUM.—Few sales have been made, but the quotations remain steady. Leewards, 1*s* 9d; Demerara, 1*s* 10d to 11d per proof gallon. Common to good Jamaica has sold at 3*s* to 3*s* 8d per gallon.

COCOA.—The sound portion of 4,823 bags Guayaquil, offered by auction, was taken in at 55*s* to 57*s*. Of 274 bags Trinidad, the bulk was withdrawn, a few lots fine selling at 95*s* to 96*s*. 129 bags Grenada were withdrawn. Bahia has sold privately at 51*s* 6d per cwt.

COFFEE.—The market has been barely supplied, but the public sales will shortly be upon a large scale. Several arrivals have taken place lately. 502 casks 256 barrels and bags plantation Ceylon went off steadily at 68*s* to 76*s* for fine ordinary to good middling. 682 bags good ordinary native sold at 61*s*, one lot 61*s* 6d. 55 casks Jamaica: low middling to good middling, 70*s* 6d to 80*s* per cwt.

TEA.—The public sales opened on Wednesday with 1,157 packages Assam of the Company's growth, which realised full valuations for good to fine, but the lower sorts sold cheap. 24,080 packages China went off flatly, 8,584 packages finding buyers, a great deal of this quantity being printed "without reserve." Foo-Chow congou sold on easier terms.

RICE.—Partial inquiries prevail for Bengal. Privately transactions have been upon a very moderate scale: white. Bengal commanding 10*s* to 13*s* 4½d; good Ballam, 9*s* 6d; Moulmein, 9*s* 6d; Necrancie Arracan, 9*s* 10½d to 10*s*. By auction, 5,940 bags 2,964 pockets Bengal partly sold: good white, 12*s* 6d; Ballam, 9*s* 3d.

IMPORTS and DELIVERIES of RICE to June 29, with STOCKS on hand.

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—135 barrels Jamaica ginger chiefly sold at 2*l* 1*s* to 3*l* 5*s*. 189 cases Cochin, ordinary small to superior bold, 2*l* 7*s* to 5*l* 2*s* per cwt, being steady prices for both descriptions. Nothing of importance has transpired privately. By auction, 100 bags fair Singapore white pepper realised 5½d to 5⅝d per lb.

SAGO FLOUR.—A small parcel of sound brought 16*s* per cwt.

SALTPETRE.—The business by private treaty has been limited to 1,000 bags Bengal, at 34*s* to 37*s* 3d, refraction 10¼ to 3¼. 426 bags in public sale were disposed of: refraction 9 to 8, at 34*s* 6d to 34*s* 9d. 145 bags Bombay, refraction 5 1½, 30*s*. A small parcel of Japan: good colour, refraction 1¼, 37*s* per cwt.

Imports	10120	8860	9000	4500
Deliveries	8270	8180	8900	7300
Stock	8400	6740	5820	5230

SHELLAC has realised further advanced rates: fine orange, 10*l* 7*s* 6d; livery reddish to good, 9*l* 5*s* to 9*l* 17*s* 6d; garnet, 8*l* 2*s* 6d to 8*l* 7*s* 6d; button, 8*l* 5*s* to 9*l* 7*s* 6d per cwt.

DRYSALTERY GOODS.—No change of interest has transpired.

DRUGS.—The only change of interest at the sales yesterday was the advance paid for castor oil, straw to very good quality selling at 5¼d to 6¾d per lb.

HIDES.—93,000 East India sold at full, and in some cases at rather higher, prices.

METALS.—The market continues entirely devoid of animation. Scotch pig iron has been steady at 50*s* to 50*s* 3d for mixed numbers. No change in railway bars or other kinds of British. The quotation of spelter is about 16*l*, with limited transactions passing. Small plates have realised 16*l* 5*s*. Straits tin has sold at 115*s* to 116*s*, the price of English being lowered only 4*s* per cwt. Other metals have not shown any alteration. Copper is still dull.

RUBBER.—East India is firm at 1*s* 3d per lb.

JUTE.—5,600 bales partly sold at easier rates: ordinary to good, 12*l* 2*s* 6d to 17*l* 10*s*. The stock on the 1st inst. was returned at 10,700 tons, against 15,050 tons last year, and 12,950 in 1859.

HEMP.—Manilla is still very dull: 1,500 bales roping sorts were bought in at 20*l* to 22*l* per ton.

OILS.—Fish oils have been quiet. 40 tuns Southern whale, by auction, were bought in at 35*l* to 36*l*; some sperm, at 90*l* to 94*l*; bagged, 102*l*. Olive remains dull, and prices remain nominal: Gallipoli, 57*l* 10*s* to 58*l*. Mogadore sold at 47*l* 10*s* per tun. 571 casks palm, by auction, part sold at 40*s* 9d to 44*s* 3d. Some good Cochin cocoa-nut realised 42*s* 9d to 43*s*. Linseed oil is steady at 29*s* 9d. Moderate inquiries prevail for rape: foreign refined, 40*s* 6d to 41*s* 6d; brown, 38*s* 6d to 39*s* per cwt.

LINSEED.—There are buyers of Bombay at 54*s* 6d; Calcutta, 52*s* to 52*s* 6d. A large of ordinary quality Taganrog sold at 51*s*, due shortly. Bombay has sold at 55*s* per quarter for arrival, at which price there is still an inquiry.

SPIRITS TURPENTINE.—Large purchases have been made on American account. Yesterday (Thursday) the closing price was 50*s* per cwt.

TALLOW.—On Saturday, some few parcels were taken from the Russian speculators to meet contracts previously entered into for delivery last month. For these the holders obtained much higher prices, viz., Y.C., 58*s* 6d to 59*s*. The excitement has since entirely abated, and the market is now quiet. 1st sort Petersburg Y.C., 52*s*; for delivery in the last three months, 50*s* to 50*s* 6d.

PARTICULARS OF TALLOW.—Monday, July 1.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market remains quiet, but a large proportion of 9,500 bags Mauritius offered by auction to-day found buyers; also 321 casks Barbadoes at the previous value. The week's sales in West India were 3,723. A floating cargo white Havana sold at 31*s* 6d for Russia: one of Havana, No. 12, 24*s* 9d for a near port; one, No. 13, 25*s* 6d for the United Kingdom; No. 10½ to 11, 24*s*.

COFFEE.—119 casks 61 barrels and bags plantation Ceylon sold at previous rates: also 8 casks 14 barrels Jamaica.

TEA.—The sales concluded to-day, Oolong and broken leaf congou selling at 1d to 2d per lb decline. 2,755 packages were disposed of.

SALTPETRE.—1,216 bags Bengal partly sold: refraction 13½ to 6, 34*s* to 36*s*. 366 bags Bombay, 39¾ to 32¾, 30*s* to 30*s* 6d per cwt.

SPICES.—1,950 bags Penang pepper were bought in at 3¼d. 124 bags pimento realised 2⅝d to 2¾d per lb.

SAFFLOWER.—151 bales Bengal sold steadily at 2*l* 15s to 4*l* 7s 6d.
CUTCH.—1,343 bags sold at 21s to 22s.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been rather more active this week. No alteration to note as respects prices: low grocery lumps, 48s 6d to 49s. In Holland, Dutch crushed continues well supported.

GREEN FRUIT.—The first arrivals of West India pine apples are to hand: 10,000, sold by Keeling and Hunt at public sale, went at prices in character with size, condition, and quality. Valencia and Lisbon oranges lower. Lemons improved in value. Barcelona nuts to be bought on easier terms. Para held firmly, stock being limited.

DRY FRUIT.—The market for fruit continues stagnant, though the large clearances show the trade of the country to be healthy.

ENGLISH WOOL continues very dull. No alteration in prices.

COLONIAL WOOL.—Market without change.

FLAX.—Market unaltered.

HEMP dull, and but few transactions to report.

COTTON.—Sales of cotton, from Friday, 28th June, to Thursday, 4th July, inclusive:—1,700 bales Surat, 6d for fully good fair new Oomrawatty; 5$\frac{1}{4}$d to 5$\frac{1}{2}$d, middling old Oomrawatty; 5$\frac{3}{4}$d, fair Broach; 5$\frac{3}{8}$d, good fair Mangorole; 5$\frac{1}{4}$d to 5$\frac{1}{2}$d, middling fair to fair Compta: 1,500 bales Tinnevelly, 5$\frac{3}{4}$d to 6$\frac{1}{4}$d, middling fair to good fair: 250 bales Western Madras, 5$\frac{1}{8}$d to 5$\frac{1}{4}$d, fair to good fair. An improved demand has been experienced, and a fair amount of business transacted at an advance of about $\frac{1}{8}$d per lb for the better qualities of Tinnevelly, extreme prices for Western Madras, and in partial instances $\frac{1}{8}$d advance on Surat, the market closing with great firmness. Yesterday 12 bales middling fair African were sold at public sale at 6$\frac{3}{4}$d per lb, and about 80 bales American ordinary to fully middling fair at 6$\frac{3}{4}$d to 8$\frac{1}{4}$d. P.S.—Market very firm. Sales to-day 200 Surat, 5$\frac{3}{8}$d to 5$\frac{1}{2}$d; 250 Westerns, 5$\frac{1}{2}$d to 5$\frac{1}{4}$d.

SILK.—No change in the market, which is extremely quiet; prices without alteration. There has been a public sale of damaged Japan silk, which has been taken at full prices.

TOBACCO.—The market remains in the same state as described in our last, and the extreme firmness of holders has confined sales to a very limited extent. Quotations must be considered almost nominal for home-trade sorts.

METALS.—There is little change to note in the situation of affairs. Copper is heavy for all descriptions. Tin has been reduced 4*l* per ton on English, and the tendency is still to go lower, to be equal with foreign. Banca tin is offering at sales price and terms. Lead continues to be neglected. Spelter has been fairly firm, although little dealt in. Tin plates are still much depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	0
Fat by ditto	2	8
Yellow Russian	53	6
Melted stuff	35	6
Rough ditto	20	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Very little bacon came to market this week, anything fine fetching 80s readily; Hamburg making 74s, and all sold. Friesland butter advanced to 102s; trade brisk.

METROPOLITAN CATTLE MARKET.

THURSDAY, July 4.—There was a fair average supply of beasts in to-day's market; nevertheless, all kinds moved off readily, at fully Monday's prices. The general top figure was 5s, but some superior Scots realised 5s 2d per 8 lbs. The show of sheep was tolerably good, and the mutton trade was in a sluggish state, at about previous currencies. We have to report a dull sale for lambs, at a further decline in value of from 2d to 4d per 8 lbs. Calves, the supply of which was good, sold heavily at barely late rates—the extreme price being 4s 8d per 8 lbs. There was very little business doing in pigs or milch cows, on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	10	Prime Southdown sheep	5	0	5	4
Second quality ditto	4	0	4	4	Large coarse calves	3	6	4	0

Lambs, 5s 6d to 6s 0d.

Total supply—Beasts, 1,020; sheep and lambs, 10,640; calves, 540; pigs, 400.
Foreign supply—Beasts, 310; sheep 1,300; calves, 360.

NEWGATE AND LEADENHALL.

FRIDAY, July 5.—Only moderate supplies of meat have been on sale here. Generally speaking, the demand has ruled steady, and prices have been well supported.

Per 8 lbs by the carcase.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, July 1.—The arrivals of new home-grown potatoes increase but slowly, but large imports of foreign qualities have taken place since our last; these amount to 6,871 baskets from Roterdam, 1,113 baskets and 786 barrels from Dunkirk, 100 casks and 100 bags from Antwerp, 825 boxes from Lisbon, 98 baskets from Boulogne, and 15 tons from Guernsey. The general state of the trade is by no means active, nevertheless prices range from 8s to 17s per cwt.

FRIDAY, July 5.—The supplies of home-grown potatoes have increased, and the imports of foreign qualities have been large. Generally speaking, the trade rules steady, but by no means active, at from 6s to 14s per cwt. The crop both here and in Ireland is very favourably spoken of.

HOP MARKET.

BOROUGH Monday, July 1.—The accounts received this morning from the various districts continue much of the same character as last week. The only improvement we hear of is in the Worcester and Hereford ground, which are making an effort to throw off the vermin, and give promise of half a crop, and some few grounds in the eastern part of Sussex. This is more than counterbalanced by the fresh attacks of vermin in Mid-Kent, and in plantations which have been comparatively clean. The duty is estimated at from 65,000*l* to 70,000*l*. Our market is firm, with but little doing. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, July 5.—The plantation accounts report a slight improvement, and the duty is estimated at from 60,000*l* to 70,000*l*. On the whole, a fair business is doing in our market, and prices are well supported.

COAL MARKET.

FRIDAY, July 5.—Lambtons 18s—Trimdon Hartlepool 17s 9d—South Kelloe 17s—Hetton Lyons 15s 6d—Heugh Hall 15s 9d—Shincliffe 15s 6d—Lamberts 15s—Bell's Primrose 12s—Tanfield Butes 12s. Ships at market 41; sold 34.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 0*l* 0s to 0*l* 0s; straw, 1*l* 14s to 2*l* 0s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 5*l* 18s; new ditto, 0*l* 0s; and straw, 1*l* 16s to 2*l* 0s per load. A short supply.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 0*l* 0s to 0*l* 0s; and straw, 1*l* 14s to 2*l* 0s per load. A slow demand.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 5.—Public sales commenced here on the 2nd instant with a fair attendance of buyers, and the prices realised so far are quoted from $\frac{1}{2}$d to 2d lower than at the May series; the higher priced descriptions of East India suffering the greater decline. The total quantity of East India will be about 16,000 bales, and on the 11th and 12th instant about 7,000 bales of a miscellaneous character will be offered.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 5.—The market was moderately attended. Wheat in better demand, at the extreme rates of Tuesday. Better qualities flour more steady; inferior dull at Tuesday's rates. Indian corn, mixed, in good demand, at 28s 6d to 29s; yellow, 29s. Beans a shade firmer: Saidi, 32s; Beheira, 30s 6d. Oats and oatmeal dull.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 5.—The market for manufactured iron continues quiet, though there is a fair demand at about previous rates, the nominal reduction of 10s per ton, decided on at the Staffordshire meeting, having been anticipated for some time in most transactions. Scotch pig iron has still an upward tendency. Copper continues depressed. Little doing in lead. Tin plates in limited request.

The Gazette.

TUESDAY, July 2.

BANKRUPTS.

J. A. Mowat, Crawford street, bootmaker.
J. Sugden, Charles terrace, Paxton park, Sydenham, builder.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 22nd of June amounted to 551,160*l*, and for the corresponding week of last year to 546,150*l*, showing an increase of 5,010*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 249,280*l*, and for the corresponding week of 1860 to 251,291*l*, showing an decrease of 2,011*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 1.—The railway market opened firmly on the revenue returns, but, owing to the stagnation in business, a relapse soon took place, and the closing quotations were mostly the same as on Saturday. The only material alteration was a decline of ⅛ per cent. in Great Western. The general transactions were unimportant. There were no fluctuations of any consequence in colonial stocks. Indian guaranteed, however, were slightly flatter in the afternoon on the announcement of the new loan. Foreign railways were also neglected. Lombardo-Venetian shares were steady at ⅛ dis. Mines were in little demand, and occasionally show a decline. In joint stock banks, London and County shares were firm. In miscellaneous descriptions an improvement took place in St Katherine's Docks stocks and Peninsular and Oriental and Royal Mail steam shares.

TUESDAY, July 2.—The railway market continued without business, and the variations of the day were unimportant. At the close several of the leading stocks showed a trifling decline, while a recovery took place in Great Western; South-Eastern, Great Northern, and Caledonian also improved. In colonial descriptions, Great Western of Canada shares advanced to 10 to ¼, while Grand Trunk left off the same as yesterday. Foreign railways were generally neglected. Great Luxembourg were a shade firmer at 7⅞ to 8. In American railway securities, New York and Erie shares receded. Mines were dull, and in some cases exhibited a decline. In joint stock banks the shares of the Chartered Bank of India and the Chartered Mercantile Bank were quoted higher. In miscellaneous descriptions, National Discount slightly improved. London Dock stock has been lately advancing, and is now fully 11 per cent. above the lowest prices lately touched.

WEDNESDAY, July 3.—The railway market was rather dull at the opening, but, on the statement of a favourable traffic return on the Lancashire and Yorkshire, subsequently improved. The market continued extremely sensitive to any influence, however slight, the public continuing to operate as little as possible, and the daily variations being almost entirely caused by the transactions of the dealers themselves. Towards the afternoon a further rally took place, and the closing prices were the highest of the day. Midland, Caledonian, Great Western, South-Eastern, and Lancashire and Yorkshire showed the chief rise, the two last being especially in demand. Great Northern was exceptionally dull. Colonial stocks were firmer, particularly Indian guaranteed. Grand Trunk of Canada advanced to 17⅞ to 18¼. In the foreign market, Great Luxembourg shares were steady, while Lombardo-Venetian continued depressed. No general change occurred in American securities; Virginia Five per Cents., however, were quoted lower. There was not much doing in mines, and prices occasionally exhibited a decline.

THURSDAY, July 4.—The railway market was depressed the whole day, and most of the leading speculative stocks left off at a decline of ⅜ to ⅝ per cent. York and North Midland, however, exceptionally improved, and Lancashire and Yorkshire, though a fraction lower, remained comparatively steady. The general business was of little importance. In the colonial market a rise occurred in Grand Trunk stock to 18⅜ to 19, and in Great Western of Canada shares to 10⅛ to ⅜. There were few transactions in foreign railways, and the only material change was an advance in Lombardo-Venetian.

FRIDAY, July 5.—The railway share market was extremely inactive, but steady. In two or three of the principal stocks an improvement of about ⅛ per cent. occurred. Other lines were unaltered. London and North-Western stock was quoted 93⅛ to ⅞; Great Western, 71½ to ¾; Midland, 120⅝ to ⅞; Lancashire and Yorkshire, 111⅞ to 112⅛; South-Eastern, 81⅞ to 82⅛, being dull; Eastern Counties, 49½ to ¾; Great Northern, 106½ to 107½; Caledonian, 99 to ½. Lombardo-Venetian Railway shares were quoted ⅝ to ½ dis. Great Western of Canada were a little more inquired for. Great Luxembourg ruled steady. In mines, a a limited business was transacted, at about late currencies.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4 The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W,

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

FURNITURE CARRIAGE FREE.—Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free, This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co, Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfect; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.

CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND,
London, W.C.

CAUTION.—Beware of Proposed Substitutions.

TRADE 67/D MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

ATTIRE FOR JUVENILES.—

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books; nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Hurley street, Cavendish square, London, where he may be consulted daily.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in
HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

HOLLOWAY'S PILLS.—

Diseases of the Brain, Coup de Soleil, headache, dimness of sight, giddiness, or frequent yawnings, are generally in the summer time forerunners of serious illnesses, and should be at once promptly and vigorously routed. In all head complaints Holloway's Pills will be found the most safe and efficient restorative. They relieve the throbbing headache by regulating the circulation. These Pills fully ensure the entire digestion of the food, so that all pains resulting from indigestion or flatulency are at once banished, and low spirits soon cede to cheerfulness. They purify the blood and improve the secretions of every gland. Under whatever circumstances taken, Holloway's Pills must do good and produce benefit by expelling all impurities from the system.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S, &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of all booksellers

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)

NERVOUS DEBILITY AND ITS

train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8, on all those ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

MR CHASE'S BUDGET.

No more remarkable document has ever emanated from the pen of any financier than the recent report which Mr Chase, the Secretary of the Federal Treasury, has just addressed to his Government. As soon as the civil struggle in the United States began, it was evident that its pecuniary consequences must be remarkable. It appears that the cost of the war with the South is more than double the cost of our war against Napoleon in its most costly and expensive years. Those who will consult the admirable and exhaustive discussion of the finances of the great war given by Mr Gladstone in his celebrated financial statement of 1853, will find that the average cost of the French war and of the civil government of Great Britain from 1806 to 1815, *exclusive of the interest on the debt*, was 56,294,000*l*. Mr Chase asks for 122,000,000*l* for all purposes; and as 18,000,000*l* used to suffice for the expenditure of the Federal Government, the trifling interest on its debt included, the sum of 104,000,000*l* represents the mere cost of the present war, which is nearly double as much as the French war and the civil government of the time cost us together, and therefore much more than double what the French war cost us of itself.

And what have the Federal Government obtained for their unparalleled outlay? They have obtained some acres more or less of the State of North Carolina near Port Royal, and they have an army at Washington, of which the only apt description is one almost too coarse and popular for these pages, which *is eating its head off*. These are the sole results which have yet come—which have come after many months—which ever seem likely to come of an expenditure which exceeds that which strained the credit of this country—of an expenditure greater than that which cemented many coalitions of the greatest military powers in the world—which sufficed for the Peninsular war—which gave us the victory of Waterloo and the salvation of our country. The North are paying for a fruitless effort at an impossible empire more than England paid for her very existence and for the liberty of almost all the continent of Europe.

The details of Mr Chase's statement do not lessen our surprise at the stupendous result. On the 4th of July, 1861, he expected that 71,666,910*l* would suffice for the Federal expenditure for the year ending the 30th of June, 1862, and he hoped to raise 18,000,000*l* or thereabouts by taxation. He has now revised his estimate, and he finds that he can only raise 12,274,350*l* by taxation, and, as we have said, that he requires 122,000,000*l*. He underestimated his expenditure in his last Budget—a Budget which astounded all foreigners—by 70 per cent., and he overrated his receipts by 50 per cent. Mr Chase's Budget is in summary as follows:—

		£
For the actual expenditure of the first quarter		22,103,946
For the estimated expenditure of remaining three quarters		67,958,046
For the estimated expenditure under the additional grants now asked for—For interest of debt	£1,162,449	
Army and Navy	31,042,009	
		32,204,458
		122,266,444

which he intends to obtain—

	£	£
By TAXATION:—		
Actual receipts for first quarter from customs, land, &c., including 507,839*l* balance at commencement of quarter	2,207,189	
Estimated receipts—remaining three quarters	6,075,000	
Estimated produce of direct tax not yet in operation	4,500,000	
		12,782,189
By LOANS:—		
Already obtained	44,379,583	
To be obtained	65,104,672	
		109,484,255
		122,266,444

Whence it appears that the Federal Government are paying only for a little above 10 per cent. of their expenditure by actual taxation. As we have already referred to the Napoleonic war, we may contrast this result with the Budget of 1815, including in our expenditure the vast outlay for interest of debt which then burdened us, but from which the Americans as yet are exempt. The expenditure of 1815 was 119,361,619*l*, of which we raised

	£
By taxation	79,939,669
By loans	39,421,950
Total	119,361,619

We raised, therefore, 75 per cent. of our expenditure that year, crippled as we were; but the Americans only raise 10 per cent., free as they are.

We by no means make this contrast in the spirit of exultation or boasting. We only refer to our own history as the best means of measuring the events which are before us. We know the difficulties of America. Perhaps few have considered them so much. She is a pacific country which has had to improvise an army; she is a Federal country, in which the ordinary safety of life, all that concerns common men in common things, is provided by local and subordinate Governments, and in which, therefore, the Federal Government has never needed to impose taxes, though some of the local Governments have imposed many; she is a miscellaneous country, in which there is a rebellion, and in which taxation may be dangerous; she is a country without statesmen who are anxious to warn and who are able to guide. Still, after all is weighed and considered, can any fair, any impartial, even any sympathising spectator, help being astounded at the results which we see?

Mr Chase gives calmly enough an estimate for the year ending on the 4th of July, 1863; and in that year he expects to have 11,125,000*l* of additional taxation; but even if he should obtain it—and we have not a profound credence for taxation *in the future tense*—and if he should be able to moderate his expenditure to 100,000,000*l*, which is more than he ventures to hope, the revenue from taxation

would still not be nearly a quarter of the national outlay. The account would stand:—

	£	£
Taxation, old	12,782,000	
— new	11,125,000	
		23,907,000
To be obtained in some way		76,093,000
Expenditure		100,000,000

The main engine of Mr Chase's finance, as of all financiers in very great difficulties, is a long series of loans. But will he be able to obtain them? As yet he has succeeded fairly—he has achieved more than we anticipated. He has borrowed 44 out of the 109 millions which he requires for the year ending next summer; but persons who have tried the money market on a much less scale than Mr Chase, well know that the difficulty is not in the first loan, but in the last. The series, like another well-known descent, is easy and cheerful at the beginning, but dark and perilous at its conclusion.

Because Mr Chase has been able to borrow so much, we must not infer that he can borrow the immense sum he requires in future. All credit must stop some time. He can borrow nothing in Europe. That has been tried already, and has wholly failed already. He can borrow but little in the open market of America. All his principal loans have been with the banks, who have not been able to resell to any large extent to the public the Federal securities they have taken. The figures are these:—

Loans from the public:—	£
By notes payable on demand	5,523,823
By notes payable at three months' date	2,897,494
By notes payable at two years' date	3,154,283
	11,575,600
From the associated banks	32,803,983
	44,379,583

But the banks are too poor to continue to lend at this rate even if they are willing. The aggregate deposits of the banks of the whole *Federal* States were on the 1st of January, 1860, only 42,238,000*l*, and it is not surprising that they should be so small. America is a young and enterprising country, in which profits are high, in which every one is eager, in which almost every one is business-like, in which scarcely any capital lies idle. The rate of interest in New York is habitually usurious, because capital is so scarce and the means of employing it are so many. Bankers in such a country as this have not the means of supplying a Government with unlimited means for civil warfare.

A most strange consolation is sometimes taken from the internecine nature of the present struggle. It is said that the *money* will be spent in the country, and, therefore, that there is no danger in the banks lending it. But the scarcity is not one of money, but of capital. The course of war is to turn man's industry and capital from productive employment to unproductive. If you lend to a man to enable him to cultivate the earth, when his crop grows up he is able to repay you; but if you lend to him to devastate the earth, he will have no crop, no income, no source of payment. During our railway mania many inconsiderate persons indulged a security because the money was exclusively expended in Great Britain. But the practical result confirmed the theoretical arguments of more sagacious thinkers. The railway mania was not prevented or even mitigated by the particular locality of the previous expenditure. The money was spent here, and the panic happened here too.

We are dubious, too, if the banks are willing to lend much more. Mr Chase has a loose understanding with them for another 11,000,000*l*; but they have an *option* of refusing even to that extent. They are said at the last loan to have expressed great distrust of the policy of Mr Seward, and to have deliberated whether they should not ask for his removal. The news from Europe which will have been just received will not strengthen him. He is known to have been, not long ago at least, rather favourable to a quarrel with England; and the banking interest would fear nothing so much and oppose nothing so heartily. The astounding figures of Mr Chase's statement, too, must frighten the associated bankers, if anything will. What they have already subscribed is said, on not bad authority, to have been subscribed as much from a fear of mob compulsion and State compulsion acting together as have been willing to lend much more, even if Mr Chase had suggested nothing to offend them.

But he has suggested something which must irritate many of them, which must lessen the profits of all, and destroy the very existence of some. So frugal a man as Mr Chase would not have done so if he had not perceived his extreme difficulty and his only real resource. There is *one* fund, and one only, from which the Government of a new and poor country (and America is, in comparison with Europe, both a poor and a new country) can obtain on a sudden extremity a vast loan. That fund is the currency. If the circulation of the country be of metal, or be supplied on the credit of some person or persons other than the State itself, the Government can, by forcing into exclusive use a paper of its own, expel the previous coin, and previous paper from circulation, and secure to itself a loan to that extent. The Confederate States have already adopted this final expedient of finance, and we recently explained its difficulties and its dangers in their case. Mr Chase evidently knows them well. He knows that to manage such a circulation properly, he must take precautions against an excess of issue,—he must keep a proper reserve of coin,—he must establish with care, caution, and consideration, a great many local depôts at which that coin may be exchanged for notes when the holders desire it. He knows, too, that in a time of revolution nothing of this kind is possible. He knows that the last function with which a needy Government ought to be intrusted is the function of creating money. But he knows, too, that he will soon have no other resource save the currency left, and therefore believes (probably with truth) that it is better for him to indicate it at once. To avoid some evils, and probably to give a *douceur* to deeply-injured persons, he slightly sketches, rather than sufficiently explains, a scheme for making the now existing banks of issue the agents for the contemplated Government paper. But he will probably find them bitterly hostile. To the bankers of large mercantile cities like New York circulation is of secondary importance. But to the country bankers of America, as to all country bankers in rude, large, and thickly populated districts, the circulation is a primary and essential consideration. Few persons are able from difficulties of distance and imperfections in commercial civilisation to keep accounts with a banker, and the only mode in which a banker can utilise his credit is the promissory note. If he can induce the population among which he lives to circulate these he will be wealthy, and if he cannot he will be poor. A Government which counts on superseding the circulation of bankers in rural districts, especially in a rude country, must expect their bitter hostility, and never rely on their aid in the introduction of a substitute.

Again, the bankers are not the only local bodies who will be aggrieved—probably deeply aggrieved—by Mr Chase's proposal. The currency of America is by law mostly secured upon the stocks of the several States; and if that circulation is superseded, these stocks will not be of the same use as before, and will be thrown on the market. The holders of such securities in Europe will immediately feel the consequences, and the States themselves will not improbably protest against a plan so adverse to their interests and pernicious to their credit. At another time a strong and united Government might defy their remonstrances; but Mr Lincoln's Government is disunited, and the hearty concurrence of every one in all acts of the Government was never so necessary as now. There are, we have heard, constitutional objections to the scheme, and it is not unlikely, though we will not presume to pronounce as to their validity.

The figures we have given and the proposals we have explained need no comment, for they speak but too plainly for themselves. We will but ask one question, and then conclude. Is it possible that a nation whose finances are now as we have stated,—who is engaged in a civil war, but has met with no advantage as yet,—whose rulers have announced one great scheme for the purchase of slaves and another for their emigration,—can venture on a war with Great Britain?

THE LAST IDEA OF WHAT MR LINCOLN WILL DO.

It seems impossible to form any certain opinion of the manner in which the American Constitution will work at

Finchley.—The Lease, at a very low rent, of a capital Family Residence and Five Acres, for sale by order of the Executors of the late T. L. Barclay, Esq.

MESSRS. DEBENHAM AND TEWSON will SELL, at the Mart, on Wednesday, July 24, at 12, the excellent RESIDENCE known as "Elm Villa," situate in Nether street, Finchley, within a drive of five miles from Regent's Park, and a mile and half from Colney Hatch Station. The house has just undergone a complete repair and comprises 11 bed rooms, dressing room, school room, nursery, drawing and dining rooms, library, and domestic offices. It is approached by a carriage drive, with a pretty Gothic lodge entrance, and is situate high and dry within its own beautifully timbered grounds. Stabling for 4 horses, coach house, man's room, and cottage for gardener; pleasure grounds, capital walled kitchen garden, vineries, and productive grass orchard, in all about 5 acres. Held for 17 years, at an exceedingly low rental. The late lessee gave a considerable premium for the lease, and has recently expended a large sum in permanent improvements to the property. Possession will be given. Particulars and lithographic views of Messrs Allen, Nicol, and Allen, Solicitors, Queen street, City; and at the Estate Offices, 80 Cheapside.

CEYLON COFFEE ESTATES.—To be Sold by Public Sale, in Colombo, Ceylon, on Friday, September 6th, unless previously disposed of by Private Sale, the NELLA OOLLA COFFEE ESTATE, Kurnegalle, about 20 miles from Kandy, consisting of about 202 acres planted, and 310 of fine forest land, with good stores, machinery, lines, &c.
Also, BOTAWE, a tract of fine forest land adapted for Coffee, adjoining Nella Oolla, and consisting of about 300 acres. These lands are held in fee direct from the Crown, and the soil is among the richest in the Coffee Districts of Ceylon.
Further particulars obtainable from Messrs O'Hallaran and Co., 12 Billiter square, London; and Messrs Barnett and Co., Colombo, Ceylon.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Steppered Bottles of all kinds.

INTERNATIONAL EXHIBITION 1862.—Preparing for publication, Some Account of the Building designed by CAPTAIN FOWKE, R.E., for the International Exhibition 1862, with Illustrations. London: Chapman and Hall, and of all booksellers, and Railway Stations.

CLERK.—THE ADVERTISER, who has lately returned from South America, is desirous of a re-engagement, either at home or abroad, Has a thorough knowledge of bookkeeping and accounts, and is well acquainted with Spanish.—Address E. G., Messrs Mackie and North's, 29 Threadneedle street, E.C.

CHINA.—JAPAN.—A respectable young German, age 27, who is well acquainted with French and German Correspondence and Manchester goods, is desirous of meeting with an engagement for China or Japan. He possesses first-class references.—Address Mr C. A. R., 14 Endsleigh street, Tavistock square.

WANTED, BY A GENTLEMAN representing a first-class House in the Manufacture of Colours and Drysaltery, a Commission for the sale of Oil, Turpentine, Glue, or any article where the samples are not bulky, in London, Lancashire, Yorkshire, and Ireland. The present is a favourable opportunity for any House wishful to extend their business, as the advertiser has been connected with the above House for a number of years, and possesses a first-rate connection.—Apply, by letter, to H. B. C., Post Office, Manchester.

TO WHOLESALE DRUGGISTS, &c.—To be Disposed of, a Share in a large Wholesale Drug Business in Liverpool. No person need apply but one brought up in the trade, and who would be willing to take a share in the travelling and home management. Capital required £5,000. One of the present partners retiring in consequence of ill-health.—Apply, by letter or personally, to Thos. Keating, St Paul's churchyard, London.

TO ACCOUNTANTS AND ASSURANCE COMPANIES.—A professional Accountant, who has been practically engaged in business in a large provincial town for a period of fifteen years, is desirous of forming an engagement in London, so as to be introduced to a more extended sphere of business. He is thoroughly conversant with mercantile and bankrupt law and procedure, and is also an experienced actuary, and well acquainted with all departments of Assurance business. The Advertiser would engage with an Assurance office as Actuary or Manager, either with or without liberty to practise on his own account, or would be happy to meet with a professional accountant requiring assistance to whom his acquirements as an actuary might be an additional advantage.
The Advertiser is well known to William Thomas Thomson, Esq., Manager of the Standard Life Assurance Company, Edinburgh, to whom he is permitted to refer, and who will be happy to communicate confidentially with inquirers on the subject.

EDUCATION.—COLLEGIATE SCHOOL.—Newark House, Hempstead, Glocester.—The above mansion is deservedly celebrated for its peculiar salubrity; its elevated position commands an extensive prospect, the picturesque scenery is rarely equalled, while its spacious apartments and pleasure grounds render it pre-eminently calculated for an educational establishment. Head Master, Edw. Green, F.L.S., late Tutor in Grosvenor College, formerly Master at the Proprietary Grammar School, Yarmouth, Author of "Popular Education," &c. Pupils are instructed in Greek and Latin, the mathematics, and the French and German languages, while a superior English and mercantile education is ensured. They are also prepared for civil competitive, and the middle class examinations of Oxford and Cambridge. Much useful information on natural philosophy and mechanical science is communicated by familiar lectures. Terms:—Under 10 years of age, 25 guineas; above, 30 guineas per annum: entrance fee, one guinea. The number of pupils is limited to 30. No notice demanded previous to removal. The ensuing term will commence July 22nd. Particulars may be obtained on application to Mr Thompson, 322 Regent street, London; Mr J. Lasher, No. 19 High Holborn; or Mr Bean, James's terrace, Hoxton.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.
The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.
W. J. HALL and Co., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S.W.

THE HON. FRANCIS SCOTT, CHAIRMAN.

CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

Established in the Reign of Queen Anne, A.D. 1714.

UNION ASSURANCE SOCIETY,

FIRE and LIFE.

OFFICES.

81 Cornhill, and 70 Baker street, London;
and in Bristol, Liverpool, Edinburgh, Dublin, Hamburg, Berlin, and Berne.

Fire Insurances due at Midsummer should be paid on the 24th June, or within 15 days after.

This Company combines the advantages of a large accumulated Capital, every modern system of Insurance, and the experience of 150 years.

Forms of proposal, Fire and Life, sent free on application. WM. B. LEWIS, Secretary.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £116 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

WESTERN LIFE ASSURANCE

and ANNUITY SOCIETY,
Parliament street, London, S.W.

James Lys Seager, Esq., Millbank row, Westminster, and Carreun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£ s d		£ s d
20	1 14 2	40	2 14 5
25	1 18 6	45	3 2 5
30	2 2 9	50	3 17 0
35	2 8 0	55	4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

ROYAL INSURANCE COMPANY,

29 Lombard street, London, and Royal Insurance Buildings, Liverpool.

Subscribed Capital £2,000,000. Paid up and accumulated Funds £700,000.

Mercantile Insurances of every description in the Port of London and elsewhere freely entertained.

This Company has ever distinguished itself by promptitude and liberality in the settlement of Claims.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1861, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

FREDK. G. SMITH, Secretary to the London Board. No. 37 Cornhill, London.

THE SCOTTISH WIDOWS' FUND

and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3 033,649
3. Sums assured and bonuses existing	10.886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure the Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.
Charles Edward Pollock, Esq., Barrister, Temple.
David Hill, Esq., Sussex square.
John Murray, Esq., Publisher, Albemarle street.
Samuel Laing, Esq., India Finance.
Sir John Thomas Briggs, Admiralty.
Leonard Horner, Esq., F.R.S.
Jas. Anderson, Esq., Q.C., Lincoln's inn.

AGENTS for LONDON and the SUBURBS.

Central Agent { Hugh M'Kean, 4 Royal Exchange buildings, Cornhill.
District Agents { Major R. S. Ridge, 49 Pall Mall, Agent for the West-end District.
District Agents { Benton Seeley, Islington green, Agent for Islington District.

ROBERTSON and WHITE, Accountants,
4 Princes street, Bank, E.C.

QUEEN INSURANCE COMPANY

(FIRE, LIFE).

Henry Fowler, Esq., (firm, H. and R. Fowler), St Saviour's Dock, Southwark.
Thomas Wm. Kough, Esq., (firm, Jones Brothers), Upper Thames street.
Samuel Lloyd Stacey, Esq., (firm, Corbyn, Stacey, Messer, and Co.), Holborn.
BANKERS—Messrs Barclay, Bevan, Tritton, and Co.
Mercantile and other descriptions of Fire Insurance effected.
Losses promptly and liberally settled.
Life assurance in every branch.
Days of Grace.—Full protection granted under fire and life policies during the period allowed for renewal.

W. P. CLIREHUGH, Manager and Actuary.
H. B. TAPLIN, London Secretary.

FREE ASSURANCE

The Policies of the STANDARD LIFE ASSURANCE COMPANY are relieved from all restrictions as to residence Abroad (except in special cases), and these otherwise so framed as to afford the most complete security in connection with Family Provisions, Marriage Settlements, Loan Transactions, and the various other purposes in connection with which the protection of Life Assurance is sought.

The STANDARD LIFE ASSURANCE COMPANY was established in 1825, and during the last four years the annual average of New Assurances exceeded Half a Million sterling, being the largest business transacted in that period by any Life Assurance Office. The new Assurances effected in 1860 alone were upwards of £700,000. The business is a purely home business, the Company having no agencies out of the United Kingdom.

Accumulated fund £1,856,802 19 4

Annual revenue ..... £304,[illegible]

THE SIXTH DIVISION OF PROFITS was made on 9th May last, when it was declared that the Bonus Additions were at the rate of £[illegible] per cent. on the sum assured on Policies effected in 1825; 40 per cent. on Policies effected in 1831; and 50 per cent. on Policies effected in 1840. Next Division of Profits, 1865.

THE INVESTIGATION REPORT, showing these important advantages, is now ready, and may be had at the Office, or Agencies of the Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

LONDON ..... 82 King William street.
EDINBURGH..... 3 George street (Head office).
DUBLIN..... 66 Upper Sackville street.
GLASGOW..... 35 St Vincent place.
